* The REGNAL DATES are those given by sir H. Nicolas. The early Norman and Plantagenet kings reckoned their reigns from the day of their coronation; the later Plantagenets from the day after the death of their predecessor. With Edward VI. began the present custom of beginning the reign on the day of the death of the preceding sovereign.

ROYAL ARMS OF ENGLAND.

William I., William II., and Henry I.—two lions or leopards passant.

Stephen—Sagittarius, the archer, one of the signs of the zodiac (*traditional*).

Henry II. to Edward II.—three lions passant.

Edward III. and his successors quartered the preceding with fleurs-de-lis, the arms of France.

Henry V. used only three fleurs-de-lis.

Mary I. quartered the preceding with the arms of her husband, Philip II. of Spain.

UNITED KINGDOM.

James I. and his successors combined the arms of England and France (1st and 4th quarter); 2d, the lion rampant of Scotland; 3d, the harp of Ireland. He introduced the unicorn as a supporter of the arms.

George I., George II., and George III. introduced the arms of Brunswick.

In 1801 the arms of France were omitted. In 1816 the arms were modified through Hanover being made a kingdom.

"**Englishman**," a newspaper edited by Dr. Kenealy, published in April, soon after the conviction of the claimant of the Tichborne estates (see *Trials*, 1873-4). For its libellous character, the editor was disbenched by the Society of Gray's Inn, 1 Aug. 1874; ordered to give up his chambers by vice-chancellor, 29 June, 1876.

Engraving on signets is mentioned Exod. xxviii. 11 (1491 B.C.). Engraving on plates and wood began about the middle of the fifteenth century. Engraving on glass was perfected by Bourdier, of Paris, 1799. The copyright to engravings has been protected by several statutes: among the principal are the acts 16 & 18 Geo. III. 1775 and 1777; and the acts 7 & 8 Vict., 6 Aug. 1844, and 15 Vict., 28 May, 1852. A process of enlarging and reducing engravings by means of sheets of vulcanized india-rubber was shown by the Electroprinting Block Company in 1860; see *Lithography* and *Photo-galvanography*. In "*Lyra Germanica*," published in 1861, are illustrations engraved upon blocks photographed from negatives taken by John Leighton, F.S.A.

ENGRAVING ON COPPER—Prints from engraved copper plates made their appearance about 1450, and were first produced in Germany. Masso, surnamed Finiguerra, is considered to have been the first Italian engraver, about 1440; see *Niello*.

The earliest date known of a copper-plate engraving is 1461. Rolling presses for working the plates were invented in 1545. Of the art of *etching* on copper by means of *aqua-fortis*, Francis Mazzuoli, or Parmegiano, is the reputed inventor, about 1532.—*De Fides*.

Etching was practised by Albert Dürer, and most especially by Rembrandt. Its revival began about 1860. Eminent modern etchers: Messrs. Lalanne, P. G. Hamerton, F. Seymour Haden, Bracquemond, Jacquemart, Martial, and others. The Etching Club was established in 1838.

Society of Painter-etchers formed; opened an exhibition, April, 1881.

ENGRAVING ON WOOD, long known in China, began in Europe with the *briefmahlers*, or manufacturers of playing-cards, about 1400 (see *Printing*). The art is referred by some to a Florentine, and by others to Reuss, a German; it was greatly improved by Dürer (1471-1528) and Lucas van Leyden (1497). It was much improved in England by Bewick and his brother, and pupils Nesbitt, Anderson, etc. 1789 et seq. The earliest wood engraving which has reached our times is one representing St. Christopher carrying the infant Jesus over the sea; it bears date 1423.

ENGRAVING ON SOFT STEEL, to be hardened afterwards, was introduced into England by Messrs. Perkins and Heath, of Philadelphia, 1810.

John Pye, "father of English landscape engraving," died 6 Feb. 1874.

MEZZOTINTO is said to have been discovered by col. von Siegen, who engraved a portrait of princess Amelia of Hesse in mezzotinto in 1643; it was improved by prince Rupert in 1648; and by sir Christopher Wren, about 1662.

Aquatint, by which a soft and beautiful effect is produced, was invented by the celebrated French artist St. Non, about 1662; he communicated his invention to Le Prince. Barabbe de Paris was distinguished for his improvements in this kind of engraving, 1763. *Chiaroscuro* engraving originated with the Germans, and was first practised by Mair, one of whose prints bears date 1491; see *Zinc*, etc.

Enlistment. No persons enlisting as soldiers or sailors are to be sworn in before a magistrate in less

than twenty-four hours after, and they are then at liberty to withdraw upon their returning the enlistment or bounty money and 21s. costs. Enlistment is now entirely voluntary. In 1847 the term of enlistment was limited to ten years for the infantry, and twelve years for the cavalry, artillery, and royal marines; and in 1867, to twelve years; see *Army*, 1867 and 1879, and *Foreign Enlistment*.

Enniskillen (N.W. Ireland). This town made an obstinate defence against the army of Elizabeth, 1595, and resisted James II., 1689. 1500 Enniskilleners met his gen. McCarthy at Newton Butler with 6000 men (of whom 3000 were slain, and nearly all the rest made prisoners), they losing but twenty men, 30 July, 1689. The dragoon regiment the "Enniskillingers" was originally recruited here.

Enoch, Book of, an apocryphal work, quoted by the fathers, disappeared about the eighth century. A MS. Ethiopic version was found in Abyssinia by Bruce, and brought to England in 1773. Of this, archbishop Lawrence published an English translation in 1821, and the Ethiopic text in 1838.

Ensisheim (E. France). Here Turenne defeated the Imperial army, and expelled it from Alsace, 4 Oct. 1674.

Entail of Estates began with the statute of Westminster, 1285. Subsequent legislation broke the entail in cases of treason (1534), when the estate is to revert to the crown, and of bankruptcy (1833 and 1849), when it is to be sold. The law of entail in Scotland was amended in 1875.

Entertainment of the People Society, for the very poor, held first concert at the board schoolroom, Saffron hill, London, Saturday, 12 April, 1879.

Entomology, the science of insects, now mainly based upon the arrangement of Linnæus, 1739. Ray's "Methodus Insectorum," 1705; "Insectorum Historia," 1710. The Entomological Society of London was instituted in 1833. A National Entomological Exhibition at the Westminster Aquarium was opened 9 March, 1878.

Envelopes for letters are mentioned by Swift, 1726. Stamped adhesive envelopes came into general use shortly after the establishment of the penny postal system, 10 Jan. 1840. Machinery for their manufacture was patented by Mr. George Wilson in 1844; and by Messrs. E. Hill and Warren De La Rue, 17 March, 1845.

Envoys at Courts, in dignity below ambassadors, enjoy the protection, but not the ceremonies, of ambassadors. Envoys - extraordinary are of modern date. - *Wicquefort*. The court of France denied to them the ceremony of being conducted to court in the royal carriages, 1639.

Eozoön Canadense, asserted to be the earliest known form of life, is a species of foraminifera, found by prof. J. W. Dawson, of Montreal, in Laurentian limestone, in 1858.

Epact (Greek, *ἡπαρός*, added) is the excess of the solar month above the lunar synodical month, 1 day, 11 hours, 15 minutes, 57 seconds, the lunar month being only 29 days, 12 hours, 44 minutes, 3 seconds; and the excess of the solar year above the lunar synodical year (nearly 11 days), the lunar year being 354 days. The number of the Gregorian epact for 1877, 15; 1878, 26; 1879, 7; 1880, 18.

Épernay (N.E. France), seat of the trade in champagne, was taken from the League by Henry IV., 26 July, 1592, when marshal Armand Biron was killed.

Ephesus (in Asia Minor), a city founded by the Ionians about 1043 B.C. It was subdued by Cyrus in 544 B.C.; revolted from the Persians, 501 B.C.; and was destroyed by an earthquake in A.D. 17; see *Diana*, *Temple of*, and *Seren Churches*. Paul preached here A.D. 55, 56 (Acts xviii., xix.). His epistle to the Ephesians is dated A.D. 64. The third general council was held here in 431. After investigation, begun in 1868, Mr. J. T. Wood discovered the site of the temple of Diana in April, 1870; and about 60 tons of marble were shipped at Smyrna for the British Museum, Jan. 1872, part of which arrived in the summer. Mr. Wood published an illustrated account of his discoveries in 1876. The site of the temple was purchased for the British Museum.

Ephori, powerful magistrates of Sparta, five in number, said to have been first created by Theopompus to control the royal power, about 757 B.C.

Epic Poems (from Greek *ἔπος*, a song), narratives in verse. Eminent examples:

Homer's "Iliad" and "Odyssey" (Greek), between eighth and tenth century B.C.; see <i>Home</i> .

Epicurean Philosophy. Epicurus of Gargettus, near Athens, about 300 B.C., taught that the greatest good consists in peace of mind springing from virtue, as tending to prevent disquiet; but the name epicurean is frequently given to those who derive happiness from sensual pleasure; see *Atoms*.

Epidaurus (Greece), celebrated for the temple of Asclepius, or Æsculapius, god of medicine, and enriched by gifts from persons healed. The Romans sent an embassy to seek the help of the god during a pestilence, and his worship was introduced at Rome, 293 B.C. The temple was visited by Æmilius Paulus, after his conquest of Macedonia, 167 B.C.

Epidemiological Society, established in 1850.

Epigenesis, see *Spontaneous Generation*.

Epigrams derive their origin from the inscriptions placed by the ancients on tombs. Marcus Valerius Martialis, the Latin epigrammatist, who flourished about A.D. 83, is allowed to have excelled all others, ancient or modern. The following epigram on Christ's turning water into wine (John iii.) is an example: "Vidit et erubuit lympha pudica Deum." "The modest water saw its God, and blushed." - *Crushaw* (died 1650).

"The Epigrammatists," a collection by rev. H. P. Dodd, published 1870 and 1875.

Epiphany (appearance), a feast (Jan. 6), termed Twelfth-day, celebrates the manifestation of the Saviour by the appearance of the star which conducted the Magi to the place where he was to be found; instituted 813. - *Whately*.

Epirus (N. Greece). Its early history is very obscure.

Episcopacy, see *Bishops*.

Epistles, or LETTERS. The earliest known letter is that sent to Joab by David by the hands of Uriah, about 1035 (2 Sam. xi. 14); see under article *Bible*. Horace Walpole, renowned for his letters, was born 5 Oct. 1717; died 2 March, 1797. The collection entitled "Elegant Epistles," commencing with Cicero, was published in 1790. It ends with an essay on letter-writing by Dr. Johnson.

Epitaphs were inscribed on tombs by the Egyptians, Greeks, and Romans. Mr. T. J. Pettigrew published a collection entitled "Chronicles of the Tombs," in 1857.

Epithalamium, a nuptial song at marriage. Tisias, the lyric poet, is said to have been the first writer of one. He received the name of Stesichorus, from the alterations made by him in music and dancing, about 536 B.C. — *Bossuet*.

Espsom (Surrey). The mineral springs were discovered in 1618. The races began about 1711, and have been held annually since 1730.

Equestrian Order in Rome began with Romulus, about 750 B.C.; see *Knighthood*.

Equinox. When the sun in his progress passes through the equator in one of the equinoctial points, the day and night are equal all over the globe. This occurs twice in the year: about 21 March the *vernal* equinox, and 22 Sept. the *autumnal* equinox. The equinoctial points move backwards about 50 seconds yearly, requiring 25,000 years to accomplish a complete revolution. This is called the *precession* of the equinoxes, which is said to have been observed by the ancient astronomers.

Equity, COURTS OF, are those of the lord chancellor, the vice-chancellors, and the master of the rolls, their office being to correct the operations of the literal text of the law, and supply its defects by reasonable construction not admissible in a court of law. The supreme court of session in Scotland combines the functions of law and equity. In 1865 equity powers were conferred on the county courts for cases respecting sums under 500*l*.; see *Supreme Court*, in which law and equity are combined.

Erastianism, the opinions of Thomas Lieber (Latinized *Erastus*), a German physician (1524–83), who taught that the church had no right to exclude any person from church ordinances, to inflict excommunication, etc. Persons who acknowledge the jurisdiction of

the civil power in spiritual matters and the law of patronage are now termed *Erastians*.

Erasures. By order of sir John Romilly, master of the rolls, in 1855, no document corrected by erasure with the knife was to be henceforth received in his court. The errors must be corrected with the pen. It is so in the army courts.

Erdington Orphanage, etc., see *Orphans' Houses*.

Erfurt (Central Germany) was founded in 476, and its university established about 1390. Erfurt was ceded to Prussia in 1802. It capitulated to Murat, when 14,000 Prussian troops surrendered, 16 Oct. 1806. In this city Napoleon and Alexander met, and offered peace to England, 27 Sept. 1808. The French retreated to Erfurt from Leipzig, 18 Oct. 1813. A German parliament met here in March and April, 1850.

Ericsson's Caloric Engine, see *Heat*, note.

Eric, Fort, in Upper Canada, nearly opposite Black Rock, was the theatre of many stirring events. On 3 July, 1814, it was taken from the British by a part of gen. Brown's division, commanded by gens. Scott and Ripley. The garrison withdrew to the intrenched British camp. Early in Aug., Fort Eric was besieged by gen. Drummond, with 5000 men. Gen. Gaines was in command of the fort, with 2500 troops. Drummond made a severe assault on the 15th, but was repulsed with the loss of almost 600 men in killed, wounded, and prisoners. The Americans lost 26 killed and 86 wounded during the siege. On 17 Sept., when gen. Brown had command of the fort, a sortie was made, by his orders, by 3000 of his division, who drove the British towards Chippewa. They were then more than 5000 strong. In that sortie the British lost almost 1000 men. The Americans lost 79 killed and 216 wounded.

Erivan (Armenia), in the sixteenth century the residence of the shahs of Persia, was taken by the Turks in 1553 and 1582, but recovered by Abbas the Great, 1604. After being several times captured, it was ceded to Persia, 1769. It was taken by Paskiewitch in 1827, and annexed to Russia by treaty in Feb. 1828.

Erzeroum (Asiatic Turkey), a city built by Theodosius II., 415; taken by the Seljuk Turks in the thirteenth century, and by the Ottoman Turks in 1517. It was captured by the Russian gen., Paskiewitch, June, 1829, but restored in 1830. It was almost totally destroyed by earthquakes, 2 June to 17 July, 1859.

Escheats, land or other property that falls to a lord within his manor for forfeiture or death. The escheator observes the rights of the king in the county whereof he is escheator.—*Covel*. In London, a court of escheats was held before the lord mayor to recover the property of a bastard who died intestate for the king, 16 July, 1771; such a court had not been held in the city for 150 years before.—*Phillips*.

Escombrera Bay, BATTLE OF; see *Spain*, 11 Oct. 1878.

Escorial, properly ESCORIAL (25 miles N.W. of Madrid), the magnificent palace of the sovereigns of Spain, termed the eighth wonder of the world, was commenced by Philip II. in 1563, and completed in 1586, at a cost of about 10,000,000*l*. It was built in the form of a gridiron in honor of St. Lawrence, on whose day (10 Aug. 1557) the Spaniards gained the victory of St. Quentin. According to Francisco de los Santos, the total length of all its rooms and apartments is above 120 English miles. The Escorial comprises a church, mausoleum, monastery, palace, library, and museum. It was struck by lightning and caught fire 11.30 P.M., 1 Oct. 1872, and was much damaged; but the grand library and other treasures were preserved.

Esparto (from the Latin *spartum*; *stipa tenacissima* of Linnæus), a Spanish grass used by Romans for whiptongs, and now largely employed in paper-making. In 1856 about 50 tons, in 1870 above 100,000 tons, were imported into Britain. The price has risen from 4*l*. to 10*l*.

per ton. Living plants were received at Newcastle, July, 1867.

Espierres (Belgium). At Pont-à-Chin, near this village, the French, under Pichegru, attacked the allied English and Austrian army (100,000 men), commanded by the duke of York, and were repulsed after a long and desperate engagement, losing the advantages gained by the victory at Turcoing, 22 May, 1794.

Esprit, SAINT (or Holy Ghost), the title of an order of knighthood, founded by Henry III of France in 1578, and abolished in 1791.

Esquires, among the Greeks and Romans, were armor-bearers to, or attendants on, a knight.—*Blount*. In England, the king created esquires by putting about their necks the collars of SS, and bestowing upon them a pair of silver spurs. John de Kingston was created a squire by patent, 13 Richard II. 1389-90.

"Essays and Reviews," by six clergymen and one layman of the Church of England (the rev. Drs. Frederick Temple and Rowland Williams, prof. Baden Powell, H. B. Wilson, Mark Pattison, prof. B. Jowett, and Mr. C. W. Goodwin), were published in an 8vo vol. in March, 1860. The book did not excite much attention at first; but having been severely censured for heterodox views by nearly all the bishops and many of the clergy, it created much excitement in 1861, and was condemned by convocation 24 June, 1864. The ecclesiastical courts sentenced the revs. R. Williams and H. B. Wilson to suspension for one year, and costs, 15 Dec. 1862; but on appeal the sentence was reversed by the judicial committee of the privy council, 8 Feb. 1864. The most remarkable among the works put forth in opposition (in 1862) are the "Aids to Faith," edited by the bishop of Gloucester (W. Thomson, now archbishop of York), and "Replies to Essays and Reviews," edited by the bishop of Oxford (S. Wilberforce). The election of Dr. Temple to the see of Exeter was much opposed on account of his essay in this collection; see *Church of England*, 1869.

Este, HOUSE OF. Boniface, count of Lucca and duke of Tuscany, about 811, is said to have descended from Odoacer, king of Italy. From Boniface sprang Albert Azzo II., marquess of Italy and lord of Este, born about 996, who married—first, Cunegonda of the house of Guelf, by whom he had Guelf, duke of Bavaria, the ancestor of the house of Brunswick (see *Bavaria* and *Brunswick*); and, secondly, Gersonda, by whom he had Fulk, the ancestor of the Estes, dukes of Ferrara and Modena.

Estella (N. Spain). In a conflict at Peña Mura, near this place, 25-28 June, 1874, the republicans were repulsed, and their general, Manuel de Concha (aged 66), killed by the Carlists, 27 June.

Euthonia, or REVEL, a Russian province, said to have been conquered by the Teutonic knights in the twelfth century; after various changes it was ceded to

Sweden by the treaty of Oliva, 8 May, 1660, and finally to Russia by the peace of Nystadt, 30 Aug. 1721, having been conquered by Peter in 1710.

Ether was known to the earliest chemists. Nitric ether was first discovered by Kunkel, in 1681; and muriatic ether, from the chloride of tin, by Courtauvau, in 1759. Acetic ether was discovered by count Lauraguais, same year; and hydriotic ether was first prepared by Gay-Lussac. The phosphoric ether was obtained by M. Boullay. The discovery that by *inhaling ether* the patient is rendered unconscious of pain is due to Dr. Charles T. Jackson, of Boston, U.S. Mr. Thomas Morton, of the same place, first introduced it into surgical practice, under Dr. Jackson's directions (1846); see *Chloroform* and *Amylene*. The term "ether" was applied to the transparent celestial space by the German astronomer Encke, about 1829, when studying the elements of Pons's comet, discovered in 1818.

Ethics (Greek term for *Morals*). The works of Plato, Aristotle, and Confucius contain heathen systems; the New Testament is that of Christianity. Paley's "Moral Philosophy" appeared in 1785, and Whewell's "Elements of Morality" in 1845.

Ethiopia. The name was applied anciently rather vaguely to countries the inhabitants of which had *sun-burnt* complexions, in Asia and Africa; but is now considered to apply properly to the modern Nubia, Sennaar, and Northern Abyssinia. Many pyramids exist at Napata, the capital of Meroë, the civilized part of ancient Ethiopia.

Ethnology, a branch of anthropology, is defined as the science "which determines the distinctive characters of the persistent modifications of mankind, their distribution, and the causes of the modifications and distribution." The study of the relations of the different divisions of mankind to each other is of recent origin. Ballbi's "Ethnographic Atlas" was published in 1826, and Dr. Prichard's great work, "Researches on the Physical History of Mankind," 1841-7. The Ethnological Society, established in 1843, published transactions. On 17 Jan. 1871, it was amalgamated with the Anthropological Society (*which see*), and named the Anthropological Institute. Dr. R. G. Latham's works, "On the Ethnology of the British Empire," appeared in 1861-2. Prof. T. H. Huxley gave courses of lectures on ethnology at the Royal Institution, London, May and June, 1866, 1867.

Ethyl, a compound radical, a colorless gas, with a slightly ethereal odor, a compound of carbon and hydrogen, first obtained in the free state by prof. Edward Frankland in 1849. Several of its compounds with metals take fire on exposure to the air.

Etna, MOUNT (Sicily). Here were the fabled forges of the Cyclops, and it is called by Pindar the pillar of heaven. Eruptions are mentioned by Diodorus Siculus as happening 1693 B.C., and Thucydides speaks of three eruptions as occurring 734, 477, and 425 B.C. There were eruptions, 125, 121, and 43 B.C.—*Livy*.

Eton College (Buckinghamshire), founded by Henry VI. in 1440, and designed as a nursery to King's College, Cambridge. John Stanbery, confessor to Henry VI. (bishop of Bangor, in 1448), was nominated the first provost. One of the provosts, William Waynflete (bishop of Winchester, 1447) greatly promoted the erection of the buildings. Besides about three hundred noblemen's and gentlemen's sons, there were seventy king's scholars on the foundation, who, when properly qualified, were formerly elected, on the first Tuesday in August, to King's College, Cambridge, and removed there when there were vacancies, according to seniority. The establishment of the *Montem* is nearly coeval with the college. It consisted in the procession of the scholars, arrayed in fancy dresses, to Salt-hill once in three years; the donations collected on the road (sometimes as much as 800*l.*) were given to the senior or best scholar, their captain, for his support while studying at Cambridge. The *montem* was discontinued in 1847. The college system was modified by the Public Schools act, 1868. In 1873 the practice of electing students to King's College, Cambridge, ceased, the scholars to be students at Cambridge being chosen there. In 1880 there were 853 students.

Etruria (or TUSCIA, hence the modern name Tuscany), a province of Italy, whence the Romans, in a great measure, derived their laws, customs, and superstitions. Herodotus asserts that the country was conquered by a colony of Lydians. The subjugation of this country forms an important part of early Roman history. It was most powerful under the Etruscans of Clusium, who attempted to reinstate the Tarquins, 506 B.C. Veii was taken by Camillus, 396 B.C. A truce between the Romans and Etruscans for forty years was concluded, 351 B.C. The latter and their allies were defeated at the Vadimonian lake, 310, with the Boii their allies, 283 B.C., and totally lost their independence about 265 B.C. The vases and other works of the Etruscans still remaining show the degree of their civilization. Napoleon I. established a kingdom of Etruria, 1801, and suppressed it 1807; see *Tuscany*. "The Cities and Cemeteries of Etruria," by George Dennis, published 1848 and 1878. *Etruria*, Staffordshire, the site of Josiah Wedgwood's porcelain works, etc., was founded in 1771.

Eubœa, the largest island in the Ægean sea. Two of its cities, Chalcis and Eretria, were very important, till the former was subdued by Athens, 506 B.C., and the latter by the Persians, 490. After the Persian war, Eubœa became wholly subject to Athens, and was its most valuable possession. It revolted in 445, but was soon subdued by Pericles. After the battle of Chæronea, 338, it became subject to Macedon. It was made independent by the Romans in 194; but was afterwards incorporated in the province of Achaia. It now forms part of the kingdom of Greece.

Eucalyptus Globulus, or Blue Gum-tree, a very fast-growing Tasmanian evergreen, of the order *Myrtaceæ*. From the extraordinary power of its roots of absorbing moisture, and the salutary aromatic odor of its leaves, it has been found highly beneficial in counteracting the malaria of marshy districts of hot climates, and hence has been named the fever-destroying tree. M. Ramel first sent seeds from Melbourne to Paris in 1854, and subsequently seeds were distributed over the south of Europe, the north and south of Africa, and elsewhere. He died in 1881.

So rapid is the growth of this tree that a forest may be formed in twenty years. It sometimes reaches the height of 350 feet, with a circumference of 100 feet, rivaling *Wellingtonia pinnata* (which see).

The timber, bark, and oils of the Eucalyptus are highly valuable, and prof. Bentley says that the genus is one of the most important to man in the vegetable kingdom. In 1874 its medicinal value was said to have been exaggerated.

Eucharist, thanksgiving, an early name for the Lord's Supper; see *Sacrament*.

Euclid's Elements. Euclid, a native of Alexandria, flourished about 300 B.C. The "Elements" are not wholly his; for many of the demonstrations were derived from Thales, Pythagoras, Eudoxus, and others. Euclid reduced them to order, and probably inserted many theorems of his own. The "Elements" were first printed at Basil by Simon Grynæus, in 1533.

Eudiometer, an apparatus to ascertain the purity of atmospheric air, or the quantity of oxygen gas or vital air contained in it; one was invented by Dr. Priestley in 1772.

Eugubine Tables, seven tablets of brass, probable date about 400 B.C. (with inscriptions relating to sacrifices, etc.—four in Umbrian, two Latin, and one partly in both dialects), were discovered in 1444 at Gubbio, the ancient Eugubium, or Iguvium. The inscriptions are accurately given by Lepsius, in his "Inscriptiones Umbricæ et Oscæ," 1841.

Eunuchs, first mentioned among the Egyptians and Assyrians, and said to have been first employed by Semiramis, queen of Assyria, about 2007 B.C. Eunuchs frequently attained to political power in the later Eastern empire.

Eupatoria (KOSLEFF), a seaport on the west coast of the Crimea. After the allied French, English, and Turkish armies landed in the Crimea, 14 Sept. 1854, a detachment under capt. Brock occupied this place, which was afterwards reinforced by the Turks. It was attacked 17 Feb. 1855, by 40,000 Russians under Liprandi. The latter were repulsed with the loss of 500 men by the Turks, whose loss was only 50, among whom, however, was Selim Pacha, the commander of the Egyptian contingent.

Euphrates Valley Railway, as a speedy means of reaching India, has been much advocated, especially by the late gen. Chesney, who published his survey of the Euphrates and Tigris in 1850. A parliamentary commission reported on it, Aug. 1872, when it was also considered at the meeting of the British Association at Brighton. The construction would cost from five to ten millions sterling, and its advantages are considered rather hypothetical by the best judges.

Euphuism, an affected style of language, prevalent in the time of Elizabeth, arose from "Euphuæ; the Anatomy of Wit," by John Lyly, published in 1581.

Eurasian Plain, the great central plain of Europe and Asia, so named by ethnologists (1865).

Europe, the smallest of the three divisions of the old continent, really an appendage of Asia; area, nearly 3,800,000 square miles; population, 301,700,000 (1872); 310,675,966 (1877). For the history, see *Greece*, *Rome*, and the modern kingdoms.

Eutaw Springs, BATTLE OF. One of the most

sanguinary battles of the American revolution was fought at Eutaw Springs, near the Santee, in South Carolina, on 8 Sept. 1781. The Americans were commanded by gen. Greene, and the British by col. Stewart. The victory, at the end of the conflict, belonged to neither party. Stewart kept the field, but that night prudently retreated towards Charleston. On the following morning Greene took possession of the battle-ground, and sent detachments in pursuit of his enemy. Congress presented a gold medal to Greene, and a British flag captured on that occasion, in token of their appreciation of his valor. The Americans lost in the battle, in killed, wounded, and missing, 555. The British lost 633.

Eutychians, so called from Eutyches, an abbot of Constantinople, who asserted in 446 that there was but one nature in Christ, the human having been absorbed in the divine. This doctrine was condemned by councils—at Constantinople in 448, and at Chalcedon in 451. It has been also called *Monophysite* (of one nature), and *Jacobite*, from Jacobus Baradaeus, its zealous defender in the sixth century. It is the form of Christianity now existing among the Copts and Armenians.

Evangelical, a term applied to a portion of the clergy of the Church of England (also called the low church), who profess to preach the gospel more purely than their brethren termed the high-church party; see *Church of England*.

The Evangelical Alliance was founded by sir Culling Eardley Smith and others at Liverpool in 1845, with the view of promoting unity among all denominations of Protestant Christians against Romanism and infidelity. It holds annual meetings. It met in Sept. 1857, at Berlin, where it was well received by the king. The 19th meeting was held at Hull, 3 Oct. 1865; the 20th at Bath, 16 Oct. 1866; the 21st at Amsterdam, Aug. 1867; at Derby, 23–28 Nov. 1869. Lord Ebury presided at a day of united prayer for the issue of the general election about to take place, 1 Oct. 1868. The proposed conference at New York in Sept. 1870, deferred on account of the war, took place Oct. 1871. The Alliance met at Geneva, 23–28 Sept. 1872; at Paris, 24–28 April, 1873; at Oxford, 29 Aug. 1874; at Constantinople, March, 1875; at Southampton, 3 Oct. 1876; at Oxford, 1–5 Oct. 1877; at Basle, 2 Sept.; and at Edinburgh, 28 Oct. 1879.

The "Evangelical Church" in Germany began with a fusion of the Lutherans and Calvinists in Nassau in 1817; followed by similar movements in different parts of Germany, 1818–22.

Evangelists, preachers of the "gospel," or good news; see *Gospels*.

Evelina Hospital, Southwark, established in 1869 by baron Ferdinand de Rothschild, in memory of his wife, and since maintained by him. Its enlargement by public aid was proposed in 1871.

Evening Schools for adults of the lower classes were strongly recommended by bishop Hinds in 1839, and by the committee of the Privy Council on Education in 1861. One was set up at Bala, in Wales, by the rev. T. Charles in 1811.

Evesham (Worcestershire), where prince Edward, afterwards Edward I., defeated the barons headed by Simon de Montfort, earl of Leicester, 4 Aug. 1265, when the earl, his son Henry, and most of his adherents were slain. Henry III. at one period of the battle was on the point of being cut down by a soldier who did not know him, but was saved by exclaiming, "Do not kill me, soldier; I am Henry of Winchester, thy king!" This victory broke up the combination of the barons.

Evidence, LAW OF, regulated by 14 & 15 Vict. c. 99 (1851), 16 & 17 Vict. c. 83 (1853), 32 & 33 Vict. c. 68 (1869).

Evil May-day (1 May, 1517), thus called on account of the violence of the apprentices and populace, directed against foreigners, particularly the French. The rioters were headed by one Lincoln, who, with 15 others, was hanged; and 400 more in their shirts, and bound

with ropes, and halters about their necks, were carried to Westminster; but they crying "Mercy, mercy!" were all pardoned by the king, Henry VIII.

Evolution Theory includes the nebular theory and Mr. Darwin's doctrine of natural selection; see *Development*, and *Progressionists*.

In 1877 three forms of evolution were discussed:—1. That of all animals gradually from the lowest form, the ameba, up to man, in opposition to the Biblical account of the creation; 2. that of every animal from protoplasm in a cell, or egg; 3. that of all the parts of an animal from its blood.

Examination of candidates for employment in the civil service have been enforced since 1855. Mr. Gladstone in 1862 said that the present might be termed the "age of examinations;" see *Civil Service*.

Examiner, liberal weekly journal, established Jan. 1808; extinct; last number, 26 Feb. 1881.

Examiner of Stage Plays, an office under the lord chamberlain, now held by Mr. E. F. S. Pigott, appointed 25 Aug. 1874. His more recent predecessors were, George Culman, Chas. Kemble, and his son John Mitchell Kemble, and Mr. Wm. Bodham Donne (1857–74).

Exarchs, appointed by the Byzantine emperors of the East, to govern central Italy after its conquest by Belisarius and Narses, 548. They ruled Ravenna from 568 to 752, when Eutychus, the last, was overcome by Astolphus the Lombard.

Exchange, formerly *Bourse*, the Royal Exchange being "Britain's Bourse;" that at Paris is still named *La Bourse*, from *bursa*, a purse. One called *Collegium Mercatorum* existed at Rome, 493 B.C. The Exchange at Amsterdam was reckoned the finest structure of the kind in the world. Many edifices of this name in the United Kingdom are magnificent; see *Royal Exchange*, and *Bills of Exchange*.

Exchequer, an ancient institution, consisting of officers with financial and judicial functions: the chancellor of the exchequer, the financial officer, formerly sat in the court of exchequer above the barons. The first chancellor was Eustace de Fauconbridge, bishop of London, in the reign of Henry III., about 1221. Sir Robert Walpole was the last chancellor of the exchequer who acted judicially (in 1735). The legal function of the chancellor was abolished by the Judicature act, Aug. 1873. The exchequer stopped payment from Jan. to 24 May (Charles II.), 1673.—*Stow*. The English and Irish exchequers were consolidated in 1816; see *Chancellors of the Exchequers* and *Tally Office*.

EXCHEQUER BILLS. The government securities, so called, said to have been invented by Montague, afterwards earl of Halifax, were first issued in 1697, and first circulated by the bank in 1796. These bills, of which more than twenty millions sterling are often in circulation, are in effect accommodation notes of government, that are issued in anticipation of taxes, at daily interest; and being received for taxes, and paid by the bank in lieu of taxes, in its dealings with the exchequer, they usually bear a premium. Amount in circulation, 56,974,700*l.* in 1817; in 1854, 16,008,700*l.* Robert Aslett, a cashier of the Bank of England, tried for embezzling exchequer bills and found *not guilty*, on account of the invalidity of the bills, though the actual loss to the bank amounted to 342,697*l.* 18 July, 1863.

Mr. Beaumont Smith tried for forging exchequer bills to the amount of 350,000*l.*; pleaded guilty; sentenced to transportation, 4 Dec. 1841.

EXCHEQUER BONDS, a species of public securities, introduced by Mr. W. E. Gladstone in 1853, have not been well received. **TELLERS OF THE EXCHEQUER**. Besides chamberlains of the exchequer, clerks of the pells, and auditor of the exchequer (offices which have all been discontinued since their last avoidance in Oct. 1826, or by surrender or abolition in Oct. 1834), there were the four lucrative offices of *tellors* of the exchequer, also abolished, 10 Oct. 1834.

John Jeffreys Pratt, earl (afterwards marquess) Camden, was appointed a teller of the exchequer in 1790, and held the appointment until his death, in 1840. During nearly half of this long term he relinquished the income (amounting in the whole to upwards of a quarter of a million sterling) and placed it at the service of the state, as it annually accrued. **COMPTROLLER GENERAL OF THE EXCHEQUER**. This office was created on the abolition of the offices of the auditor and the

four tellers of the exchequer, and the clerk of the pells, mentioned in the preceding paragraph. The first comptroller-general was s.r. John Newport, appointed 11 Oct. 1834.—34.—4384. per annum have been saved to the state by the retrenchments in this department of the government.

COURT OF EXCHEQUER CHAMBER. Erected by Edward III. in 1357. It was remodelled by Elizabeth in 1584, and then made to comprise the judges of all the courts. This court is for error from the judgments of the courts of Queen's Bench, Common Pleas, and Exchequer of Pleas in actions commenced therein. Remodelled by act 2 Geo. IV. and 1 Will. IV. c. 70 (23 July, 1830).

The Exchequer office, Westminster, was instituted by Henry IV. in 1399.

Exchequer, COURT OF (*Curia Regis*), instituted by William I. on the model of the Transmarine Exchequer of Normandy, in 1079; according to some authorities by Henry I. It included the common pleas until they were separated (16 John, 1215).—*Coke's Reports*. The exchequer is so named from a chequered cloth which anciently covered the table where the judges and chief officers sat.* Here are tried all causes relating to the king's revenue; such as are concerning accounts, disbursements, customs, and fines imposed, as well as all matters at common-law between subject and subject. The judges are styled barons, first appointed in 1234. There are a chief and four puisne barons, the fifth judge having been added 23 July, 1830. The office of Cursitor Baron was abolished in 1856. For changes, see *Supreme Court*. The ancient court sat for last time, 10 July, 1875. The Exchequer division was abolished in 1881.

Excise. The system was established in England by the Long Parliament in 1643, duties being levied on wines, beer, etc., and tobacco, to support the army against Charles I. It was continued under Charles II. The present system was settled about 1733. The old excise office was built on the site of Gresham College in 1774; the present is at Somerset House. The officers of excise and customs were deprived of their votes for returning members to parliament in 1782, but received them again in 1868. In 1849 the boards of excise, stamps, and taxes, were united as "*the board of commissioners of inland revenue*." Notwithstanding the abolition of the excise duty upon numerous articles, and the reduction of duty upon various others of late years, the total excise revenue, so far from having decreased, has progressively advanced (1847 and 1861 excepted) in its aggregate annual amount. Additional excise duties were charged by 17 and 18 Vict. c. 27, 3 July, 1854. The excise duties were further modified in 1860; see *Revenue*.

Exclusion Bill (to exclude the duke of York, afterwards James II., from the throne) was passed by the commons, but rejected by the lords in 1680. The revival of the question led to the dissolution of parliament in 1681.

Excommunication, or separation from Christian communion (Matt. xviii. 17; 1 Cor. v., etc.), was instituted to preserve the purity of the church. The Roman church excommunicated by *Bell, Book, and Candle* (*which see*); see *Interdict*.

Gregory VII. excommunicated the emperor Henry IV., and absolved his subjects from their allegiance. 1077
Innocent III. excommunicated John of England, placing the country under an interdict. 1208-14
Gregory IX. excommunicated the emperor Frederick II. four times, between. 1228-45

Louis XII. of France was excommunicated by Julius II. 1510; Luther by Leo X. 1521; Henry VIII. of England by Paul III. in 1535; and Elizabeth by Pius V. 25 April, 1570
The emperor of France, the king of Sardinia, and others were virtually excommunicated (but not by name) on account of the annexation of the Romagna by Sardinia, 29 March, 1860

Executions, see *Crime*. In the reign of Henry VIII. (88 years) it is said that no less a number than

72,000 criminals were executed.—*Slow*. In the ten years between 1820 and 1830, there were executed in England alone 797 criminals; but as our laws became less severe the number of executions decreased. In the three years ending 1820, the executions in England and Wales amounted to 812; in the three years ending 1830, they were 178; in the three years ending 1840, they were 62. The place of execution in London (formerly generally at Tyburn) was in front of Newgate from 1783 to 1868, when an act was passed directing executions to take place within the walls of prisons. The dissection of the bodies of executed persons was abolished in 1852; see *Death*, 1868.

John Calcraft, born 1800, executioner for London, 1838–74, died 13 Dec. 1873.

Exeter (Devonshire), said to have been named *Augusta* from having been occupied by the second Augustan legion commanded by Vespasian; its present name is derived from *Excestre*. It was for a considerable time the capital of the West Saxon kingdom. The BISHOPRIC anciently comprised two sees—Devonshire (founded about 909) and Cornwall. The church of the former was at Crediton, of the latter at Bodmin, and afterwards at St. German's. About 1040 the sees were united. St. Petroc was the first bishop of Cornwall, before 900; Eadulphus, the first bishop of Devonshire, 905; and Leofric, the first bishop of Exeter, in 1049. The cathedral originally belonged to a monastery founded by Athelstan; Edward the Confessor removed the monks

to his new abbey of Westminster, and gave their church for a cathedral to the united see, 1049; the see was valued in the king's books at 500*l.* per annum. Present stated income, 2700*l.*

Exeter Change (London) was built about 1680, on part of the site of Exeter House, the palace of Walter Stapleton, bishop of Exeter and lord treasurer in 1319, beheaded by order of the queen-regent, Isabella, in 1326. It was entirely demolished at the period of the Strand improvements, in 1829. The new Exeter Change, built by the marquess of Exeter near its site, opened in 1845, was pulled down in 1862 for the Strand Music-hall, now Gaiety theatre.

Exeter College (Oxford) was founded by Walter Stapleton, bishop of Exeter, in 1314. The college buildings mainly consist of a quadrangle in the later Gothic style.

Exeter Hall (Strand, London), erected in 1830-1 for the meetings of religious and philanthropic institutions, concerts, oratorios, and musical societies, a large and magnificent apartment with a splendid orchestra and organ, and having rooms attached for committees, etc., opened 29 March, 1831; see under *Music*. Religious services were held here in 1856 by the rev. C. Spurgeon, and in 1857 by ministers of the Church of England, on Sundays.

The Sacred Harmonic Society met here 1831-80; last concert, "Israel in Egypt," 30 April, 1880. The hall was purchased for the Young Men's Christian Association for 25,000*l.*, July, 1880; re-opened (jubilee), 29 March, 1881.

Exhibition of 1851 (THE GREAT EXHIBITION).

The original idea of a *National Exhibition* * is attributed to Mr. F. Whishaw, secretary of the Society of Arts in 1844. It was not taken up till 1849, when prince Albert, president of the society, said, "Now is the time to prepare for a Great Exhibition—an exhibition worthy of the greatness of this country; not merely national in its scope and benefits, but comprehensive of the whole world; and I offer myself to the public as their leader, if they are willing to assist in the undertaking."

Royal commission appointed.	3 Jan. 1850
A subscription-list opened, headed by the queen for 1000 <i>l.</i>	"
Civic banquets in support of the plan, at London, 21, 22 March; and at York.	25 Oct. "
The building† commenced.	26 Sept. "
Many persons admitted into it in Jan.; it is virtually transferred to the royal commissioners by the contractors, Messrs. Fox and Henderson.	Feb. 1861
Reception of goods began, 12 Feb., and the sale of season tickets.	25 Feb. "
The Exhibition opened by her majesty.	1 May, "
The number of exhibitors exceeded 17,000, of whom 2918 received prize medals and 170 council medals. The articles exhibited in arts, manufactures, and the various produce of countries defied calculation.	"
The palace continued open above 23 weeks—altogether 144 days (1 May–15 Oct), within which time it was visited by 6,170,000 persons, averaging 43,536 a day, whose admission—at the respective prices of one pound, half a crown, and one shilling—amounted to 503,107 <i>l.</i> , including season tickets, leaving a surplus, after payment of expenses, of about 150,000 <i>l.</i>	"
The greatest number of visitors in one day was 109,760 (8 Oct.); and at one time (2 o'clock, 7 Oct.) there were 93,000; these persons were assembled at one time, not in an open area, like a Roman amphitheatre, but within a windowed and floored and roofed building. There is no like vast assemblage recorded in either ancient or modern annals as having been gathered together, it may be said, in <i>one room</i> .	"
The Exhibition was closed to the public.	11 Oct. "
A memorial statue of the prince consort by Joseph Durham, placed in the gardens of the Royal Horticultural Society, uncovered in the presence of the prince and princess of Wales.	10 June, 1863

Exhibition of 1862 (INTERNATIONAL).

A proposal in 1858 for another great exhibition, to be held in 1861, was withdrawn in consequence of the war in Italy in 1859, etc. The scheme was revived in April, 1860, when the prince consort engaged to guarantee 10,000*l.* if 240,000*l.* should be subscribed for by other persons.

A charter granted to the following commissioners: earl Granville, the marquess of Chandos, C. W. Dilke, jun., and Thomas Fairbairn.	22 Feb. 1861
The guarantee fund amounted to 349,000 <i>l.</i> in Nov. 1860, and to 452,300 <i>l.</i>	22 Aug. 1862

* Industrial exhibitions began with the French; *Expositions* having been organized and opened at Paris in 1798, 1801, 1802, 1806, 1819, 1823, 1827, 1834, 1839, 1844, and 1849, the last, being the eleventh, exceeding all the preceding, in extent and brilliancy. The first exhibition of the kind in this country was the National Repository, opened under royal patronage in 1828, near Charing cross. It was not successful. Other exhibitions were opened at Manchester in 1837, at Leeds in 1839, and at Birmingham in 1849. Exhibitions have since been held at Cork, Dublin, Manchester, New York, Paris, Montreal, Florence, Constantinople, Bayonne, Melbourne, Vienna, Philadelphia, and many other places (*which see*).

† The palace, with the exception of the flooring and joists, was entirely of glass and iron. It was designed by Mr. (since sir) Joseph Paxton (who died 8 June, 1865), and the contractors were Messrs. Fox and Henderson, to whom it was agreed to pay 79,500*l.* or 150,000*l.* if the building were permanently retained. It cost 176,030*l.* 13*s.* 8*d.* Its length was 1851 feet, corresponding with the year; the width 408 feet, with an additional projection on the north side, 936 feet long by 48 wide. The central portion was 120 feet wide and 64 feet high, and the great avenues ran east and west through the building; the transept near the centre was 72 feet wide and 108 feet high. The entire area was 772,784 square feet, or about 19 acres. Four galleries ran lengthways, and others round the transept. The ground-floor and galleries contained 1,000,000 square feet of flooring. There were altogether 4000 tons of iron in the structure, and 17 acres of glass in the roof, besides about 1500 vertical glazed sashes.

‡ This was placed in the hands of commissioners, who have promoted the South Kensington Museum, and in 1876 proposed the establishment of a science library.

 The Exhibition opened by the duke of Cambridge and royal commissioners. . . . 1 May. "
 The Fine Arts department included a noble collection of paintings and sculptures. "
 The jurors' award of medals was announced in the building. . . . 11 July. "
 The Exhibition was closed 1 Nov. when the total number of visitors (exclusive of attendants) had been 6,117,450. "
 The Exhibition reopened on 3 Nov. for the sale of goods exhibited; was finally closed. . . . 15 Nov. "
 The success of the Exhibition was much impaired by the *decease of the prince consort*, 14 Dec. 1861, and the breaking-out of the civil war in the United States of America. The foreign exhibitors in 1851 were 6566; in 1862, 10,456. "
 Exhibitors at London, in 1851, 14,000; at Paris, in 1855, 24,000; at London, in 1862, 29,000; at Paris, in 1867, 50,000.

Exhibitions, International. A meeting was held 4 April, 1870, the prince of Wales in the chair, to promote annual international exhibitions at South Kensington, to commence 1 May, 1871; see *Centennial Exhibition of the United States*.

I. 1871. Fine arts, pottery, woollen and worsted manufactures; educational department; opened by the prince of Wales, 1 May; closed 30 Oct.

[34 countries contributed: total number of visitors, 1,142,154; highest on one day (Whit-Monday, 29 May), 21,946.]

II. 1872. Fine arts, cotton, jewelry, stationery, with machinery, and raw materials; opened by the duke of Edinburgh, 1 May; closed 19 Oct.

III. 1873. Fine arts; manufactures (silk, steel, surgical instruments, etc.; carriages for rails or tramways; food; scientific inventions and new discoveries; opened 14 April; closed 31 Oct.

IV. Fine arts; manufactures and raw materials, and engineering, and recent scientific inventions; opened 6 April; closed 31 Oct. 1874.

[The annual exhibitions having proved unsuccessful, the building was appropriated by the East India Museum.]

Exodus (Greek, *ἔξοδος*, way out), a term applied to the departure of the Israelites from Egypt, 1491 B.C.; and described in the book of Exodus. Chronologers vary in the date of this event: the L.XX. gives 1614; Hales, 1648; Wilkinson, 1495; Bunsen, 1320 or 1314.

Ex Officio Informations are those filed by the attorney-general, by virtue of his office, without applying to the court where they are filed for leave, or giving the defendant an opportunity of showing cause why they should not be filed.—*Cabinet Lawyer*. They were used by the Liverpool administration about 1817–19. William Hone was tried on criminal information, 18–20 Dec. 1817, and acquitted. The British bank directors were thus tried, 1857.

Expeditions. Many are described under their respective heads.

Expedition of "the Nations," or "the Ditch;" the third expedition of the Koreish (*which see*) against Mahomet, named from the nations who marched under their leader, Abu Sophian, and from the ditch which was drawn before the city. They were principally vanquished by the fury of the elements.—*Gibbon*. 625.

* The main building occupied about 16 acres of ground, and the annexes 7 acres. The south front was 1150 feet long and 55 feet high, and over the east and west fronts rose the two domes 260 feet high. The interior was decorated by Mr. John G. Crace. The building was given up to Messrs. Kelk and Lucas on 31 Dec. 1862, the house of commons having refused to purchase it for 80,000*l*. 2 July, 1863; and the pulling down commenced on 6 July. The domes and other parts of the structure were purchased for erection in Alexandra park, Muswell Hill, near London (north).

Expenditure, see under *Revenue*.

Exploring Expedition, UNITED STATES, under lieut. Wilkes, consisted of six small vessels of the United States navy (*Vincennes, Peacock, Porpoise, Relief, Flying-fish*, and *Sea-gull*), to explore the southern seas, sailed from Hampton Roads, Va., on 19 Aug. 1838. They discovered an Antarctic continent 19 July, 1839. The *Peacock* was lost on the bar at the mouth of the Columbia river in July, 1841. The *Vincennes*, Wilkes's flag-ship, returned to New York in June, 1842, after an absence of almost four years. Wilkes's "Narrative" was published in six vols., illustrated. The scientific reports form 20 quarto and folio vols.

Explosives, see *Gunpowder, Gun-cotton, Nitro-glycerine, Dynamite, Dualine, Lithofracture, Glyoxiline, Blasting, Gelatine*, etc. A committee to examine into the nature and properties of various explosives was appointed by government in 1871. Explosives have been much studied by professor F. A. Abel, of Woolwich (1881).

Professor Osborne Reynolds produced a new explosive—75 parts chlorate of potash, 25 sulphuria—a product of coal-gas; the ingredients kept apart till required; announced 1878.

Explosives Act, passed 14 June, 1875, amends the law with respect to the manufacturing, keeping, selling, carrying, and importing gunpowder, nitro-glycerine, and other explosive substances.

Exports. Edward III., by his encouragement of trade, turned the scale so much in favor of English merchandise that, by a balance taken in his time, the exported commodities amounted to 294,000*l*. and the imported to only 38,000*l*.; see *Revenue*. The declared value is of much less amount than the official.

Extract of Meat, obtained by Liebig in 1847; a company was formed to manufacture it in South America in 1866.

Extradition Treaty between Great Britain and France, 1843. In Dec. 1865, the French government gave notice of withdrawing from it in six months. It was renewed, with modifications, for six months, 21 May, 1866. A new act was passed 9 Aug. 1870; amended in 1873. Similar treaties have been concluded with other

powers: with Austria, 8 Dec. 1873; Switzerland, 4 April, 1874; Holland, Aug. 1874; with Spain, 1878.

In 1866, M. Lamirand, charged with forgery and fraud against the Bank of France, fled to America. He was pursued, and was arrested at Montreal, on 1 Aug., under the governor-general's warrant. On 15 Aug., while his examination was still pending, he petitioned the governor-general not to warrant his surrender before he could apply for a writ of *habeas corpus*, and was assured on 17 Aug. that ample time should be allowed for this purpose. On 23 Aug. he was finally committed; and on 24 Aug. his petition for a writ of *habeas corpus* was presented to Judge Drummond, twenty-four hours' notice having been given to the representatives of the crown and the Bank of France. After arguments had been heard and the case adjourned until the following day, he was surreptitiously carried off the same night by train to Quebec, and hurried on board a steamer bound for Europe, by virtue of an extradition warrant, purporting to be signed by the governor-general at Ottawa on 23 Aug. He was conveyed to France, and on 5 Dec. was tried, found guilty, and condemned to ten years' imprisonment. These circumstances led to much discussion, and the Canadian authorities were censured for irregularity and want of discretion. The discussion ended by Lamirand declining British intervention.

Dispute with United States respecting the surrender of Ezra D. Winslow, a forger, by Great Britain, which is refused unless it is agreed that the prisoner shall only be tried for the offence for which he has been committed (according to the treaty) April, 1876

Bylau (Prussia), where, on 7-8 Feb. 1807, the French defeated the Russians in one of the most bloody contests of the war. Napoleon commanded in person. Both armies, by this and other battles, were so much reduced that the French retired to the Vistula and the Russians on the Pregel.

Eyre (old French for *ire*, to go on), the itinerant court of justices, the justices in eyre, was instituted by Henry II. 1176; and when the forest laws were in force its chief-justice had great dignity. These justices were to go their circuit every third year, and punish all abuses committed in the king's forests. The last instance of a court being held in any of the forests is said to have been in 1671.—*Beaumont*.

F.

F's, **THREE** (that is, "fixity of tenure, fair rents, and free sale"), term much used respecting Irish land question in 1880-1. Sir Stafford Northcote termed them "fraud, force, and folly," and they were much opposed by lord Dufferin and others.

Fabii. A noble family at Rome, said to have derived their name from *fabia*, a bean, because some of their ancestors cultivated this pulse; or to have descended from Fabius, a son of Hercules. They made war against the Veientes, and in an engagement near the Cremera all the grown-up males of the family (306 men) were slain in a sudden attack, 477 B.C. From one, whose tender age had detained him at Rome, arose the noble Fabii of the following ages. Fabius *Cunctator* (the delayer) kept Hannibal in check for some time without coming to an engagement, 217-216 B.C.

Fables. "Jotham's fable of the trees [Judg. ix., about 1209 B.C.] is the oldest extant, and as beautiful as any made since."—*Addison*. Nathan's fable of the poor man (2 Sam. xii., about 1034 B.C.) is next in antiquity. The earliest collection of fables extant is of Eastern origin, and preserved in the Sanscrit. The fables of Vishnu Sarma, or Pilpay, are the most beautiful, if not the most ancient, in the world.—*Sir William Jones*. Professor Max Müller traced La Fontaine's fable of the Milkmaid to a very early Sanscrit collection. *Æsop's* fables (*which see*), supposed to have been written about 565 or 620 B.C., were versified by Babrius, a Greek poet, about 130 B.C. (*Coray*), and turned into prose by Maximus Planudes, a Greek monk, about 1320, who added other fables and appended a worthless life of *Æsop*. The fables of Phædrus, in elegant Latin iambs (about A.D. 8), of La Fontaine (1700), and of Gay (1727), are justly celebrated.

Facial Angle (that contained by one line drawn horizontally from the middle of the ear to the edge of the nostrils, and another from the latter point to the ridge of the frontal bone) was invented by Peter Camper to measure the elevation of the forehead. In negroes this angle is about 70°; in Europeans varies from 75° to 85°. Camper died 7 April, 1789. His book on "Characteristic Marks of Countenance" was published in 1791.

Factions of the Circus, among the Romans, were parties that fought on chariots in the circus, and who

were distinguished by colors, as green, blue, red, and white; Domitian added gold and scarlet, about A.D. 90.

"*Nika*" "*Sedition*.—In Jan. 532, a conflict took place at Constantinople, lasting five days, when about 30,000 lives were lost, and Justinian was mainly indebted for his life and throne to the heroism of his empress Theodora. The blues and greens united for a day or two against the emperor, taking *Nika* (overcome) for a watchword. The blues soon turned, and massacred nearly all the greens. The conflict was suppressed by Belisarius with difficulty, and the games were abolished for a time.

Factories, supplied with machinery for producing manufactures, have immensely increased in this country since 1815. The Factory act, regulating the hours of labor, etc., was passed in 1833 and amended 1834 and 1844. Similar acts have been passed since; and an act for the extension of the principles of the Factory acts was passed in 1867, in relation to women and children employed in manual labor; short time on Saturdays was enacted. Other acts were passed in 1870-8.

The act of 1878 (like that of 14 July, 1874) relates to sanitary provisions, safety from machinery, hours of employment, meal hours, women and children, holidays, education of children, accidents, etc., passed 27 May, 1878.

Faculties, **COURT OF**, giving powers to the archbishops of Canterbury and York, 25 Hen. VIII. cap. 21, 1534.

Faenza, central Italy, the ancient Faventia, submitted to the emperor Frederick I., 1162; was taken by Frederick II., 12 April, 1241; held by the pope, 1275; by the Bolognese, 1282; by Cæsar Borgia, 1501; by Venice, 1504; by the papacy, 1509; by the French, 1512. After various changes early in the sixteenth century it was acquired by the papacy and retained till the annexation by Sardinia, 1859. Faience pottery owes its name to this place, where it was invented.

Fairlop Oak, with a trunk 48 feet in circumference, the growth of five centuries, in Hainault forest, Essex, was blown down in Feb. 1820. Beneath its branches an annual fair was long held on the first Friday in July, which originated with the eccentric Mr. Day, a pump and block maker of Wapping, who, having

a small estate in the vicinity, annually repaired here with a party of friends, to dine on beans and bacon.

Fairoaks, near the Chickahominy, Virginia, the site of two sanguinary indecisive battles between the Confederates, under gen. Joseph E. Johnston, and the Federal army of the Potomac, under gen. McClellan, 31 May and 1 June, 1862.

Fairs and Wakes, of Saxon origin, were instituted in Italy about 500; in England by Alfred, 886.—*Spelman*. Wakes were established by order of Gregory VII. in 1078, and termed *Feria*, at which the monks celebrated the festival of their patron saint: the vast resort of people occasioned a great demand for goods, wares, etc. Fairs were established in France about 800 by Charlemagne, and encouraged in England about 1071 by William the Conqueror. Many statutes were made for the regulation of fairs (1328-1868). The "Fairs act," passed 25 May, 1871, provides for the abolition of fairs; in 1872, Charlton and Blackheath fairs, and in 1873 Clapham fair, were abolished as nuisances.

An "old English fair" was opened at the Royal Albert Hall by princess Christian, to aid the Chelsea Hospital for Women, 9 June, 1881.

Falck Laws, see *Prussia*, 1873.

Falconry, or **HAWKING**, in England cannot be traced with certainty before the reign of king Ethelbert, the Saxon monarch, 858.—*Pennant*. The grand seignior at one time kept six thousand falconers in his service. Juliana Berners's book on "Hawkyng and Huntynge" was printed in 1496; see *Angling*. Recent attempts have been made to revive falconry. Hawking was practised in Thrace.—*Aristotle*.

Falczl, on the Pruth, Turkey. Here was concluded a *Peace* between Russia and Turkey, 21 July, 1711, the Russians giving up Azof, and all the possessions on the Black Sea, to the Turks. The Russians were saved from imminent destruction by the address of Catherine, the empress. In 1712 the war was renewed, and terminated by the peace of Constantinople, 16 April, 1712.

Falerii, a city of the Falisci, an Etruscan people who joined the Veientes against Rome, and were beaten by Cornelius Cossus, 437 B.C. It is recorded that when the city was besieged by Camillus in 394, a schoolmaster offered to betray to him the children of the principal citizens. On his refusal, the citizens from gratitude surrendered. They opposed Rome during the first Punic war; and in 241 the city was taken and destroyed.

Falernian Wine, celebrated by Virgil and Horace, was the produce of Falernus, or, as called by Martial, Mons Masicus, in Campania. Horace, in his "Odes," boasts of having drunk Falernian wine that had been, as it were, born with him, or which reckoned its age from same consuls, 14 B.C.

Falkirk (Stirlingshire, Scotland), the site of a victory by the English under Edward I. over the Scots, commanded by Wallace, part of whose forces deserted him. It is said from 20,000 to 40,000 Scots were slain, 22 July, 1298. A battle was fought at Falkirk Muir between the royal forces under Hawley, and prince Charles Edward Stuart, in which the former were defeated, 17 Jan. 1746.

Falkland Islands, a group in the South Atlantic, belonging to Great Britain, seen by Americus Vesputius, 1502, and visited by Davis, 1592; explored by Hawkins, 1594; taken possession of by France, 1764. The French were expelled by the Spaniards; and in 1771 Spain resigned them to England. Not having been colonized by us, the republic of Buenos Ayres assumed a right to these islands, and a colony from that country settled at Port Louis; but owing to a dispute with America the settlement was destroyed by the latter in 1831. In 1833 the British flag was hoisted at Port Louis, and a British officer has since resided there. Governors, Wm. Cleaver

Family of Love, a society, called also Philadelphians, from the love they professed to bear to all men, assembled at Brew-house yard, Nottingham. Their founder, David George, an Anabaptist, of Holland, propagated his doctrines in Switzerland, where he died in 1556. The tenets of the society were declared impious, and George's body and books ordered to be burned by the hangman. In England a sect with a similar title was repressed by Elizabeth, 1580; but existed in the following century. See *Agapemone*.

Fan. Used by the ancients; *Cape hoc flabellum, et ventulum huic sic facito*—"Take this fan, and give her thus a little air."—*Terence's Eunuchus*, 166 B.C. Fans, together with muffs, masks, and false hair, were first devised by the harlots in Italy, and were brought to England from France.—*Stow*. In the British Museum are Egyptian fan-handles.

Great competitive exhibition of fans at Drapers' Hall, London, opened.....2 July, 1878

Faraday Monument, etc. Professor Michael Faraday, natural philosopher and chemist (see *Electricity*), died 25 Aug. 1867. A public meeting was held at the Royal Institution, 21 June, 1869, the prince of Wales in the chair, to take measures to provide a public monument to him. A sufficient sum having been subscribed, the production of a statue was intrusted to Mr. Foley. The statue was placed provisionally at the Royal Institution, London, in 1876, and still remains there (1881). The "*Faraday Medal*," to be given to distinguished foreign philosophers by the Chemical Society, was awarded

to M. Dumas, June, 1869; to professor Cannizzaro, May, 1872; to Dr. A. W. Hofmann, March, 1875; to professor A. Wurtz, and given to him after his lecture, 12 Nov. 1878; to professor H. Helmholtz, April, 1881. For *Faraday* steamship, see *Steam*.

Faradization, the medical application of the magneto-electric currents which Faraday discovered in 1827. Apparatus for this purpose was first made by M. Pixii, and employed by Dr. Neef of Frankfurt. "*Farad*," name taken for a unit of electric capacity, 1875.

Farce, a short comic drama, usually of one or two acts. One by Otway is dated 1677. The best English farces (by Foote, Garrick, Bickerstaff, etc.) appeared from about 1740 to 1780. This species of dramatic entertainment originated in the droll shows which were exhibited by charlatans and their buffoons in the open streets; see *Drama*.

Farmers' Alliance, an organization of agricultural reformers; held a provisional meeting 27 May, and a conference 2 July, 1879. It was active during the elections of April, 1880.

Farmers' Union, National, established at Leamington, by Lord Walsingham and others, to oppose the Agricultural Laborers' Union, June, 1874.

Farmers-general, see *Fermiers*.

Farnese Family became important through the elevation of Alexander Farnese to the papacy as Paul III. He gave his natural son Peter the duchy of Parma, and his descendants ruled till the death of Antony without issue in 1731. Alexander, prince of Parma, was governor of the Netherlands in 1579.

Farringdon Market, erected by the corporation of London, near the abolished Fleet Market, was opened 20 Nov. 1829.

Farthing, an early English coin. Farthings in silver were coined by king John; the Irish farthing of his reign (1210) is rare. Farthings were coined in England in silver by Henry VIII. First coined in copper by Charles II., 1665; and again in 1672, when there was a large coinage of copper money. Half-farthings were first coined in 1843; see *Queen Anne's Farthings*. A single copy of the *Penny-a-week Country Daily Newspaper* (conservative), No. 1, sold for $\frac{1}{4}$ d., 25 June, 1873. The *Farthings act*, 21 & 22 Vict. c. 75, 1858, relates to the payment for portions of a mile travelled by third-class railway trains.

Farthingale, see *Crinoline*.

Fasti Capitolini, marble tablets dug up in the forum at Rome, 1547, contain a list of the consuls and other officers from the year of Rome 250 to 765. Other fragments were found in 1817 and 1818. The "*Fasti Consulares*," from 509 B.C. to A.D. 235, are given at the end of Smith's "*Dictionary of Greek and Roman Antiquities*."

Fasts, observed by most nations from the remotest antiquity: by the Jews (2 Chron. xx. 3); by the Ninevites (Jonah iii.); see Isaiah lviii. A fast was observed by the Jews on the great day of atonement, Lev. xxiii., 1490 B.C. Moses fasted 40 days and nights on Sinai (Exod. xxiv.), 1491 B.C. The first Christian ministers were ordained with fasting (A.D. 45), Acts xiii. 2. Annual fasts, as that of Lent, and at other stated times, and on particular occasions to appease the anger of God, began in the Christian church in the second century (138). The Mahometan fast is termed *Ramadan* (which see). Fast-days are appointed by the Reformed churches in times of war and pestilence (as 21 March, 1855, for the Russian war, and 7 Oct. 1857, for the Indian mutiny); see *Abstinence*.

Fencible Light Dragoons, a body of cavalry raised voluntarily in various counties of England and Scotland in 1794 to serve during the war in any part of

Great Britain. This force (between 14,000 and 15,000), which did its duty with much judgment during a period of intense popular excitement, was disbanded in 1800.

Fencing was introduced into England from France. Fencing-schools, having led to duelling in England, were prohibited in London by statute 13 Edw. I., 1285. In 1859 there were eight teachers of fencing in London; in 1872, ten.

Fenians (the name of ancient Irish national militia), a "brotherhood" in the United States and Ireland united to liberate Ireland and establish a republic.* The agitation was begun, it is said, by Stephens in March, 1858, and in 1864 enlistments and secret drillings took place. A convention was formed in 1863 in America. The movement is opposed by the Roman Catholic clergy; see *Ireland*.

Feriae Latinae, solemn Roman festivals, said to have been instituted by Tarquin the Proud, about 534 a.c. The principal magistrates of forty-seven towns of Latium assembled on a mount near Rome, and with the Roman authorities offered a bull to Jupiter Latialis.

Fermentation, termed by Gay-Lussac one of the most mysterious processes in nature: he showed that in the process, 45 lbs. of sugar are resolved into 23 of alcohol and 22 of carbonic acid. His memoir appeared in 1810. In 1861 Pasteur brought forward evidence to show that fermentation depends on the presence of minute organisms in the fermenting fluid, and that the source of all such organisms is the atmosphere. For his researches he was awarded an annual pension of 120,000 francs in 1874.

Fermiers Généraux, officers who farmed the French revenues previous to 1789, frequently with much oppression. Lavoisier and 27 of these were executed 8 May, 1794.

Ferndale Colliery Explosion; 8 Nov. 1867; about 178 lives lost; see under *Coal*.

Ferns (Ireland), an ancient bishopric, once archiepiscopal. St. Eden was seated here in 598. Leighlin and Ferns were united in 1600; and by the Church Temporalities act, passed Aug. 1833, both were united to the bishopric of Ossory; see *Ossory*.—**FERNs**, an order of cryptogamous plants, now much cultivated in Wardian cases (which see, and also *Nature-printing*).

Ferozeshah (India). The British, commanded by sir Hugh Gough, attacked the intrenchments of the Sikhs, and carried their first line of works, 21 Dec. 1845; but night coming on, the operations were suspended till daybreak, when their second line was stormed by gen. Gilbert, and 74 guns captured. The Sikhs advanced to retake their guns, but were repulsed with great loss, and retreated towards the Sutlej, 22 Dec.; and recrossed that river unmolested, 27 Dec. The British loss was reckoned at 2415.

Ferrara, formerly part of the exarchate of Ravenna, under the emperors of the East. It was subdued by the Lombards in the eighth century, and taken from them about 752 by Pepin, who gave it to pope Stephen II. About 1208 it fell into the hands of the house of Este (which see), and became the principal seat of the literature and fine arts in Italy. Pope Clement VIII. obtained the sovereignty in 1598, on the death of the duke Alphonso II., the last legitimate male of the Este family. His illegitimate nephew, Cæsar, became duke of Modena.

The French under Massena took Ferrara in 1796; but it was restored to the pope in 1814. An Austrian garrison held it from 1849; it retired in June, 1859, and the people rose and declared for annexation to Sardinia, which was accomplished in March, 1860.

Ferrara's Arrest. In March, 1542, Mr. George Ferrara, a member of parliament, while in attendance on the house, was taken in execution by a sheriff's officer for debt, and committed to the Compter prison. The house despatched their sergeant to require his release, which was resisted, and, an affray taking place, his mace was broken. The house in a body repaired to the lords to complain, when the contempt was adjudged to be very great, and the punishment of the offenders was referred to the lower house. On another messenger being sent to the sheriffs by the commons, they delivered up the senator, and the civil magistrates and the creditor were committed to the Tower, the inferior officers to Newgate, and an act was passed releasing Mr. Ferrara from liability for the debt. The king, Henry VIII., highly approved of all these proceedings, and the transaction became the basis of that rule of parliament which exempts members from arrest.—*Holinshed*.

Ferro, the most western of the Canary isles, from whose west point some geographers have taken their first meridian, was known to the ancients, and was rediscovered in 1402.

Ferrol (N.W. Spain). Upwards of 10,000 British landed near Ferrol under the command of sir James Pulteney, in Aug. 1800. They gained possession of the heights; but, despairing of success, on account of the strength of the works, sir James re-embarked his troops. His conduct was much condemned. Soult captured Ferrol, 27 Jan. 1809. An insurrection of about 1500 men in the arsenal here broke out, headed by brigadier Pozas and capt. Montojo, who raised the red flag, 11 Oct. They dispersed or surrendered when about to be attacked, 17 Oct. 1872.

Fescennine Verses were rude extemporaneous dialogues, frequently licentious, in favor among the ancient Etruscans at weddings, and still popular in Italy.

Festivals, see under *Feasts, Clergy, Music*.

Fête de Dieu, a feast of the Roman church in honor of the real presence in the Lord's Supper, kept on the Thursday after Trinity Sunday; see *Corpus Christi*. Berengarius, archbishop of Angers, opposed the doctrine of transubstantiation, and to atone for his crime a yearly procession was made at Angers, called *la fête de Dieu*, 1019.

Fête de Vertu, an annual assemblage, chiefly of young persons, to whom were adjudged rewards for industry and virtue. These fêtes, held at Nuneham, in Oxfordshire, begun by lady Harcourt in 1789, were continued till her death.

Feudal Laws. The tenure of land by suit and service to lord or owner, in use in England by the Saxons, about 600, was mainly introduced by William I. in 1066. The kingdom was divided into baronies, which were given on condition of the holders furnishing the king with men and money. The vassalage, limited by Henry VII., 1495, was abolished by statute, 1660. The feudal system was introduced into Scotland by Malcolm II. in 1008, and the hereditary jurisdictions were finally abolished in that kingdom, 1746-7. The feudal laws, established in France by Clovis I. about 486, were discontinued by Louis XI. in 1470.

Feuillants, a religious order founded by Jean de la Barrière in 1577 at the abbey of Feuillant, near Toulouse, and settled in Paris in 1587. The *Feuillant Club*, formed in Paris by La Fayette and others in 1789, to counteract the intrigues of the Jacobins, was so named from the convent where they met. A body of Jacobins burst into their hall and obliged them to separate, 25 Dec. 1791; and the club was broken up in 1792.

Fex (in the ancient *Mauritania*, Africa), founded by

Edris, a descendant of Mahomet, about 787, was long capital of the kingdom of Fez. After long-continued struggles, it was annexed to Morocco about 1550. Leo Africanus describes it as containing more than 700 temples, mosques, and other public edifices, in the twelfth century.

Fictions, see *Romances*.—**FICTIONS IN LAW** were invented by the lawyers in the reign of Edward I. as a means of carrying cases from one court to another, whereby the courts became checks to each other.—*Hume*. Lord Mansfield, in the court of King's Bench, emphatically declared that "no fiction of law shall ever so far prevail against the real truth as to prevent the execution of justice," 31 May, 1784. They have been mostly abolished in the present century.

"Fidelio," Beethoven's single opera; composed in 1804, produced at Vienna, 20 Nov. 1805.

Fidenæ, a Sabine city, frequently at war with Rome. It was finally captured and the inhabitants enslaved, 426 B.C., by the Romans, whose ambassadors they had slain.

Fifth-monarchy Men, about 1645, supposed the period of the Millennium to be just at hand, when Jesus Christ should descend from heaven and erect the fifth universal monarchy. They proceeded so far as to elect him king at London. Cromwell dispersed them, 1653.—*Kearney*. Another rising, with loss of life, was suppressed, 6 Jan. 1661. Thos. Venner, a cooper, their leader, and 16 others, were executed soon after.

Files are mentioned (1 Sam. xiii. 21) 1093 B.C. The manufacture of them has attained to great perfection by means of file-cutting machinery. That set up by Mr. T. Greenwood of Leeds, in 1859, was invented by M. Bernot of Paris. It is said that the price of files made by it is reduced from 32*d.* to 4*d.* per dozen.

Filebusters (properly *Filibusters*), a name given to the freebooters who plundered the coasts of America in the sixteenth and seventeenth centuries; see *Buccaneers* and *Nicaragua*.

Filioque ("and from the Son"), inserted in the Ni-

cene creed, in respect to the procession of the Holy Ghost from the Father and the Son, in a council at Toledo, 589; adopted by the Western, but rejected by the Eastern church since 662. The omission of the phrase was considered at the Old Catholic Conference at Bonn, Aug. 1875; see *Athanasian Creed*.

Filterers. A plan for purifying corrupted water was patented by William Woolcott in 1675. Other modes followed. James Peacock's method of filtration was patented in 1791, and many others since; Ransome's, 1856.

Apparatus for freshening salt-water, brought forward by Grant, 1849; by Macbride, 1849; Gravely, 1868. Dr. Normandy's greatly improved apparatus, 1859, much used in the royal navy.

Fine Arts, see *Arts, Paintings, Sculpture, Engraving*, etc.

Fines AND RECOVERIES, conferring the power of breaking ancient entails and alienating estates, began in the reign of Edward IV., but was not, properly speaking, law till Henry VII., by correcting some abuses that attended the practice, gave indirectly a sanction to it, 1487. Fines and recoveries were abolished in 1833.

Finisterre, see *Cape Finisterre*.

Finland, a Russian grand-duchy, in the middle of the twelfth century was conquered by Eric IX. of Sweden, who introduced Christianity. It was several times taken by the Russians (1714, 1742, and 1808), and restored (1721 and 1743); but in 1809 they retained it by treaty; see *Abo*. Its political constitution was confirmed by the czar in 1800, 1825, and 1855. Population in 1862, 1,746,229; in 1867, 1,880,853; 1875, 1,912,647. During a dreadful famine whole villages were starved, March, 1868.

Finnian, see *Fenians*.

Finsbury Park, London, N. In 1866 land was purchased, and preparations for the park began; and it was opened 7 Aug. 1869.

Fire. The poets supposed that fire was stolen from heaven by Prometheus. Heraclitus, about 596 B.C., maintained that the world was created from fire, and deemed to be a god omnipotent; see *Parses*.

Fire Insurance, see *Insurance*.

Fire-annihilator, an apparatus invented by Mr. T. Phillips, and made known by him in 1849. When put in action, steam and carbonic acid are formed, which extinguish flame. It was not successful commercially. *L'Extincteur* was invented by Dr. F. Carlier, and patented by A. Vignon in July, 1862. It is an iron cylinder filled with water and carbonic acid gas, generated by bicarbonate of soda and tartaric acid. The apparatus was developed and improved by Mr. W. B. Dick in his *Manual and Chemical Fire-engines*, which give a continuous flow of water and gas, patented April, 1869.

The "Mata fuego," or "Fire-killer," of M. Banolas of Paris, was successfully exhibited at the Alexandra Palace, 16 Oct. 1880. Great bodies of flame were almost instantaneously extinguished.

Fire-arms, see *Artillery, Cannon, Needle-gun, Chassepot, and Pistols*. The first small fire-arms were a species of cannon, borne by two men.

Fire-brigade. The "London Fire-engine Establishment," an amalgamation of the engines of the different companies, was established in London in 1832 by Mr. Charles Bell Ford, director of the Sun fire-office. It then had 80 men and 19 stations. In 1863 it had 180 men and 20 stations. In May, 1862, a commission recommended the establishment of a fire-brigade, which was effected by the Metropolitan Fire-brigade act in 1865. The establishment then gave up its plant to the Metropolitan Board of Works. The fire-brigade is supported by a $\frac{1}{2}$ *d.* rate, and by contributions from government and from the insurance offices. It came into action and its energies were successfully tested at the great fire at St. Katharine's docks, 1 Jan. 1866.

Fire-damp Indicator, a small apparatus, about the size of a chronometer, invented by Mr. G. F. Ansell, and patented by him in 1865, by which the presence of very small quantities of fire-damp or light carburetted hydrogen gas may be detected in mines. It is an application of the law of the diffusion of gases.

Fire-detector AND ALARM, a mechanical and chemical apparatus invented by prof. Grechi, which causes a bell to be rung and exhibits colored light when the temperature of a room is greatly increased. It was tried at the International exhibition, London, 4 June, 1873.

Fire-engines are said to have been invented by Ctesibius, 250 B.C. They are mentioned by Pliny, A.D. 70. A "water-bow" was patented by Thomas Grent in 1632; one was constructed by John Van der Heyden about 1663. Bramah's engine was patented in 1793. Mr. John Braithwaite constructed a steam fire-engine in 1830. A trial of steam fire-engines took place at the Crystal Palace, Sydenham, on 1, 2, 3 July, 1863, when prizes were awarded to a large one by Merryweather, and a small one by Shand and Mason; see *Fire-ammulator*.

W. Dennis's portable self-acting pneumatic fire-engine was tried successfully at gas-works near the Thames, 30 Nov. 1876

Fire-escapes were patented by David Marie (1766) and Joachim Smith (1773). The Royal Society for the Protection of Life from Fire was first established in 1836; its object was not fully attained till 1843, when it was re-organized, beginning with six escape stations in London; in March, 1859, it possessed 67; in 1866, 85. In 1858 504 fires had been attended and 57 persons rescued. In 1861 it was stated that 84 lives had been saved by the society's officers. In 1866, 695 fires had been attended and 78 lives saved. In Aug. 1867, the plant of the society was virtually presented to the Board of Works, in consequence of the passing of the Metropolitan Fire-brigade Act, 1865. Versmann's composition for rendering washing dresses *fire-proof* was published about 1860.

Fireman's Respirator, the invention of Dr. Tyn-dall (1870-71), is a combination of his respirator of cotton-wool moistened with glycerine, and Dr. Stenhouse's charcoal respirator. Armed with this apparatus, a man may remain a long time in the densest smoke.

Burning and explosion of fireworks factory at Chester, Pa.; 14 lives lost.....17 Feb. 1882

Fire-salvage Corps formed, in 1865, by the London fire-insurance offices.

Fire-ships. Among the most formidable contrivances of this kind ever used was an explosion vessel to destroy a bridge of boats at the siege of Antwerp in 1585. The first use of them in the British navy was by Charles, lord Howard, of Effingham, in the engagement with the Spanish Armada, July, 1588.—*Rapin*.

Fire-watch, or FIRE-GUARD, of London, was instituted Nov. 1791.

Fireworks are said to have been made by the Chinese in remote ages. They were invented in Europe, at Florence, about 1360, and were exhibited as a spectacle in 1588.

Macaulay states that the fireworks let off in England at the peace of Ryswick, in 1697, cost 12,000*l*.

Very grand fireworks were let off from a magnificent building erected in the Green park, London, at the peace of Aix-la-Chapelle, Nov. 1748.

A grand display of this kind (at a cost of 10,000*l*.) to celebrate the peace with Russia, 29 May, 1856.

In consequence of explosions frequently occurring at firework-makers' (particularly one on 12 July, 1858, at Mr. Bennett's, in the Westminster road, Lambeth, when 5 lives were lost and about 300 persons seriously injured and much property destroyed), it was determined to enforce 9 & 10 Will. III. c. 7 (1697), an act to prevent the throwing and forming of squibs, serpents, and other fireworks. An act regulating the making of fireworks was passed in 1860.

First-fruits were offerings which made a large part of the revenues of the Hebrew priesthood. First-fruits (called *ANNATES*, from *annus*, a year), in the Roman church, originally the profits of one year of every vacant bishopric, afterwards of every benefice, were first claimed by pope Clement V. in 1306, and were collected in England in 1316; but chronologers differ on this point. In the 26th of Henry VIII. 1534, the first-fruits were assigned, by parliament, to the king and his successors. Mary gave the annates to the popes (1555); but Elizabeth resumed them (1559). They were granted, together with the tenths, to the poor clergy, by queen Anne, in 1703. The offices of First-fruits, Tenths, and Queen Anne's Bounty were consolidated by 1 Vict. c. 20 (1838); see *Augmentation of Poor Livings*. Annates were long resisted in France, but not totally suppressed till 1789.

Fish, Fisheries, &c. Laws for the protection of fisheries were enacted by Edward I. in 1284, and by his successors. The rights of the English and French fishermen were defined by treaty in 1839; see *Herring, Whale, and Newfoundland Fisheries; Oysters*. The known species of fish are about 7000.—*Günther*, 1871.

The first experiments in fish-culture by artificial propagation, in the United States, were made in South Carolina in 1804. In 1853 successful efforts to hatch trout were made at Cleveland, Ohio. Many large establishments for hatching are now in operation; and there are official fish commissioners in about half the states. Much has been done to stock or restock rivers, creeks, lakes, and ponds; and laws for the protection of fish are in force in most of the states. By act of congress of 9 Feb. 1871, a United States commissioner of fish and fisheries was provided for; and, under the

auspices of this officer, great progress has been made in the propagation and conservation of food fishes.

AMERICAN SEA FISHERIES.—Sebastian Cabot first directed attention to the American fisheries in 1498. The earliest fishing voyages to American coasts were made in 1517. Bartholomew Gosuold explored the New England coast in 1602; and, catching cod near the southern cape of Massachusetts, named that point Cape Cod. A ship load of fish was sent from Massachusetts to England in 1624. Fish were exported from Boston in 1633. An act to encourage fishing was passed by Massachusetts in 1639, and the industry grew rapidly from that time until the Revolution. By the treaty of peace in 1783, the right of United States citizens to fish on the Banks of Newfoundland, in the Gulf of St. Lawrence, etc., was conceded. But, to injure the United States fishing industry, the British government, in July, 1783, prohibited the importation of fish by United States fishers into the British West Indies. The United States government passed a bounty act to encourage fishing in 1789, and another in 1790, at the same time imposing duties on imported fish. Other acts to encourage this industry were passed 16 Feb. 1792, 2 May 1792, 1797, and 1799. The bounties were abolished in 1807, but restored in 1813. The subject has been many times legislated upon since, the general policy having been to encourage the industry as far as possible. After the war of 1812-15, the British maintained that hostilities had abrogated the fishing rights conceded in 1783; and in 1818 the matter was made the subject of a convention, by which the fishing privileges of United States citizens were defined. Disputes concerning bay and inlet fishing arose in 1852, which were settled by the reciprocity treaty of 1854. The United States gave notice, 17 March, 1865, of the abrogation of this treaty, which terminated in pursuance of that notice, 17 March, 1866. In consequence of disputes which arose in 1870, the subject was included in the treaty of Washington, 1871, the fisheries provisions of which took effect 1 July, 1873. By that treaty the fisheries of both countries were opened equally to the citizens of both; but it was agreed to submit the question of the difference of value, in the respective concessions, to arbitration. This commission met at Halifax, Nova Scotia, in 1877, and awarded to Great Britain the sum of \$5,600,000. The justice of this decision was stoutly disputed in the United States; but congress promptly made the necessary appropriation, and the money was paid in London by the American minister, 23 Nov. 1878. In making the payment the United States fled a protest against the award as excessive.

The following table shows the total tonnage of the United States whale and cod and mackerel fisheries, in the several years named, since 1789:

Fishguard (Pembroke). On 22 Feb. 1797, 1400 Frenchmen landed in Cardigan bay. On 24 Feb. they surrendered to lord Cawdor with the Castlemartin yeomanry, and some countrymen, armed with scythes and pitchforks, near Fishguard.

Fitzwilliam Museum (Cambridge), founded by Richard viscount Fitzwilliam, who died in 1816, and bequeathed his collection of books, pictures, etc., to the university, with 100,000*l.* to erect a building to contain them. The building was begun by G. Basevi in 1837, and finished by Cockerell some years after.

Fiume (meaning river), the port of the kingdom of Hungary, on the Adriatic: a very ancient town, built on the supposed site of Tersatica, destroyed by Charlemagne about 799, and afterwards known as Vitopolis, Civita Sancti Viti ad Flumen, and finally Fiume. After being successively subjected to the Greeks, Romans, the Eastern emperors, and the pope, it was transferred to the house of Austria. It was captured by the French early in the century, from whom it was taken by the English in 1813, and given to Austria in 1814. It was transferred to Hungary in 1822; to the Croats in 1848; restored to Hungary in 1868. A new port and railways have been recently constructed (1877).

Five Forks, near Richmond, Va. Here gen. Sheridan turned the front of the confederates and defeated them after a fierce struggle, 1 April, 1865.

Five Hundred, COUNCIL OF, established by the new French constitution, 22 Aug. 1795, was unceremoniously dissolved by Napoleon Bonaparte, 10 Nov. 1799.

Five Mile Act, 17 Chas. II. c. 2 (Oct. 1665), forbade nonconformist teachers who refused to take the non-resistance oath to come within five miles of any corporation where they had preached since the Act of Oblivion (unless they were travelling), under the penalty of 40*l.* They were relieved by Will. III. in 1689.

Fladenheim, or FLATHEIM, Saxony. Here Rodolph of Swabia defeated the emperor Henry IV., 27 Jan. 1080.

Flag. The flag acquired its present form in the sixteenth century, in Spain; it was previously small and square.—*Ashe*. It is said to have been introduced there by the Saracens, before whose time the ensigns of war were extended on cross-pieces of wood; see *Carroccium*. The honor-of-the-flag salute at sea was exacted by England from very early times; but it was formally yielded by the Dutch in 1673, at which period they had been defeated in many actions. Louis XIV. obliged the Spaniards to lower their flag to the French, 1680.—*Hénault*. After an engagement of three hours between Tourville and the Spanish admiral Papachin, the latter yielded by firing a salute of nine guns to the French flag, 2 June, 1688.—*Idem*. The earliest legislation concerning the United States flag was a resolution of congress, 14 June, 1777, "that the flag of the 13 United States be 13 stripes alternate red and white; that the union be 13 stars, white in a blue field, representing the new constellation." This flag was first raised by Paul Jones on the *Ranger*. In 1794 it was resolved in congress that after May 1, 1795, "the flag of the United States be 15 stripes alternate, red and white, and that the union be 15 stars, white in a blue field." In 1816 a committee was appointed to inquire into the expediency of changing the flag, and April 4, 1818, a bill was approved by the president reducing the number of stripes to 13, and increasing the number of stars to represent at all times the number of states in the union; see *Salute at Sea* and *Union Jack*.

The comte de Chambord definitively declined to give up the white flag for the tricolor (see *France*), 5 July, 1871, and 27 Oct. 1873.

Flagellants, at Prouse, about 1268, during a plague, they maintained there was no remission of sins without flagellation, and publicly lashed themselves. Clement VI. declared them heretics in 1349; and 90 of them, and their leader, Conrad Schmidt, were burned, 1414. In

1574, Henry III. of France became a flagellant for a short time.

Flageolet, a musical instrument said to have been invented by Juvigny, about 1581; double flageolet patented by William Bainbridge, 1803; improved 1809 and 1819.

Flanders, the principal part of ancient Belgium, which was conquered by Julius Cæsar, 51 B.C. It became part of the kingdom of France, A.D. 843, and was governed by counts subject to the king, from 862 till 1369, the first being Baldwin, *Bras de Fer*, who is said to have introduced the cloth manufacture. In 1204, Baldwin IX. became emperor at Constantinople. In 1369, Philip, duke of Burgundy, married Margaret, the heiress of count Louis II. After this, Flanders was subjected successively to Burgundy (1384), Austria (1477), and Spain (1555). In 1580 it declared its independence, but afterwards returned to its allegiance to the house of Austria. In 1713 it was included in the empire of Germany. France obtained a part of Flanders by treaty in 1659 and 1679; see *Burgundy*, *Netherlands*, and *Belgium*.

Flax. The manufacture in Egypt in very early times was carried thence to Tyre about 588 B.C., and to Gaul about 1 B.C.; and thus reached Britain. It was ordered to be grown in England, by statute 24 Hen. VIII. 1533. For many ages the core was separated from the flax, the bark of the plant, by the hand. A mallet was next used; but the old methods of breaking and scutching the flax yielded to a water-mill which was invented in Scotland about 1750; see *Hemp*. The duty imposed on imported flax, 1842, was repealed 1845. In 1851 chevalier Claussen patented a method of "cottoning" flax.

Fleet Prison, Market, etc. (London), were built over the small river Fleta, now used as a common sewer. In the reign of Henry VII. this river is said to have been navigable to Holborn bridge.

FLEET PRISON was founded in the first year of Richard I., and was allotted for debtors, 1640; and persons were committed here who had incurred the displeasure of the Star-chamber, and for contempt of the court of chancery. It was burned during the Gordon riots, 7 June, 1780, and rebuilt 1781-2. It was pulled down in 1845 (and the debtors removed to the Queen's Bench prison). The site was sold to the London, Dover, and Chatham railway company for 60,000*l.* on 2 June, 1864. Last vestige removed..... Feb. 1868

FLEET MARKET, originally formed in 1737, was removed, and the site named Farringdon street in 1829. A new (Farringdon) market was opened 20 Nov. 1829. The granite obelisk in Fleet street, to the memory of alderman Waitman, was erected..... 25 June, 1833

FLEET MARRIAGES. Between 19 Oct. 1704, and 12 Feb. 1705, there were celebrated 295 marriages in the Fleet without license or certificate of banns. 20 or 30 couples were sometimes joined in one day, and their names concealed by private marks, if they chose to pay an extra fee. Pennant says that in his youth he was often accosted with, "Sir, will you please to walk in and be married?" Painted signs, of male and female hands conjoined, with the inscription, "Marriages performed within," were common along the building.

This abuse abolished by the Marriage act..... 1753

Flies. An extraordinary fall of these insects in London covered the clothes of passengers, 1707.—*Chamberlain*. In the United States of America the *Hessian fly*, so called from the notion of its having been brought there by the Hessian troops in the service of England in the war of independence, ravaged the wheat in 1777. Before and during the severe attack of cholera at Newcastle in Sept. 1853, the air was infested with small flies.

Flodden Field (Northumberland). The site of a battle on 9 Sept. 1513, between the English and Scots; in consequence of James IV. of Scotland having taken part with Louis XII. of France against Henry VIII. of England. James, many of his nobles, and upwards of 10,000 of his army were slain; while the English, who were commanded by the earl of Surrey, lost only persons of small note.

Flogging, by the Jewish law, was limited to forty stripes, "lest thy brother should seem vile unto thee," 1451 B.C. (Deut. xxv. 3). William Cobbett in 1810, and John Drakard in 1811, were punished for publishing severe censures on flogging in the army. Flogging was made a punishment for attempts at garroting in 1863; and for juvenile criminals, 1847 and 1850.

Flogging in the army much diminished by orders. 9 Nov. 1859

Floral Hall, adjoining Covent-garden theatre, is a large conservatory, 220 feet long, 75 feet wide, and 55 feet high, erected from designs by Mr. E. M. Barry, and was opened with the volunteers' ball, 7 March, 1860. It was used as a flower-market, 22 May-Aug. 1861. Here was held the West London Industrial Exhibition, 1 May to 2 Aug. 1865.

Floralia, annual games at Rome in honor of Flora, instituted about 752, but not celebrated with regularity till about 174 B.C.

Florence (*Florentia*), capital of Tuscany (which see), and from 1864 to 1870 of Italy, is said to have been founded by the soldiers of Sylla (80 B.C.), and enlarged by the Roman triumviri. In its palaces, universities,

academies, churches, and libraries are to be found the rarest works of sculpture and painting in the world. The Florentine Academy and *Accademia della Crusca* (established 1582) were instituted to enrich literature and improve the language of Tuscany. The latter was so named because it rejects like *bran* all words not purely Tuscan: both are now united under the former name.

Flores, or Isle of Flowers, one of the Azores (which see), discovered by Vanderberg in 1439, and settled by the Portuguese in 1448.

Florida, a peninsula, one of the southern states of North America, first discovered by Sebastian Cabot in 1497. It was visited by Juan Ponce de Leon, the Spanish navigator, 4 April, 1512, in a voyage he had undertaken to discover a fountain whose waters had the property of restoring youth to the aged who tasted them. Florida was conquered by the Spaniards under Ferdinand de Soto in 1539; but the settlement was not fully established until 1565. It was plundered by sir Francis Drake in 1585; and by Davis, a buccaneer, in 1665. It was invaded by the British in 1702, and again by gen. Oglethorpe in 1740; ceded to the British crown in 1763; taken by the Spaniards in 1781, and guaranteed to them in 1783. At the revolution in 1810, the United States government took means for occupying the western division of the country. During the war of 1812-15, the British made Pensacola their base of operations against the United States; and after remonstrating in vain with the Spanish authorities, gen. Jackson invaded Florida and captured Pensacola, 1814. He again took Pensacola in 1818, and after a tedious negotiation, the country was finally ceded by Spain to the United States by treaty, 24 Oct. 1820, and admitted into the Union as a state in 1845. It seceded in Dec. 1860, and was restored in 1865; see *United States*.

Florin, a coin first made by the Florentines. A *florin* was issued by Edward III., which was current in England at the value of 6s. in 1337.—*Camden*. This English coin was called floren, after the Florentine coin, because the latter was of the best gold.—*Ashe*. The florin of Germany is in value 2s. 4d.; that of Spain, 4s. 4½d.; that of Palermo and Sicily, 2s. 6d.; that of Holland, 2s.—*Ayliffe*. Silver florins (value 2s.) were issued in England in 1849.

Flowers. Our present common flowers were, for the most part, introduced into England from the reign of Henry VII. to that of Elizabeth (1485-1603). The art of preserving flowers in sand was discovered in 1638. A mode of preserving them from the effects of frost in winter, and hastening their vegetation in summer, was in-

vented in America by George Morris, in 1792. A very great number have been introduced from America, Australia, the Cape, etc., during the present century.

Fluorescence. When the invisible chemical rays of the blue end of the solar spectrum are sent through uranium glass or solutions of quinine, horse-chestnut bark, or stramonium datura, they become luminous. This phenomenon was termed "fluorescence" by its discoverer, prof. Stokes, in 1852. By means of fluorescence, Drs. Bence Jones and Dupré detected the presence of quinoidine in animal tissues; see *Calorescence*.

Fluorine, a gaseous element obtained from fluor spar; first collected over mercury by Priestley. Its property of corroding all vessels is so great that it is separated with great difficulty. It was named by Ampère in 1810. Its chemical history was further elucidated by Davy (1809), Berzelius (1824), and succeeding chemists. The corroding property of fluoric acid was employed in the arts in 1760 by Schwankhard of Nuremberg.—*Gmelin*.

Flushing, a sea-port of the Netherlands, on the isle of Walcheren. For the siege, see *Walcheren Expedition*. It was fortified by Napoleon I., but the works were finally dismantled in 1867. The port improved, and new dock opened by the king of Holland, 8 Sept. 1873.

Flute. The transverse flute, incorrectly termed the "German" instead of the Swiss flute, was known to the ancients. It was described by Michael Pretorius of Wolfenbüttel in 1620, and by Mersenne of Paris in 1636. It was much improved by the French in the seventeenth century; by Quantz, Tacet, Florio, Potter, Miller, Nicholson, and others in the eighteenth. In the present century, also, the Nicholsons, Boehm of Munich, Godfrey of Paris, Carter, Rockstro, and Rudall and Rose of London, have greatly contributed to the perfection of this instrument; see *Flageolet*.

Fluxions, a branch of the higher mathematics, invented by Newton, 1665, similar to the differential calculus described by Leibnitz, 1684. A fierce controversy ensued as to the priority of the discovery. The finest applications of the calculus are by Newton, Euler, La Grange, and La Place. The first elementary work on fluxions in England is a tract of twenty-two pages in "A New Short Treatise of Algebra, together with a Specimen of the Nature and Algorithm of Fluxions," by John Harris, M.A. (London, 1702).

Flying, ARTIFICIAL. In Greek mythology, Dædalus is said to have attached wings of wax to the body of his son Icarus, who, neglecting the advice of his father, flew so high that the sun melted his wings, and he fell into the Icarian sea. Archytas is said to have made a flying dove, about 400 B.C. Friar Bacon maintained the possibility of the art of flying, and predicted it would be a general practice, 1273. Bishop Wilkins says (1651), "It will yet be as usual to hear a man call for his wings when he is going on a journey as it is now to hear him call for his boots!" Borelli (about 1670) showed the futility of these speculations. About 1800, sir George Cayley experimented on the subject, and in 1848 Mr. Henson invented a flying-machine; but nothing has been devised capable of serving a practical purpose. The motion of birds in relation to aeronautics was much discussed by scientific men in 1867-8. At a meeting of the Aeronautical Society, 26 March, 1868, it was stated that a member had actually, by his muscular force, aided by apparatus, risen from the ground and flown horizontally. Dr. James Pettigrew published his elaborate researches on flying, 1867-71. M. Von Groof, a Belgian, "the flying-man," descended from a balloon, by means of a para-

chute resembling wings, in 1874; but was killed by falling, through failure of his apparatus, at Chelsea, 9 July.

Mr. Simmonds tried his flying-machine (combining an umbrella and kite) at Chatham, and failed: it carried sand-bags about 100 feet high; and fell, 15 Dec. It failed again.....23 Dec. 1875

Fô, RELIGION OF, the form of Buddhism (*which see*) existing in China.

Fog. In 1862, much attention was paid to the subject of fog-signals by the Royal Commission on Light-houses, etc. The use of bells, steam-trumpets, a battery of whistles blown by steam, the transmission of sound through water, the siren, etc., were considered. A fog-horn blown by steam is in use at Dungeness light-house (1869). For Dr. Tyndall's experiments, see *Acoustics*.

Continued thick fog in London, Nov. 1879, to Feb. 1880, caused much mortality; very bad on.....25 Dec. 1879

Foix (S. France), a county established 1050, and united with Béarn, 1290. About 1494 Catherine de Foix, the heiress, married Jean d'Albret, whose descendant, Henry IV., as king of France, united Foix to the monarchy, 1589.

Folk-lore, a general name given by Mr. W. J. Thoms, in 1846, to popular legends, fairy tales, local traditions, old outlying customs, superstitions, and similar matters. The formation of the Folk-lore Society was proposed by Mr. W. J. Thoms, in *Notes and Queries*, 1 Dec. 1877; established in 1878.

Font. Formerly the baptistery was a small place partitioned off in a church, within which a large font was placed, where the persons to be baptized (frequently adults) were submerged. Previously, lakes and rivers were resorted to for immersion. Fonts are said to have been set up in churches in the sixth century.

Fontainebleau, near the Seine, France. The royal palace, founded by Robert le Pieux about 999, enlarged and adorned by successive kings, was completed by Louis Philippe, 1837-40. Fontainebleau was entered by the Austrians, 17 Feb. 1814. Here Napoleon resigned his dignity, 4 April, and bade farewell to his army, 20 April, 1814.

Fontenaille, or FONTENAY (*Fontanetum*), a village in Burgundy. Near here Charles the Bald and Louis the German totally defeated their brother, the emperor Lothaire I., 25 June, 841. This victory, termed "the judgment of God," conduced to the formation of the French monarchy.

Fontenoy, near Tournay, in Belgium, the site of an obstinate sanguinary battle, on 30 April (11 May, n.s.), 1745, between the French, commanded by marshal Saxe, and the English, Hanoverians, Dutch, and Austrians, commanded by the duke of Cumberland. The king, Louis XV., and the dauphin were present. The success of the British at the commencement is still quoted as an illustration of the extraordinary power of a column; and the advance of the Austrians during several hours at Marengo (14 June, 1800) was compared to it by Bonaparte. The allies lost 12,000 men, and the French nearly an equal number; but the allies were compelled to retire. Marshal Saxe (ill of the disorder of which he afterwards died) was carried about to all the posts in a litter, assuring his troops that the day would be their own.

Fonthill Abbey, Wiltshire, founded in 1796, the mansion of William Beckford, author of "Vathek," and son of alderman Beckford. He died 2 May, 1844. Within this edifice (which alone cost 273,000*l.*) were collected costly articles of virtù and art, and the rarest works of the old masters. The sale of the abbey and

its contents to Mr. Farquhar took place in 1822; 7200 catalogues, at a guinea each, were sold in a few days. On 21 Dec. 1825, the lofty tower fell, and in consequence the remaining buildings were sold.

Food, see *Provisions*. A *Food Journal* published 1870; continued several years. Sale of Food and Drugs act passed 11 Aug. 1875. Dr. Arthur Hill Hassall's "Food and its Adulterations" published 1854, and since. International Food Exhibition at Agricultural Hall, Islington, 13-20 Oct. 1880.

Fools, FESTIVALS OF, were held at Paris on the 1st of January, when, we are told, all sorts of absurdities were committed, from 1198 to 1438. Fools or licensed jesters were kept at court in England up to the time of Charles I., 1625. The "Order of Fools," founded by Adolphus, count of Cleves, for philanthropic purposes, 1381, existed in 1520.

Foot and Mouth Disease, see *Cattle*.

Forbes Mackenzie's Act (16 & 17 Vict. c. 67), "for the better regulation of public-houses in Scotland," passed in 1853. It permits grocers to sell spirits, etc., as usual, but forbids drinking on the premises, which is to be confined to places duly licensed. Much dram-drinking previously took place in grocers' shops.

Foreign Cattle Market. The city of London having been required to provide this market before 1 Jan. 1872, by the Contagious Diseases act (for animals), 1869, the common council, 7 Nov. 1870, agreed to the expenditure of 160,000*l.* for the purpose. The site chosen, Deptford dockyard, was much opposed. The requisite alterations were made by Mr. Horace Jones, and the market was formally opened by the lord mayor, 28 Dec. 1871; for use on 1 Jan. 1872.

Foreign Enlistment Act, 59 Geo. III. c. 69 (1819), forbids British subjects to enter the service of a foreign state, without license from the king or privy council, and prohibits the fitting out or equipping ships for any foreign power to be employed against any power with which our government is at peace; see *Trials*, 1862, 1863. In 1606, Englishmen were forbidden to enter foreign service without taking an oath not to be reconciled to the pope. The act was suspended in 1835 on behalf of the *British Legion (which see)*. The act passed 9 Aug. 1870, relates to illegal enlisting, ship-building, and expeditions.

Foreign Jurisdiction Acts, passed in 1843, 1865, and 1866, were extended and amended by 41 & 42 Vict. c. 67, passed 16 Aug. 1878.

Foreign Legion. Foreigners have frequently been employed as auxiliaries in the pay of the British government; see *Hessians*. An act (18 & 19 Vict. c. 2) for the formation of a foreign legion as a contingent in the Russian war (1855) was passed 23 Dec. 1854.* The queen and prince Albert reviewed 3500 soldiers, principally Swiss and Germans, at Shorncliffe, 9 Aug. 1855. On the peace in 1856, many were sent to the Cape of Good Hope; but, not prospering, returned.

Foreign Office was established at the rearrangement of the duties of secretaries of state in 1782. It has the exclusive charge of British interests and subjects in foreign countries. The secretary for foreign affairs negotiates treaties, selects ambassadors, consuls, etc., for foreign countries, and grants passports. The new Foreign Office building, in the Italian style (designed by sir Gilbert Scott), was begun in 1864. A portion of it was inaugurated by Mr. Disraeli's reception, 25 March,

* The endeavor to enlist for this legion, in 1854, in the United States, gave great offence to the United States government. Mr. Crampton, our envoy, was dismissed, 28 May, 1856, in spite of all the judicious pacific efforts of lord Clarendon. Lord Napier was sent out as our representative in 1867.

and it was occupied by lord Stanley, 24 June, 1868. See *Administrations* under separate heads, and *Secretaries*.

Foreign Orders. No British subject is permitted to accept a foreign order from the sovereign of any foreign country, or wear the insignia thereof, without her majesty's consent, by orders issued in 1812 and 1834: regulations published in *London Gazette*, 10 May, 1855.

Foreigners, see *Alien*.

Forestalling was forbidden by statutes (in 1350, 1552, etc.), all repealed in 1844.

Foresters, ANCIENT ORDER OF, a species of benefit society, founded on the principle that many can help one; all religious and political discussions are strictly avoided. About 500,000 members. Meeting of high court, Edinburgh, 7 Aug. 1876; at Newcastle-on-Tyne. Aug. 1878.

Forests. There were in England, even in the last century, as many as 68 forests, 18 chases, and upwards of 780 parks; see *New Forest*.*

Forests, CHARTER OF THE, *Charta de Foresta*, granted by Henry III. in 1217, was founded on *Magna Charta*, granted by king John, 15 June, 1215. It was confirmed in 1225 and 1297. See *Woods*.

Forfarshire Steamer, on its passage from Hull to Dundee, on 6 Sept. 1838, was wrecked in a violent gale, and thirty-eight persons out of fifty-three perished. The Outer-Fern lighthouse-keeper, James Darling, and his heroic daughter Grace, ventured out in a tremendous sea in a coble, and rescued several of the passengers..

Forgery of deeds, or giving forged deeds in evidence, was made punishable by fine, by standing in the pillory, having both ears cut off, the nostrils slit up and seared, the forfeiture of land, and perpetual imprisonment, 5 Eliz. 1562. Since the establishment of paper credit many statutes have been enacted; the latest Forgery act passed 9 Aug. 1870.

Forgery first made punishable by death	1634
Forging letters of attorney made capital	1722
Mr. Ward, M.P., a man of wealth, expelled the house of commons for forgery, 16 May, 1726; and consigned to the pillory	17 March, 1727
The first forger on the Bank of England was Richard William Vaughan, once a linen-draper of Stafford. He employed a number of artists on different parts of the notes fabricated. He filled up twenty of the notes and deposited them in the hands of a young lady whom he was on the point of marrying, as a proof of his being a man of substance; no suspicion was entertained. One of the artists informed, and Vaughan was executed at Tyburn	1 May, 1758
Value of forged notes presented to the bank 1801-10 nominally 101,661 <i>l</i> .	
The bank prosecuted 142 persons for forgery or the uttering of forged notes	1817
Thos. Maynard, the last person executed for forgery, 31 Dec. 1829	
Statutes reducing into one act all such forgeries as shall henceforth be punished with death	1830
The punishment of forgery with death ceases, except in cases of forging or altering wills, or powers of attorney to transfer stock	1832
These cases also reduced to transportable offences	1837
A barrister, Jem Seward, and others, tried for forging numerous drafts on bankers	5 March, 1857

* The commissioners appointed to inquire into the state of the woods and forests, between 1787 and 1793, reported the following as belonging to the crown, viz.: In Berkshire, Windsor Forest and Windsor Great and Little Park. In Dorset, Cranburn Chase. In Essex, Waltham or Epping and Hainault Forest. In Gloucestershire, Dean Forest. In Hampshire, the New Forest, Alice Holt, Woolmer Forest, and Bere Forest. In Kent, Greenwich Park. In Middlesex, St. James's, Hyde, Bushey, and Hampton Court parks. In Northamptonshire, the forests of Whittlebury, Salecy, and Rockingham. In Nottingham, Sherwood Forest. In Oxford, Whichwood Forest. In Surrey, Richmond Park. Several of these have been disforested since 1851, viz.: Hainault, Whichwood, and Whittlebury. A committee of the house of commons respecting forests sat in 1863. Motion in parliament to preserve *Epping Forest* adopted 14 Feb. 1870; and the decision of the master of the rolls, 10 Nov. 1874, stopped the enclosures by the lords of manors. The lord mayor Stone visited the forest in state, 14 Oct. 1875. The commissioners' new scheme was published, July, 1876. *Memorial trees* were planted by the duke and duchess of Connaught, 16 Oct. 1880.

Forks were in use on the continent in the thirteenth and fourteenth centuries.—*Voltaire*. This is reasonably disputed. In Fynes Moryson's "Itinerary," reign of Elizabeth, he says, "At Venice each person was served (besides his knife and spoon) with a fork to hold the meat while he cuts it, for there they deem it ill manners that one should touch it with his hand." Thomas Corvate describes, with much solemnity, the manner of using forks in Italy, and adds, "I myself have thought it good to imitate the Italian fashion since I came home to England," 1608. Two-pronged forks were made at Sheffield soon after. Three-pronged forks are more recent. Silver forks, previously only used by the highest classes, came into more general use in England about 1814.

Mr. G. Smith found a bronze fork with two prongs at Kouyunjik, Assyria, 1873.
A "flesh-hook of three teeth" mentioned 1 Sam. ii. 13, about 1165 B.C.

Forma Pauperis. A person having a just cause of suit, certified as such, yet so poor that he cannot meet the cost of maintaining it, has an attorney and counsel assigned him on his swearing that he is not worth 5*l*., by statute 11 Henry VII., 1495. This act has been remodelled, and now any person may plead in *forma pauperis* in the courts of law.

Formic Acid, the acid of ants (*formice*). Its artificial production by Pelouze in 1831 was considered an event in the progress of organic chemistry.

Formosa, an island in the Pacific, 90 miles from the Chinese coast. In May, 1874, the Japanese, with the consent of a Chinese mandarin, chastised the savage tribes here for massacring Japanese sailors on their proposed settlement on the isle. The Chinese threatened war if they did not quit within 90 days, 18 Aug. 1874. By British interposition the Japanese withdrew, an indemnity having been agreed on; treaty between Japan and China signed 31 Oct. 1874. Formosa flourished under the rule of Ting; removed in 1878. The plant of the Woosung railway brought here in 1878. George Psalmanazar published his fabricated description of Formosa in 1704.

Fornovo (Parma, Italy). Near here Charles VIII. of France defeated the Italians, 6 July, 1495.

Forster's Act, see *Education*, 1870.

Fort Donelson (Tennessee). This fort, built by the confederates, near the beginning of the war, on the Cumberland river, east of Fort Henry, was designed, in connection with the latter, to prevent an approach to Nashville and into the interior of the confederacy. Its importance was not appreciated by the confederates, who expected that the national troops would in 1862 advance into East Tennessee. Fort Henry was captured 6 Feb., and the surrender of Donelson to gen. Grant took place on the 16th. The naval attack made by commodore Foote on the 14th was repulsed. A battle was fought on the 15th, in which an attempt was made by the garrison to cut its way through Grant's line of investment. The attack was made on the national right with great success at first; but the advantages gained were not followed up, and on the 16th the fort was surrendered, with 10,000 prisoners and 40 guns. The garrison numbered on the 15th about 18,000 men. Of these over 2000 were killed or wounded, and a large number escaped by the river, among them generals Floyd, Pillow, and Forrest. The defence was mismanaged. The national loss was about 2000; the confederate somewhat larger. The immediate results of the surrender of Donelson were the confederate evacuation of Nashville and Columbus.

Fort Duquesne (North America). Near here gen. Braddock was surprised by a party of French and Indians, his troops routed and himself killed, 9 July, 1755. The fort was named *Fort Pitt* after its capture by Forbes, 24 Nov. 1758. It is now *Pittsburgh*.

Fort Erie (Upper Canada). This fortress was taken by the United States forces under gen. Browne, 3 June, 1814. After several conflicts it was evacuated, 5 Nov. 1814.

Fort George (Inverness, N.W. Scotland) was erected in 1747, to restrain the Highlanders.—FORT WILLIAM, besieged by them in vain in 1746, is now in ruins.

Fort Henry (Tennessee). This fort, situated on the Tennessee river, was captured by gen. U. S. Grant and commodore A. H. Foote, 6 Feb. 1862. The attacking fleet consisted of seven gunboats, four of which were iron-clad. Gen. Grant, with 11 regiments, co-operated with Foote by a movement to the rear of the fort, which led gen. Tilghman, commanding the post, to send the main portion of his command—about 3000 men—to Fort Donelson, retaining 83 in the fort to contend with the gunboats. Twenty-one of these were killed or wounded, and the remainder, including Tilghman, were captured with the fort. Seventeen guns were captured.

Fort Sumter IN THE WAR OF THE AMERICAN REBELLION. This fort is situated in Charleston harbor, nearly midway between Sullivan and Morris islands, and $8\frac{1}{2}$ miles from Charleston city. It was originally a casemated brick work of five faces, designed to mount two tiers of guns in embrasure and *en barbette*. In the spring of 1861 major Robert Anderson commanded the national works in Charleston harbor. This officer, in view of the secession of South Carolina (20 Dec. 1860), and of the preparations being made by the military forces in that state to seize the forts in the harbor, evacuated Fort Moultrie on the night of 26 Dec., and occupied Fort Sumter with his command. The *Star of the West*, in an attempt to reinforce Sumter, was fired upon off Morris Island (9 Jan. 1861), and obliged to return to New York. For four months preparations were made by the confederate forces at Charleston—numbering 7000 men, and commanded by gen. G. T. Beauregard—for an attack on Fort Sumter. On 11 April Beauregard demanded the surrender of the fort, which demand was refused by major Anderson. That night the relieving flotilla reached the offing; and at 3.20 A.M. on the 12th, Anderson was notified that fire would be opened upon him in one hour. At the time appointed the bombardment of Fort Sumter commenced from Fort Moultrie, two batteries at Fort Johnson, an iron-clad battery on Cumming's Point, another near Charleston, and other works, which had been constructed within range. The first gun was fired by Edmund Ruffin, an aged Virginian. After about three hours this fire was replied to by the garrison. Three times during the day the quarters were set on fire by the shells. At noon the relieving fleet was discerned from the fort and saluted. The bombardment was continued till dark, and renewed on the 13th. It was impossible for reinforcements to reach the fort. The fires in the quarters again broke out, and the fort being untenable, major Anderson surrendered it to the confederates, and the next day evacuated the work, lowering his flag with a salute, and, with the garrison, sailed northward. In this first conflict of the rebellion there were no casualties on either side. On 7 April, 1863, an attempt was made by admiral Dupont, with a fleet of monitors, to reduce Fort Sumter, but failed on account of obstructions in the harbor, which prevented the vessels from reaching the weakest side of the fort. In this attack the monitor *Kearsage* was sunk, and other vessels of the fleet sustained serious injuries. The bombardment was renewed by admiral Dahlgren after the occupation of Morris Island in the summer of 1863, and the fort, though reduced to an earthwork, and rendered temporarily harmless as an offensive work, was not captured. The fort was held by the confederates until they evacuated the city of Charleston, 17 Feb. 1865. On 14 April,

1865, the old flag, which had been lowered by major Anderson four years before, was again raised above the fort.

Forth and Clyde Canal, commenced 10 July, 1768, under the direction of Mr. Smeaton, and opened 28 July, 1790. A communication was thus formed between the eastern and western seas on the coast of Scotland.

A railway bridge across the Firth of Forth projected, and a raft launched in June, 1866.

Mr. (afterwards sir) T. Bouch, of Edinburgh, was engaged to prepare plans for a suspension bridge, 1878.

The Forth Bridge company accepted tenders from Wm. Arrol & Co. (£1,250,000) for constructing bridge and railway, Oct. 1879; through Tay-bridge disaster, etc., the scheme was suspended and eventually abandoned by the company, 13 Jan. 1881.

Fortification. The Phenicians were the first people to fortify cities. Apollodorus says that Perseus fortified Mycenæ, where statues were afterwards erected to him. The modern system was introduced about 1500. Albert Dürer wrote on fortification in 1527; and great improvements were made by Vauban, who fortified many places in France; he died 1707. The new fortifications of Paris were completed in 1846; see *Paris*. In Aug. 1860, the British parliament passed an act for the expenditure of 2,000,000*l.* in one year upon the fortifications of Portsmouth, Plymouth, Pembroke, and Portland, the Thames, Medway, and Sheerness, Chatham, Dover, and Cork, and on the purchase of a central arsenal establishment; the estimated expense being 9,500,000*l.* A committee to investigate our fortifications was appointed, 16 April, 1868.

Fortune-telling is traced to the early astrologers, by whom the planets Jupiter and Venus were supposed to betoken happiness. The Sibyllæ were women said to be inspired by Heaven; see *Sibyls* and *Gipsies*. In England the laws against fortune-telling were at one time very severe. A declaration was published in France, 11 Jan. 1680, of exceeding severity against fortune-tellers and poisoners, under which several persons suffered death. —*Hénault*. Fortune-tellers, although liable by the acts of 1743 and 1824 to be imprisoned as rogues and vagabonds, still exist in England.

Forty-shilling Freeholders, see *Freeholders*.

Forum, at Rome, originally a market-place, became about 472 B.C. the place of assembly of the people in their tribes (the *Comitia*), and was gradually adorned with temples and public buildings.—Near FORUM TREBONII, in Mæsia, the Romans were defeated by the Goths, Nov. 251. After a struggle in the morass, the emperor Decius and his son were slain and their bodies not recovered.

Fossalta, near Bologna, central Italy. Here Enzo or Enrico, titular king of Sardinia, natural son of the emperor Frederick II., was defeated and made prisoner, 26 May, 1219, and retained. He was kept in honorable captivity till his death, 14 March, 1272.

Fotheringhay Castle (Northamptonshire), built about 1400. Here Richard III. of England was born in 1450; and here Mary queen of Scots was tried, 11-14 Oct. 1586, and beheaded, 8 Feb. 1587. It was demolished by her son, James I. of England, in 1604.

Foughard, near Dundalk, N. Ireland. Here Edward, brother of Robert Bruce, after invading Ireland in 1315, was defeated by sir John Bermingham, 5 Oct. 1318. Bruce was killed by Roger de Maupin, a burgess of Dundalk.

Foundling-hospitals are ancient. A species of foundling-hospital was set up at Milan in 787, and in the middle ages most of the principal cities of the continent possessed one. The French government in 1790 declared foundlings to be the "children of the state."

No founding-hospital in England when Addison wrote in 1713
 London founding-hospital, projected by Thomas Coram,
 a sea-captain, incorporated Oct. 1739; opened, 3 June, 1756
 Handel gave an organ; opened it, 1 May, 1750
 It succors about 500 infant children; Coram's statue was
 put up in, 1866
 Foundling-hospital in Dublin instituted in 1704. Owing
 to great mortality, and from moral considerations, the
 internal department was closed by order of govern-
 ment, 31 March, 1835
 Foundling-hospital at Moscow, founded by Catherine II.
 in 1772; about 12,000 children are received annually.

Fountains. The fountain of Hero of Alexandria
 was invented about 150 B.C. Among the remarkable
 fountains at Rome are the Fontana di Trevi, constructed
 for pope Clement XII. in 1735; the Fontana Paolina,
 erected for pope Paul V. in 1612; and Fontana dell'
 Acqua Felice, called also the Fountain of Moses. The
 fountains in the palace gardens at Versailles, made for
 Louis XIV., and the Grand Jet d'Eau at St. Cloud, are
 exceedingly beautiful. There are above 100 public foun-
 tains in Paris, the most striking being the Château d'Eau
 on the Boulevard St. Martin (by Girard, 1811) and that
 at the Palais Royal. London is not remarkable for
 fountains; the largest are in Trafalgar square, constructed
 in 1845, after designs by sir Charles Barry. There are
 beautiful fountains at Chatsworth, in Derbyshire, the
 seat of the duke of Devonshire. The magnificent foun-
 tains at the Crystal Palace, Sydenham, were first publicly
 exhibited on 18 June, 1856, in the presence of the queen
 and 20,000 spectators.

The fountain at Park lane, London, W., the gift of Mrs. Brown,
 was inaugurated and uncovered, 9 July, 1875. It has statues
 of Chaucer, Shakespeare, and Milton, the work of Mr. Thomas
 Croft, and cost 5000*l*.

Fourierism, a social system devised by M. Charles
 Fourier (who died in 1837). The Phalanstery (from *pha-*
lax), an association of 400 families living in one edifice,
 was to be so arranged as to give the highest amount of
 happiness at the lowest cost. The system failed; caused,
 it is said, by the smallness of the scale on which it was
 tried.

"**Four Masters**," a name given to Michael, Cona-
 ry, and Cucogry O'Clery, and Ferfeasa O'Mulconry, who
 compiled from original documents the annals of Ireland
 from 2242 B.C. to A.D. 1616. An edition of these "*Ann-*
als," printed from autograph MSS., with a translation
 edited by Dr. John O'Donovan, was published at Dublin
 in 1851. The "Four Masters" lived in the first half of
 the seventeenth century.

Fourth Party, a name facetiously given to lord
 Randolph Churchill, sir Henry Wolf, Mr. Gorst, and a
 few other conservative members, active opponents of
 the government; also termed "free lances." The other
 parties were liberals, conservatives, and home-rulers
 (1880-1).

ville Administration.

Foxglove (folks' or fairies' glove), a handsome in-
 digenous flower. The canary foxglove (*Digitalis Cana-*
riensis) came from the Canary islands, 1698. The Ma-
 deira foxglove came here in 1777. The fox-grape shrub

 Alfonso I. of Aragon, were defeated by the Moors, 17
 July, 1134.

Franc, the current silver French coin (value 10*l*.),
 superseded the *livre tournois* by law in 1795.

France, the Roman *Gaul* (which see). In the fifth
 century it was conquered by the Franks, a people of
 Germany, then inhabiting Franconia, where they became
 known about 240. The country was gradually named
Franken-ric, Franks' kingdom. For the dynastic changes,
 see list of sovereigns, *infra*. Previous to the revolution,
 France was divided into 40 governments. In 1790 it was
 divided into 83 departments, and subsequently into 130,
 including Corsica, Geneva, Savoy, and other places,

chiefly conquests. In 1815 the departments were re-
 duced to 86; in 1860 they were raised to 89 by the ac-
 quisition of Savoy and Nice,* reduced to 86 by the loss
 of Alsace and Lorraine. The political constitution has
 been frequently changed since 1789. For details of
 more important events, see separate articles.

France, Isle of, see *Mauritius*.

Franche-Comté, in upper Burgundy, E. France, was conquered by Julius Cæsar, about 45 B.C.; by the Burgundians, early in the fifth century A.D.; and by the Franks about 534. It was made a county for Hugh the Black in 915, and received its name from having been taken from Renaud III. (1127-48) and restored to him. By marriage with the count's daughter, Beatrice, the emperor Frederick I. acquired the county, 1156. Their descendant, Mary of Burgundy, by marriage with the archduke Maximilian, conveyed it to the house of Austria, 1477. It was conquered by the French, 1668; re-

stored by the treaty of Aix-la-Chapelle, 2 May, 1668; again conquered; and finally annexed to France by treaty, 1678.

Franchise. A privilege or exemption from ordinary jurisdiction, and anciently an asylum or sanctuary where the person was secure. In Spain, churches and monasteries were, until lately, franchises for criminals, as formerly in England; see *Sanctuaries*. In 1429, the ELECTIVE FRANCHISE for counties was restricted to persons having at least, 40s. a year in land, and resident; for recent changes, see *Reform*.

Franciscana. Gray or Minor Friars, an order founded by St. Francis d'Assisi about 1209. Their rules were chastity, poverty, obedience, and very austere regimen. About 1220 they appeared in England, where, at the time of the dissolution of monasteries by Henry VIII., they had 55 abbeys or other houses, 1536-8.

Francis's Assault on the Queen. John Francis, a youth, fired a pistol at queen Victoria as she was riding down Constitution hill, in an open barouche, accompanied by prince Albert, 30 May, 1842. The queen was uninjured. Previous intimation having reached the palace of the intention of the criminal, her majesty had commanded that none of the ladies of her court should attend her. Francis was condemned to death, 17 June, following, but was transported for life. He was liberated on ticket-of-leave in 1867.

Franconia, or FRANKENLAND (on the Maine), formerly a circle of the German empire, part of Thuringia, was conquered by Thierry, king of the Franks, 530, and colonized. Its count or duke, Conrad, was elected king of Germany, 912; and his descendant was the emperor Conrad III., elected 1138, and another duke. Franconia was made a distinct circle from Thuringia in 1512. At its subdivision in 1806 various German princes obtained a part; but in 1814 the largest share was awarded to Bavaria.

Franco-Prussian War originated in the French emperor's jealousy of the greatly increased power of Prussia, through the successful issue of the war with Denmark in 1864, and with Austria in 1866. The German Confederation was thereby annulled, and the North German Confederation established under the supremacy of the king of Prussia, to whose territories were further annexed Hanover, Hesse-Cassel, Nassau, Frankfurt, and other provinces. This great augmentation of the power of Prussia was mainly due to the energetic policy of count Bismarck-Schönhausen, prime minister since Sept. 1862.

In a draft treaty, secretly proposed to the Prussian government by the French emperor in 1866: "1. The emperor recognizes the acquisitions which Prussia has made in the last war; 2. The king of Prussia promises to facilitate the acquisition of Luxembourg by France; 3. The emperor will not oppose a federal union of the northern and southern states of Germany, excluding Austria; 4. The king of Prussia, in case the emperor should enter or conquer Belgium, will support him in arms against any opposing power; 5. They enter into an alliance offensive and defensive."

[This draft treaty was published in the *Times*, 25 July, 1870. After some discussion, its authenticity was admitted; count Bismarck asserting that it emanated entirely from the French emperor, and that the scheme had never been seriously entertained by himself.]

In March, 1867, a dispute arose through the French emperor's proposal for purchasing Luxembourg from the king of Holland, which was strongly opposed by Prussia, as that province had formed part of the dissolved Germanic Confederation; and the affair was only settled by a conference of the representatives of the great powers in London, at which the perfect neutrality of Luxembourg was determined, together with the withdrawal of the Prussian garrison and the destruction of the fortifications. . . . 7-11 May, 1867

Prince Leopold of Hohenzollern-Sigmaringen (connected with the Prussian dynasty, and brother of Charles, prince of Roumania), consented to become a candidate for the throne of Spain. . . . 4 July, 1870

This was denounced by the French government. Threatening speeches were made in the French chamber by the duc de Grammont, the foreign minister, and eventually, after some negotiation and the intervention of

Frankfort-on-the-Oder (N. Germany), a member of the Hanseatic league; suffered much from marauders in the middle ages and in the Thirty Years' war. The university was founded in 1506, and incorporated with that of Breslau in 1811. Near Frankfort, 12 Aug. 1759, Frederick of Prussia was defeated by the Russians and Austrians; see *Cunnersdorf*.

Franking Letters, passing letters free of postage, was claimed by parliament about 1660. The privilege was restricted in 1839, and abolished after the introduction of the uniform penny postage, 10 Jan. 1840. The queen was among the first to relinquish her privilege. The franking privilege in the United States formerly belonged to the president during life, and to senators and members of the house of representatives during their terms of office. The frank was abolished July 1, 1873; but certain classes of mail matter, chiefly relating to public business, may still be sent free in what are called penalty envelopes.

Franklin, the English freeholder in the middle ages; see "the Franklin's Tale" in Chaucer's "Canterbury Tales" (written about 1364).

Franklin, SEARCH FOR. Sir John Franklin, with caps. Crozier and Fitzjames, in H.M. ships *Arctus* and *Terror* (carrying in all 138 persons), sailed on his third arctic expedition of discovery and survey, from Greenwich, on 24 May, 1845; see *Northwest Passage*. Their last despatches were from the Whalefish islands, dated 12 July, 1845. Their protracted absence caused intense anxiety, and several expeditions were sent from England and elsewhere in search of them; and coals, provisions, clothing, and other necessities were deposited in various places in the arctic seas by our own and by the United States government, by lady Franklin, and numerous private persons. The *Truelove*, capt. Parker, which arrived at Hull 4 Oct. 1849, from Davis's Strait, brought intelligence (not afterwards confirmed) that the natives had seen sir John Franklin's ships in the previous March, frozen up by the ice in Prince Regent's Inlet. Other accounts were equally illusory. Her majesty's government, on 7 March, 1850, offered a reward of 20,000*l.* to any party of any country that should render efficient assistance to the crews of the missing ships. Sir John's first winter-quarters were found at Beechy Island by caps. Ommanney and Penny.

1. H.M.S. *Porpoise*, capt. Moore (afterwards under capt. Maguire), sailed from Sheerness to Behring's Strait, in search. 1 Jan. 1848

2. Land expedition under sir John Richardson and Dr. Rae, of the Hudson's Bay Company, left England, 25 March, "

[Sir John Richardson returned to England in 1849, and Dr. Rae continued his search till 1851.]

3. Sir James Ross, with the *Enterprise* and *Investigator* (12 June, 1848), having also sailed in search to Barrow's Straits, returned to England (Scarborough). . . . 3 Nov. 1849

4. The *Enterprise*, capt. Collinson, and *Investigator*, commander M'Clure, sailed from Plymouth for Behring's Strait. 20 Jan. 1850

[Both ships proceeded towards the eastward.]

5. Capt. Austin's expedition, viz. *Resolute*, capt. Austin, C.B.; *Assistance*, capt. Ommanney; *Intrepid*, lieutenant. Bertie Cator; and *Pioneer*, lieutenant. Sherard Osborn, sailed from England for Barrow's Straits. 25 April, "

6. The *Lady Franklin*, capt. Penny; and *Sophia*, capt. Stewart, sailed from Aberdeen for Barrow's Straits, 13 April, "

[Returned home Sept. 1851.]

7. The United States expedition in the *Advance* and *Rescue*, under lieutenant. De Haven and Dr. Kane (son of the judge), towards which Mr. Grinnell subscribed \$30,000, sailed for Lancaster Sound and Barrow's Straits; after drifting in the pack down Baffin's Bay, the ships were released in 1851 uninjured. 25 May, "

8. The *Felix*, sir John Ross, fitted out chiefly by the Hudson's Bay Company, sailed to the same locality, 22 May, "

9. H.M.S. *North Star*, commander Saunders, which had sailed from England in 1849, wintered in Wolstenholme Sound, and returned to Spithead. 28 Sept. "

10. H.M.S. *Herald*, capt. Kellott, C.B., which had sailed in 1848, made three voyages to Behring's Strait, and returned in. 1851
Lieut. Pim went to St. Petersburg with the intention of travelling through Siberia to the mouth of the river Kolyma; but was dissuaded from proceeding by the Russian government. 18 Nov. "

[The *Enterprise* and *Investigator* (see No. 4 above) not having been heard of for two years.]

11. Sir Edward Belcher's expedition—consisting of *Assistance*, sir Edward Belcher, C.B.; *Resolute*, capt. Kellott, C.B.; *North Star*, capt. Pullen; *Intrepid*, capt. M'Clintock; and *Pioneer*, capt. Sherard Osborn—sailed from Woolwich. 15 April, 1852

[This expedition arrived at Beechy Island 14 Aug. 1852. The *Assistance* and *Pioneer* proceeded through Wellington Channel, and the *Resolute* and *Intrepid* to Melville Island; the *North Star* remaining at Beechy Island.]

LADY FRANKLIN'S EQUIPMENTS

Lady Franklin, aided by a few friends (and by the "Tasmanian Tribute" of 1500*l.*), equipped four expeditions, (Nos. 12, 13, 14, 16).

12. The *Prince Albert*, capt. Forsyth, sailed from Aberdeen to Barrow's Straits. 6 June, 1850
[Returned 1 Oct. 1850.]

13. The *Prince Albert*, Mr. Kennedy, accompanied by lieutenant. Bellet, of the French navy, and John Hepburn, sailed from Stromness to Prince Regent's Inlet, 4 June, 1851

[Returned Oct. 1852.]

14. The *Isabel*, commander Inglesfield, sailed for the head of Baffin's Bay, Jones's Sound, and the Wellington Channel, 6 July; and returned. Nov. 1852

15. Mr. Kennedy sailed again in the *Isabel*, on a renewed search to Behring's Strait. 1853

16. H.M.S. *Rattlesnake*, commander Trollope, despatched to assist the *Power*, capt. Maguire (who succeeded capt. Moore), at Point Barrow in April; met with it Aug. "

17. The second United States expedition, the *Advance*, under Dr. Kane. early in June, "

18. The *Phoenix* (with the *Bredalbane* transport), commander Inglesfield, accompanied by lieutenant. Bellet, sailed in May; he returned, bringing despatches from sir E. Belcher, etc. Oct. "

The *Investigator* and sir E. Belcher's squadron were safe; but no traces of Franklin's party had been met with. Lieutenant. Bellet was unfortunately drowned in August while voluntarily conveying despatches for sir E. Belcher. Capt. M'Clure had left the *Herald* (10) at Cape Lisburne, 31 July, 1850. On 8 Oct. the ship was frozen in, and so continued for nine months. On 26 Oct. 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N.E.-N.W. passage. In Sept. 1851 the ship was again fixed in ice, and so remained till lieutenant. Pim and a party from capt. Kellott's ship, the *Resolute* (11), fell in with them in April, 1853. The position of the *Enterprise* (4) was still unknown.

A monument to Bellet's memory was erected at Greenwich. His "Journal" was published in. 1854

Dr. Rae, in the spring of 1853, again proceeded towards the magnetic pole; and in July, 1854, he reported to the admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to sir J. Franklin and his party—namely, sir John's star or order, part of a watch, silver spoons, and forks with crests, etc. He also reported the statement of the natives, that they had met with a party of white men about four winters previous, and had sold them a seal; and that four months later, in the same season, they had found the bodies of thirty men (some buried), who had evidently perished from starvation; the place appears, from the description, to have been in the neighborhood of the Great Fish River of Back. Dr. Rae arrived in England on 22 Oct. 1854, with the relics, which have since been deposited in Greenwich hospital. He and his companions were awarded 10,000*l.* for their discovery.

19. The *Phoenix*, *North Star*, and *Talbot*, under the command of capt. Inglesfield, sailed in May, and returned in Oct. "

Sir E. Belcher (No. 11), after mature deliberation, in April, 1854, determined to abandon his ships, and gave orders to that effect to all the captains under his command; and capt. Kellott gave similar orders to capt. M'Clure, of the *Investigator*. The vessels had been abandoned 15 May* when the crews of the *Phoenix*

* Capt. Kellott's ship, the *Resolute*, was found adrift 1000 miles distant from where she was left, by Mr. George Henry, commanding an American whaler, who brought her to New York. The British government having abandoned their claim on the vessel, it was bought by order of the American congress, thoroughly repaired and equipped, and intrusted to capt. H. J. Hartsteno, to be presented to queen Victoria. It arrived at Southampton, 12 Dec. 1856; was visited by her majesty on

and *Talbot* (under capt. Inglefield) arrived (19). On their return to England all the captains were tried by court-martial and honorably acquitted. 17-19 Oct. 1855
 Capt. Collinson's fate was long uncertain, and another expedition was in contemplation, when intelligence came, in Feb. 1855, that he had met the *Rattlemake* (16) at Fort Clarence on 21 Aug. 1854, and had sailed immediately, in hopes of getting up with capt. Maguire in the *Plover* (1), which had sailed two days previously. Capt. Collinson having failed in getting through the ice in 1850 with capt. McClure, returned to Hong-Kong to winter. In 1851 he passed through Prince of Wales's Straits, and remained in the arctic regions without obtaining any intelligence of Franklin till July, 1854, when, being once more released from the ice, he sailed for Fort Clarence, where he arrived as above mentioned. Capt. Collinson and Maguire arrived in England in..... May, 1855
 20. The third United States expedition in search of Dr. Kane, in the *Advance*, consisted of the *Release* and the steamer *Arctic*, the bark *Eringo*, and another vessel under the command of lieut. H. J. Hartstene, accompanied by a brother of Dr. Kane as surgeon, 31 May, 1857

[On 17 May, 1855, Dr. Kane and his party quitted the *Advance*, and journeyed over the ice, 1300 miles, to the Danish settlement; on their way home in a *Baffin* vessel, they fell in with lieut. Hartstene, 18 Sept.; and arrived with him at New York, 11 Oct. 1855. Dr. Kane visited England in 1856; he died in 1857.]

The Hudson's Bay Company, under advice of Dr. Rae and sir G. Back, sent out an overland expedition, June, 1855, which returned Sept. following. Some more remains of Franklin's party were discovered.....

21. The 18th British expedition (equipped by lady Franklin and her friends, the government having declined to fit out another)—the *Fox*, screw steamer, under capt. (since sir) F. L. McClintock, R.N. (see No. 11)—sailed from Aberdeen 1 July, 1857; returned, 22 Sept. 1859
 On 6 May, 1859, lieut. Hobson f. d. at Point Victory, near Cape Victoria, besides a cairn, a tin case, containing a paper, signed 25 April, 1848, by capt. Fitzjames, which certified that the ships *Erebus* and *Terror*, on 12 Sept. 1846, were beset in lat. 70° 50' N. and long. 98° 23' W.; that sir John Franklin died 11 June, 1847; and that the ships were deserted 23 April, 1848. Capt. McClintock continued the search, and discovered skeletons and other relics. His "Journal" was published in Dec. 1859; and on 28 May, 1860, gold medals were given to him and to lady Franklin by the Royal Geographical Society.

Mr. Hall, the arctic explorer, reported, in Aug. 1865, circumstances that led him to hope that capt. Crozier and others were surviving.

A national monument by Noble, set up in Waterloo place, was inaugurated 15 Nov. 1866. It is inscribed to "FRANKLIN, the great navigator, and his brave companions who sacrificed their lives in completing the discovery of the Northwest Passage, A.D. 1847-8."

Sir John Franklin discovered the *northwest passage* by sailing down Peel and Victoria Straits, now named Franklin Straits.

"Franklin search expedition," under lieut. Schwatka, of the United States navy, in an overland expedition in summer and autumn of 1879, discovers some human remains of the crews of the ships and other things; he set up memorials, and brought away the remains of lieut. John Irving, of the *Terror*; and returned to Massachusetts..... about 23 Sept. 1880
 Remains of lieut. John Irving buried at Edinburgh, 7 Jan. 1881

Fredericksburg (Virginia, U.S.). On 10 Dec. 1862, gen. Burnside and the federal army of the Potomac crossed the small deep river Rappahannock. On 11 Dec. Fredericksburg was bombarded by the federals. On the 13th commenced a series of desperate unsuccessful attacks on the confederate works, defended by gens. Lee, Jackson, Longstreet, and others. Gen. Hooker crossed the river with the reserves, and joined in the conflict in vain. On 15 and 16 Dec. the federal army recrossed the Rappahannock. The battle was one of the most severe in the war. The national army numbered 100,000 men, the confederate army 80,000; the national loss was 10,500, the confederate 4600.

Frederickshald (Norway). Charles XII. of Sweden was killed by a cannon-shot before its walls, while examining the works, 11 Dec. 1718. His hand was on his sword, and a prayer-book in his pocket.

Free Church (OF ENGLAND). The rev. H. Hampton, one of the curates of Islington, having been dismissed, a part of his congregation erected a temporary church. The bishop of London, after inquiry, refused to license it. On this the congregation declared itself to be the *Free Church of England*, March, 1859. Eventually he left the neighborhood, and re-entered the establishment. Secessions from the Church of England took place in 1872, in consequence of the decision in favor of Mr. Bennett, 8 June, 1872; see *Church of England*. The establishment of a bishopric for a new Free Church at Southampton was proposed Jan. 1873.

A *Free Church of England* founded; only two orders, presbyters or bishops and deacons, are recognized; a primus is elected, Sept. 1874; see *Reformed Episcopal Church*.

Free Church (OF SCOTLAND) was formed by an act of secession of nearly half the body from the national church of Scotland, headed by Dr. Thos. Chalmers and other eminent ministers, 18 May, 1843. The difference arose on the question of the right of patrons to nominate to livings; see *Patronage*. The Free Church claims for the parishioners the right of a veto. Much distress was endured the first year by the ministers of the new church, although 366,719*l.* 14*s.* 3*d.* had been subscribed. In 1853 there were 850 congregations; in 1873, 954. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638*l.*, from which was paid the sum of 138*l.* each to 700 ministers.

Freedmen's Bureaus, established in the Southern States of North America in March, 1865, to protect the freed negroes. The act of congress making them permanent was vetoed by president Johnson in Feb. 1866.

Freeholders. Those under forty shillings per annum were not qualified to vote for members of parliament by 8 Hen. VI. c. 7, 1429. Various acts have been passed for the regulation of the franchise at different periods. The more recent were, the act to regulate polling, 9 Geo. IV. 1828; act for the disqualification of freeholders in Ireland, which deprived those of forty shillings of this privilege, passed 13 April, 1829; Reform acts, 1832, 1867, 1868. County Elections act, 7 Will. IV. 1836; see *Chandos Clause*.

Freemasonry. Writers on Masonry, themselves Masons, affirm that it has had a being "ever since symmetry began and harmony displayed her charms." It is traced by some to the building of Solomon's temple; and it is said the architects from the African coast, Mahometans, brought it into Spain about the ninth century. Its introduction into Britain has been fixed at 674; and in Scotland 1140. Many of our Gothic cathedrals are attributed to Freemasons. The grand lodge at York was founded 926. Freemasonry was interdicted in England, 1424. In 1717, the grand lodge of England was established; that of Ireland in 1730; and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1738; again condemned, 30 Sept. 1865. Freemasons' Hall, Great Queen street, London, built 1771; rebuilt, and consecrated 14 April, 1869. The charity instituted, 1788. The duke of Sussex and the earl of Zetland were each twenty-five years grand-master of England. Earl de Grey, afterwards marquess of Ripon, was installed grand-master of the English Freemasons in room of the earl of Zetland, 14 May, 1870. The marquess (on becoming a Romanist) resigned 1 Sept. 1874. He was succeeded by the prince of Wales; installed in the Royal Albert Hall, 28 April, 1875. The duke of Leinster, grand-master for Ireland for 60 years, died 10 Oct. 1874; succeeded by the duke of Abercorn. The prince of Wales was installed at Edinburgh as patron of the Freemasons of Scotland, 12 Oct. 1870. Prince Leopold installed as master of the "Lodge of Antiquity" (held by sir Christopher Wren), 25 June, 1879.

Freethinkers, professors of natural religion; see *Deists*.

Free-trade principles, advocated by Adam Smith in his "Wealth of Nations" (1776), triumphed in England when the corn-laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Richard Cobden, who was very instrumental in passing these measures, and termed "Apostle of Free Trade," died 2 April, 1865. Since 1830 the exports have been tripled; see *French Treaty*. An agitation for free trade has begun in the United States. A reform league was formed at Boston, 20 April, 1869; and the movement became active in New York in Nov., and has since continued. A free-trade budget was brought in by the ministry in Sydney in 1873. A new free-trade league was inaugurated in London in Dec. 1873; and one at Melbourne, Australia, Sept. 1876. Free trade warmly advocated in New South Wales, supported in New Zealand; opposed in Canada and in Victoria, Australia, 1877-80.

French Association FOR THE ADVANCEMENT OF THE SCIENCES was established by the general assembly 22 April, 1872, its chief founders being MM. Balard, Claude Bernard, Delaunay, Dumas, Pasteur, Berthelot,

Wurtz, and others. It held its first meeting at Bordeaux, 5 Sept. 1872, when many foreign scientific men were present, M. de Quatrefages, president; second, Lyons, 21 Aug. 1873; third, Lille, 20 Aug. 1874; fourth, Nantes, 19 Aug. 1875; fifth, Clermont-Ferrand, 19 Aug. 1876; sixth, Havre, 30 Aug. 1877; seventh, Paris, 22 Aug. 1878; eighth, Montpellier, 28 Aug. 1879; ninth, Rheims, 11 Aug. 1880; tenth, Algiers, 14 April, 1881.

French Church, see *Church of France*.

French Language is mainly based on the rude Latin of the western nations subjugated by the Romans. German was introduced by the Franks in the eighth century. In the ninth the Gallo-Romanic dialect became divided into the *langue d'oc* of the south and the *langue d'oïl* of the north. The dialect of the Isle of France became predominant in the twelfth century. The French language as written by Froissart assimilates more to the modern French, and its development was almost completed when the Académie Française (established by Richelieu in 1634) published a dictionary of the language in 1674. The French language, laws and customs were introduced into England by William I., 1066. Law pleadings were changed from French to English in the reign of Edward III., 1362.—*Stow*.

French Treaty, the term given to the treaty of commerce between Great Britain and France, signed 23 Jan. 1860, at Paris, by Lord Cowley and Richard Cobden and by the ministers MM. Baroche and Rouher. The beneficial results of this treaty compensated for the depression of trade occasioned by the civil war in the United States (1861-5). The French assembly determined that on 15 March, 1871, this treaty should cease in 12 months from that date. A fresh treaty was signed at Paris 29 Jan. 1873. Free trade was somewhat restricted, but the new French navigation law was relaxed. Negotiations for a new treaty began in London, 26 May, 1881.

Frontenac (Canada), was taken from the British by gen. Winchester, 18 Jan. 1813, during the second war with the United States of America. It was retaken by the British forces under gen. Proctor, 22 Jan., and the United States commander and his troops were made prisoners.

Fresco Paintings are executed on plaster while fresh. Very ancient ones exist in Egypt, Italy, and England, and modern ones in the British houses of parliament, at Berlin, and other places. The fresco paintings by Giotto and others at the Campo Santo, a cemetery at Pisa, executed in the thirteenth century, are justly celebrated; see *Stereochromy*.

Fresh-water Fish, see *Fish*.

Fréteval (central France). Here Richard I. of England defeated Philip II. of France, and captured his

royal seal, archives, etc., 15 July, 1194. Fréteval was taken by the Germans, 14 Dec. 1870, and soon abandoned.

Friars (from the French *frère*, a brother); see *Minorites*, *Carmelites*, *Dominicans*, *Franciscans*, and other orders.

Friday, the sixth day of the week; so called from Friga, or Frea, the Scandinavian Venus, the wife of Thor, and goddess of peace, fertility, and riches, who with Thor and Odin composed the supreme council of the gods; see *Good Friday*.

Friedland (Prussia). Here the allied Russians and Prussians were beaten by the French, commanded by Napoleon, on 14 June, 1807. The allies lost eighty pieces of cannon and about 18,000 men; the French about 10,000 men. The peace of Tilsit followed, by which Prussia was obliged to surrender nearly half her dominions.

Friendly Isles, in the Southern Pacific, consist of a group of more than 150 islands, forming an archipelago of very considerable extent. These islands were discovered by Tasman, in 1643; visited by Wallis, who called them Keppel Isles, 1767; and by capt. Cook, who named them on account of the friendly disposition of the natives, 1778. Subsequent voyagers describe the natives as very ferocious.

Friendly Societies, which originated in the clubs of the industrious classes, were subjected to slight control in 1793, and have been regulated by various enactments. Other acts were passed in 1855, 1858, and 1860; important ones, 11 Aug. 1875, 24 July, 1876. In London, the Deaf and Dumb Society dates from 1687; the Norman, 1703; the Lincolns, 1708; still exist, 1879.

Friends, see *Quakers*, and under *Clergy*.

Friends of the People, an association formed in London to obtain parliamentary reform, 1792.

Friesland, East (N. Germany), the ancient Frisia, formerly governed by its own counts. On the death of its prince, Charles Edward, in 1744, it became subject to the king of Prussia; Hanover disputed its possession, but Prussia prevailed. It was annexed to Holland by Bonaparte in 1806; to the French empire, 1810; and awarded to Hanover in 1815. The English language is said to be mainly derived from the old Frisian dialect.—**FRIESLAND**, West, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 986, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *chevaux de frise* (or *cheval de frise*, a *Friesland horse*) is derived from Friesland, where it was invented.

Friuli (Venetia), made a duchy by Alboin the Lombard when he established his kingdom, about 570. It was conquered by Charlemagne. Henri, a Frenchman, made duke, was assassinated in 799, which was the fate of duke Berengarius, king of Italy and emperor, in 924. The emperor Conrad gave the duchy to his chancellor, Poppo, patriarch of Aquileia, in the eleventh century; it was conquered by Venice in 1420, annexed to Austria, 1797; to France, 1805; to Austria, 1814; to Italy, 1806.

Frobisher's Straits, discovered by sir Martin Frobisher, who tried to find a northwest passage to China, and after exploring the coast of New Greenland, entered this strait, 11 Aug. 1576. He returned to England, bringing with him a quantity of black ore, supposed to contain gold, which induced queen Elizabeth to patronize a second voyage. This led to a third fruitless expedition. He was mortally wounded at Bristol, Nov. 1594.

Froebel Society, established to promote the Kindergarten system (which see), 1874.

Frogmore, near Windsor, Berks. A house here, built by Nash, was the residence of queen Charlotte and afterwards of the duchess of Kent. Here is situated the mausoleum of the late prince-consort; see *Albion*.

Frohsdorf, a village near Vienna, lately the residence of the comte de Chambord; see *France*, 1878.

Fronde, CIVIL WARS OF THE, in France, in the minority of Louis XIV. (1648-52), during the government of queen Anne of Austria and cardinal Mazarin, between the followers of the court and the nobility, and the parliament and the citizens. The latter were called *Frondeurs* (*slingers*), it is said, from an incident in a street quarrel. In a riot on 27 Aug. 1648, barricades were erected in Paris.

Fuchsia, an American plant named after the German botanist Leonard Fuchs, about 1542. The *Fuchsia fulgens*, the most beautiful variety, was introduced from Mexico, about 1830.

Fuel, see *Coal*, *Bogs*. In the autumn of 1873, it was announced that Louis Raynecker, a French peasant, had discovered that earth mixed with coal and a little soda made good fuel.

Fuentes de Onoro (central Spain). On 2 May, 1811, Massena crossed the Agueda with 40,000 infantry, 5000 horses, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 82,000 men, of which only 1200 were cavalry. He, however, determined to fight rather than give up the blockade of Almeida. After much fighting, on 3 May, night came on and stopped the conflict. Next day Massena was joined by Bessières with a body of the Imperial Guard, and on 5 May made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until evening, when the lower part of the town was abandoned by both parties—the British maintaining the chapel and crags, and the French retiring a cannon-shot from the stream.—*Napier*.

Fuessen (Bavaria). By a treaty signed here, 22 April, 1745, peace was made between Maria Theresa, queen of Hungary, and the elector of Bavaria, the latter renouncing his claim to the imperial crown and recovering his lost territories.

Fugger, an illustrious German family (the present head, prince Leopold Fugger-Babenhhausen, since 28 May, 1836), derives its origin from John Fugger, a master weaver in Augsburg in 1370; and its wealth by trade, and by money-lending to monarchs, especially the emperors.

Fugitive Slave Law passed by the United States congress in Sept. 1850. It imposed a fine of \$1000 and six months' imprisonment on any person harboring fugitive slaves or aiding in their escape; it empowered slave-owners to go into any state or territory and there recover

fugitive slaves, and made it lawful to compel the assistance of any citizen in capturing fugitives. The law was stoutly resisted in most of the northern states by legislative enactments and otherwise. It was repealed 13 June, 1864; see *Slavery in America*.

Fugitive Slave Circulars, see *Slavery*.

Fugue, in music (in which one part seems to chase another), is described in Morley's "Introduction to Practical Musick," 1597. Sebastian Bach and Handel were eminent fugue-writers.

Fulda (W. Germany), the seat of an abbey founded by St. Boniface, the apostle of Germany, in 744. It was made a bishopric in 1752, and a principality in 1803. Napoleon incorporated it with Frankfurt in 1810, but in 1815 it was ceded to Hesse-Cassel.

Fulford, Yorkshire. Here Harold Hardrada of Norway, and Tostig, brother of Harold of England, defeated the earls Edwin and Morcar, 20 Sept. 1066; and the people near York submitted to them; see *Stamford Bridge*.

Fuller Case, see *India*, 1876.

Fumigation. Acron, a physician of Agrigentum, is said to have first caused great fires to be lighted and aromatics to be thrown into them to purify the air, and thus to have stopped the plague at Athens and other places in Greece, about 473 B.C.

Funds, see *Stocks and Sinking Fund*.

Funerals. David lamented over Saul and Jonathan, 1056 B.C., and over Abner, 1048 B.C. (2 Sam. i. and iii.). In Greece, Solon was the first who pronounced a funeral oration, according to Herodotus, 580 B.C. The Romans pronounced harangues over their illustrious dead. Theopompus obtained a prize for the best *Funeral Oration* in praise of Mausolus, 353 B.C. Popilia was the first Roman lady who had an oration pronounced at her funeral, which was done by her son, Crassus; and it is observed by Cicero that Julius Caesar did the like for his aunt Julia and his wife Cornelia.—*Funeral Games*, among the Greeks and Romans, included horse-races, dramatic representations, processions, and mortal combats of gladiators. These games were abolished by the emperor Claudius, A.D. 47. A tax was laid on funerals in England, 1793.

Furnace, see *Blowing-machines and Iron*.

Furniture. Specimens of Egyptian furniture, represented on the interior walls of the pyramids, appear in Rosellini's "Monumenti dell' Egitto," 1832-44, vol. ii. Mr. J. G. Pollen's "Ancient and Modern Furniture and Woodwork" in the South Kensington Museum, 1874, illustrated by photographs and engravings, was published July, 1874. Many interesting examples will be found in Fosbroke's "Encyclopædia of Antiquities," vol. i. 1825.

Furruckabad (N. India), a province acquired by the East India Company in June, 1802. Near the capital of the same name, 16 Nov. 1804, Lord Lake defeated the Maharatta chief Holkar, and about 60,000 cavalry, himself losing 2 killed and about 20 wounded.

Furs were worn by Henry I. about 1125. Edward III. enacted that all persons who could not spend 100*l.* a year should be prohibited this species of finery, 28 March, 1336-7.

Fusiliers. Foot-soldiers, formerly armed with fuses with slings to sling them. The 7th regiment (or Royal English Fusiliers) was raised, 11 June, 1685; the 21st (or Royal North British), 23 Sept. 1679; the 23d (or Royal Welsh), 17 March, 1688.—*Grose*.

Fusion of the French legitimists and Orleanists into one monarchical party, 5 Aug. 1873; see *France*.

Futteghur (India). Here Nana Sahib massacred both the English defenders of the fort and their Sepoy assailants, July, 1857; and here the Sepoy rebels were defeated by Sir Colin Campbell, 2 Jan. 1858.

G.

Gabelle (from *Gabe*, a gift), a term applied to various taxes, but afterwards restricted to the duty upon salt, first imposed by Philip the Fair on the French in 1286.—*Duruy*. Our Edward III., termed Philip of Valois, who exacted the tax rigorously, the author of the *Salic law* (from *sal*, salt), 1340. The assessments were unequal, being very heavy in some provinces and light in others; owing to exemptions purchased from the sovereigns. The tax produced 38 millions of francs in the reign of Louis XVI. It was a grievous burden, and tended to hasten the revolution, during which it was abolished (1790).

Gaelic, the northern branch of the Celtic languages, Irish, Erse or Highland Scottish, and Manx. The "Dean of Lismore's Book" (written 1511-51) contains Gaelic poetry; specimens were published, with translations, in 1862, by rev. T. M'Lachlan; see *Celts*.

Gaeta (the ancient Cajeta), a fortified Neapolitan seaport, has undergone several remarkable sieges. It was taken by the French, 4 Jan. 1799; by the English, 31 Oct. 1799; by the French, 18 July, 1806; and by the Austrians in 1815 and 1821. Here pope Pius IX. took refuge, 24 Nov. 1848, and resided more than a year. Here also Francis II. of Naples, with his queen and court, fled when Garibaldi entered Naples, 7 Sept. 1860; and here he remained till the city was taken by the Sardinian

gen. Cialdini, 13 Feb. 1861, after a severe siege, uselessly prolonged by a French fleet remaining in the harbor. Cialdini was created duke of Gaeta.

Gagging Bill, properly so called, meant to protect the king and government from the harangues of seditious meetings, was enacted 8 Dec. 1795, when the popular mind was much excited. In Dec. 1819, soon after the Manchester affray, an act was passed for restraining public meetings and cheap periodical publications; it was popularly called "a gagging bill." Statutes coercing popular assemblies, particularly in Ireland, have been also so designated; see *Germany*, Jan.-March, 1879.

Gaiety Theatre, Strand, opened 21 Dec. 1868, Mr. John Hollingshead manager.

Gaines's Mill (Va.), BATTLE OF, see *Peninsular Campaign*.

Galapagos, islands ceded to the United States by Ecuador, 3 Nov. 1854, the British, French, and other powers protesting against it.

Galatia, a province of Asia Minor. In the third century B.C., the Gauls under Brennus invaded Greece, crossed the Hellespont, and conquered the Troas, 278; were checked by Attalus I. in a battle about 241; and then settled in what was called afterwards Gallogræcia

and Galatia. The country was ravaged by Caelus Mamilus, 180 a.c., and was finally annexed to the Roman empire, 25 a.c., on the death of the king Amyntas. Paul's Epistle to the Galatians was probably written a.d. 55.

Galatz (Moravia). The preliminaries of peace between Russia and Turkey signed here, 11 Aug. 1791, led to the treaty of Jassy, 9 Jan. 1792. The site of several conflicts, in which the Russians defeated the Turks, Nov. 1769; 10 May, 1828.

Galicia, a province, N.W. Spain, was conquered by D. Junius Brutus, 136 a.c., and by the Visigoths a.d. 419, and was subdued by successive invaders. In 1065, on the death of Ferdinand I., king of Castile and Leon, when his dominions were divided, his son Garcia became king of Galicia. Ruling tyrannically, he was expelled by his brother Sancho; returned at his death, in 1072; was again expelled by his brother Alfonso, 1073; and died in prison in 1091. Alfonso, son of Urraca, queen of Castile, was made king of Galicia by her in 1109. He defended his mother, a dissolute woman, against her husband, Alfonso VII., and at her death, in 1126, acquired Castile, and once more reunited the kingdoms.—**GALICIA**, *Poland*. East Galicia was acquired by the emperor of Germany at the partition in 1772, and West Galicia at that of 1793. The latter was ceded to the grand-duchy of Warsaw in 1809, but recovered by Austria in 1815. The appointment of count Goluchowski, a Pole, as governor, in Oct. 1866, gave much satisfaction to the Poles; about 2,000,000 in this province; see *Poland*, note.

Galignani's Weekly Messenger, English newspaper published in Paris; began in 1814, at the Restoration.

Gall, St. (Switzerland). The abbey, founded in the seventh century, was surrounded by a town in the tenth. St. Gall became a canton of the confederation in 1815.

Gallerion, see *National, Louvre, and Versailles*.

Galleys with three rows of rowers, *trirames*, were invented by the Corinthians, 786 a.c.—*Blair*. The terms "galley slave" and "condemned to the galleys" arose from these sea-vessels having from 25 to 30 benches on each side, manned by four or five slaves to each bench. In France they had a general of galleys of whom the *baron de la Garde* was the first, 1544. The punishment of the galleys (*galères*) has been superseded by the "*travaux forcés*," forced labor, regulated by a law of 1864, the men being called "*forçats*."

Gallioan Church, see *Church of France*.

A building for the Catholic Gallioan church was opened by Father Hyacinthe Loyson, 9 Feb. 1879.

Gallipoli, the ancient Callipolia, a seaport in Turkey in Europe, 128 miles west of Constantinople. It was taken by the Turks in 1357, and fortified by Bajazet I. The first division of the French and English armies proceeding against the Russians landed here in March and April, 1854.

Gallium, new elementary metal discovered by Leconte de Boisbaudran, by means of the spectroscope; reported to French Academy of Sciences 20 Sept. and 6 Dec. 1875.

Galloches, French fire overshoes, formerly of leather; but since 1843 made of vulcanized India-rubber. The importation of *galoches* was prohibited by 3 Edw. IV. c. 4 (1463).

Galvanism AND **Galvano-plastica**, see under *Electricity*.

Galway (W. Ireland). The ancient settlers here were divided into 13 tribes, a distinction not yet forgotten. It was conquered by Richard de Burgo in 1222. In 1690 Galway city declared for king James, but was taken by gen. Ginkel soon after the decisive battle of Aughrim, 13 July, 1691. Here is one of the new colleges, endowed by government, pursuant to act 8 & 9

Vict. c. 86 (1845), inaugurated 20 Oct. 1849; see *Colleges and Ireland*, 1872-3.

In 1888 the mailing of mail steam packets from Galway to America began, but the subsidy ceased in May, 1861, through the company's breach of contract, which occasioned much discussion in parliament. In July, 1863, the contract for the conveyance of mails from Galway to America was renewed, and 75,000*l.* voted for the purpose. The scheme was not successful. On 9 Nov. the steamer *Anglia* struck on the Black Rock and the mails were taken to Dublin. The last packet sailed in Feb. 1864.

Gambia, see *West Africa*. The proposed cession of Gambia to France, in exchange for other territories, was opposed in Jan. 1876, and eventually given up.

Gamboge, a medicine and pigment, brought from India by the Dutch, about 1600. Hermann, in 1877, announced that it was derived from two trees of Ceylon, since ascertained to belong to the order *Guttifera*.

Game Laws are a remnant of the forest laws imposed by William the Conqueror, who, to preserve his game, made it forfeiture of property to disable a wild beast, and loss of eyes for a stag, buck, or boar. The clergy protested against ameliorations of these laws, under Henry III. The first game act passed in 1486. Game certificates were first granted with a duty in 1784. The Game act (1 & 2 Will. IV. c. 39), greatly modifying all previous laws, was passed in 1831. By it the sale of game is legalized at certain seasons. By the Game Poaching Preventive act, passed in 1862, greatly increased powers were given to the county police. Licences to kill game granted for the year 1856-7, 28,960; for 1865-6, 48,281; for 1869, 54,308; received for licences, 1877-8, 196,252*l.* Convictions under the game laws in 1869, 10,845.

Gamut. The scale of musical intervals (commonly termed *do* or *ut*, *re*, *mi*, *fa*, *sol*, *la*, to which *si* was added afterwards), for which the first seven letters of the alphabet are now employed, is mentioned by Guido Aretno, a Tuscan monk, about 1025.

Gandamak (or *GURDAMUK*), North India. A treaty with Yakoub Khan, ameer of Afghanistan, was signed here by major Cavagnar, 26 May, 1879. Principal articles: British to hold Khyber Pass and valleys of Kurram and Peshawar; a British resident at Cabul; annual

subsidy of 60,000*l.* to the ameer, etc. The treaty was not carried out; see *Afghanistan*, Sept. 1879.

Ganges Canal, for irrigating the country between the Ganges and the Jumna. The main line (525 miles long) was opened 8 April, 1854. The immense difficulties in its execution were overcome by the skill and perseverance of its engineer, sir Proby Cautley. In Oct. 1864, sir Arthur Cotton asserted that the work was badly done, and the investment only paid 3 per cent.

Gangs, see *Agricultural Gangs*.

Gardeners' Chronicle, a weekly paper, long edited by Dr. John Lindley, first appeared 2 Jan. 1841.

Gardening. The first garden, Eden, planted by God (Gen. ii.). The Scriptures abound with allusions to gardens, particularly the Song of Solomon and the prophets; and Christ's agony took place in a garden. Xenophon describes the gardens at Sardis, and Epicurus and Plato taught in gardens. Theophrastus's "History of Plants" was written about 322 B.C. Horace, Virgil, and Ovid derive many images from the garden (50 B.C. to A.D. 50); and Pliny's Tusculan villa is circumstantially described (about A.D. 100). The Romans introduced gardening into Britain, the religious orders maintained it, and its cultivation increased in the sixteenth century, when many Flemings came here to escape the persecutions of Philip II. Miller's dictionary was published in 1724; the Horticultural Society (*which see*) was established in 1804; Loudon's "Encyclopædia of Gardening" was first published in 1822, and his "Encyclopædia of Plants" in 1829; an act for the protection of gardens and ornamental grounds in cities was passed in 1863; see *Botany, Flowers, Fruits*. Gardeners' Royal Benevolent Institution, founded 1838.

Garigliano, a river, S.W. Italy. After long waiting and refusing to recede a step, the great captain Gonsalvo de Cordova made a bridge over this river, 27 Dec. 1503, and surprised and totally defeated the French army. Gaeta surrendered a few days after.

Garrote, a machine for strangling criminals, used in Spain. Many attempts to strangle made by thieves (termed "garroters") in the winter of 1862-3 led to the passing of an act in July, 1863, to punish these acts by flogging, which proved effectual.

Garter, ORDER OF THE. Edward III., when at war with France and eager to draw the best soldiers of Europe into his interest, projected the revival of king Arthur's round-table, proclaimed a solemn tilting. On New Year's day, 1343-4, he published letters of protection for the safe coming and returning of such foreign knights as would venture their reputation at the jousts and tournaments about to be held. They took place 23 April, 1344. A table was erected in Windsor Castle of 200 feet diameter, and the knights were entertained at the king's expense. In 1346, Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy); and being victorious on sea and land, and having David, king of Scotland, a prisoner, he, in memory of these exploits, is said to have instituted this order, 23 April, 1349; see *below*.

Edward III. gave the garter pre-eminence among the ensigns of the order; it is of blue velvet bordered with gold, with the inscription in old French, "*Honi soit qui mal y pense*" (Evil be to him who evil thinks). The knights are installed at Windsor, and styled *Equites aureæ perisclidii* (knights of the golden garter).—*Beaton*.

The order, until king Edward VI.'s time, was called the order of St. George, the patron saint of England. His figure on horseback, presented as holding a spear, and killing the dragon, was first worn by the knights of the institution. It is suspended by a blue ribbon across the body from the shoulder.

Instituted, according to Selden, 23 April, 1344; according to Nicolas, 1347; to Ashmole. 1349

Gas, in chemistry, a permanently elastic aeriform fluid; see *Oxygen, Hydrogen, Nitrogen, Chlorine, etc.*

It is stated that Monge and Clouet condensed sulphurous acid before 1800, and Northmore liquefied chlorine. . . . 1805
Faraday determined a gas to be the vapor of a volatile liquid existing at a temperature considerably above the boiling-point of the liquid; and that the condensing-points of different gases are merely the boiling-points of the liquids producing them; he, by pressure, condensed chlorine gas into a liquid. 1823
Other gases liquefied by intense cold and great pressure (as indicated by Faraday); oxygen by Cailliet, at Paris, 2 Dec., and independently by Raoul Pictet at Geneva. 22 Dec. 1877
Nitrogen, hydrogen, and atmospheric air liquefied by Cailliet soon after. 1877-8
The process exhibited at the Royal Institution, London, by prof. James Dewar. 14 June, 1878
Ozone liquefied by Hauteville and Chappuis, Paris, Oct. 1860
Prof. Thomas Graham's paper on the law of the diffusion of gases appeared, 1834; he showed that platinum and other metals can absorb gases. 1866
Furnaces in which gases are used as fuel invented by C. W. Siemens, and employed in glass-works, etc. 1861
Lenoir's gas-engine, in which the motive power is obtained by the ignition of combined gases by electricity, patented by him. "
143 of these engines had been working in Paris; and introduced into England. Dec. 1864
Pierre Hugon's gas-engine (said to be superior to Lenoir's, 1871) exhibited. 1867

Gastein (Salzburg, Austria). The long discussion
 between Austria and Prussia respecting the disposal of
 the duchies conquered from Denmark was closed by a
 provisional convention signed here by their ministers
 (Blum for Austria, and Bismarck for Prussia) 14 Aug.
 1865. This convention was severely censured by the
 other powers and abrogated in 1866.

Austria was to have the temporary government of Holstein,
 and Prussia that of Schleswig; the establishment of a German
 fleet was proposed, with Kiel as a Federal harbor, held by
 Prussia; Lauenburg was absolutely ceded to Prussia, and
 the king was to pay Austria as a compensation 2,000,000
 Danish dollars.

Gateshead, a borough in Durham, on the Tyne,
 opposite Newcastle. At Gateshead-fell, William I. de-
 feated Edgar Atheling and his Scotch auxiliaries in
 1066. Gateshead was made a parliamentary borough
 by the Reform act in 1832.

Between twelve and one o'clock, 5, 6 Oct. 1864, a fire broke
 out in a worsted manufactory here, which set fire to a bond
 warehouse containing a great quantity of nitre sulphur,
 etc. causing a terrific explosion felt at nearly twenty miles'
 distance and totally destroying many buildings, and bury-
 ing many persons in the ruins. At the moment of the ex-
 plosion large masses of blazing materials flew over the
 Tyne and set fire to many warehouses in Newcastle. About
 fifty lives were lost and very many persons were seriously
 wounded. The damage was estimated at about a million
 pounds.

Gatling Gun or Battery. An American inven-
 tion exhibited at Paris in 1867. It is intended to dis-
 charge at once a number of projectiles smaller than the
 shells of field guns, and it has as many locks as barrels.
 It was tried at Shoeburyness and rejected as inferior to
 a field gun firing shrapnel. The gun has been greatly
 improved, and is now believed to be one of the best

arms of its class in use. A powder to be used in the
 Gatling, invented by M. Partouret, was tried in London,
 Aug. 1870.

Gauganoia, see Arcton.

Gauges (in railways). Much discussion (termed
 "the battle of the gauges") began among engineers
 about 1833. Mr. I. M. Brunel approved of the broad
 gauge, adopted on the Great Western Railway; and
 Mr. R. Stephenson, Joseph Locke, and others, chose the
 narrow, now almost universally adopted even by the
 Great Western. A 2-foot gauge was recommended in
 Feb. 1870, having been successful on the Festiniog rail-
 way, Wales, with Fairlie's engine. About 200 miles of
 the S.W. lines of the Great Western were altered from
 the broad to the narrow gauge in a few days, June, 1874.
 In the United States the broad (6 feet) gauge has been
 entirely abandoned. The Southern railroads, originally
 5 feet, and the Ohio railroads originally 4 feet 10 inches,
 have been conformed to the standard gauge of 4 feet
 8½ inches. This gauge is now in use throughout the
 country, except upon unimportant lines, where for the
 sake of economy very narrow gauges (3 feet, or 2 feet
 6 inches) have been adopted.

Gauging, measuring the contents of any vessel of
 capacity, with respect to wine and other liquids, was es-
 tablished by a law, 27 Edw. III. 1352.

Gaul and Gauls. Gallia was the ancient name of
 France and Belgium. The Gauls (termed by the Greeks
 Galetai, by the Romans Galli or Celti) came originally
 from Asia, and, invading Eastern Europe, were driven
 westward, and settled in Spain (in Galicia), North Italy
 (Gallia Cisalpina), France and Belgium (Gallia Transal-
 pina), and the British Isles (the lands of the Cymry or
 Gaels).

Genealogy (Greek γενεαλογία—from γενεά, birth, descent, and λόγος, discourse). The earliest pedigrees are contained in the 5th, 10th, and 11th chapters of Genesis. The first book of Chronicles contains many genealogies. The pedigree of Christ is given in Matt. i. and Luke iii. Many books on the subject have been published in all European countries; one at Magdeburg, "Theatrum Genealogicum," by Henninges, in 1598. Anderson, "Royal Genealogies," London, 1732. Sims's "Manual for the Genealogist," etc., 1586, will be found a useful guide. The works of Collins (1756 et seq.), Edmondson (1764-84), and Nicolas (1825 and 1857), on the British peerage, are highly esteemed. The Genealogical Society, London, established in 1853.

Geneva Convention, for the succor of the wounded in time of active warfare. Having been a witness of the horrors of the battle-field of Solferino, 24 June, 1859, M. Henri Dunant, a Swiss, published his experiences, which induced the *Société Gênéroise d'Utilité Publique* in Feb. 1863 to discuss the question whether relief societies might not be formed in time of peace to help the wounded in time of war by means of qualified volunteers. At an international conference held 26 Oct. 1863, fourteen governments, including Great Britain, France, Austria, Prussia, Italy, and Russia, were represented by delegates. The propositions then drawn up were accepted as an international code by a congress which met at Geneva, 8 Aug. 1864, and on 22 Aug. a convention was signed by twelve of the delegates, and it was eventually adopted by all civilized powers except the United States. International conferences were held at Paris in 1867 and at Berlin in 1869 for further developing in a practical manner the objects of the Geneva conference. The International Society (termed "the Red Cross Society"), established in consequence of these proceedings, was very energetic in relieving the wounded and sick during the Franco-Prussian war in 1870, its flag being recognized as neutral. See *Aid to Sick and Wounded*. Above 13,000 volunteers said to be employed in attending the sick and wounded, Sept.-Dec. 1870. At a meeting in London, 6 Aug. 1872, M. Dunant proposed a plan for the uniform treatment of prisoners of war.

Gens-d'armes were anciently the king's horse-guards only, but afterwards the king's *gardes-du-corps*; the musqueteers and light horse were reckoned among them. There was also a company of gentlemen (whose number was about 250) bearing this name. Scots guards were about the persons of the kings of France from the time of St. Louis, who reigned in 1226. They were organized as a royal corps by Charles VII. about 1441; the younger sons of Scottish nobles being usually the captains. The name gens-d'armes was afterwards given to the police; but, becoming obnoxious, was changed to "municipal guard" in 1830.

Gentleman (from *gentilis*, of a *gens*, a race or clan). The Gauls, observing that during the empire of the Romans the *scutarii* and *gentiles* had the best appointments of all the soldiers, applied to them the terms *écuyers* and *gentilshommes*. This distinction of gentlemen was much in use in England, and was given to the well-descended about 1430.—*Sidney*. Gentlemen by blood were those who could show four descents from a gentleman who had been created by the king by letters-patent.

Gentlemen-at-arms (formerly styled the Band of Gentlemen Pensioners) is the oldest corps in England, with the exception of the Yeomen of the Guard. The band was instituted by Henry VIII. in 1509, and was originally composed entirely of gentlemen of noble blood, whom he named his pensioners or spears. William IV. commanded that it should be called his majesty's honorable corps of gentlemen-at-arms, 7 March, 1834.—*Curling*.

Geodesy (from the Greek *γῆ*, the earth, and *δαίω*, I divide), the art of measuring the surface and determining the figure of the earth, etc. Col. A. Clarke's "Geodesy" published 1880; see *Latitude*.

Geography. The first geographical records are in the Pentateuch and in the book of Joshua. Homer describes the shield of Achilles as representing the earth surrounded by the sea, and also the countries of Greece, islands of the Archipelago, and site of Troy.—*Iliad*. The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B.C. Hipparchus attempted to reduce geography to a mathematical basis, about 135 B.C. Strabo, the great Greek geographer, lived 71-14 B.C. Ptolemy flourished about 139 A.D. The science was brought to Europe by the Moors of Barbary and Spain, about 1240.—*Langlet*. Maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. Geography is now divided into mathematical, physical, and political, and its study has been greatly promoted during the present century by expeditions at the expense of various governments and societies. The *Royal Geographical Society*

of London was established in 1830; that of Paris in 1821. The *American Geographical Society*, New York, was organized 1852; see *Africa*, *Northwest Passage*, etc.

Geology, the science of the earth, is said to have been cultivated in China before the Christian era, and occupied the attention of Aristotle, Theophrastus, Pliny, Avicenna, and the Arabian writers.

In 1574 Mercati wrote concerning the fossils in the pope's museum: Cesalpino Majoli and others (1597), Steno (1669), Scilla (1670), Quirini (1676), Plot and Lister (1678), Leibnitz (1680), recorded observations, and put forth theories on the various changes in the crust of the earth.

Hooke (1668), in his work on Earthquakes, said that fossils, "as monuments of nature, were more certain tokens of antiquity than coins or medals; and though difficult, it would not be impossible to raise a chronology out of them."

Burnet's "Theory of the Earth" appeared in 1690, Whiston's in 1696.

Buffon's geological views (1749) were censured by the Sorbonne in 1751, and recanted in consequence. The principle he renounced was that the present condition of the earth is due to secondary causes, and that these same causes will produce further changes. His more eminent fellow-laborers and successors were Gesner (1758), Michell (1760), Raspe (1762-73), Pallas and Saussure (1793-1800).

Werner (1775) ascribed all rocks to an aqueous origin, and even denied the existence of volcanoes in primitive geological times, and had many followers—Kirwan, De Luc, etc. Hutton (1788), supported by Playfair (1801), warmly opposed Werner's views, and asserted that the principal changes in the earth's crust are due to the energy of fire. The rival parties were hence termed Neptunists and Vulcanists.

William Smith, the father of British geology (who had walked over a large part of England) drew up a "Tabular View of British Strata" in 1799, and published it and his "Geological Map of England and Wales," 1812-15; died 28 Aug. 1839. The rev. Adam Sedgwick, another father, died 27 Jan. 1873, aged 87. Sir Charles Lyell died 22 Feb. 1875.

In 1803 the Royal Institution possessed the best geological collection in London, collected by H. Davy, C. Hatchett, and others; the proposal of sir John St. Aubyn, sir Abraham Hume, and the right hon. C. F. Greville to aid the government in establishing a school of mines there in 1804-7 was declined 13 Nov. 1807.

In 1807 the *Geological Society of London* was established. By collecting a great mass of new facts it greatly tended to check the disposition to theorize, and led to the introduction of views midway between those of Werner and Hutton. The Geological Society of Dublin, 1832; of Edinburgh, 1834; of France, 1830; of Germany, 1848.

In 1835 Mr. (afterwards sir Henry) De la Beche suggested the establishment of the present *Museum of Geology*, which began at Craig's court, and which was removed to its present position in Jermyn street. To him are also due the valuable geological maps formed on the ordnance survey. The building was erected by Mr. Pennethorne, and formally opened by the prince consort, 14 May, 1851. Attached to the Museum are the Mining Records office, a lecture theatre, laboratories, etc. Sir H. De la Beche, the first director, died 13 April, 1855; succeeded by sir Roderick Murchison, who died 22 Oct. 1871; succeeded by prof. A. C. Ramsay, March, 1872.

A similar institution was established at Calcutta by the East India Company in 1840.

International Geological congress met at Paris, 1878; to meet at Bologna, 29 Sept. 1881.

The English standard works on geology at the present time are those of Lyell, Murchison, Phillips, De la Beche, Mantell, and Ansted.

The strata composing the earth's crust may be divided into two great classes:

I. Those generally attributed to the agency of water;

- II. To the action of fire: which may be subdivided as follows:
 Aqueous formations, stratified, rarely crystalline;
 Sedimentary, or fossiliferous, rocks.
 Metamorphic, or unfossiliferous.
- Igneous formations, unstratified, crystalline.
 Volcanic, as basalt, etc.
 Plutonic, as granite, etc.
- Fossiliferous, or Sedimentary, rocks are divided into three great series:
 The Palæozoic (most ancient forms of life), or Primary.
 The Mesozoic (middle-II e period), or Secondary.
 The Neozoic, or Cainozoic (more recent forms of life), or Tertiary.

TABLE OF STRATA (chiefly from Lyell).

NEOZOIC:

I. POST-TERTIARY:

A. Post-Pliocene:

1. Recent: Marine strata; with human remains; Danish peat; kitchen middens; bronze and stone implements; Swiss lake-dwellings; temple of Serapis at Pozzuoli.
2. Post-Pliocene: Brixham cave, with flint knives, and bones of living and extinct quadrupeds; ancient valley gravels; glacial drift; ancient Nile mud; postglacial North American deposits; remains of *Mastodon*; Australian broccias.

II. TERTIARY, OR CAINOZOIC, SERIES:

B. Pliocene:

3. Newer Pliocene (or Pleistocene) Mammalian beds, Norwich Crag. [*Marine Shells*.]
4. Older Pliocene: Red and Coralline Crag (Suffolk, Antwerp).
- 5, 6. Miocene, Upper and Lower: Bordeaux; Virginia Sands and Tournai beds; Pliocene deposits near Athens; volcanic tuff and limestone of the Azores, etc.; brown coal of Germany, etc. [*Mastodon*, *Gigantic Elk*, *Salamander*, etc.]
- 7, 8, 9. Eocene, Upper, Middle, and Lower: Fresh-water and Marine beds; Barton Clays; Bracklesham Sands; Paris Gypsum; London Plastic, and Thanet Clays. [*Palms*, *Birds*, etc.]

III. SECONDARY, OR MESOZOIC, SERIES:

- E. 10. Cretaceous, Upper; British Chalk; Maestricht beds.—Chalk with and without Flints, Chalk Marl, Upper Green Sand, Gault, Lower Green Sand. [*Mesosaurus*; *Fish*, *Mollusks*, etc.]
11. Lower (or Neocomian or Wealden): Kentish Rag; Weald Clay; Hastings Sand. [*Iguanodon*, *Hylasaurus*, etc.]
- F. 12. Oolite, Upper: Purbeck beds, Portland Stone and Sand, Kimmeridge Clay; Lithographic Stone of Solenhofen with *Archæopteryx*. [*Fish*.]
13. Middle: Calcareous Grit, Coral Rag, Oxford Clay, Kelloway Rock. [*Belemnites* and *Ammonites*.]
14. Lower: Cornbrash, Forest Marble, Bradford Clay, Great Oolite, Stonesfield Slate, Fuller's Earth, Inferior Oolite. [*Ichthyosaurus*, *Plesiosaurus*, *Pterodactyl*.]
- G. 15. Lias, Lias Clay and Marl Stone. [*Ammonites*, *Equisetum*, *Amphibia*, *Labyrinthodon*.]
- H. 16. Trias, Upper: White Lias, Red Clay, with Salt in Cheshire, Coal-fields in Virginia, U. S. [*Fish*, *Dromætherium*.]
17. Middle, or Muschelkalk (wanting in England). [*Encrinurus*, *Placodus gigas*.]
18. Lower: New Red Sandstone of Lancashire and Cheshire. [*Labyrinthodon*, *Footprints of Birds and Reptiles*.]

IV. PRIMARY, OR PALÆOZOIC, SERIES:

- I. 19. Permian: Magnesian Limestone, Marl Slates, Red Sandstone and Shale, Dolomite; Kupferschiefer. [*Fish*, *Fishes*, *Amphibia*.]
- K. 20, 21. Carboniferous, Upper and Lower: Coal Measures, Millstone Grit, Mountain Limestone. [*Ferns*, *Calamites*, *Coal*.]
- L. 22, 23, 24. Devonian, Upper, Middle, and Lower: Tllestones, Cornstones, and Marls, Quartzose, Conglomerates. [*Shells*, *Fish*, *Trilobites*.]
- M. 25, 26, 27. Silurian, Upper, Middle, and Lower: Ludlow Shales, Aymestry Limestone, Wenlock Limestone, Wenlock Shale, Caradoc Sandstone, Llandovery Flags; Niagara Limestone. [*Sponges*, *Corals*, *Trilobites*, *Shells*.]
- N. 28, 29. Cambrian, Upper and Lower: Bala Limestone, Festiniog Slates, Bangor Slates and Grits, Wicklow Rock, Haslecks Grits, Huronian Series of Canada. [*Zoophytes*, *Lingula*, *Ferns*, *Sigillaria*, *Stigmaria*, *Calamites*, and *Cryptogamia*.]
- O. 30. Laurentian, Upper Gneiss of the Helderberg (?): Labradorite Series, N. of the St. Lawrence; Adirondack Mountains, New York.

31. Lower: Gneiss and Quartzites, with Interstratified Limestones, in one of which, 1000 feet thick, occurs a foraminifer, *Eosoda Canadensis*, the oldest known fossil.

Geometry, so termed from its original application to measuring the earth, is ascribed to the Egyptians; the annual inundations of the Nile having given rise to it by carrying away the landmarks and boundaries.

Thales introduced geometry into Greece, about 600 a.c.

Pythagoras cultivated the science about 580.

The doctrine of curves originally attracted the attention of geometers from the conic sections, which were introduced by Plato, about 390 a.c.

Euclid's "Elements" compiled about 300 a.c.

Archimedes, a discoverer in geometry, 287-212 a.c.

The conchoid curve invented by Nicomedes, 220 a.c.

Ptolemy, the astronomer, second century, a.d.

Geometry taught in Europe in the thirteenth century.

Books on geometry and astronomy were destroyed in England as infected with magic, 7 Edw. VI., 1552.—*Stow*.

Descartes published his "Analytical Geometry," 1627.

George. A gold coin current at 6s. 8d. in the reign of Henry VIII.—*Leake*.

George, Fort, on the Canada side, near the mouth of the Niagara river, was captured by the Americans under gen. Dearborn, nearly 4000 strong, on the 27th of May, 1813. The British garrison numbered about 3000. The Americans lost 33 killed and 88 wounded; the British lost 108 killed, 163 wounded, and 622 made prisoners. On the 8th of July following, an American foraging party, near Fort George, were attacked by a greatly superior force of British and Indians. Only a corporal and nine men escaped to the fort; the remainder (29) were killed or wounded. On the 17th of the same month the outworks of Fort George were attacked by 200 British and Indians. They were gallantly defended by a detachment from the garrison under col. (afterwards lieut.-gen.) Winfield Scott. The Americans lost four killed and four wounded. Again, on the 24th of August, these outworks were attacked by a British party. They were repulsed by a detachment under capt. Davenport. The loss on both sides was considerable.

George, St., the tutelary saint of England, and adopted as patron of the order of the Garter by Edward III. His day is 23 April; see *Garter* and *Knighthood*.

St. George was a tribune in the reign of Diocletian, and, being a man of great courage, was a favorite; but, complaining to the emperor of his severities towards the Christians, and arguing in their defence, he was put in prison, and beheaded 23 April, 290.—On that day, in 1192, Richard I. defeated Saladin.

Georges' Conspiracy, in France. Gen. Moreau, gen. Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, were arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII., Feb. 1804. Pichegru was found strangled in prison, 6 April. Twelve of the conspirators, including Georges, were executed 25 June, and others imprisoned. Moreau was exiled, and went to America. In 1813 he was killed before Dresden (*which see*).

Georgia, the ancient Iberia, now a province of S. Russia, near the Caucasus, submitted to Alexander about 331 a.c., but threw off the yoke of his successors. It was subjugated to Rome by Pompey, 65 a.c., but retained its own sovereigns. Christianity was introduced into it in the third century. In the eighth century, after a severe struggle, Georgia was subdued by the Arab caliphs; by the Turkish sultan Alp-Arslan, 1068; and by the Tartar hordes, 1285. From the fourteenth to the eighteenth century, Georgia was successively held by the Persian and Turkish monarchs. In 1740 Nadir Shah established part of Georgia as a principality, of which the last ruler, Heraclius, surrendered his territories to the czar in 1799; and in 1802 Georgia was declared to be a Russian province.—*GEORGIA*, a state of the United States, was settled by gen. Oglethorpe in 1732.

Separating from the United States congress, it surrendered to the British, Dec. 1778; and its possession was of vast importance to the royalists in the war. Count d'Estant joined the United States general Lincoln, and made a desperate attack on Georgia, which failed, and the French fleet returned home; the colony was given up to the Union by the British in 1783. It seceded from the Union, by ordinance, 18 Jan. 1861, and was conquered by Sherman in 1864-5, and readmitted as a state in Jan. 1868; see *United States*.—GEORGIA, in the Pacific, was visited by capt. Cook in 1775.

Georgium Sidus, the first name of the planet Uranus (*which see*), discovered 13 March, 1781.

Germ Theory of Disease supposes "that many diseases are due to the presence and propagation in the animal system of minute organisms having no part or share in its normal economy."—*MacLagan*, 1876.

The doctrine of *contagium animatum* was held in the middle ages and put forth in the sixteenth century, but contagious organisms were not discovered till the nineteenth by professors Lister, Tyndall, and others, 1875-8. At the British Association, 14 Sept. 1870, professor Huxley expressed his concurrence with the "germ theory;" see *Dust and Disease*.

Germain, St., near Paris. The palace here was begun by Louis the Fat, 1124, and enlarged and embellished by his successors, especially by Francis I., Henry IV., and Louis XIV. Here James II. of England resided in state after his abdication in 1689, and here he died, 16 Sept. 1701; see *Treaties*.

German Confederation, North, established in room of the Germanic Confederation (*which see*): population, 1867, estimated 29,906,092. The confederation ceased on the re-establishment of the German empire, 1 Jan. 1871.

German Language has two great branches: *Hochdeutsch* and *Plattdeutsch*, High and Low German. The former became the literary language, principally through its use by Luther in his translation of the Bible and in other works, 1522-34. The latter is that spoken by the lower classes. There are many dialects: the satirical epic in Low-German, "Reineke Fuchs," appeared in 1498; see *Reynard*.

German Union of NATURAL PHILOSOPHERS, the forerunner of the British Association, was founded by Oken, at Leipsic, in 1822; partly to promote political unity in Germany. It has met annually, except in troubled years, such as 1848, 1866, and 1870; 50th time, 17 Sept. 1877; 53d meeting at Dantzic, 18 Sept. 1880.

Germanic Confederation, superseding the Confederation of the Rhine (*which see*), was constituted 8 June, 1815; held its first diet at Frankfurt, 16 Nov. 1816, and its last, 24 Aug. 1866; see *next article*. It comprised:

1. Austria; 2. Prussia; 3. Bavaria; 4. Saxony; 5. Hanover; 6. Württemberg.
7. Baden; 8, 9. Hesse (electorate and grand-duchy).
10. Denmark (for Holstein and Lauenburg).
11. Netherlands (for Luxemburg).
12. Saxe-Weimar, Saxe-Coburg, Saxe-Meiningen, and Saxe-Altenburg.
13. Brunswick and Nassau.
14. Mecklenburg-Schwerin and Mecklenburg-Strelitz.
15. Oldenburg, three Anhalts, and two Schwarzburgs.
16. Two Hohenzollerns, Liechtenstein, two Reuss, Schaumburg-Lippe, Lippe, and Waldeck.
17. Free cities: Lubeck, Frankfurt, Bremen, and Hamburg.

Germanites, a name given to a sect, of which members appeared in the British Mediterranean fleet in 1867. They called themselves "non-fighting men," and hold no communion with other religious bodies.

Germans, St., was made the seat of the bishopric of Cornwall for a short time, about 905.

Germany (*Germania, Alemannia*), anciently, as now, divided into independent states. The Germans long withstood the attempts of the Romans to subdue them; and although that people conquered some parts of the country, they were expelled before the close of the third century. In the fifth century the Huns and other tribes prevailed over the greater portion of Germany. In the latter part of the eighth century, Charlemagne subdued the Saxons and other tribes, and was crowned emperor at Rome, 25 Dec. 800. At the extinction of his family, the empire became elective, 911, and was generally obtained by a member of the house of Hapsburg from 1437 till 1804. Germany was divided into circles, 1501-12. The Confederation of the Rhine was formed 12 July, 1806; the Germanic Confederation, 8 June, 1815; and the North German Confederation, 18 Aug. 1866; the treaty ratified, 8 Sept. 1866; see *Franco-Prussian War*, 1870-1.

The re-established empire of Germany (1 Jan. 1871) founded upon treaties concluded between the North German Confederation (*which see*) and (1) the grand-duches of Baden and Hesse, 16 Nov. 1870; (2) the kingdom of Bavaria, 23 Nov. 1870; (3) the kingdom of Württemberg, 25 Nov. 1870; ratified, 29 Jan. 1871. William I., king of Prussia, was proclaimed emperor at Versailles, 15 Jan. 1871.
Population in 1871 (including Alsace-Lorraine, conquered 1870), 41,069,846. The parliament is elected by manhood suffrage and ballot.

Gesta Romanorum, a collection of popular tales derived from Oriental and classical sources, written in Latin by an unknown author, about the middle of the fourteenth century, and one of the first books printed in the fifteenth. These tales have been largely used by our early poets and dramatists, including Shakespeare. The English translation, by the Rev. C. Swan (from an edition printed at Hagenau, 1508), appeared 1824.

Gettysburg (Pennsylvania), **BATTLE OF**, fought 1-3 July, 1863. The Confederate victory at Chancellorsville led to a universal clamor in the South for an invasion of the northern states by Lee's army. As early as May movements were made indicating that Lee contemplated such an invasion. Early in June his entire army was concentrated at Culpepper, except A. P. Hill's division, which was left at Fredericksburg. At the middle of June, when the movement was fairly commenced, Lee's army numbered fully 100,000 men. On 12 June, Hooker began to fall back from the Rappahannock to cover Washington. Lee advanced to Winchester, and on 15 June dispersed Milroy's force at Winchester (7000 strong), capturing 2300 prisoners. He then crossed the Potomac with his main force (24, 25 June), and advanced to Chambersburg. Hooker also crossed on 26 June, and the next day was relieved by gen. Meade. Lee, in the

meantime, was pushing forward into the interior of Pennsylvania. The national army moved in a parallel direction on the east side of the Blue Ridge. Lee was considerably in the advance, and seriously threatened Harrisburg. As in the former invasion (1862), the passes of South Mountain afforded access to the Confederate rear. Meade took advantage of this fact, and (28 June) Lee saw that he must halt and stake the issue of the campaign upon a battle with the national army. The battle of Gettysburg ensued. The time and place of this battle were determined more by accident and the physical character of the region than by any purpose on the part of either commander. Lee ordered the concentration of his army at Gettysburg, to which point Ewell marched southwardly from Carlisle, and Longstreet and Hill eastwardly from Chambersburg. Meade's right wing (30 June) was near Gettysburg, and gen. Pleasonton, detecting the importance of that place, advanced and occupied it—anticipating the Confederates, who were advancing on the same point. On 1 July there was a collision of the opposing forces, in which gen. Reynolds was killed; but, after losing 10,000 men, the national forces still held a position which was the key of the field of operations. On 2 July (both armies being well up and in position) there was a second battle, in which the loss on both sides was severe. In this action Sickles was driven, but from a position which was of no material importance. At night the Union forces still held Cemetery Ridge from Culp's Hill to Round Top. On 3 July, after a bombardment of Cemetery from Seminary Ridge, Lee again assaulted. The assaulting column, under Pickett and Heth, numbered 18,000. It was almost annihilated. After this decisive repulse Lee retreated from the field. His army might have been utterly demoralized and dispersed by prompt and relentless pursuit. The forces were about equal at Gettysburg, each numbering from 70,000 to 80,000 infantry and artillery. The national loss was 23,190, of whom nearly 7000 were missing. The Confederate loss was about 36,000, of whom 18,783, wounded or unwounded, remained as prisoners. Lee's entire loss, from the commencement to the close of the invasion, was nearly 60,000 men.—On 19 Nov. 1863, the battle-ground was consecrated as a national cemetery for soldiers who fell in the July battles.

Ghent (Belgium), an ancient city, built about the seventh century, during the middle ages became very rich. John, third son of Edward III. of England, is said to have been born here in 1340 (hence named *John of Gaunt*) during the revolt under Jacob Van Artevelde, a brewer, whose son Philip revived the insurrection against Louis, count of Flanders, 1379-82.

Ghent rebelled against Philip of Burgundy, 1451; against the emperor Charles V., 1539; severely punished, 1540.

"*Pacification of Ghent*" (when the north and south provinces of the Netherlands united against Spain) proclaimed 8 Nov. 1576; broken up, 1579. The 300th anniversary celebrated 3-10 Sept. 1876.

Ghent taken by Louis XIV. of France, 9 March, 1678; and by the duke of Marlborough, 1708.

Ghent seized by the French, 1793; annexed to the Netherlands, 1814; made part of Belgium, 1830.

Peace of Ghent, between Great Britain and the United States, signed 24 Dec. 1814.

Ghibellines, see *Guelphs*.

Ghiznee, or **GHUZNEE** (E. Persia), the seat of the Gaznevides, who founded the city, 969. They were expelled by the Seljuk Tartars in 1038. The British under sir John Keane attacked the strong citadel of Ghiznee at 2 A.M., 23 July, 1839. At 8 o'clock the gates were blown in by the artillery, and, under cover of a heavy fire, the infantry forced their way into the place, and at 5 fixed the British colors on its towers. It capitulated to the Afghans, 1 March, 1842, who were defeated 6 Sept., and gen. Nott re-entered Ghiznee 7 Sept. same year. Seized for Musa Khan by Mahomed Jan in Jan.; retaken after a conflict, 19, 20 April, 1880.

Ghoorkas, see *Goorkas*.

Ghosts, produced by optical science. Mr. Dircks described his method at the British Association meeting

here, and was opened Oct. 1873. Nuneham Hall, Cambridge, in connection with it, was opened 18 Oct. 1875.

Miss Charlotte Angas Scott, aged about 22, attained the position of "wrangler" (for mathematics), Jan. 1880.

Glazors, BATTLE of (France), on 20 Sept. or 10 Oct. 1198, when Richard I. of England defeated the French. His parole for the day, "*Dieu et mon droit*" ("God and my right"), afterwards became the motto to the arms of England.

Gitschin (Bohemia) was captured by the Prussians after a severe conflict with the Austrians, 29 June, 1866. Near Gitschin, the same evening, the crown-prince of Prussia was victor in another engagement.

Giurgevo (Wallachia). Here the Russians were defeated by the Turks, aided by some English officers, 7 July, and repulsed in an attack, 23 July, 1854.

Glaciarium, at King's road, Chelsea; containing a surface of artificially made ice for rinking, constructed by Dr. John Gangee, and opened March, 1876. The freezing was accomplished by Raoul Pictet's process, and W. E. Ludlow's rotary engine and pump were employed.

Gladiators were originally malefactors who fought for their lives, or captives who fought for freedom. They were first exhibited at the funeral ceremonies of the Romans, 263 B.C., and afterwards at festivals, about 215 B.C. Their revolt under Spartacus, 73 B.C., was quelled by Crassus, 71. When Dacia was reduced by Trajan, 1000 gladiators fought at Rome in celebration of his triumph, for 123 days, A.D. 103. These combats were suppressed in the East by Constantine the Great, 325, and in the West by Theodoric in 500.

Gladstone Administrations.* Mr. Disraeli resigned 2 Dec., and was succeeded by Mr. Gladstone, whose ministry received the seals 9 Dec. 1868. In consequence of a majority of three against the Irish University bill, early on 12 March, 1873, Mr. Gladstone tendered his resignation, but withdrew it a few days after, as Mr. Disraeli declined office with the existing house of commons. Changes were made Aug.-Sept. 1873; the ministry resigned 17 Feb. 1874.

FIRST ADMINISTRATION (1868-74).

Glasgow, Bishopric of. Kennet, in his "Antiquities," says it was founded by St. Kentigern, *alias* Mungo, in 560; Dr. Heylin, speaking of the see of St. Asaph, in Wales, says that *that* see was founded by St. Kentigern, a Scot, then bishop of Glasgow in 583. This prelate became archbishop in 1491, ceased at the revolution, and is now a post-revolution bishopric. The cathedral, commenced in 1121, has a noble crypt; see *Bishops*.

Glasites (in Scotland) and **SANDEMANIANS** (in England). In 1727, John Glas, a minister of the Church of Scotland, published "The Testimony of the King of Martyrs concerning his Kingdom (John xviii. 36)," in which he opposed national churches, and described the original constitution of the Christian church, its doctrines, ordinances, officers, and discipline, as given in the New Testament. Having been deposed in 1728, he and others established several churches formed upon the primitive models. The publication of a series of letters on Hervey's "Theron and Aspasio," by Robert Sandeman, in 1755, led to the establishment of churches in London and other places in England, and also in North America. The meeting-house at Barnsbury, London, N., was erected in 1862.

Glass. The Egyptians are said to have been taught the art of making glass by Hermes. The discovery of glass took place in Syria.—*Pliny*. Glass-houses were erected in Tyre. It was in use among the Romans in the time of Tiberius; and we know, from the ruins of Pompeii, that windows were formed of glass before 79.

Glass is said to have been brought to England by Benedict Biscop, abbot of Wearmouth, in... 676

The glass-manufacture established in England at Crutched-friars and in the Savoy.—*Shew*... 1557
 Great improvements have been made in the manufacture, through the immense increase of chemical knowledge in the present century. Prof. Faraday published his researches on the manufacture of glass for optical purposes in... 1830

Tempered or toughened glass: M. De la Bastie's process (plunging heated glass into a hot bath of oleaginous or alkaline compounds) announced April, 1875; largely manufactured in France, and sold cheap in London... 1876

Glastonbury (Somerset), said to have been the residence of Joseph of Arimathea, and the site of the first Christian church in Britain, about 60. A church was built here by Ina about 708. The town and abbey were burned, 1184, and an earthquake did great damage in 1275. Richard Whiting, the last abbot, who had 100 monks and 400 domestics, was hanged on Tor hill in his pontificals for refusing to take the oath of supremacy to Henry VIII., 14 Nov. 1539. The monastery was suppressed 1540.

Glee, a piece of unaccompanied vocal music, in at least three parts. Their composition began early in the eighteenth century. Eminent composers, Samuel Webbe (1740-1816), Stevens, Callcott, Horsley, Danby, Paxton, lord Mornington, Spofforth, etc. The *Glee Club*, founded by Dr. J. W. Callcott, Dr. Arnold, and others, 1787.

Glencoe Massacre of the Macdonalds, a Jacobite clan, for not surrendering before 1 Jan. 1692, the time stated in king William's proclamation. Sir John Dalrymple, master (afterwards earl) of Stair, their enemy, obtained a decree "to extirpate that set of thieves," which the king is said to have signed without perusing. Every man under 70 was to be slain. This mandate was treacherously executed by 120 soldiers of a Campbell regiment, hospitably received by the Highlanders, 18 Feb. 1692. About 60 men were slain, and many women and children, turned out naked in a freezing night, perished. This excited great indignation, and an inquiry was set on foot, May, 1695, but no capital punishment followed.

Glendalough, or "Seven Churches," an ancient Irish bishopric, said to have been founded by St. Keven in 498; united with Dublin, 1214.

Globe. The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true causes of lunar eclipses were taught, and an eclipse predicted, by Thales of Miletus, about 640 B.C. Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round; that there might be antipodes on the opposite part of the globe; that Venus was the morning and evening star; that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun; Venus, Mercury, Mars, Jupiter, Saturn, and the spheres of the stars; about 506 B.C.—Aristarchus of Samos maintained that the earth turned on its own axis and revolved about the sun, which doctrine was held by his contemporaries as so absurd that the philosopher nearly lost his life, 280 B.C.; see *Circumnavigators*.

To determine the figure of the earth, a degree of latitude has been measured in different parts of the world: by Bouguer and La Condamine, in Peru, and by Maupertuis and others, in Lapland, 1735.

Estimated density, 5.6 that of water, weight, 8,000,000,000, 800,000,000,000 tons.—*Proctor, 1873.*

Gloves and Spats measured by Mechina, Dolmbe, Biot, and Arago between 1793 and 1801.

Measurements made in India by col. (afterwards sir George) Everest, published in 1830.

Measurements made on a meridian by long continued astronomical observations, the points being connected by telegraph between Cahia, Me., and Nantucket, Mass., by the United States Coast Survey, in 1866-7.

Experiments made by pendulums to demonstrate the rotation of the earth by Foucault in 1851, and to determine its density by Maskelyne Baily and others, and in 1828, 1829, and 1854 by Mr (afterwards sir) G. B. Airy, the astronomer royal.

ARTIFICIAL GLOBES. It is said that a celestial globe was brought to Greece from Egypt, 306 a.c., and that Archimedes constructed a planetarium about 213 a.c.

The globe of Gottorp, a concave sphere, eleven feet in diameter, containing a table and seats for twelve persons, and the inside representing the visible surface of the heavens, the stars and constellations, all distinguished according to their respective magnitudes, and being turned by means of curious mechanism, their true position, rising and setting, are shown. The outside is a terrestrial globe. The machine, called the globe of Gottorp from the original one of that name, which, at the expense of Frederick II, duke of Holstein, was erected at Gottorp under the direction of Adam Olearius, and was planned after a design found among the papers of the celebrated Tycho Brahe. Frederick IV of Denmark presented it to Peter the Great in 1713. It was nearly destroyed by fire in 1757, but it was afterwards reconstructed.—*Cope.*

The globe at Pembroke Hall, Cambridge, erected by Dr Long (master 1733), 18 feet in diameter.

In 1851 Mr Abraham erected in Leicester square, for Mr Wyld a globe 60 feet 4 inches in diameter, lit from the centre by day and by gas at night. It was closed in July 1861, the models were sold, and the building eventually taken down.

Globe Theatre, BANKSIDE (London), see *Shakespeare's Theatre*.—The Globe "Theatre," erected on the site of Lyon's inn, Strand, was opened 29 Nov. 1666, Mr Saffron Parry manager.—The *Globe* evening newspaper, formerly whig, now conservative; established 1808.

"**Gloire,**" French steam frigate; see *Navy, French.*

Glory, the nimbus drawn by painters round the heads of saints, angels, and holy men, and the circle of rays on images, adopted from the Chinese and their flatterers, were used in the first century. The doxology "*Gloria Patri*," is very ancient, and originally without the clause "as it was in the beginning," etc. In the Greek it began with *Δόξα, glory.*

GLOUCESTER (Roman *Glevum*) submitted to the Romans about 46, and to the Saxons 577. The statutes of Gloucester, passed at a parliament held by Edward I. 1278, relate to actions at law. This city was incorporated by Henry III., and was fortified by a strong wall, which was demolished after the Restoration, in 1660, by order of Charles II., as a punishment for the successful resistance of the city to Charles I., under col. Masey, Aug., Sept. 1643. The Gloucester and Berkeley canal was completed in April, 1827. Gross bribery took place here at the election for the parliament in 1859. The *BISHOPRIC* was one of the six erected by Henry VIII. in 1541, and was formerly part of Worcester. It was united to Bristol in 1836. The church, which belonged to the abbey, and its revenues, were appropriated to the maintenance of the see. The abbey, which was founded by king Wulphere about 700, was burned in 1102, and again in 1122. In it are the tombs of Robert, duke of Normandy, and Edward II. In the king's books this bishopric is valued at £154 17s. 2d. per annum. Present income, 5000*l.*

RECENT BISHOPS OF GLOUCESTER AND BRISTOL.

1802. George Isaac Hextingford, translated to Hereford, June, 1815.

1815. Hon. Henry Ryder translated to Lichfield, 1834.

1834. Christopher Bethell, translated to Exeter, 1850.

1850. James Henry Monk, died.

1850. Charles Haring, translated to Durham, Sept. 1861.

1861. William Thomson, translated to York, 1882.

1882. Charles John Elliott (present bishop).

Gloves. Woodstock and Worcester leather gloves are of ancient celebrity. In the middle ages, the giving a glove was a ceremony of investiture in bestowing lands and dignities; and two bishops were put in possession,

of their sees by each receiving a glove, 1002. In England, in the reign of Edward II., the deprivation of gloves was a ceremony of degradation. The Glovers' Company of London was incorporated in 1556. Embroidered gloves are presented to judges at maiden sessions. The importation of foreign gloves was not permitted till 1825.

GLUCINUM (from γλυκός, sweet). In 1796 Vauquelin discovered the earth *glucina* (so termed from the sweet taste of its salts). It is found in the beryl and other crystals. From glucina Wohler and Bussey obtained the rare metal glucinum in 1828.—*Gmelin.*

GLUCOSE, see *Sugar.*

Gluten, an ingredient of grain, particularly wheat, termed the vegeto-animal principle (containing nitrogen). Its discovery is attributed to Baccaria in the eighteenth century.

Glycerine, discovered by Scheele about 1779, and termed by him the "sweet principle of fats," and further studied by Chevreul, termed the "father of the fatty acids." It is obtained pure by saponifying olive-oil or animal fat with oxide of lead, or litharge. Glycerine is now much employed in medicine and the arts.

Glyoxyline (invented by Mr. F. A. Abel, the chemist of the war department, in 1867), an explosive mixture of gun-cotton, pulp, and saltpetre saturated with nitroglycerine. It was abandoned for compressed gun-cotton.

Gnostics (from the Greek γνῶσις, knowledge), a sect who, soon after the preaching of Christianity, endeavored to combine its principles with the Greek philosophy. Among their teachers were Saturninus, 111; Basilides, 134, and Valentine, 140. Priscillian, a Spaniard, was burned at Traves as a heretic, in 384, for endeavoring to revive Gnosticism.

Goa (S.W. Hindostan) was taken by the Portuguese under Albuquerque in 1510, and made their Indian capital. It was visited by the prince of Wales, 27 Nov. 1875.

Goat Show at Alexandra Palace, 16-22 Sept. 1880, supported by the British Goat Society, recently established.

Gobelin Tapestry, so called from a house at Paris, formerly possessed by wool-dyers, whence the chief (Jehan Gobelin), in the reign of Francis I., is said to have found the secret of dyeing scarlet. This house was purchased by Louis XIV. about 1663 for a manufactory of works for adorning palaces (under the direction of Colbert), especially tapestry, designs for which were drawn by Le Brun, about 1666. Present establishment (1878) costs about 8000*l.* a year.

"**God bless you!**" see *Swearing.*

"**God Save the King.**" This melody is said to have been composed by John Bull, Mus. D., in 1606, for a dinner given to James I. at Merchant Taylors' Hall; others ascribe it to Henry Carey, author of "*Sally in Our Alley*," who died 4 Oct. 1743. It was much sung 1745-6. It has been claimed by the French. The controversy on the subject is summed up in Chappell's "*Popular Music of the Olden Times*" (1859). The melody has been adopted for the German national anthem ("*Heil dir im Siegerkranz*"), and also for the Danish.

Goderich Administration. Viscount Goderich* (afterwards earl of Ripon) became first minister on the death of Mr. Canning, 8 Aug. 1827; he resigned 9 Jan. 1830.

Viscount Goderich, *first lord of the treasury.*

Duke of Portland, *president of the council.*

Lord Lyndhurst, *lord chancellor.*

Earl of Carlisle, *lord privy seal.*

Viscount Dudley, Mr. Huskisson, and the marquess of Lansdowne, *foreign, colonial, and home secretaries.*

Lord Palmerston, *secretary of war.*

* Born 1782, held various inferior appointments from 1800 to 1818, when he became president of the board of trade, was chancellor of the exchequer from 1818 to April, 1827, when he became colonial secretary, which office he held in the Grey cabinet, Nov. 1830; created earl of Ripon, 1833, died 26 Jan. 1869.

Mr. C. W. Wynn, *president of the India board*.
Mr. Charles Grant (afterwards lord Glenelg), *board of trade*.
Mr. Herries, *chancellor of the exchequer*.
Mr. Tierney, *master of the mint*, etc.

Godfathers AND Godmothers, or *sponsors*. The Jews are said to have had them at circumcision, but there is no mention of them in Scripture. Tradition says that sponsors were first appointed by Hyginus, a Roman bishop, about 154, during a time of persecution. In Roman Catholic countries bells have godfathers and godmothers at their baptism.

Godolphin Administrations (see *Administrations*), 1684 and 1690. Lord Godolphin became prime-minister to queen Anne, 8 May, 1702. The cabinet was notified in 1704. The earl resigned 8 Aug. 1710, and died 1712.

Sidney, lord (afterwards earl) Godolphin, *treasury*
Sir Nathan Wright, *lord keeper*.
Thomas, earl of Pembroke and Montgomery, *lord president*.
John Sheffield, marquess of Normandy (afterwards duke of Normandy and Buckingham), *privy seal*.
Hon. Henry Boyle, *chancellor of the exchequer*.
Sir Charles Hedges and the earl of Nottingham (the latter succeeded by Robert Harley, created earl of Oxford in 1704), *secretaries of state*.

Godwin Sands, sand-banks off the east coast of Kent, occupy land which belonged to Godwin, earl of Kent, the father of king Harold II. This ground was afterwards given to the monastery of St. Augustin at Canterbury; but the abbot neglecting to keep in repair the wall that defended it from the sea, the tract was submerged about 1100, leaving these sands, upon which many ships have been wrecked.—*Salmon*.

Godwin's Oath. "Take care you are not swearing Godwin's oath." This caution, to a person taking a voluntary and intemperate oath, or making violent protestations, had its rise in the following circumstance related by the monks: Godwin, earl of Kent, was tried for the murder of prince Alfred, brother of Edward the Confessor, and pardoned, but died at the king's table while protesting with oaths his innocence of the murder; supposed by the historians of those times to have been choked with a piece of bread, as a judgment from heaven, having prayed it might stick in his throat if he were guilty of the murder; 1053.

Gog and Magog, see *Guildhall*.

Gold (mentioned Gen. ii. 11), the purest and most ductile of all the metals, for which reason it has been considered by almost all nations as the most valuable. It is too soft to be used pure, and to harden it is alloyed with copper or silver: our coin consists of twenty-two carats of pure gold and two of copper. By 17 & 18 Vict. c. 96 (1854), gold wares are allowed to be manufactured at a lower standard than formerly—wedding-rings excepted—by 18 & 19 Vict. c. 60 (1855). The present stated price is 3*l.* 17*s.* 10*d.* per oz.; see *Coin of England and Guinea*. In 1816 it was enacted by 56 Geo. III. c. 68, that "gold coins only should be legal tender in all payments of more than 40*s.*"

Estimated amount of gold in the world: value, 1848, 560,000,000*l.*; 1875, 1,000,000,000*l.*

The value of gold compared with silver is said to have been estimated in the time of Herodotus, B.C. 450, about 10 to 1; of Plato, B.C. 38, 12 to 1; A.D. 1870, more than 15 to 1. See *Silver*.

The Amalgamation of Gold is described by Pliny (about 77) and Vitruvius (about 27 B.C.). The alchemist Basil Valentine (in the fifteenth century) was acquainted with the solution of the chloride of gold and fuming nitric acid. Andreas Cassius, in 1685, described the preparation of gold purple, which was then adapted by Kunkel to make red glass, and to other purposes.—*Gmelin*. Gold has been subjected to the researches of eminent chemists, such as Berzelius and Faraday.

GOLD MINES. Gold was found most abundantly in Africa, Japan, and South America. In the last it was discovered by the Spaniards in 1492, from which time to 1731 they imported into Europe 6000 millions of pieces of eight, in register gold and silver, exclusively of what were unregistered. Peter the Great reopened ancient gold-mines in Russia, 1690.

The Ural or Oural mountains of Russia long produced gold in large quantity.

A piece of gold weighing ninety marks, equal to sixty

pounds troy (the mark being eight ounces), was found near La Paz, a town of Peru, 1730.

Gold discovered in Malacca in 1731; in New Andalusia in 1785; in Ceylon, 1800; 2887 ounces of gold, value 9991*l.*, obtained from mines in Britain and Ireland in 1864; it has been found in Cornwall, and in the county of Wicklow, in Ireland.

Gold discovered in California, Sept. 1847; and in Australia, 1861. On 28 April, 1858, a nugget, said to weigh 146 pounds, was shown to the queen. It is estimated that between 1851 and 1859 gold to the value of 88,849,435*l.* was exported from Victoria alone (see *California and Australia* severally).

Gold discovered in what is now termed New Columbia in 1856; much emigration there in 1858.

Gold discovered in New Zealand, and in Nova Scotia in 1861.

Gold discovered in South Africa (Transvaal republic, etc.), and discovered in Sutherlandshire; much excitement, Oct. 1868; in West Australia, reported Sept. 1870; in the Bendigo fields, Victoria, Nov. 1871; in Land of Midian, by capt. R. Burton, announced May, 1877.

Gold obtained in United Kingdom: value in 1861, 10,816*l.*; in 1862, 20,390*l.*; in 1863, 1747*l.*; in 1864, 9991*l.*; in 1865, 5894*l.*; in 1866, 3522*l.*; in 1876, 1139*l.*

The gold obtained in the United States during 1880 amounted to \$36,000,000.

The imports of gold coin and bullion into the United States during the fiscal year ending 30 June, 1881, were \$90,031,259.

GOLD-WIRE was first made in Italy about 1350. An ounce of gold is sufficient to gild a silver wire above 1300 miles in length; and such is its tenacity that a wire the one eighteenth part of an inch will bear the weight of 500 pounds without breaking.—*Fourcroy*.

GOLD-LEAF. A single grain of gold may be extended into a leaf of 56 square inches, and gold-leaf can be reduced to the 300,000th part of an inch, and gilding to the ten-millionth part.—*Kelly's Cambist*.

GOLD ROBBERY. Three boxes, hooped and sealed, containing gold in bars and coin to the value of between 18,000*l.* and 20,000*l.*, were sent from London, 15 May, 1855. On their arrival in Paris, it was found that ingots to the value of 12,000*l.* had been abstracted and shot substituted, although the boxes bore no marks of violence. Many persons were apprehended on suspicion, but the police obtained no trace till Nov. 1856. Three men, named Pierce, Burgess, and Toster, were tried and convicted, 13-15 Jan. 1857, on the evidence of Edward Agar, an accomplice. They had been preparing for the robbery for eighteen months previous to its perpetration.

Gold Coast, West Africa; settlements made by the Dutch; transferred to Great Britain by treaty, signed 2 Feb. 1872; joined with Lagos to form the "Gold Coast Colony," governor, capt. George Cumine Strahan, appointed 1874; Sandford Freeling, 1876; Herbert Taylor Ussher, 1879; sir Samuel Rowe, 25 Jan. 1881.

Golden Bulls, *Rose*, see *Bulls, Rose*, note.

Golden Fleece (see *Argonauts*). Philip the Good, duke of Burgundy, in 1429, at his marriage, instituted the military order of *Toison d'or*, or "golden fleece;" it was said on account of the profit he made by wool. The number of knights was thirty-one. The king of Spain, as duke of Burgundy, afterwards became grand-master of the order. The knights wore a scarlet cloak lined with ermine, with a collar opened, and the duke's cipher, in the form of a B, to signify Burgundy, together with flints striking fire, with the motto "*Ante ferit, quam flamma micat*." At the end of the collar hung a golden fleece, with this device, "*Pretium non rile luborum*." The order afterwards became common to all the princes of the house of Austria, as descendants of Mary, daughter of Charles the Bold, last duke of Burgundy, who married Maximilian of Austria in 1477, and now belongs to both Austria and Spain, in conformity with a treaty made 30 April, 1725.

Golden Horde, a name given to the Mongolian Tartars, who established an empire in Kaptchak (or Kibzak), now S.E. Russia, about 1224, their ruler being Batou, grandson of Gengis Khan. They invaded Russia, and made Alexander Newski grand-duke, 1252. At the battle of Bielawisch, in 1481, they were crushed by Ivan III. and the Nogai Tartars.

Golden Legend, "*Legenda Aurea*." The lives of our Lord and the saints, written by Giacomo Varaggio, or Jacobus de Voragine, a Dominican monk, about 1260; first printed 1470; a translation printed by Caxton, 1483.

Golden Number, the cycle of nineteen years, or

the number that shows the years of the moon's cycle; its invention is ascribed to Meton of Athens, about 432 B.C.—*Pliny*. To find the golden number or year of the lunar cycle, add one to the date, and divide by 19; the quotient is the number of cycles since Christ, and the remainder the golden number. The golden number for 1876, 15; 1877, 16; 1878, 17; 1879, 18; 1880, 19; 1881, 1; 1882, 2; 1883, 3; 1884, 4; 1885, 5.

Golden Wedding, see *Wedding*.

Gold-fish (the golden carp, *Cyprinus auratus*), brought to England from China in 1691, but not common till about 1723.

Goldsmiths' Company (London) began about 1327, and incorporated 16 Rich. II., 1392. The old hall was taken down in 1829, and the present magnificent edifice by Philip Hardwick was opened 15 July, 1835; see *Assay* and *Standard*. The first bankers were goldsmiths.

Goldsmiths' Hall marks on gold and silver plate are five: 1. The sovereign's head (after 1784); 2. Lion passant (the standard mark), probably introduced between 1538 and 1558; 3. The standard mark, fixed 8 & 9 Will. III. 1696-7; 4. Leopard's head, the Hall mark; 5. The maker's mark (an old custom).

[The *date-letter* is one of an alphabet of 20 letters; A to U or V, J being omitted. The letter is changed on 30 May annually, and the shape of the letter every 30 years; thus 1716, A, etc.; 1790, A, etc.; 1756, A, etc.; 1776, A, etc.; 1790-1816, A, etc.; 1816-36, A, etc.; 1836-56, A, etc.; 1856-76, A, etc.; 1876-96, A, etc. The earliest known alphabetical series began 1438-9.]

A parliamentary commission on Hall marking reported in favor of its continuance with modifications, May, 1879.

"**Goliath**," training-ship, burned 22 Dec. 1875; see under *Wrecks*.

Gomarists, see *Arminians*.

Gonfalonier, or STANDARD-BEARER OF JUSTICE, originally a subordinate officer in Florence; instituted 1292; became paramount in the fifteenth century, and was suppressed 27 April, 1532, when the constitution was changed and Alexander de' Medici made duke.

Good Friday (probably God's Friday), the Friday before Easter day, on which a solemn fast has long been held, in remembrance of the crucifixion of Christ on Friday, 3 April, 33, or 15 April, 29. Its appellation of *good* appears to be peculiar to the church of England; our Saxon forefathers denominated it *Long Friday*, on account of the length of the offices and fastings enjoined on this day. Good Friday, 1883, 23 March; 1884, 11 April; 1885, 3 April.

Good Templars (first lodges formed in America) pledge themselves not to make, buy, sell, furnish, or cause to be furnished, intoxicating liquors to others as a beverage. The first English lodge was formed at Birmingham in May, 1868. There were said to be 8743 lodges and 210,255 members in the United Kingdom in 1874.

Goodman's Fields Theatre, London, opened 1729. Here David Garrick made his *début* as Richard III., 19 Oct. 1741. The new theatre, erected about 1746, was burned down June, 1802. The Garrick Theatre here was opened in 1830; burned 4 Nov. 1846; and since rebuilt.

Goojerat (N. India), see *Guzerat*.

Goorkhas, a warlike tribe of Nepal, became prominent in the seventeenth century. Their invasions were defeated about 1791 by the Chinese, whose vassals they became. In a war with the British in 1814 they were at first successful, but were eventually subdued, and a treaty of peace was signed in Feb. 1816. Since 1841 the native regiments have been largely recruited by Goorkhas, who have rendered valuable service in nearly all our Indian wars, and in Afghanistan, 1878-9.

Goose, see *Michaelmas*.

Gordian Knot is said to have been made of the

things that served as harness to the wagon of Gordius, a husbandman, afterwards king of Phrygia. Whosoever loosed this knot, the ends of which were not discoverable, the oracle declared should be ruler of Persia. Alexander the Great cut away the knot with his sword until he found the ends of it, and thus, in a military sense at least, interpreted the oracle, 330 B.C.

Gordon's "No Popery" Riots, occasioned by the zeal of lord George Gordon, 2-9 June, 1780.

On 4 Jan. 1780, he tendered the petition of the Protestant Association to lord North.

On Friday, 2 June, he headed the mob of 40,000 persons who assembled in St. George's Fields, under the name of the Protestant Association, to carry up a petition to parliament for the repeal of the act which granted certain indulgences to the Roman Catholics. The mob proceeded to pillage, burn, and pull down the chapels and houses of the Roman Catholics first, but afterwards of other persons, for nearly six days. The Bank was attacked, the jails opened (the King's Bench, Newgate, Fleet, and Bridewell prisons). On the 7th, thirty-six fires were seen blazing at one time. At length, by the aid of armed associations of the citizens, the horse and foot guards, and the militia of several counties, then embodied and marched to London, the riot was quelled on the 8th.

210 rioters were killed and 248 wounded, of whom 75 died afterwards in the hospitals, and many were tried, convicted and executed.

The loss of property was estimated at 180,000*l*.

Lord George was tried for high-treason and acquitted, 5 Feb. 1781. He died a prisoner for libel, 1 Nov. 1793.

Alderman Kennett was found guilty of a dereliction of duty, 10 March, 1781.

Goree, a station near Cape Verd, west coast of Africa, planted by the Dutch, 1617. It was taken by the English admiral Holmes in 1663; seized by the French, 1677, and ceded to them by the treaty of Nimeguen in 1678; taken by the British in 1758, 1779, 1800, and 1804; ceded to France, 1814. Governor Wall was hanged in London, 28 Jan. 1802, for the murder of sergeant Armstrong, committed while governor at Goree in 1782.

Gorey (S.E. Ireland). Near here the king's troops under col. Walpole were defeated, and their leader slain, by the Irish rebels, 4 June, 1798.

Gorget, the ancient breastplate, was very large, varying in size and weight. The present diminutive breastplate came into use about 1660; see *Armor*.

Gorham Case, see *Trials*, 1849-50.

Gorilla, a powerful ape of W. Africa, about five feet seven inches high. It is a match for the lion, and attacks the elephant with a club. It is considered to be identical with the hairy people called *Gorillai* by the navigator Hanno, in his "Periplus," about 400 B.C. In 1847 a sketch of a gorilla's cranium was sent to prof. Owen by Dr. Savage, then at the Gaboon river, and preserved specimens have been brought to Europe, and a living one died on its voyage to France. In 1851 prof. Owen described specimens to the Zoological Society; in 1859 he gave a summary of our knowledge of this creature at the Royal Institution, London; and in 1861 several skins and skulls were there exhibited by M. Du Chaillu, who stated that he killed 21 of them in his travels in Central Africa. The gorilla was not known to Cuvier.

A young gorilla landed at Liverpool, 21 June, 1876; went to Berlin; was exhibited at Westminster aquarium 23 July; died at Berlin, 13 Nov. 1877; another brought to the Crystal Palace, England, soon died, Aug. 1879.

Gospellers, a name given to the followers of Wickliffe, who attacked the errors of Popery, about 1377. Wickliffe opposed the authority of the pope, the temporal jurisdiction of bishops, etc., and is called the father of the Reformation.

Gospels (Saxon *god-spell*, good story). Matthew's and Mark's are conjectured to have been written between A.D. 38 and 65; Luke's, 55 or 65; John's, about 97. Ireneus in the 2d century refers to each of the gospels by name. Dr. Robert Bray was one of the authors of the Society for the Propagation of the Gospel in Foreign Countries, incorporated in 1701. A body termed "Bray's Associates" still exists; its object being to assist in forming and supporting clerical parochial libraries.

Gosport (Hampshire), contains the royal Clarence victualling-yard. The great Haslar hospital, near Gosport, was built in 1762.

Gotha, capital of the duchy of Saxe-Coburg-Gotha. Here is published the celebrated *Almanach de Gotha*, which first appeared in 1764, in German.

Gothard, see *Gotthard* and *Tunnels*.

Göthenburg System (in Sweden). By this alcoholic drinks are dispensed by persons deriving no profit from the sale. It was advocated in England by Mr. Chamberlain, M.P., and much discussed, 1876-7.

Gothic Architecture began about the 9th century after Christ, and spread over Europe. Its great feature is the pointed arch; hence it has been suggested to call it the *pointed style*. "Gothic" was originally a term of reproach given to this style by the Renaissance architects of the 16th century. Its invention has been claimed for several nations, particularly for the Saracens. The following list is from Godwin's "Chronological Table of English Architecture:"

ANGLO-ROMAN—B.C. 55 to about A.D. 250—St. Martin's church, Canterbury.

ANGLO-SAXON—A.D. 800 to 1066—Earl's Barton church, St. Peter's, Lincolnshire.

GOthic ANGLO-ROMAN—A.D. 1066 to 1135—Rochester cathedral nave; St. Bartholomew's, Smithfield; St. Cross, Hants, etc. EARLY ENGLISH, OR POINTED—A.D. 1135 to 1272—Temple church, London; parts of Winchester, Wells, Salisbury, and Durham cathedrals, and Westminster Abbey.

POINTED, called pure Gothic—A.D. 1272 to 1377—Exeter cathedral, Waltham Cross, etc.; St. Stephen's, Westminster.

FLORID POINTED—A.D. 1377 to 1509—Westminster Hall; King's College, Cambridge; St. George's Chapel, Windsor; Henry VII.'s Chapel, Westminster.

ELIZABETHAN—A.D. 1509 to 1625—Northumberland House, Strand; part of Windsor Castle; Hatfield House; Schools at Oxford.

Revival of Grecian architecture about 1625. Banqueting House, Whitehall, etc.

The revival of Gothic architecture commenced about 1825, mainly through the exertions of A. W. Pugin. The controversy as to its expediency was rife in 1860-1.

Gothland, an isle in the Baltic sea, was conquered by the Teutonic knights, 1397-8; given up to the Danes, 1524; to Sweden, 1645; conquered by the Danes, 1677; and restored to Sweden, 1679.

Goths, a warlike nation that inhabited the country between the Caspian, Pontus, Euxine, and Baltic seas. They entered Mæsia, took Philippopolis, massacring thousands of its inhabitants; defeated and killed the emperor Decius, 251; but were defeated at Naissus by Claudius, hence surnamed Gothicus, 320,000 being slain, 269. Aurelian ceded Dacia to them in 272; but they long troubled the empire. After the destruction of the Roman Western empire by the Heruli, the *Ostrogoths*, under Theoderic, became masters of the greater part of Italy, where they retained their dominion till 553, when they were finally conquered by Narses, Justinian's general. The *Visigoths* settled in Spain, and founded a kingdom, which continued until the country was subdued by the Saracens.

Gotthard, St., near the river Raab, Hungary. Here the Turks, under the grand-vizier Kupruli, were totally defeated by the Imperialists and their allies, commanded by Montecuculi, 1 Aug. 1664. Peace followed this great victory.

Göttingen (Hanover), a member of the Hanseatic League about 1360. The university "Georgia Augusta," founded by George II. of England in 1734, was opened 1737. It was seized by the French, 1760, and held till 1762. In 1837 several of the most able professors were dismissed for their political opinions.

"Gouverneur, THE," a moral and educational work, full of anecdotes, by sir Thomas Elyot, first published in 1531; an annotated edition with a glossary by Mr. H. H. S. Croft was published in 1880.

Governesses' Benevolent Institution was established in 1843, and incorporated in 1848. It affords

to aged governesses annuities and an asylum; and to governesses in distress a temporary home and assistance.

Government Annuities Act, see *Annuities*. The building of the few GOVERNMENT OFFICES began in 1861.

Gowrie Conspiracy. John Ruthven, earl of Gowrie, in 1600, reckoning on the support of the burghs and the kirk, conspired to dethrone James VI. of Scotland, and seize the government. For this purpose the king was decoyed into Gowrie's house in Perth, on 5 Aug. 1600. The plot was frustrated, and the earl and his brother, Alexander, were slain on the spot. At the time, many persons believed that the young men were rather the victims than the authors of a plot. Their father, William, was treacherously executed in 1584 for his share in the raid of Ruthven, in 1582; and he and his father, Patrick, were among the assassins of Rizzio, 9 March, 1566.

Grace, a title assumed by Henry IV. of England, on his accession in 1399. *Excellent Grace* was assumed by Henry VI. about 1425. Till the time of James I., 1603, the king was addressed by that title, but afterwards by the title of *Majesty* only. "Your Grace" is the manner of addressing an archbishop and a duke in this realm.—The term "*Grace of God*" is said to have been taken by bishops at Epheus, 431 (probably from 1 Cor. xv. 10), by the Carlovingian princes in the ninth century, by popes in the thirteenth century; and about 1440 it was assumed by kings as signifying their divine right. "*Dei gratia*" was put on his great seal by William II. of England, and on his gold coin by Edward III. The king of Prussia's saying that he would reign "by the grace of God" gave much offence, 18 Oct. 1861.

Grace at Meat. The ancient Greeks would not partake of any meat until they had first offered part of it, as the first-fruits, to their gods. The short prayer said before, and by some persons after meat, in Christian countries, is in conformity with Christ's example, John vi. 11, etc.

Græcia Magna, colonies planted by the Greeks, 974-748 B.C.; see *Italy*.

Graffiti, a term given to the scribbles found on the walls of Pompeii and other Roman ruins; selections were published by Wordsworth in 1837, and by Garrucci in 1856.

Grafton Administration succeeded that of lord Chatham, Dec. 1767. The duke resigned, and lord North became prime-minister, Jan. 1770; see *North's Administration*.

Augustus Henry, duke of Grafton, *first lord of the treasury* (born 1735; died 1811).

Frederick, lord North, *chancellor of the exchequer*.

Earl Gower, *lord president*.

Earl of Chatham, *lord privy seal*.

Earl of Shelburne and viscount Weymouth, *secretaries of state*.

Sir Edward Hawke, *first lord of the admiralty*.

Marquess of Granby, *master-general of the ordnance*.

Lords Sandwich and Le Despencer, *joint postmasters-general*.

Lords Hertford, duke of Ancaster, Thomas Townshend, etc.

Lord Camden, *lord chancellor*, succeeded by Charles Yorke (created lord Morden), died (it is said by his own hand) 20 Jan. 1770.

Graham's Dyke (Scotland), a wall built in 209 by Severus Septimus, the Roman emperor, or, as others say, by Antoninus Pius. It reached from the Firth of Forth to the Clyde. Buchanan relates that there were considerable remains of this wall in his time, and vestiges of it are still to be seen.

Grail, HOLY (Sangreal). The publication of Tennyson's poem with this title, Dec. 1869, led to much discussion. Tennyson treats it as the cup in which Christ drank at the Last Supper. The mediæval romances treat it as the dish which held the paschal lamb. The word is probably old French, *gréal*, from the old Latin *gradalis*, a dish.

Grain. Henry III. is said to have ordered a grain of wheat gathered from the middle of the ear to be the original standard of weight: 12 grains to be a penny-

weight, 12 pennyweights one ounce, and 12 ounces a pound troy.—*Lawson*.

An act for the sale carriage of grain (63 & 44 Viet. c. 48), passed 7 Sept. 1899.

Grammar Schools, see *Education*.

Grammarians. A society of grammarians was formed at Rome so early as 276 a.c.—*Hinsr*. Apollodorus of Athens, Varro, Cicero, Messala, Julius Cæsar, Nicias, Ælius Donatus, Remmius, Palemon, Tyrannion of Pontus, Athenus, and other distinguished men were of this class. A Greek grammar was printed at Milan in 1476; Lily's Latin grammar ("Brevia Institutio"), 1513; Lindley Murray's English grammar, 1795; Cobbett's English grammar, 1818.—Harris's "Hermes" was published in 1750, Horne Tooke's "Epea Pteroenta; or, The Diversions of Purley," in 1786, treatises on the philosophy of language and grammar. Cobbett declared Mr. Canning to have been the only purely grammatical orator of his time; and Dr. Parr, speaking of a speech of Mr. Pitt's, said, "We threw our whole grammatical mind upon it, and could not discover one error." The science of grammar has been recently much studied with excellent results.

Grampian Hills (central Scotland). At Ardoch, near *Mons Grampius* of Tacitus, the Scots and Picts under Galgacus were defeated by the Romans under Agricola, 84 or 85.

Grampound (Cornwall) was disfranchised in 1871, for bribery and corrupt practices in 1819. Sir Manasseh Lopes was sentenced by the Court of King's Bench to a fine of 10,000*l.* and two years' imprisonment.

Gran (Hungary). Here the Hungarians defeated the Austrians, 27 Feb. 1849.

Granada, a city, S. Spain, was founded by the Moors in the eighth century, and formed at first part of the kingdom of Cordova. In 1236, Mohammed-al-Hamar made it the capital of his new kingdom of Granada, which was highly prosperous till its subjugation by the "great captain," Gonsalvo de Cordova, 2 Jan. 1492. In 1609 and 1610 the industrious Moors were expelled from Spain by the bigoted Philip III., to the lasting injury of his country. Granada was taken by marshal Sault in 1810, and held till 1812; see *New Granada*.

Granaries were formed by Joseph in Egypt, 1715 a.c. (Gen. xli. 48). There were 327 granaries in Rome.—*Udell*. *Hist.* Twelve new granaries were built at Unirew to hold 8000 quarters of corn, and two storehouses for sea-coal to hold 4000 loads, thereby to prevent the sudden dearth of these articles by great increase of inhabitants, 7 James I. 1610.—*Stow*.

Grand Alliance between the emperor and the Dutch states-general (principally to prevent the union of the French and Spanish monarchies in one person), signed at Vienna, 12 May, 1689, to which England, Spain, and the duke of Savoy afterwards acceded.

Grand Junction Canal (central England), joins several others, and forms a water communication between London, Liverpool, Bristol, and Hull. The canal commences at Braunston, on the west borders of Northamptonshire, and enters the Thames near London. Executed 1793-1805.

Granicus (a river, N.W. Asia Minor), near which, on 22 May, 334 a.c., Alexander the Great signally defeated the Persians. The Macedonian troops (30,000 foot and 5000 horse) crossed the Granicus in the face of the Persian army (800,000 foot and 20,000 horse).—*Justin*. The victors lost fifty-five foot-soldiers and sixty horse. Sardis capitulated, Miletus and Halicarnassus were taken by storm, and other great towns submitted to the conqueror.

Granson, near the lake of Neuchâtel, Switzerland, where Charles the Bold, duke of Burgundy, was defeated by the Swiss, 3 March, 1476.

Grant's Virginia Campaign (4 May, 1864-9 April, 1865). The grade of lieutenant-general was revived 2 March, and on the 9th Grant received this rank, thus becoming, under the president, the commander of all the armies of the United States. He had left the western field under Sherman's control, and a plan had been agreed upon between these officers for a simultaneous advance in May against the armies of Johnston and Lee. The army of the Potomac at the commencement of Grant's Virginia campaign numbered (including Burnside's corps, which acted and was soon incorporated with it) 140,000 men. In and around Washington were 42,000, in West Virginia 31,000; and in the department of Virginia and North Carolina gen. Butler had 26,000 available men. The confederate army of northern Virginia, under Lee, had lain in winter-quarters on the south bank of the Rapidan. By 1 May this army numbered about 60,000. Grant began his campaign against Lee 4 May, 1864. It had two distinct periods: 1st, that of the advance from the Rapidan to the James; and, 2d, that of the siege of Petersburg, terminating finally in the capture of Lee's army. The events of these two periods we give in their chronological order.

Grant crossed the Rapidan and encamped in the Wilderness, 4 May, 1864
 Battles of the Wilderness, in which Lee failed in his attempt to intercept and defeat Grant's column. Gen. Wadsworth killed. National loss about 20,000, confederate, 10,000. 5, 6 May, "
 Butler attacked Petersburg. 10 May, "
 Battle of Spottsylvania. Grant made a movement on this place to flank Lee. The latter reached Spottsylvania first. Sedgwick killed (9 May). Hancock captured Johnson's division. 11 May, "
 Grant moved to the North Anna. 21 May, "
 Butler occupied City Point on the James (6 May), made an unsuccessful attack on Fort Drury (13 May), was attacked by Beauregard, who, after a partial success, was repulsed. 26 May, "
 Battle of Cold Harbor. Grant recrossed the North Anna (26 May), and moved to and across the Pamunkey (30 May), after a severe conflict Grant secured a position at Cold Harbor (1 June). Grant attacked Lee, and, after a loss of about 10,000 men, was repulsed, 3 June, "
 Grant crossed the James river. 14 June, "
 Second attack on Petersburg. 16 June, "
 Investment of Petersburg began. 19 June, "
 Attack on the Weldon railroad by Birney and Wright repulsed with a loss of from 3000 to 4000 men. 21, 22 June, "
 Early made a movement up the Shenandoah, threatening Washington. 26 June-4 July, "
 Assault on the Petersburg lines. Explosion of mine. National loss 4000. 30 July, "
 Warren's attack on the Weldon railroad succeeded, with national loss of 4400 men. 18-21 Aug. "
 Battle of Winchester. Sheridan defeated Early, 19 Sept. "
 Sheridan routed Early at Fisher's Creek. 22 Sept. "
 Ord and Birney attacked the confederate works north of the James, and captured Fort Harrison. 26 Sept. "
 Warren and Parke repulsed in an attack on Lee's right at Poebler's Burn. National loss 2000. 30 Sept. "
 Battle of Cedar Creek. Sheridan, after the repulse of his army in the morning, attacked and defeated Early, capturing 54 guns and a large number of prisoners. 19 Oct. "
 National repulse at Hatcher's Run. 27 Oct. "
 Second national repulse at Hatcher's Run. 6 Feb. 1865
 Lee attacked Grant and captured Fort Stedman, which was afterwards retaken. 25 March, "

Sheridan, after his destructive raid on the James River Canal, joined Grant at City Point. . . . 26 March, 1865
Battle of Five Forks. Sheridan and Warren turned Lee's right, capturing 4000 prisoners.

 Capture of Jefferson Davis. . . . 11 May, "

Grapes. Previously to the reign of Edward VI. grapes were brought to England in large quantities from Flanders, where they were first cultivated about 1276. The vine was introduced into England in 1552; being first planted at Bloxhall, in Suffolk. In the gardens of Hampton Court palace is a vine stated to surpass any in Europe; it is 72 feet by 20, and has in one season produced 2272 bunches of grapes, weighing 18 cwt.; the stem is 13 inches in girth; it was planted in 1769.—*Leigh.*

Graphic, LONDON, illustrated weekly journal, established 4 Dec. 1869.

Graphite (from the Greek *γράφειν*, to write), a peculiar form of mineral carbon, with a trace of iron, improperly termed black-lead and plumbago. In 1809 sir Humphry Davy investigated into the relations of three forms of carbon—the diamond, graphite, and charcoal. A rude kind of black-lead pencil is mentioned by Gesner in 1565. Interesting results of sir B. C. Brodie's researches on graphite appeared in the International Exhibition of 1862. Fresh discoveries were made in the nearly exhausted Borrowdale mines, Cumberland, in 1875.

Graphoscope, an optical apparatus for magnifying and giving fine effects to engravings, photographs, etc., invented by C. J. Rowsell; exhibited in 1871.

Graphotype, a new process for obtaining blocks for surface-printing, the invention of Mr. De Witt Clinton Hitchcock in 1860. It was described by Mr. Fitz-Cook at the Society of Arts, 6 Dec. 1865. Drawings were made on blocks of chalk with a silicious ink; when dried, the soft parts were brushed away, and the drawings remained in relief; stereotypes were then taken from the block.

Grates. The Anglo-Saxons had arched hearths, and chafing-dishes were in use until the introduction of chimneys about 1200; see *Chimneys* and *Stoves*.

Gravelines (N. France). Here the Spaniards, aided by an English fleet, defeated the French on 13 July, 1558.

Gravelotte, BATTLE OF, 18 Aug. 1870; see *Metz*.

Gravitation, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about 38. Kepler investigated the subject about 1615; and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galileo at Florence, about 1633; but the great law on this subject, laid down by Newton in his "Principia" in 1687, is said to have been proved by him in 1670. The fall of an apple from a tree in 1666 is said to have directed his attention to the subject.

Newton says, "I do not anywhere take on me to define the kind or manner of any action, the causes or physical reasons thereof, or attribute forces in a true and physical sense to certain centres, when I speak of them as attracting, or endued with attractive powers."

On 15 July, 1867, M. Chasles laid before the Paris Academy of Sciences some letters alleged to be from Newton to Pascal and others tending to show that to Pascal was due the theory of gravitation. The authenticity of these letters was authoritatively denied, and their forgery and his own delusion were acknowledged by M. Chasles before the Academy 13 Sept. 1869.

Great Seal of England. The first seal used by Edward the Confessor was called the broad seal, and affixed to the grants of the crown, 1048.—*Baker's Chron.* The most ancient seal with arms on it is that of Richard I. James II., when fleeing from London in 1688, dropped the great seal in the Thames. The great seal of England was stolen from the house of lord chancellor Thurlow in Great Ormond street, and carried away, with other property, 24 March, 1784, a day before the dissolution of parliament; it was never recovered, and was replaced the next day. A new seal was brought into use on the union with Ireland, 1 Jan. 1801. A new seal for Ireland was brought into use and the old one defaced, 21 Jan. 1832. The Great Seal Offices act, passed 7 Aug. 1874, abolished certain offices, transferred duties, etc. The Great Seal act, passed 2 Aug. 1880, relates to appointment of judges, patents, etc.

Great Seal of the United States was adopted on 20 June, 1782. Immediately after the adoption of the Declaration of Independence, on the 4th of July, 1776, a committee was appointed to prepare a device for a seal, but the matter was not consummated until the date above mentioned. The device is, on one side, a spread eagle, with a shield with thirteen stripes paleways, and a chief azure; in one talon a bundle of arrows, in the other an olive branch; in its beak a scroll with the motto E PLURIBUS UNUM; and over its head a glory breaking from the clouds, surrounding thirteen stars. On the reverse is an unfinished pyramid, symboling the growth and strength of the states; over it the All-seeing Eye in a triangle, surrounded by a glory, and around the rim the words ANNUIT CŒPTIS (God has favored the undertaking), and NOVUS ORDO SECLORUM (a new order of things). This seal has never been changed, and is in charge of the secretary of state.

Greece, anciently termed *Hellas*. The Greeks are said to have been the progeny of Javan, fourth son of Japheth. Greece was so called from an ancient king, Græcus, and Hellas from another king, Hellen, the son of Deucalion. From Hellen's sons, Dorus and Æolus, came the Dorians and Æolians; another son Xuthus was father of Achæus and Ion, the progenitors of the Achæans and Ionians. Homer calls the inhabitants indifferently Myrmidons, Hellenes, and Achæans. They were also termed Danaï, from Danaus, king of Argos, 1474 B.C. Greece anciently consisted of the peninsula of the Peloponnesus, Greece outside of the Peloponnesus, Thessaly, and the islands. The principal states of Greece were Athens, Sparta, Corinth, Thebes, Arcadia, and afterwards Macedon (*all which see*). The limits of Modern Greece are much more confined. Greece became subject to the Turkish empire in the fifteenth century. The population of the kingdom, established in 1829, 96,810; in 1861, 1,096,810, with the Ionian Isles (added in 1864), about 1,348,522; in 1870, 1,437,894. The early history is mythic.

Greek Fire, a combustible composition (now unknown, but thought to have been principally naphtha), thrown from engines, said to have been invented by Callicinus, an engineer of Heliopolis, in Syria, in the seventh century, to destroy the Saracens' ships, which was effected by the general of the fleet of Constantine Pogonatus, and 30,000 men were killed. A so-called "Greek fire," probably a solution of phosphorus in bisulphide of carbon, was employed at the siege of Charleston, U.S., in Sept. 1863.

Greek Language. The study was revived in western Europe about 1450; in France, 1473. William Grocyu, or Grokeyn, an English professor of this language, introduced it at Oxford, about 1491, where he taught Erasmus, who himself taught it at Cambridge in 1510.—*Wood's Athen. Green Cloth, **BOARD** or, in the department of the lord-steward of the household, included an ancient court (abolished in 1849), with jurisdiction of all offences committed in the verge of the court.

Green Park (near Buckingham Palace, London) forms a part of the ground enclosed by Henry VIII. in 1530, and is united to St. James's and Hyde parks by the road named Constitution hill. Over the arch at the entrance, the Wellington statue was placed in 1846. On the north side was a reservoir of the Chelsea water-works, filled up in 1866.

Greenbacks, a name given, from the predominating color of the ink, to notes for a dollar and upwards, first issued by the United States government in 1862. Notes for lower sums (even 3 cents) were termed "fractional currency." For *Greenbackers*, see *United States*, 1878.

Green-bag Inquiry took its name from a *Green Bag*, full of documents of alleged seditions, laid before parliament by lord Sidmouth, 3 Feb. 1817. Secret committees presented their reports, 19 Feb.; and bills were brought in on the 21st to suspend the habeas corpus act, and prohibit seditious meetings, then frequent.

Greenland, an extensive Danish colony in North America, discovered by Icelanders, under Eric Raude, about 980, and named from its verdure. It was visited by Frobisher in 1576. The first ship from England to Greenland was sent for the whale-fishery by the Muscovy Company, 2 James I. 1604. In a voyage performed in 1630, eight men were left behind by accident, who suffered incredible hardships till the following year, when the company's ships brought them home.—*Tindal*. The Greenland Fishing Company was incorporated in 1693.—Hans Egede, a Danish missionary, founded a new colony, called *Godthaab*, or Good Hope, in 1720–3; and other missionary stations have been since established. Scoresby surveyed Greenland in 1821; and capt. Graah, by order of the king of Denmark, in 1829–30. Population in 1878, about 9408.

Greenock (W. Scotland). Charters were granted in 1635 and 1760 to John Shaw, of the barony of Greenock. It was a fishing station till 1697, when the Scottish Indian and African Company resolved to erect salt-

works in the Frith, and thus drew the attention of sir John Shaw, its superior, to its maritime advantages. It was made a burgh of barony in 1757, and a parliamentary burgh in 1832. The erection of the new quay was intrusted, about 1773, to James Watt, who was born here in 1736. The East India harbor was built 1805-19, and Victoria harbor 1846-50.

Greenwich (Kent), anciently Grenawic, an ancient manor, near which the Danes murdered the archbishop Elphege, 1012. The *Hospital* stands on the site of a royal residence erected in the reign of Edward I., and much enlarged by his successors. Here were born Henry VIII., his daughters Mary and Elizabeth, and here his son Edward VI. died. Charles II. intended to build a new palace here, but erected one wing only.

William III. and Mary converted the palace into a Royal Hospital for Seamen, 1694, and added new buildings, erected by Wren 1696

The chapel rebuilt 1789
Sixpence per month to be contributed by every seaman; the payment advanced to one shilling, from June, 1797
The payment abolished in 1829, and that of "the merchant seamen's" sixpence also in 1834
The hospital had lodging for 2710 seamen, and a revenue of about 150,000*l.* per annum 1853
Greenwich Fair was discontinued April, 1857
The office of the commissioners was abolished 1865
Reported annual income, 155,532*l.* 1867
By an act of parliament, about 900 indoor pensioners received additions to their pensions, quitted the hospital, 1 Oct. 1865; henceforth to be used as an infirmary. All the remaining inmates, except 31 bedridden persons, had left the place 1 Oct. 1869
The patients of the *Dreadnought* seamen's hospital removed here 13 April, 1870
Acts for the application of the revenues were passed in 1869-72

A part of the buildings appropriated for a naval college, opened 1 Feb. 1873
Greenwich Royal Hospital Schools (on the industrial plan), opened under the auspices of Mr. Childers 1870

Greenwich Observatory, built at the solicitation of sir Jonas Moore and sir Christopher Wren, by Charles II., on the summit of Flamsteed hill, so called from the first astronomer-royal. The building was founded 10 Aug. 1675, and Flamsteed commenced his residence 10 July, 1676. In 1832, an electric telegraph signal-ball in the Strand was completed, and put in connection with Greenwich observatory.

Grenville Administrations. The first succeeded the Bute administration, 8 April, 1763; and resigned in July, 1765.

George Grenville (born 1712, died 1770), *first lord of the treasury and chancellor of the exchequer*.

Earl Granville (succeeded by the duke of Bedford), *lord president*.

Duke of Marlborough, *privy seal*.

Earls of Halifax and Sandwich, *secretaries of state*.

Earl Gower, *lord chamberlain*.

Earl of Egmont, *admiralty*.

Marquess of Granby, *ordnance*.

Lord Holland (late Mr. Fox), *paymaster*.

Welbore Ellis, *secretary-at-war*.

Viscount Barrington, *treasurer of the navy*.

Lord Hillsborough, *first lord of trade*.

Lord Henley (afterwards earl of Northington), *lord chancellor*.

Duke of Rutland, lords North, Trevor, Hyde, etc.

SECOND GRENVILLE ADMINISTRATION, formed after the death of Mr. Pitt, on 23 Jan. 1806. From the ability of many of its members, their friends said it contained "*all the talents, wisdom, and ability of the country*," a term applied to it derisively by its opponents. The death of Mr. Fox, 13 Sept. 1806, led to changes, and eventually the cabinet resigned, 25 March, 1807:

Lord Grenville, *first lord of the treasury*.

Lord Henry Petty (afterwards marquess of Lansdowne), *chancellor of the exchequer*.

Earl Fitzwilliam, *lord president*.

Viscount Sidmouth (late Mr. Addington), *privy seal*.

Charles James Fox, *foreign secretary*.

Earl Spencer, *home secretary*.

William Windham, *colonial secretary*.

Lord Erskine, *lord chancellor*.

Sir Charles Grey (afterwards viscount Howick and earl Grey), *admiralty*.

Lord Minto, *board of control*.

Lord Auckland, *board of trade*.

Lord Moira, *master-general of the ordnance*.

R. B. Sheridan, *treasurer of the navy*.

Richard Fitzpatrick, etc.

Lord Ellenborough (lord chief-justice) had a seat in the cabinet.

Gresham College (London), established by sir Thomas Gresham in 1575, founder of the Royal Exchange. He left a portion of his property in trust to the city and the Mercers' Company to endow this college for lectures in divinity, astronomy, music, geometry, civil law, physic, and rhetoric; he died 21 Nov. 1579. The lectures commenced in Gresham's house, near Broad street, June, 1597 (where the founders of the Royal Society first met in 1645). The buildings were pulled down in 1768, and the Excise office erected on its site, the property having been acquired by the crown for an annuity of 500*l.* The lectures were then read in a room over the Royal Exchange for many years. On the rebuilding of the exchange, the Gresham committee erected the present building in Basinghall street, which was designed by G. Smith, and opened for lectures 2 Nov. 1843. It cost above 7000*l.* In 1871 the college acquired a valuable collection of books and pictures, bequeathed by Mrs. Hollier. Changes respecting the lectures were advocated in 1875, and some made in 1876.

Gretna Green (Dumfries, S. Scotland, near the border). Here runaway marriages were contracted for many years, as Scotch law ruled that an acknowledgment before witnesses made a legal marriage. John Paisley, a tobaccoist, and termed a blacksmith, who officiated from 1760, died in 1814. His first residence was at Megg's Hill, on the common or green betwixt Gretna and Springfield, to the last of which villages he removed in 1782. A man named Elliot was lately the principal officiating person. The General Assembly, in 1826, in vain attempted to suppress this system; but an act of parliament, passed in 1856, made these marriages

illegal after that year, unless one of the persons married had lived in Scotland twenty-one days.

Grey Administration succeeded the Wellington administration, which resigned 16 Nov. 1830. It carried the Parliamentary and Corporation Reform acts (*which see*), and terminated 9 July, 1834.

Earl Grey, * *first lord of the treasury*.
Lord Brougham, *lord chancellor*.
Viscount Althorpe, *chancellor of the exchequer*.
Marquess of Lansdowne, *president of the council*.
Earl of Durham, *privy seal*.
Viscounts Melbourne, Palmerston, and Goderich, *home, foreign, and colonial secretaries*.
Sir James Graham, *admiralty*.
Lord Auckland and Mr. Charles Grant (afterwards, 1830, lord Glenelg), *boards of trade and control*.
Lord Holland, *chancellor of duchy of Lancaster*.
Lord John Russell, *paymaster of the forces*.
Duke of Richmond, earl of Carlisle, Mr. Wynne, etc.
E. G. Stanley (afterwards earl of Derby), *chief secretary for Ireland*, became *colonial secretary*, March, 1833.

Grist-tax (*imposta sul macinato*). Principle of the tax adopted by the Italian parliament, 1 April, 1868.

Groat, from the Dutch *groat*, value of fourpence, was the largest silver coin in England until after 1351. Fourpenny pieces were coined in 1836 to the value of 70,884*l.*; in 1837, 16,038*l.*; discontinued since 1856.

Grocers anciently meant "ingrossers or monopolizers," as appears by a statute 37 Edw. III. 1363: "Les marchauntz nomez engrossent totes maners de merchandises vendables." The Grocers' Company, one of the twelve chief companies of London, was established in 1345, and incorporated in 1429.

Grochow, near Praga, a suburb of Warsaw. Here took place a desperate conflict between the Poles and Russians, 19, 20 Feb. 1831, the Poles remaining masters of the field of battle. The Russians shortly after retreated, having been foiled in their attempt to take Warsaw. They are said to have lost 7000 men, and the Poles 2000; see also *Poland*, 1861.

Grog, sea term for rum and water, derived its name from admiral Edw. Vernon, who wore *grogam* breeches, and was hence called "Old Grog." About 1745, he ordered his sailors to dilute their rum with water.†

* Born 13 March, 1764; M. P., as Charles Grey, in 1786; first lord of the admiralty and afterwards foreign secretary in 1806; resigned in 1806 on account of his favoring Roman Catholic emancipation; died 17 July, 1845.

Grosvenor Gallery Library, opened 25 March, 1880.

Ground Game, see *Game*.

Guadalupe Hidalgo, a city of San Luis Potosi, Mexico, where, on 2 Feb. 1848, the Mexican and United States commissioners concluded a treaty of peace between the two countries; see *Mexican War*. By that treaty, New Mexico and Upper California became territories of the United States, for which the latter government paid the former \$15,000,000, and assumed the payment of \$3,500,000 due from Mexico to Americans for property destroyed.

Guadeloupe, a West India island, discovered by Columbus in 1493. The French took possession of it in 1635, and colonized it in 1664. Taken by the English in 1759, and restored in 1763. Again taken by the English in 1779, 1794, and 1810. The allies, in order to allure the Swedes into the late coalition against France, gave them this island. It was, however, by the consent of Sweden, restored to France at the peace in 1814. It was again taken by the British, 10 Aug. 1815, and restored to the French, July, 1816.

Guad-el-ras (N.W. Africa). Here the Spaniards signally defeated the Moors, 23 March, 1860, after a severe conflict; gen. Prim manifested great bravery, for which he was ennobled. The preliminaries of peace were signed on the 25th.

Guano or **HUANO** (the Peruvian term for manure), the excrement of sea-birds that swarm on the coasts of Peru and Bolivia, and of Africa and Australia. It is mentioned by Herrera in 1601, and Garcilasso stated that the birds were protected by the incas. Humboldt was one of the first by whom it was brought to Europe, in order to ascertain its value in agriculture. The importation of guano into the United Kingdom appears to have commenced in 1839. 283,000 tons were imported in 1845 (of which 207,679 tons came from the western coast of Africa); 243,016 tons in 1851 (of which 6522 tons came from Western Australia); 131,358 tons in 1864; 237,393 tons in 1865; 135,697 tons in 1866; 280,311 in 1870; 114,454 in 1875; 152,989 in 1877.

Guarantees. The "Guarantee by Companies act," relating to the security by means of sureties required for persons employed in the public service, was passed 20 Aug. 1867 (30 & 31 Vict. c. 108).

Guardian, a moderate high-church weekly journal, first published 21 Jan. 1846.

Guards. The custom of having guards is said to have been introduced by Saul, 1093 B.C.

Body-guards were appointed to attend the kings of England, 1 Hen. VII. 1485.

Horse guards were raised 4 Edw. VI. 1550.

The royal regiment of guards was first raised by Charles II. in Flanders in 1656, col. lord Wentworth; another regiment was raised by col. John Russell, 1660, under whom they were combined in 1665. The *Coldstream Guards*, raised by gen. Monk, were constituted the 2d regiment in 1661; see *Coldstream*. These guards were the beginning of our standing army.

Gen. sir F. Wm. Hamilton's "History of the Grenadier Guards," an elaborate work, appeared 1874.

The Horse Grenadier guards first troop, raised in 1693, was commanded by gen. Cholmondeley; the second troop was raised in 1702, and was commanded by lord Forbes; this corps was reduced in 1783, the officers retiring on full pay. GUARDS' INSTITUTE, Francis street, Vauxhall-bridge road; reading- and lecture-rooms, etc., for all officers and soldiers in the metropolis; inaugurated by the duke of Cambridge, 11 July, 1867.

defeated by the French, 19 Sept. 1734. The ancient duchy, long held by the dukes of Mantua, was seized by the emperor of Germany, 1746, and ceded to Parma, 1748. After having been comprised in the Italian republic, 1796, and subjected to other changes, it was annexed to Parma, 1815, and to Modena, 1847.

Guatemala. A republic in Central America, revolted from Spain 1821, and declared independent 21 March, 1847. Constitution settled, 2 Oct. 1859. President (1862), gen. Raphael Carrera, elected 1851; appointed for life, 1854; died 14 April, 1865; succeeded by Vincent Cerna, 3 May, 1865-9; Manuel García Granados, Dec. 1872; R. Barrios, 7 May, 1873. A war between Guatemala and San Salvador broke out in Jan. 1863; and on 16 June the troops of the latter were totally defeated. An insurrection became formidable, July, 1871. Alliance with Honduras against San Salvador, March, 1872. Population, 1872, about 1,190,754.

Col. Gonzales, commandant of San José de Guatemala, imprisoned, flogged, and nearly killed Mr. John Magee, the British consul, who was rescued by capt. Morse, of the Pacific Mail Company's steamer *Arizona*, about 24 April, 1874.

Announced that Gonzales had been sentenced to five years' imprisonment, and that Mr. Magee had received 10,000*l.* as compensation, Oct. 1874.

Plot to kill the president and his ministry; conspirators shot, 7 Nov. 1877.

Guebres, see *Parses*.

Guelphic Order of knighthood was instituted for Hanover by the prince regent, afterwards George IV., 12 Aug. 1815.

Guelphs and Ghibellines, names given to the papal and imperial factions who destroyed the peace of Italy from the twelfth to the end of the fifteenth century (the invasion of Charles VIII. of France in 1495). The origin of the names is ascribed to the contest for the imperial crown between Conrad of Hohenstaufen, duke of Swabia, lord of Wiblingen (hence *Ghibelin*), and Henry, nephew of Welf, or Guelph, duke of Bavaria, in 1138. The former was successful; but the popes and several Italian cities took the side of his rival. *Ille Guelph* and *Ille Ghibelin* are said to have been used as war-cries in 1140, at a battle before Weinsberg, in Württemberg, when Guelph of Bavaria was defeated by the emperor Conrad IV., who came to help the rival duke, Leopold.* The Ghibellines were almost totally expelled from Italy in 1267, when Conradin, the last of the Hohenstaufens, was beheaded by Charles of Anjou. Guelph is the name of the present royal family of England; see *Brunswick* and *Hanover*.

Guernsey, see *Jersey*.

Guerrilla, Spanish, "a little war;" a term applied to the armed peasants who worried the French armies during the Peninsular war, 1808-14.

Gueux (beggars), a name given by the comte de Barlaimont to the 300 Protestant deputies from the Low Countries, headed by Henri de Brederode and Louis of Nassau, who petitioned Margaret, governess of the Low Countries, to abolish the inquisition, 5 April, 1566. The deputies at once assumed the name as honorable, and immediately organized armed resistance to the government; see *Holland*.

Guiana (N.E. coast of South America), discovered by Columbus in 1498, visited by the Spaniards in the sixteenth century; and explored by sir Walter Raleigh in 1596 and 1617. The French settlements here were formed in 1626-43; and the Dutch, 1627-67. Demerara and Essequibo were ceded to Great Britain in 1814; see *Demerara*. Guide-books for travellers are an English inven-

tion. Paterson's "British Itinerary" appeared in 1776; the last edition in 1840; when it was superseded by railways. Galignani's "Picture of Paris," 1814. Murray's "Handbook for Travellers on the Continent," the parent of the series, appeared in 1836.

Guides, a corps in the French army, especially charged with the protection of the person of the general, was formed by Bessières, under the direction of Bonaparte, who had been nearly carried off by the enemy, 30 May, 1796. Several squadrons of "guides" were formed in 1848, to guard the ministers. They formed a portion of the imperial guard till Sept. 1870.

Guienne, a French province, was part of the dominions of Henry II. in right of his wife Eleanor, 1152. Philip of France seized it in 1293, which led to war. It was alternately held by England and France till 1453, when John Talbot, earl of Shrewsbury, in vain attempted to retake it from the latter.

Guildhall (London) was built in 1411. When it was rebuilt (in 1669), after the great fire of 1666, no part of the ancient building remained, except the interior of the porch and the walls of the hall. The front was erected in 1789; and a new roof built, 1864-5. Beneath the west window are the colossal figures of Gog and Magog, said to represent a Saxon and an ancient Briton; replaced older ones, 1708; renewed, 1837. The hall can contain 7000 persons. Here were entertained the allied sovereigns in 1814, and Napoleon III., 19 April, 1855; and here the city industrial exhibition was held, 6 March, 1866, and the International Botanical banquet, 22 May, 1866. A memorial window, the gift of the cotton-workers of Lancashire, to commemorate the munificence of the metropolis towards them in the famine of 1862-4, was uncovered, 15 July, 1868. The prince-consort memorial window was unveiled in the presence of prince Arthur, 3 Nov. 1870. A library existed in the Guildhall in 1426, from which books were taken by the protector Somerset in the reign of Edward VI. The library was again set up; and reopened, Jan. 1828. The new handsome building by Horace Jones was opened by the lord chancellor Selborne, 5 Nov. 1872; see *London*.

Guilds (of Saxon origin, about the eighth century), associations of inhabitants of towns for mutual benefit, resembling our religious and friendly societies, chartered by the sovereign since the time of Henry II.

The London guilds became livery companies in the fourteenth century.

The guild of Corpus Christi, York, had 14,800 members when a return respecting these guilds was ordered to be made, 1388.

The Early English Text Society published the "Ordinances" of more than 100 guilds, 1870.

The "Guild of Literature and Art" (including sir E. B. Lytton, C. Dickens, and others) founded an institution (on ground given by sir E. B. Lytton, at Stevenage) consisting of thirteen dwellings, retreats for artists, scholars, and men of letters, which were completed and inaugurated, 29 July, 1865.

The revival of religious guilds began in 1851, with that of St. Alban, which held its 21st anniversary 20 June, 1872. *Guilds Inquiry Commission*, see *Companies*.

Gulford Court-house, BATTLE AT. Gen. Greene retreated from the Catawba river, in South Carolina, into Virginia, before pursuing Cornwallis, in the winter of 1781. He soon returned, and at Guilford Court-house, in North Carolina, he, with his army, fought Cornwallis and the British for more than two hours desperately. The Americans were repulsed, and the British took possession of the field, but at a cost that made the victory a sad disaster. "Another such victory," said Fox, in the British Parliament, "will ruin the British army." The British lost over 600 men; the Americans about 400 in killed and wounded, and 1000 who deserted to their homes.

Guillotine, an instrument for causing immediate and painless death, named after its supposed inventor, a physician named Joseph Ignatius Guillotin. In 1866 M. Dubois, of Amiens, stated that the idea only was due to Guillotin, who at a meeting of the legislative assembly

* It is stated, traditionally, that the emperor condemned all the men to death, but permitted the women to bring out whatever they most valued; on which they carried out their husbands on their shoulders.

bly in 1789 expressed an opinion that capital punishment should be the same for all classes. Accordingly, at the request of the assembly, M. Louis, secretary of the "Académie de Chirurgie," submitted to it on 20 March, 1792, a mode of capital punishment, "sure, quick, and uniform," which he had invented. The first person executed by it was a highway robber named Pelletier, on 25 April; and Dangremont was its first political victim, 21 Aug. following. Guillotin died in 1814. The guillotine at Paris was burned by the communist insurgents, 7 April, 1871. A similar instrument (called the *Mannaia*) is said to have been used in Italy, at Halifax in England (see *Halifax*), and in Scotland, there called the Maiden and the Widow.

Guinea (W. coast of Africa) was discovered by the Portuguese about 1446. From their trade with the Moors originated the slave-trade, sir John Hawkins being the first Englishman who engaged in this traffic. Assisted by English gentlemen with money for the purpose, he sailed from England in Oct. 1562, with three ships, proceeded to the coast of Guinea, purchased or forcibly seized 300 negroes, sold them profitably at Hispaniola, and returned home richly laden with hides, sugar, ginger, and other merchandise, in Sept. 1563. This voyage led to similar enterprises.—*Hukluyt*. See *Slave-trade*. An African company to trade with Guinea was chartered 1588. The Dutch settlements here were transferred to Great Britain, 6 April, 1872; see *Elmina*, and *Ashantees*.

Guineas, English gold coin, so named from having been first coined of gold brought by the African company from the coast of Guinea in 1663, valued then at 20s.; but worth 30s. in 1695. Reduced at various times; in 1717 to 21s. In 1810 guineas were sold for 22s. 6d.; in 1816, for 27s. In 1811 an act was passed forbidding their exportation, and their sale at a price above the current value, 21s. The first guineas bore the impression of an elephant, having been coined of African gold. Since the issue of sovereigns, 1 July, 1817, guineas have not been coined.

Gun, see *Artillery*, *Fire-arms*.—**GUN CLUB**, for pigeon-shooting, founded by sir Gilbert East, in 1862, had 200 members, noblemen and gentlemen, in July, 1867. The new gun-licenses produced in the financial year 1871-2, 62,437.

Gun-cotton, a highly explosive substance, invented by professor Schönbein, of Basel, and made known in 1846. It is purified cotton, steeped in a mixture of equal parts of nitric acid and sulphuric acid, and afterwards dried, retaining the appearance of cotton wool; see *Colloidion*. Its nature was known to Braconot and Pelouze.

The diet of Frankfort voted, 3 Oct. 1846, a recompense of 100,000 florins to prof. Schönbein and Dr. Böttger, as the inventors of the cotton powder, provided the authorities of Mayence, after seeing it tried, pronounced it superior to gunpowder as an explosive.

Improvements were made in the manufacture of gun-cotton by an Austrian officer, Baron von Lenk, about 1852, and it was tried by a part of the Austrian army in 1855, but did not obtain favor.

In 1862 details of the manufacture were communicated by the Austrian government to our own government, and Mr. Abel, our war-office chemist, was directed to experiment on the constitution and desirability of gun-cotton. The British As-

sociation also appointed a scientific committee to consider its merits. A complete decision was not arrived at.

The first trial of English-made gun-cotton was made in the spring of 1864, at the manufactory at Stowmarket, Suffolk, by Messrs. Prentice.

There was manufactured, by a company, the "patent safety gun-cotton," according to Mr. Abel's patent (including the pulping, compressing, and wet processes, based on researches commenced in 1866. The cotton was said to be explosive by detonation, and not by ignition. A great explosion took place at Stowmarket; 24 persons were killed (including A. E. H. and W. R. Prentice, managers); about 60 were dreadfully wounded, and nearly the whole town was destroyed as if by a bombardment, 11 Aug. 1871.

The verdict at the inquest attributed the explosion to the culpable "addition of sulphuric acid to the gun-cotton subsequent to its passing the tests required by government," 6 Sept. 1871.

A government commission, appointed in Sept. to consider the manufacture and use of gun-cotton, reported in favor of both, with special regard to compressed gun-cotton, 13 Dec. 1871.

Another report recommended this gun-cotton to be stored wet, with drying apparatus near; and to be kept in slighter boxes, 25 July, 1872.

Mr. E. O. Brown, of the war department, Woolwich, discovers that wet gun-cotton can be exploded by concussion by a detonating fuse, about Nov. 1872.

It is used as an explosive agent in mining, etc.

GUN-CLOTH, made on a similar principle, was patented by Mr. W. A. Dixon, about 1866.

COTTON GUNPOWDER, patented by Mr. R. Punshon, 1871.

A modified form was tried and reported successful, near Faversham, 3 Feb. 1875.

Gun-license Act, passed 9 Aug. 1870. Annual license, 10s. Licenses issued: year 1876-7, 77,068; 1877-8, 75,571.

Gunpowder. The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about 1320. But many writers maintain that it was known much earlier in various parts of the world. Some say that the Chinese and Hindus possessed it centuries before. Its composition, moreover, is expressly mentioned by Roger Bacon, in his treatise "De Nullitate Magie." He died in 1292 or 1294. Various substitutes for gunpowder have been recently invented, such as the white gunpowder of Mr. Horsley and Dr. Ehrhardt, and gun-paper by Mr. Hochstötten. A new gunpowder by M. Newmayer of Toya, near Leipsic, was discussed in Nov. 1866. "Pellet gunpowder" was ordered to be used in gun-charges in the army, March, 1868. An act to amend the law concerning the making, keeping, and carriage of gunpowder, etc., was passed 28 Aug. 1860, and other acts since; see *Birmingham*, 1870. In May, 1872, a company was formed to manufacture Mr. R. Punshon's patent cotton gunpowder, asserted to be very safe and controllable; see *Chronoscope*.

Its use was denounced by Ariosto, 1516; by Jean Marot, 1532; by Cervantes, 1604; termed "villanous saltpetre," by Shakespeare, about 1608.

ENGLISH WAR GUNPOWDER: 75 parts nitrate of potash (salt-petre), 10 sulphur, 15 carbon. These proportions may be slightly varied.

W. Hunter, after a careful examination of the question, in 1847, thus states the result: "July and August, 1346, may be safely assumed to be the time when the explosive force of gunpowder was first brought to bear on the military operations of the English nation."

Above 11 tons of gunpowder on board the *Lottie Sleigh*, in the Mersey, exploded; much damage done in Liverpool and Birkenhead, but no lives lost, 16 Jan. 1864.

About 104,000 lbs. of gunpowder exploded at the Belvedere powder magazines of Messrs. Hall & Co., at Plumstead, near Woolwich; 13 persons perished, and the shock was felt at 50 miles' distance, 1 Oct. 1864. Searching inquiries were made into the circumstances, and new regulations for the keeping and transmission of powder issued in Nov.; see *Dartford*.

Mr. Gale, a blind gentleman of Plymouth, on 22 Jan. 1865, patented his method of rendering *gunpowder unflammable* by combining with it finely powdered glass, which can be readily separated by a sieve when the powder is required for use. Successful public experiments were made.

Mr. Gale exhibited his process before the queen at Windsor, 10 Nov. 1865; and it was severely tested at a martello tower, near Hastings, 20 June, 1866. The attainment of perfect security was still doubtful. Gale's Protected Gunpowder Company was formed Oct. 1865, and wound up March, 1867. Great explosion at Messrs. Hall's powder-mills, near Faversham; 11 men killed; much damage done; shock felt at

Cantterbury, 10 miles off, 28 Dec. 1867. Another explosion about 21 Dec. 1868.

Dixon & Beck's works blown up; 9 lives lost; 25 July, 1868. Explosion at Hounslow mills; 3 lives lost; 6 Sept. 1872.

Milner's powder-magazines placed in fire at Woolwich arsenal and found secure, 8, 9 Oct. 1872.

About 5 tons of gunpowder in barrels exploded in the barge *Tilbury*, on the Regent's canal, near the North-bridge gate, Regent's park, nearly 5 A.M., 2 Oct. 1874.

Three men on the barge killed; shock felt about 30 miles off; destruction extended over about a square mile; some houses thrown down; the house of Mr. Alma Tadema, the artist, much injured; very many windows blown in.

The powder was sent by Pigou and Wilks to Derbyshire for blasting purposes. Order of the barges: *Ready* (tug steamer), *Janet*, *Dr. Tilbury*, *Limehouse*, and *Hawkesbury*.

63391. had been subscribed for the sufferers up to 1 May, 1875. *Verdict of inquest*: Explosion caused by ignition of vapor from benzoline by a fire or light in the cabin of the *Tilbury*.

The Junction Canal Company guilty of gross negligence, and the present laws inadequate for public safety, 19 Oct. 1874.

Gunpowder Plot, for springing a mine under the houses of parliament, and destroying the three estates of the realm—king, lords, and commons—there assembled, was discovered on 4 Nov. 1605. It was projected by Robert Catesby early in 1604, and several Roman Catholics of rank were in the plot. Guy Faux was detected in the vaults under the house of lords, hired for the purpose, preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed at Holbeach house, whither they had fled, 8 Nov.; and Guy Faux, sir Everard Digby, Rookwood, Winter, and others were executed, 30, 31 Jan. 1606. Henry Garnet, a Jesuit, suffered as an accomplice, 3 May following. An anonymous letter sent to lord Montague led to the discovery. It contained the following words: "Though there be no appearance of any stir, yet I say they shall receive a terrible blow this parliament, and yet they shall not see who hurts them." The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained till 1825, when it was converted into offices.

Gurney's Act, 31 & 32 Vict. c. 116 (1868), amends the law relating to larceny and embezzlement.

Gutta Percha is procured from the sap of the *Jaonandra gutta*, a large forest tree, growing in the Malayan peninsula and on the islands near it. It was made known in England by Drs. De Almeida and Montgomery, at the Society of Arts, in 1843. As a non-conductor of electricity it is invaluable in constructing submarine telegraphs, an application suggested by Faraday and Werner Siemens independently, 1847.

Guy's Hospital (London). Thomas Guy, a wealthy bookseller, after bestowing large sums on St. Thomas's, determined to found a new hospital. At the age of seventy-six, in 1721, he commenced the present building, and lived to see it nearly completed. It cost him 18,793*l.*, and, in addition, he endowed it with 219,499*l.* In 1829, 196,115*l.* were bequeathed to this hos-

pital by Mr. Hunt to provide accommodations for 100 additional patients.

Guzerat, a state in India, founded by Mahmoud the Gaznevide, about 1020, was conquered by Akbar in 1572; and became subject to the Mahrattas, 1782 or 1782. At the battle of Guzerat, near the Chenab, in the Punjab, 21 Feb. 1849, lord Gough totally defeated the Sikhs and captured the town of Guzerat.

Gwalior, an ancient state in Central India; since 1803, under British protection. Scindiah, the maharajah, remained faithful during the revolt of 1857; visit of the prince of Wales, 31 Jan. 1876.

Gymnasium, a place where the Greeks performed public exercises, and where philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing the athletes were often naked (*gymnos*), whence the name. A London gymnastic society, formed in 1826, did not flourish. In 1862, M. Ravenstein set up another gymnastic association. The German Gymnastic Institution, in St. Pancras road, London, was opened on 29 Jan. 1865; and a large and perfect gymnasium at Liverpool was inaugurated by lord Stanley, 6 Nov. 1865. A London athletic club existed in Nov. 1866.

Gymnosophistæ, a set of naked philosophers in India. Alexander (about 324 B.C.) was astonished at the sight of men who seemed to despise bodily pain, and endured tortures without a groan.—*Pliny*.

Gypsies, GIPSIKS, or EGYPTIANS (French, *Bohémiens*; Italian, *Zingari*; Spanish, *Gitanos*; German, *Zigeuner*), vagrants, supposed to be descendants of low-caste Hindus expelled by Timour, about 1399. They appeared in Germany and Italy early in the fifteenth century, and at Paris in 1427. In England an act was made against their itinerancy, in 1580; and in the reign of Charles I. thirteen persons were executed at one assizes for having associated with gypsies for about a month. The gypsy settlement at Norwood was broken up, and they were treated as vagrants, May, 1797. There were in Spain alone, previously to 1800, more than 120,000 gypsies, and many communities of them yet exist in England. Notwithstanding their intercourse with other nations, their manners, customs, visage, and appearance are almost wholly unchanged, and their pretended knowledge of futurity gives them power over the superstitious. Esther Faa was crowned queen of the gypsies at Blyth, on 18 Nov. 1860. The Bible has been translated into gypsy dialects. Gypsy parliaments are occasionally held.

GEORGE BORROW fraternized with the gypsies and wrote several works describing his adventures, especially "The Zin-cali" (1841), "The Bible in Spain" (1842), "Lavengro" (1850), and a "Dictionary of the Gypsy Language" (1874). He was born in 1803, and died in Aug. 1881.

Gyroscope (from *gyrere*, to revolve), the name of a rotatory apparatus invented by Fessel of Cologne (1852), and improved by prof. Wheatstone and M. Foucault of Paris. It is similar in principle to the rotatory apparatus of Bohnenberger of Tübingen (born 1765, died 1831).—The gyroscope, by exhibiting the combined effects of the centrifugal and centripetal forces, and of the cessation of either, illustrates the great law of gravitation.

H.

Haarlem, an ancient town in Holland, once the residence of the counts, was taken by the duke of Alva, in July, 1573, after a siege of seven months. He violated the capitulation by butchering half the inhabitants. The lake was drained 1849-51.

Habeas Corpus. The subjects' *Writ of Right*, passed "for the better securing the liberty of the subject," 31 Charles II. c. 2, 27 May, 1679. If any person be imprisoned by the order of any court, or of the queen

herself, he may have a writ of habeas corpus to bring him before the court of queen's bench or common pleas, which shall determine whether his committal be just. This act (founded on the old common-law) is next in importance to *Magna Charta*. The *Habeas Corpus* act can be suspended by parliament for a specified time when the emergency is extreme. In such a case the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then

be arrested without cause or purpose being assigned.—

The constitution of the United States provides that "the
privilege of habeas corpus shall not be suspended, un-
less when, in cases of rebellion or invasion, the public
safety may require it," but does not specify the de-
partment of the government having the power of sus-
pension. A series of contests on this subject between
the legal and military authorities began in Maryland,
May, 1861

Habeas Corpus act was suspended by Abraham Lincoln,
president of the United States, 24 Sept. 1862, to pre-
vent the release of military and state prisoners. In
April, 1863, congress upheld president Lincoln's right
to suspend the habeas corpus. Again, in Sept. 1863,
president Lincoln suspended the habeas corpus for the
retention of recruits whose parents, on false oaths,
tried to reclaim them as being under age. In May,
1864, the president, by the hand of Edwin M. Stanton,
secretary-of-war, ordered all prisoners held under the
suspension of the writ of habeas corpus to be dis-
charged.

In consequence of the affair of John Anderson (see *Slav-
ery in England*, note), an act was passed in 1862, en-
acting that no writ of *Habeas Corpus* should issue out
of England into any colony, etc., having a court with
authority to grant such writ.

East India Company in 1806; was closed in 1858, and
became a private educational establishment.

Hainault, a province in Belgium, anciently gov-
erned by counts, hereditary after Regnier I., who died in
916. The count John d'Arnesen became count of Hol-
land in 1299. Hainault henceforth partook of the fort-
unes of Flanders.

Hainault Forest (Essex), disafforested in 1851.
Here stood the Fairlop Oak (*which see*).

Hair. In Gaul, hair was much esteemed; hence the
appellation *Gallia comata*; cutting off the hair was a
punishment. The royal family of France held it as a
privilege to wear long hair artfully dressed and curled.
"The clerical tonsure is of apostolic institution!"—*Isi-
dorus Hispalensis*. Pope Anicetus forbade the clergy to
wear long hair, 155. Long hair was out of fashion dur-
ing the protectorate of Cromwell, and hence the term
Roundheads, in 1795, and also 1801.—*Hair-powder* came
into use in 1590; and in 1795 a tax of a guinea was laid
upon persons using it, which yielded at one time 20,000*l.*
per annum. The tax was repealed 24 June, 1869, when
it yielded about 1000*l.* a year; see *Beard*.

Halidon Hill, near Berwick, where, on 19 July,
1333, the English defeated the Scots, the latter losing
upwards of 14,000 slain, among whom was the regent
Douglas and a large number of the nobility; a compara-
tively small number of the English suffered. Edward
Balliol thus became king of Scotland for a short time.

Halifax (Yorkshire). The woollen manufactory
was successfully established here in the fifteenth cen-
tury. The power of the town to punish capitally (by a
peculiar engine resembling the guillotine) any criminal
convicted of stealing to the value of upwards of thirteen
pence halfpenny, was used as late as 1650. In 1857 Mr.
J. Crossley announced his intention of founding a college
here, and Mr. F. Crossley presented the town with a
beautiful park. Boiler explosion at Batme & Pritch-
ard's; Mr. Pritchard and 5 men killed, 9 Oct. 1879.

Halifax Administration. Charles, earl of Halifax, was appointed first lord of the treasury, 5 Oct. 1714. He died 19 May, 1715, and was succeeded by Charles, earl of Carlisle, on 10 Oct. following; and Robert Walpole became premier.

Charles, earl of Halifax, *first lord of the treasury*. William, lord Cowper, afterwards earl, *lord chancellor*. Daniel, earl of Nottingham, *lord president*. Thomas, earl of Wharton, *privy seal*. Hampstead, N.W. of London; originally a chapel-ry of Hendon, was made a parish after the Reformation.

The ancient chapel was taken down 1745; and a church was consecrated 8 Oct. 1747. An act authorizing the Metropolitan Board of Works to purchase the heath from sir John Maryon Wilson, bart., passed 29 June, 1871, and the heath was formally taken possession of by the Metropolitan Board of Works, 13 Jan. 1872, 45,000*l.* being paid.

Temporary small-pox hospital established at Hampstead, 1871
Charges of mismanagement against the officers; official inquiry (33 meetings, from 23 Sept. to 3 Nov.); inquiry respecting disappearance of a child, Elizabeth Bellue; medical officers exonerated from blame. Dec. "
A small-pox hospital erected here by Metropolitan District Asylum Board was much opposed, and led to litigation (see *Trials*, 1878); finally, the house of lords, on appeal, decided in favor of the inhabitants. . . . 7 March, 1881

Hampton Court Palace (Middlesex), built by cardinal Wolsey on the site of the manor-house of the knights hospitallers, and in 1525 presented to Henry VIII.; perhaps the most splendid offering ever made by a subject to a sovereign. Here Edward VI. was born, 12 Oct. 1537; here his mother, Jane Seymour, died, 24 Oct. following; and here Mary, Elizabeth, Charles, and others of our sovereigns resided. Much was pulled down, and the grand inner court built by William III. in 1694, when the gardens, occupying 40 acres, were laid out. The vine was planted 1769. Here was held, 14-16-18 Jan. 1604, the CONFERENCE between the Puritans and the Established church clergy, which led to a new translation of the Bible; see *Conference*.

Hampton Roads (Virginia), CONFLICT BETWEEN THE MONITOR AND THE MERRIMAC. The *Merrimac*, which had been sunk when the Norfolk navy yard was abandoned by national vessels, was subsequently raised by the confederates, converted into a formidable iron-clad ram, and named the *Virginia*. John Ericsson received his contract for building the *Monitor* 5 Oct. 1861, and this vessel was completed early in the following January. On 5 March she was despatched to Fortress Monroe. Just before she reached her destination the *Virginia* had come out (8 March) and attacked the national vessels in Hampton Roads. She was commanded by Franklin Buchanan. She had sunk the *Cumberland*, captured the *Congress*, and pushed the *Minnesota* aground. At night she returned to Norfolk. The next morning she reappeared; but the *Monitor*, commanded by lieutenant John L. Worden, had arrived. After a short conflict with this new antagonist, the *Virginia*, finding the odds against her, again retired. After the evacuation of Norfolk by the confederates, she was blown up by her commander, Josiah Tatnall, May 11, 1862. The *Monitor* sank on her passage to Charleston, 31 Dec. 1862.

Hampton Roads Conference. In Jan. 1865, Francis P. Blair twice visited Richmond, Va., to confer with Jefferson Davis. He believed that a suspension of hostilities, resulting ultimately in a settlement of the questions involved, by the restoration of the Union, might be brought about, by the common desire, north and south, to enforce the Monroe doctrine against the French in Mexico. Out of Mr. Blair's visits grew an arrangement for a conference, which was held on board a vessel in Hampton Roads, 3 Feb. 1865, between Mr. Lincoln and Mr. Seward upon one side, and Messrs. A. H. Stephens, R. M. T. Hunter, and John A. Campbell on the other. The conference was informal, and practically came to naught, no basis for negotiation being found upon which both sides would agree to discuss plans looking to peace.

Hanaper Office (of the court of chancery), where writs relating to the business of the subject, and their returns, were anciently kept in *hanaperio* (in a wicker hamper); and those relating to the crown, in *parva бага* (a little bag). Hence the names *Hanaper* and *Petty Bag Office*. The office was abolished in 1842.

Hanau (Hesse-Cassel), incorporated 1808. Here a division of the combined armies of Austria and Bavaria of 30,000 men, under gen. Wrede, encountered the French, 70,000 strong, under Napoleon I., on their retreat from

Leipzig, 30 Oct. 1813. The French suffered very severely, though the allies were compelled to retire. The county of Hanau was made a principality in 1803, seized by the French in 1806; incorporated with the duchy of Frankfurt in 1809; restored to Hesse in 1813; which was annexed to Prussia in 1866.

Handel's Commemorations. The first was held in Westminster abbey, 26 May, 1784; king George III. and queen Charlotte, and above 3000 persons, being present. The band contained 268 vocal and 245 instrumental performers, and the receipts of three successive days were 12,746*l*. These concerts were repeated in 1785, 1786, 1787, and 1791.

Second great commemoration, in the presence of king William IV. and queen Adelaide when there were 641 performers, 24, 26, 29 June, and 1 July, 1854.

Great Handel festival (at the Crystal Palace) on the centenary of his death, projected by the Sacred Harmonic Society (grand rehearsal at the Crystal Palace, 16, 17, 19 June, 1887, and 2 July, 1884).

Performances Messiah, 20 June, selections, 22 June, Israel in Egypt, 24 June, 1839, when the prince consort, the king of the Belgians, and 26,877 persons were present. There were 27-5 vocal and 393 instrumental performers, and the performance was highly successful. The receipts amounted to about 31,000*l*, from which there were deducted 18,000*l* for expenses, of the residue (15,000*l*), two parts accrued to the Crystal Palace Company, and one part to the Sacred Harmonic Society. Handel's baritone original scores of his oratorios, and other interesting relics were exhibited.

Handel festivals (at the Crystal Palace): 4000 performers, highly successful, 23, 25, 27 June, 1862, agents, 26, 28, 30 June, 1863, agents, 15, 17, 19 June, 1868 (about 25,000 persons), also, 19, 21, 23 June, 1871 (about 64,000 persons subscribed), also, 21, 24, 26 June, 1874 (total present, 78,000), also, 23, 27, 29 June, 1877 (present, 74,124); 18, 21, 23, 25 June, 1880 (present, 70,643).

Handel Societies, for publication of Handel's works:

Founded in London, 1847; first volume issued 1843-4; society dissolved, 1848, work continued by Cramer & Co. completed, 1865.

Founded at Leipzig in 1856, publications began 1864.

Handel and Haydn Society, Boston, U.S., for performances only, founded 1818.

Handkerchiefs, wrought and edged with gold, used to be worn in England by gentlemen in their hats, as favors from young ladies, the value of them being from five to twelve pence for each in the reign of Elizabeth, 1558.—*Stow's Chron.* Paisley handkerchiefs were first made in 1748.

Hands, imposition of, was first performed by Moses in setting apart his successor Joshua (Numb. xxvii. 23); in reception into the church, and in ordination, by the apostles (Acts viii. 17; 1 Tim. iv. 14).

Hanging, Drawing, and Quartering, said to have been first inflicted upon William Marise, a pirate, a nobleman's son, 25 Hen. III. 1241. Five gentlemen attached to the duke of Gloucester were arraigned and condemned for treason, and at the place of execution were hanged, cut down alive instantly, stripped naked, and their bodies marked for quartering, and then pardoned, 25 Hen. IV. 1447.—*Stow.* The Cato-street conspirators (*which see*) were beheaded after death by hanging, 1 May, 1820. Hanging in chains was abolished in 1834; see *Death*.

Hanging Rock, Battle at. A few miles eastward of Rocky Mount (*which see*), on the Catawba river, is a large boulder on the verge of a high bank, called Hanging Rock. It gives the name to the place. There a large body of British and Tories were attacked and dispersed by gen. Sumter on 6 Aug. 1780. There was an engagement of about four hours, and Sumter lost 12 men killed and 41 wounded. It was one of the most desperate battles of the war, considering the number engaged.

Hango Bay (Finland). On 5 June, 1855, a boat commanded by Lieut. Geneste left the British steamer *Cossack* with a flag of truce to land some Russian prisoners. They were fired on by a body of riflemen, and five were killed, several wounded, and the rest made prisoners. The Russian account, asserting the irregular-

ity to have been on the side of the English, was not substantiated.

Hanover (N.W. Germany), successively an electorate and a kingdom, chiefly composed of territories which once belonged to the dukes of Brunswick (*which see*). Population in 1859, 1,850,000; in 1861, 1,888,070; in 1873, 2,017,393. It was annexed to Prussia, 20 Sept. 1866.

ELECTORS.

1699. Ernest Augustus, youngest son of George, that son of William, duke of Brunswick Lüneburg, who obtained by lot the right to marry (see *Brunswick*). He became bishop of Osnaburg in 1692, and in 1679 inherited the possessions of his uncle John, duke of Calenberg, created Elector of Hanover in 1692.

(He married, in 1680, the princess Sophia, daughter of Frederick, elector palatine, and of Elizabeth, the daughter of James I. of England. In 1701 Sophia was declared next heir to the British crown, after William III., Anne, and their descendants.)

1690. George Lewis, son of the preceding, married his cousin Sophia, the heiress of the duke of Brunswick Zell; became king of Great Britain, 1 Aug. 1714, as GEORGE I.

1727. George Augustus, his son (GEORGE II. of England), 11 June.

1760. George William Frederick, his grandson (GEORGE III. of England), 26 Oct.

KINGS.

1614. George William Frederick (the preceding sovereign), first king of Hanover, 12 Oct.

1820. George Augustus Frederick, his son (GEORGE IV. of England), 28 Jan.

1830. William Henry, his brother (WILLIAM IV. of England), 26 June, died 20 June, 1837.

(Hanover separated from the crown of Great Britain.)

1837. Ernest Augustus, duke of Cumberland, brother to William IV. of England, on whose demise he succeeded (as a distinct inheritance) to the throne of Hanover, 20 June.

1851. George V. (born 27 May, 1819), son of Ernest; ascended the throne on the death of his father, 14 Nov. His state annexed to Prussia, 20 Sept. 1866, visited England, May, June, 1876, died 12 June, 1878.

1878. Ernest Augustus II., son, born 21 Sept. 1845, maintained his claims in a circular to the sovereigns of Europe, dated 11 July, 1878, married princess Thyra of Denmark, 20 Dec. 1878.

Hanover Square, built about 1718; the concert rooms opened by John Gallini, 1 Feb. 1775; the house taken for a club, Dec. 1874; rebuilt, 1875.

Hanse Towns. The Hanseatic League (from *hansa*, association), formed by port towns in Germany against the pirates of the Swedes and Danes: began about 1140; the league signed 1241. At first it consisted only of towns situate on the coasts of the Baltic sea, but in 1870 it was composed of sixty-six cities and forty-

four confederates. The league proclaimed war against Waldemar, king of Denmark, about the year 1348, and against Eric in 1428, with forty ships and 12,000 regular troops, besides seamen. On this several princes ordered the merchants of their respective kingdoms to withdraw their effects. The Thirty Years' war in Germany (1618-48) broke up the strength of the association, and in 1630 the only towns retaining the name were Lübeck, Hamburg, and Bremen. The league suffered also by the rise of the commerce of the Low Countries in the fifteenth century. Their privileges by treaty in England were abolished by Elizabeth in 1578.

Hanwell Lunatic Asylum, for Middlesex, established 1831.

Hapsburg (HABSBERG, or HABICHTSBERG), HOUSE OF, the family from which the imperial house of Austria sprang in the eleventh century, Werner being the first-named count of Habsburg, 1096. Hapsburg was an ancient castle of Switzerland, on a lofty eminence near Schintznach. Rodolph, count of Hapsburg, became archduke of Austria and emperor of Germany, 1273; see *Austria and Germany*.

Harbors. England has many fine natural harbors: the Thames (harbor, dock, and depot), Portsmouth, Plymouth, etc. Acts for the improvement of harbors, etc., were passed in 1847, 1861, and 1862.

Hares and Rabbits Act, see *Game*.

Harfleur, seaport, N.W. France, taken by Henry V., 22 Sept. 1415.

Harlaw (Aberdeenshire), the site of a desperate, indecisive battle between the earl of Mar, with the royal army, and Donald, the lord of the Isles, who aimed at independence, 24 July, 1411. This conflict was very disastrous to the nobility, some houses losing all their males.

Harleian Library, containing 7000 manuscripts, besides rare printed books, bought by Edward Harley, afterwards earl of Oxford and Mortimer, 1705 et seq., is now in the British Museum. A large portion of his life and wealth was spent on the collection. He died 21 May, 1734. The "Harleian Miscellany," a selection from the manuscripts and tracts of his library, was published in 1744 and 1808.

Harlem Plains, BATTLE ON. This was a severe skirmish. It occurred on 16 Sept. 1776, between American troops under col. Knowlton and major Leitch, and detachments of the British army, which was then in possession of New York city and the lower part of Manhattan island. Knowlton and Leitch were killed, but the Americans were victorious. Of Knowlton, Washington said, "He was an honor to any country."

Harley Administration, see *Oxford*.

Harley Street, London, W. At No. 139, the house inhabited by Mr. Henriques, the decomposed body of a woman, stabbed in the breast and covered with chloride of lime, was found 3 June; verdict of coroner's inquest, wilful murder by person unknown, 14 June, 1880.

Harmonic Strings, said to have been invented by Pythagoras about 540 B.C., through hearing four blacksmiths working with hammers, in harmony, whose weights he found to be six, eight, nine, and twelve.—The HARMONICA, or musical glasses (tuned by regulating the amount of water, and played by a moistened finger on the rim), were played on by Gluck in London, 23 April, 1746; "arranged" by Puckeridge and Delaval, and improved by Dr. Franklin in 1760. Mozart, Beethoven, and others composed for this instrument; see *Copophone*.—"HARMONICON," an excellent musical periodical, edited by W. Ayrton, Jan. 1823-Sept. 1833.

Harmonichord, a keyed instrument, in which sounds are produced by friction, invented by Th. Kauffmann in 1810.

Harmonists, a sect founded in Würtemberg by George and Frederick Rapp, about 1780. Not much is

known of their tenets, but they held their property in common, and considered marriage a civil contract. They emigrated to America, and built New Harmony, in Indiana, in 1815. Robert Owen purchased this town about 1823, but failed in his scheme at establishing a "social" community, and returned to England; see *Socialists*. The Harmonists removed to Pittsburgh, in Pennsylvania, in 1822.

Harmonium, a keyed instrument, resembling the accordion, the tones being generated by the action of wind upon metallic reeds. The Chinese were well acquainted with the effects produced by vibrating tongues of metal. M. Biot stated, in 1810, that they were used musically by M. Grenié; and in 1827-9 free reed-stops were employed in organs at Beauvais and Paris. The best-known harmoniums in England are those of Alexandre and Debain, the latter claiming to be the original maker of the French instrument. In 1841, Mr. W. E. Evans, of Cheltenham, produced his English harmonium, then termed the "organ-harmonica," and by successive improvements he produced a fine instrument, with diapason quality, and great rapidity of speech, without loss of power.

Harmony, the combination of musical notes of different pitch, appears not to have been practised by the Greeks.

Hucbald, a Flemish monk, published combinations in his "Enchiridion Musicæ," ninth century.

Harmony greatly promoted by Palestrina, and especially by Monteverde.

Jean de Muris wrote "Ars Contrapuncti," in fourteenth century.

Francis of Cologne described "descant," 1600.

Beethoven greatly enlarged the range of harmonic bases.

Harness, chariots, and the leathern dressings used for horses to draw them, are said to have been the invention of Erichthonius of Athens, who was made a constellation after his death, under the name of *Boötes* (Greek for ploughman), about 1487 B.C.

Haro, CRY OF (*Clameur de Haro*), traditionally derived from Raoul, or Rollo, of Normandy, ancestor of our Norman princes of England. Rollo administered justice so well that injured persons cried "*à Raoul!*" The cry was raised in a church in Jersey in 1859.

Harp. Invented by Jubal, 3875 B.C. (Gen. iv. 21). David played the harp before Saul, 1063 B.C. (1 Sam. xvi. 23). The Cimbri, or English Saxons, had this instrument. The celebrated Welsh harp was strung with gut; and the Irish harp, like the more ancient harps, with wire. Erard's improved harps were first patented in 1795.

One of the most ancient harps existing is that of Brian Boromile, monarch of Ireland: it was given by his son Donagh to pope John XVIII., together with the crown and other regalia of his father, in order to obtain absolution for the murder of his brother Teig. Adrian IV. alleged this as being one of the principal titles to the kingdom of Ireland in his bull transferring it to Henry II. This harp was given by Leo X. to Henry VIII., who presented it to the first earl of Clanricarde; it then came into possession of the family of De Burgh; next into that of MacMahon of Clenagh, county of Clare; afterwards into that of MacNamara of Limerick; and was at length deposited by the right hon. William Conyngham in the College Museum, Dublin, in 1782.

Harper's Ferry (Virginia), IN THE WAR OF THE AMERICAN REBELLION. This place is situated at the outlet of the Shenandoah Valley, at the junction of the Shenandoah with the Potomac. The town in 1860 had a population of 10,000. On 18 April, 1861, the day after the secession of Virginia, a confederate force marched upon the town. Lieut. Roger Jones, unable to hold the post, abandoned it, after destroying the arsenal and workshops. The place was held by gen. Patterson just before and during the battle of Bull Run. On 15 Sept. 1862, it was surrounded and captured by "Stonewall" Jackson. Gen. Miles, commanding the post, was killed; about 10,000 men fell into the hands of the Confederates; see *United States*, 1859-62.

Harpichord, see *Piano-forte*, note.

Harrison, Fort, DEFENCE OF. Fort Harrison, in Indiana, under the command of captain Zachary Taylor, was attacked by 300 Indians on 4 Sept. 1812. Taylor had only 15 effective men, but defended the fort and drove off the Indians, after losing 2 killed and 2 wounded.

Harrison's Timepiece, made by John Harrison, of Foulby, near Pontefract. In 1714, the government offered rewards for methods of determining the longitude at sea. Harrison came to London, and produced his first timepiece in 1735; his second in 1739; his third in 1749; and his fourth, which procured him the reward of 20,000*l.* offered by the Board of Longitude, a few years after. He obtained 10,000*l.* of his reward in 1764; and other sums, more than 24,000*l.* in all, for further improvements in following years.

In the Patent Museum at South Kensington is an eight-day clock made by Harrison in 1715. It strikes the hour, indicates the day of the month, and with one exception (the escapement) its wheels are entirely made of wood. The clock was going in 1871.

Harrogate (Yorkshire). The first or old spa in Knaresborough dome was discovered by captain Slingsby in 1571: a dome was erected over the well by lord Rosslyn in 1786. Two other chalybeate springs are the Alum well and the Towit spa. The sulphureous well was discovered in 1783. The theatre was erected in 1788. The Bath hospital was erected by subscription in 1825.

Harrow-on-the-Hill School (Middlesex), founded and endowed by John Lyon in 1571. To encourage archery, the founder instituted a prize of a silver arrow to be shot for annually on 4 Aug.; but the custom has been abolished. Lord Palmerston, sir R. Peel (the statesman), and lord Byron (the poet) were educated here. The school building suffered by fire, 22 Oct. 1838. The school arrangements were modified by the Public-schools act, 1868. Charles II. called Harrow church "the visible church."

Hartford Convention. Delegates from the several New England states politically opposed to the administration of president Madison, and deprecating the then existing war between the United States and Great Britain, assembled at Hartford in Dec. 1814, to take into consideration the state of public affairs. Peace that soon followed made further action on their part unnecessary. The purpose of the convention has been the subject of much acrimonious discussion. It has been alleged that the secession of the New England states, or some other form of obstruction to the National government in its prosecution of the war, was contemplated; but this has been stoutly denied.

Hartley Coal-mine (Northumberland). On 16 Jan. 1862, one of the iron beams, about 20 tons weight, at the mouth of the ventilating shaft, broke and fell, destroyed the brattice, divided the shaft, and carried down sufficient timber to kill five men who were ascending the shaft, and buried alive 202 persons, men and boys. Several days elapsed before the bodies could be removed. Much sympathy was shown by the queen and the public, and about 70,000*l.* were collected for the bereaved families. The coroner's verdict asserted the necessity of two shafts to coal-mines, and recommended that the beams of colliery engines should be of malleable instead of cast iron.

Hartwell (Buckinghamshire), the retreat of Louis XVIII., king of France, 1807-14. He landed in England at Yarmouth, 6 Oct. 1807; took up his residence at Gosfield Hall, in Essex; and afterwards came to Hartwell, as the count de Lille. His consort died here in 1810. On his restoration, he embarked at Dover for France, 24 April, 1814; see *France*.

Haruspices, priests or soothsayers, of Etruscan origin, who foretold events from observing entrails of animals. They were introduced in Rome by Romulus (about 750 B.C.), and abolished by Constantine, A.D. 337, at which time they were seventy in number.

Harvard College (Cambridge, Massachusetts, United States) was founded by the general court at

Boston, on 28 Oct. 1636. It derived its name from John Harvard, who bequeathed to it his library and a sum of money in 1638. The institution is the oldest university in the United States; it is now one of the best endowed and most celebrated of American institutions of learning, and has long been especially known as a chief seat of literary activity.

Hastings, a Cinque-port, Sussex; said to owe its name to the Danish pirate Hastings, who built forts here, about 893; but Mr. Kemble thinks it was the seat of a Saxon tribe named Hastings. At Senlac, now Battle, near Hastings, more than 80,000 were slain in the conflict between Harold II. of England and William, duke of Normandy, the former losing his life and kingdom, 14 Oct. 1066, his birthday. He and his two brothers were interred at Waltham abbey, Essex. The new town, St. Leonard's-on-Sea, was begun in 1828. A new pier here was inaugurated by earl Granville, 5 Aug. 1872.

Hastings's Trial. Warren Hastings, governor-general of India, was tried by the peers of Great Britain for high crimes and misdemeanors. Among other charges was his acceptance of a present of 100,000*l.* from the nabob of Oude; see *Chunar, Treaty of*. The trial occupied 145 days, and lasted seven years and three months; commencing 13 Feb. 1788, terminating in his acquittal, 23 April, 1795. Mr. Sheridan's speech on the impeachment excited great admiration.

Hastings was born in 1732; went to India as a writer in 1750; became governor-general of Bengal in 1772; of India, 1773; governed ably, but, it is said, unscrupulously and tyrannically, till he resigned in 1785. The expenses of his trial (70,000*l.*) were paid by the East India Company, and a pension was granted to him. He died a privy-councillor in 1818.

Hately Field, see *Shrewsbury*.

Hatfield's Attempt. On 11 May, 1800, during a review in Hyde park, a shot from an undiscovered hand was fired, which wounded a young gentleman who stood near king George III. In the evening, when his majesty was at Drury-lane theatre, Hatfield fired a pistol at him. Hatfield was confined as a lunatic till his death, 23 Jan. 1841, aged 69 years.

Hatherley's Act, see *Bankrupt*.

Hats, first made by a Swiss at Paris, 1404. When Charles VII. made his triumphal entry into Rouen, in 1449, he wore a hat lined with red velvet, and surmounted with a rich plume of feathers. Henceforward, hats and caps, at least in France, began to take the place of chaperons and hoods.—*Hénault*. Hats were first manufactured in England by Spaniards, in 1510.—*Stow*. Very high-crowned hats were worn by queen Elizabeth's courtiers, and high crowns were again introduced in 1788. A stamp-duty laid upon hats in 1784 and in 1796, was repealed in 1811. Silk hats began to supersede beaver about 1820.

None allowed to sell any hat for above 20*d.* nor cap for above 2*s.* 8*d.*, 5 Hen. VII. 1489. Every person above seven years of age to wear on Sundays and holidays a cap of wool, knit, made, thickened, and dressed in England by some of the trade of cappers, under the forfeiture of three farthings for every day's neglect, 1571. Excepted: maids, ladies, and gentlewomen, and every lord, knight, and gentleman, of twenty marks of land, and their heirs, and such as had borne office of worship in any city, town, or place, and the wardens of London companies, 1571.

Havana, capital of Cuba, West Indies, founded by Velasquez, 1511; taken by lord Albemarle, 14 Aug. 1762; restored, 1763. The remains of Columbus were brought from St. Domingo and deposited in the cathedral here, 1795.

Havre-de-Grâce (N.W. France) was defended for

the Huguenots by the English in 1562, who, however, were expelled in 1563. It was bombarded by Rodney, 6 to 9 July, 1759; by sir Richard Strachan, 25 May, 1798; and blockaded, 6 Sept. 1803. The attempts of the British to burn the shipping here failed, 7 Aug. 1804. The International Maritime Exhibition here opened, 1 June, 1868. The volunteers visited Havre: began to shoot, 26 May; 50 British received prizes, 29 June, 1874. The French Association for Science met here, 30 Aug. 1877.

Havre-de-Grace (Maryland), ravaged by the British under admiral Cockburn, 3 May, 1813.

Hay. Average value of the produce of the United Kingdom in 1874. 48,000,000*l*. Hay-making machinery exhibited at Taunton, July, 1875. Mr. William A. Gibbs's apparatus, with artificial heat, tried at his place at Chingford, Essex, reported successful, 3 July, 1875; at other places in July, 1880.

Hayman Case, see *Rugby*.

Haymarket (Westminster), opened in 1664, was removed to Cumberland market, 1 Jan. 1831. The Haymarket theatre was opened in 1702; see *Theatres*.

Hayti, or **HAITI**, Indian name of a West Indian island discovered by Columbus in Dec. 1492, and named Hispaniola, and afterwards St. Domingo. Before the Spaniards fully conquered it, they are said to have destroyed, in battle or cold blood, three million of its inhabitants, including women and children, 1495. It now comprises the republics of St. Domingo in the east, and Hayti in the west. Population (1877) of Hayti, about 550,000; of St. Domingo, about 136,500.

Head Act, see note to *Ireland*, 1465.

Health, GENERAL BOARD OF, was appointed by the act for the promotion of the public health, passed in 1848; see *Sanitary Legislation*. This board was reconstructed in Aug. 1854, and sir Benjamin Hall was placed at its head, with a salary of 2000*l*.; succeeded by W. F. Cowper, Aug. 1855, and by Ch. B. Adderley in 1858. The expenses for the year 1856-7 were 12,325*l*. In 1858 this board was incorporated into the privy council establishment; Dr. Simon being retained as a medical officer; see *Hygeiopolis*, *Sanitary Legislation*, etc.

Health, NATIONAL BOARD OF, in the United States, was established by act of congress approved March 3, 1879. National law of quarantine was passed June 3, 1879.

Hearth, or **Chimney**, **Tax**, on every fireplace or hearth in England, was imposed by Charles II. in 1662, when it produced about 200,000*l*. a year. It was abolished by William and Mary at the Revolution in 1689; imposed again, and again abolished.

Heat (called by French chemists *Caloric*). Little progress had been made in the study of the phenomena of heat till about 1757, when Joseph Black put forward his theory of latent heat (heat, he said, being absorbed by melting ice), and of specific heat. Cavendish, La-

volmer, and others continued Black's researches. Sir John Leslie put forth his views on radiant heat in 1804. Count Rumford put forth the theory that heat consists in motion among the particles of matter; which view he supported by experiments on friction (recorded in 1802). This theory (now called the dynamical or mechanical theory of heat, and used to explain all the phenomena of physics and chemistry) has been further substantiated by the independent researches of Dr. J. Meyer of Heilbronn and of Mr. Joule of Manchester (about 1840), who assert that heat is the equivalent of work done. In 1854, professor William Thomson of Glasgow published his researches on the dynamical power of the sun's rays. Thermo-electricity, produced by heating pieces of copper and bismuth soldered together, was discovered by Seebeck in 1823. A powerful thermo-electric battery was constructed by Marcus of Vienna in 1855. Professor Tyndall's "Heat, a Mode of Motion," first published Feb. 1863; third edition, 1868. The researches of philosophers are still devoted to this subject; see *Caloricence*. (Greatest heat in the hot summer of 1868: at Nottingham, in sun, 122.4°; in shade, 82.2°; 22 July, 1 p.m.; 14 Aug. 1876, 95.7° in the shade; 147° in sun; 26 June, 1878, 95° in the shade.)

Sir George Cayley invented a heated air engine in 1807, and Mr. Stirling applied it to raising water in Ayrshire in 1810. One invented by Mr. Wenham was described in 1873. Improvements have been made by Mr. C. Wm. Siemens. Capt. Ericsson constructed a ship, in which caloric, or heat, was the motive power. On 4 Jan. 1863, it sailed down the bay of New York at the rate of 14 miles an hour, it is said at a cost of 80 per cent. less than steam. Although caloric engines were not successful, Capt. Ericsson continued his experiments, and patented an improved engine in 1866. Mr. C. Prince states that on 14 July, 1947, the temperature was 90° in the shade at Uckfield, Sussex. In London 84.1° in the shade, 16 July, 1861.

Hebrews, see *Jews*.

Hebrides (the *Ebudes* of Ptolemy and the *Hebudes* of Pliny), western isles of Scotland, long subject to Norway; ceded to Scotland in 1264; and annexed to the Scottish crown in 1540 by James V. The heritable jurisdictions were abolished in 1747.

Hebron (in Palestine). Here Abraham resided, 1850 a.c.; and here David was made king of Judah, 1048 a.c. On 7 April, 1862, the prince of Wales visited the reputed cave of Machpelah, near Hebron, said to contain the remains of Abraham and his descendants.

Hecatombs, an ancient sacrifice of a hundred oxen, particularly observed by the Lacedaemonians when they possessed a hundred cities. The sacrifice was subsequently reduced to twenty-three oxen, and goats and lambs were substituted.

Hecla, Mount (Iceland). Its first recorded eruption is 1004. About twenty-two eruptions have taken place, according to Olafsson and Paulson. Great convulsions of this mountain occurred in 1766, since when a visit to the top in summer is not attended with great difficulty. Perhaps the most awful volcanic eruption on record took place in 1784-5, when rivers were dried up, and many villages overwhelmed or destroyed. The mount was in a state of violent eruption from 2 Sept. 1845, to April, 1846. Three new craters were formed, from which pillars of fire rose to the height of 14,000 English feet. The lava formed several hills, and pieces of pumice-stone and scoriae of 2 cwt. were thrown to a distance of a league and a half; the ice and snow which had covered the mountain for centuries melted into prodigious floods.

Hegira, ERA OF ʾHIK, dates from the flight (Arabic *hijra*) of Mahomet from Mecca to Medina on the night of Thursday, 12 July, 622. The era commences on the 16th. Some compute this era from the 12th, but Cantimir proves that the 16th was the first day. 35 of its lunar years are equal to 32 of those of the vulgar era.

Heidelberg (Germany) was the capital of the Palatinate, 1562-1719. The Protestant electoral house becoming extinct in 1688, a war ensued, in which the

castle was ruined, and the elector removed his residence to Mannheim. It was annexed to Baden in 1802. Here was the celebrated tun, constructed in 1843, when it contained twenty-one pipes of wine. Another was made in 1664, which held 600 hogheads. It was destroyed by the French in 1688; but a larger one, fabricated in 1761, which held 800 hogheads, and was formerly kept full of the best Rhenish wine, is said to be mouldering in a damp vault, empty since 1769.

Helder Point (Holland). The fort and the Dutch fleet lying in the Texel surrendered to the British under the duke of York and sir Ralph Abercromby, for the prince of Orange, after a conflict. 540 British were killed, 30 Aug. 1799. The place was left in Oct.; see *Bergen*.

Helena, St., an island in the South Atlantic Ocean, discovered by the Portuguese under Juan de Nova Castilla, on St. Helena's day, 21 May, 1502. The Dutch afterwards held it until 1600, when they were expelled by the English. The British East India Company settled here in 1651; and the island was alternately possessed by the English and Dutch until 1673, when Charles II., on 12 Dec., assigned it to the company once more. St. Helena was the place of Napoleon's captivity, 16 Oct. 1815; and here he died, 5 May, 1821. His remains were removed in 1840, and interred at the Hôtel des Invalides, Paris; see *France*, 1840. The house and tomb have been purchased by the French government. The bishopric was founded in 1859. Governor, adm. sir Charles Elliot, 1868-9; adm. Charles George Edward Patey, 1869; Hudson Ralph Janisch, 1873. Population, 1871, 6241.

Heligoland, an island in the North Sea, taken from the Danes by the British, 6 Sept. 1807; made a depot for British merchandise; confirmed to England by the treaty of Kiel, 14 Jan. 1814. In a naval engagement off Heligoland, between the Danes and the Austrians and Prussians, the allies were compelled to retire, 9 May, 1866. Governor, col. Henry F. B. Manse, 1863. Population, 1877, about 2000.

Heliography (from *ἥλιος*, the sun, and *γράφω*, to describe).

A system of telegraphing by mirrors flashing the rays of the sun said to have been employed by the ancients in the time of Alexander about 333 a.c.

A portable heliograph, invented by Mr. H. Manco, of the Persian telegraph department, was announced in 1878. It was employed in India, 1877-8, and in the Afghan and Zulu campaigns, 1879-80; see also *Photography*.

Heliometer, an instrument for measuring the diameters of the sun, moon, planets, and stars, invented by Savary in 1743; applied by M. Boquer in 1744. A fine heliometer, by Repsold of Hamburg, was set up at the Radcliffe observatory, Oct. 1849.

Heliocope, a peculiar sort of telescope prepared for observing the sun so as not to affect the eye, was invented by Christopher Scheiner in 1625.

Heliostat, an instrument invented to make a sun-beam stationary, or apparently stationary; invented by Gravesande about 1719, and greatly improved by Malus and others. One constructed by M. Foucault and Duboscq was exhibited at Paris in Oct. 1862.

Hellas, in Thessaly, the home of the Hellenes and the Greek race, which supplanted the Pelasgians from the fifteenth to the eleventh century a.c., derived its name from Hellen, king of Phthiotis, about 1600 a.c. The Hellenes separated into the Dorians, Æolians, Ionians, and Achæans. The present king of Greece is called "king of the Hellenes;" see *Greece*.

Hellenic Society, to promote Hellenic studies, formed at a meeting, 16 June, 1879, by Mr. C. T. Newton and others.

Hellespont (now the Strait of the Dardanelles) was named after Helle, daughter of Athamas, king of Thebes, who was drowned here. It is celebrated for the story of the loves of Hero of Sestos, and Leander of

Abydos: Leander was drowned in a tempestuous night as he was swimming across the Hellespont (about one mile), and Hero, in despair, threw herself into the sea, about 627 B.C. Lord Byron and lieut. Ekenhead also swam across, 3 May, 1810; see *Nerxes*.

Hell-fire Clubs. Three of these associations were suppressed, 1721. They met at Somerset House, and at houses in Westminster and in Conduit street.

Helmets, among the Romans, were provided with a vizor of grated bars, to raise above the eyes, and beaver to lower for eating; the Greek helmet was round, the Roman square. Richard I. of England wore a plain round helmet; but most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated vizor; and the helmet of Robert I. was surmounted by a crown, 1306.—*Grillim*.

Helots, *captives*, derived by some from the Greek *ἑλός*, to take; by others from Helos, a city which the Spartans hated for refusing to pay tribute, 883 B.C. The Spartans, it is said, ruined the city, reduced the Helots to slavery, and called all their slaves and prisoners of war *Helots*. The number of the Helots was much enlarged by the conquest of Messenia, 668 B.C.; and is considered to have formed four fifths of the inhabitants of Sparta. In the Peloponnesian war the Helots behaved with uncommon bravery, and were rewarded with liberty, 431 B.C.; but the sudden disappearance of 2000 manumitted slaves was attributed to Lacedæmonian treachery.—*Herodotus*.

Helvetian Republic. Switzerland having been conquered by the French in 1797, a republic was established April, 1798, with this title; see *Switzerland*.

Helvetii, a Celto-Germanic people who inhabited what is now called Switzerland. Invading Gaul, 61 B.C., they were defeated and massacred by Julius Cæsar, 58 B.C., near Geneva.

Hemp and Flax. Flax was first planted in England, when it was directed to be sown for fishing-nets, 1532-3. "Bounties were paid to encourage its cultivation in 1783; and every exertion should be made by the government and legislature to accomplish such a national good. In 1785 there were imported from Russia, in British ships, 17,695 tons of hemp and flax."—*Sir John Sinclair*. The importation of hemp and flax in 1870, 3,510,178 cwt.; in 1877, 3,502,447 cwt.; in 1879, 2,943,738. The cultivation of flax was revived at the dearth of cotton during the American civil war, 1861-4.

Hengestdown (Cornwall). Here Egbert is said to have defeated the Danes and West Britons, 835.

Henoticon (from the Greek *ἐνότης*, unity), an edict of union for reconciling the Eutychians with the church, issued by the emperor Zeno at the instance of Acacius, patriarch of Constantinople, 482. It was zealously opposed by the popes of Rome, and was annulled by Justin I. in 518. The orthodox party triumphed, and many heretic bishops were expelled from their sees.

Heptarchy (or government of seven rulers) in England was gradually formed from 455, when Hengist became king of Kent. It terminated in 828, when Egbert became sole monarch of England. There were at first nine or ten Saxon kingdoms, but Middlesex soon ceased to exist, and Bernicia and Deira were generally governed by one ruler, as Northumbria; see *Britain* and *Otarchy*.

Heraclidæ, descendants of Hercules, who were expelled from the Peloponnesus about 1200 B.C., but reconquered it in 1048, 1103-4, or 1109 B.C., a noted epoch in chronology, all the history preceding being accounted fabulous.

Heraldry. Marks of honor were used in the first ages.—*Nisbet*. The Phrygians had a sow; the Thracians, Mars; the Romans, an eagle; the Goths, a bear; the Flemings, a bull; the Saxons, a horse; and the ancient French, a lion, and afterwards the fleur-de-lis (*which see*). Heraldry, as an art, is ascribed first to

Charlemagne, about 800; and next to Frederick Barbarossa, about 1152; it began and grew with the feudal law.—*Mackenzie*. The great English works on Heraldry are those of Barham or Barkham, published by Gwillim (1610), Edmonson (1780), and Burke's "Armory" (1842; new ed., 1878, contains a history and the arms of above 60,000 British families).

Formerly, in many ceremonies, the herald represented the king's person, and therefore wore a crown, and was always a knight.

The college has an earl-marshal, 3 kings-of-arms (Garter, Clarenceux, and Norroy), 6 heralds (Richmond, Lancaster, Chester, Windsor, Somerset, and York), 4 pursuivants, and 2 extra heralds; see *Earl-marshal*, and *Kings-of-Arms*.

The building in Doctors' Commons, London, was erected by sir Christopher Wren (after the great fire in 1666). 1683
HERALDS' VISITATIONS were occasionally held in former times, at which the landed gentry were required to attend to prove their pedigrees, which were then entered in a book. The last is said to have been held in 1687. Some of the records have been printed.

Herat, on the confines of Khorasân, a strong city, called the key of Afghanistan. It was conquered by Persia, early in the sixteenth century; by the Afghans, in 1715; by Nadir Shah, 1781; recovered by the Afghans, 1749. The Persians, baffled in an attempt in 1838, took it 25 Oct. 1856, in violation of the treaty of 1853; and war ensued between Great Britain and Persia. Peace was made in April, 1857; and Herat was restored 27 July following. It was seized again by Dost Mahomed, 26 May, 1863; taken by Yakoob Khan, rebelling against his father, 6 May, 1871. Yakoob, reconciled to his father, was made governor, 16 Sept. 1871; see *Afghanistan*.

Herculaneum, an ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of lava from Vesuvius, 23 or 24 Aug. 79. Successive eruptions laid them still deeper under the surface, and all traces of them were lost until excavations began in 1711; and in 1713 many antiquities were found. In 1738 excavations were resumed, and works of art, monuments, and memorials of civilized life were discovered. 150 rolls of MS. papyri were found in a chest in 1754; and many antiquities were purchased by sir William Hamilton, and sold to the British Museum, where they are deposited; but the principal relics are preserved in the museum of Portici. The "Antichità di Ercolano," 8 vols. folio, were published by the Neapolitan government, 1757-92.

Hereford was made the seat of a bishopric about 676. Putta being first bishop. The cathedral was founded by a nobleman named Milfride, in honor of Ethelbert, king of the East Saxons, who was treacherously slain by his intended mother-in-law, the queen of Mercia. The tower fell in 1786, and was rebuilt by Mr. Wyatt. The cathedral was reopened, after very extensive repairs, on 30 June, 1863. The see is valued in the king's books at 768*l.* per annum. Present income, 4200*l.*

Heretics (from the Greek *αἵρεσις*, choice). Paul says, "After the way they call *heresy*, so worship I the

God of my fathers," 60 (Acts xxiv. 14). Heresy was unknown to the Greek and Roman religions. Simon Magus is said to have broached the Gnostic heresy about 41. This was followed by the Manichees, Nestorians, Arians, etc.; see *Inquisition*. It is stated that the promulgation of laws for prosecuting heretics was begun by the emperor Frederick II. in 1220, and immediately adopted by pope Honorius III.

Epiphanius chosen bishop of Constantius in Cyprus, 367; wrote "Panarium," a discourse against heresies; died 402
Thirty heretics came from Germany to England to propagate their opinions, and were branded in the forehead, whipped, and thrust naked into the streets in the depth of winter, where, none daring to relieve them, they died of hunger and cold (*Speed*). 1160
Laws against heretics repealed, 25 Henry VIII. 1534-5
The last person executed for heresy in Britain was Thomas Aikenhead, at Edinburgh 1696

Heritable Jurisdictions (i. e. feudal rights) in Scotland, valued at 164,232*l.*, were abolished by the act 20 Geo. II. c. 43 (1747), and restored to the crown for money compensation after 25 March, 1748. *Heritable and Movable Rights*, in the Scottish law, denote what in England is meant by real and personal property: *real* property in England answering nearly to heritable rights in Scotland, and *personal* property to the movable rights.

Hermadad, Santa (Spanish for "holy brotherhood"), associations of cities of Castile and Aragon to defend their liberties, began about the middle of the thirteenth century. The brotherhood was disorganized in 1498, order having been firmly established. It is said to have been continued as a species of voluntary police.

Herrera (Aragon). Here don Carlos of Spain, in his struggle for his hereditary right to the throne, at the head of 12,000 men, encountered and defeated gen. Buerens, who had not much above half that number of the queen of Spain's troops. Buerens lost about 1000 in killed and wounded, 24 Aug. 1837.

Herring-fishery was largely encouraged by the English and Scotch in very early times. The "statute of herrings," passed in 1357, placed the trade under government control. The mode of preserving herrings by pickling was discovered about 1397.—*Anderson*. The British Herring-fishery Company was instituted 2 Sept. 1750. A scientific commission in relation to the fishery was appointed in 1862.

Hesse (W. Germany), the seat of the Catti, formed part of the empire of Charlemagne; from the rulers of it in his time, the present are descended. It was joined to Thuringia till about 1263, when Henry I. (son of a duke of Brabant and Sophia, daughter of the landgrave of Thuringia) became landgrave of Hesse. The most remarkable of his successors was Philip the Magnanimous (1509), an eminent warrior and energetic supporter of the Reformation, who signed the Augsburg Confession in 1530 and the League of Smalcald in 1531. At his death, in 1567, Hesse was divided into HESSE-CASSEL and HESSE-DARMSTADT, under his sons William and George, and their descendants played an eminent part in the convulsions of Germany during the seventeenth and eighteenth centuries.* In 1803 Hesse-Cassel became an electorate, and in 1806 Hesse-Darmstadt a grand-duchy; which titles were retained in 1814. In 1807 Hesse-Cassel was incorporated with the kingdom of Westphalia, but in 1813 the electorate was re-established. Population (1875), grand-duchy, 884,218.

ELECTORS.

1803. William I.; born 3 June, 1743; succeeded as landgrave, 1785; made elector, 1803; deprived of his states, 1806; restored, 1813; died 27 Feb. 1821.

1821. William II.; born 28 July, 1777; died 20 Nov. 1847.

1847. Frederick William; born 20 Aug. 1802.

The elector, in 1850, remodelled the constitution given in 1831 (by which the chamber had the exclusive right of voting the taxes), and did not convene the chamber until the usual time for closing the session had arrived, when his demand for money for 1851 was laid before it. The chamber called for a regular budget, that it might discuss its items. The elector dissolved the chamber, and declared his dominions in a state of siege, 7 Sept. 1850.

He fled to Hanover, and subsequently to Frankfurt; and on 14 Oct. he formally applied to the Frankfurt diet for assistance to re-establish his authority in Hesse. On 6 Nov. an Austro-Bavarian force of 10,000 men entered Hesse-Cassel, under the command of Prince Thurn und Taxis, who fixed his headquarters in Hanau; and on the next day a Prussian force entered Cassel. The elector returned to his capital, the taxes having been collected under threats of imprisonment, 27 Dec. 1850.

The constitution of 1831 was abolished, and a new one established, 1852.

The conflict was soon resumed, and continued till, by

* Six thousand Hessian troops arrived in England, in consequence of an invasion being expected, in 1756. The sum of 471,000*l.* three per cent. stock was transferred to the landgrave of Hesse, for Hessian auxiliaries lost in the American war, at 30*l.* per man, Nov. 1786. The Hessian soldiers were again brought to this realm at the close of the last century, and served in Ireland during the rebellion in 1798.

law of 20 Sept. 1866, Hesse-Cassel was annexed to Prussia, 8 Oct. 1866.

The ex-lector's property sequestrated for intriguing against Prussia, 2 Nov. 1868, and Feb. 1869. He died 6 Jan. 1875.

HESSIE-DARMSTADT. (Population, Dec. 1875, 884,218.)

GRAND-DUKES.

1806. Louis I.; born 14 June, 1753; died 6 April, 1830.

1830. Louis II.; born 26 Dec. 1777; died 16 June, 1848.

1848. Louis III.; born 9 June, 1806. By treaty with Prussia, 15 Sept. 1866, he ceded the northern part of Hesse-Darmstadt, and paid a war contribution; supported Prussia in the Franco-Prussian war, Aug. 1870; died 13 June, 1877.

1877. Louis IV., nephew, born 12 Sept. 1837; married princess Alice of Great Britain (born 25 April, 1843), 1 July, 1862; died of diphtheria after nursing her husband and children, 14 Dec. 1878.

Heir: Ernest Louis, born 25 Nov. 1868.

Frederick William, 2d son, killed by a fall, 29 May, 1873; and other children.

HESSIE-HOMBURG, a landgraviate, established by Frederick, son of George of Hesse-Darmstadt, in 1596. His descendant, Augustus Frederick, married (7 May, 1819) Elizabeth, daughter of George III. of England, who had no issue.

The landgraviate was absorbed into the grand-duchy of Hesse in 1866, but re-established in 1815 with additional territories. The landgrave Ferdinand succeeded his brother, 8 Sept. 1848, and died 24 March, 1866. Hesse Homburg annexed to Prussia, 8 Oct. 1866.

Hexameter, the most ancient form of Greek verse, six measures or feet, each containing two long syllables (a spondee), or a long one and two short (a dactyl), the form of verse in which Homer wrote his "Iliad" and "Odyssey," and Virgil the "Æneid."

Hexham, or **HAGULSTAD**, Northumberland. The see of Hexham was founded about 678; it had ten bishops successively, but by reason of the rapine of the Danes it was discontinued; the last prelate appointed 810. At the BATTLE OF HEXHAM the Yorkist army of Edward IV. obtained a complete victory over the Lancastrian army of Henry VI., 15 May, 1464.

Hibbert Fund. Robert Hibbert on 19 July, 1847, established a trust fund "for the promotion of comprehensive learning and thorough research in relation to religion as it appears to the eye of the scholar and philosopher, and wholly apart from the interest of any particular church or system."

Hicks's Hall, Clerkenwell, London. The sessions-house of the justices of Middlesex was long so named on account of its having been erected for them by sir Baptist Hicks, at his own expense, 1611-12.

Hieroglyphics (sacred engravings), picture-writing, the expression of ideas by representation of visible objects, used chiefly by the Egyptians; said to have been invented by Athotes, 2112 B.C.—*Usher*. Young, Champollion, Rosellini, and others (in the present century) have much elucidated Egyptian hieroglyphics; see *Rosetta Stone*.

High and Low Church, sections in the church of England, became prominent in the reign of Anne. Dr. Sacheverell, preacher at St. Saviour's, Southwark, was prosecuted for two seditious sermons preached (14 Aug. and 9 Nov. 1709) to create apprehension for the safety of the church, and to excite hostility against dissenters. His friends were called High-church and his opponents Low-church, or moderate, men, 1720. The queen favored Sacheverell, and presented him with the rectory of St. Andrew's, Holborn. He died in 1724.

High Commission, COURT OF, an ecclesiastical

court, erected by 1 Eliz. c. 1, 1559, by which all spiritual jurisdiction was vested in the crown. It originally had no power to fine or imprison; but under Charles I. and archbishop Laud it assumed illegal powers, was complained of by the parliament, and abolished in 1641.

Highlands (of Scotland), long held by semi-barbarous clans, were greatly improved by the construction of military roads by gen. Wade, about 1725-6; by the abolition of heritable jurisdiction of feudal rights in 1747, and by the establishment of the Highland and Agricultural Society in 1784; see *Regiments*.

Highness. The title of *Highness* was given to Henry VII.; and this, and sometimes *Your Grace*, was the manner of addressing Henry VIII.; but about the close of the reign of the latter, the titles of "Highness" and "Your Grace" were absorbed in that of "Majesty." Louis XIII. of France gave the title of Highness to the prince of Orange in 1664; this prince had previously only the distinction of Excellency. Louis XIV. gave the princes of Orange the title of High and Mighty Lords, 1644.—*Henault*.

High-priest, see *Priest*.

High-treason. To regulate the trials for this crime, the statute so favorable to liberty, the 25th of Edward III. 1352, was enacted, by which two living witnesses are required; parliament having refused to sanction the sentence of death against the duke of Somerset. By the 40 Geo. III. 1800, it was enacted that where there was a trial for high-treason in which the overt act was a direct attempt upon the life of the sovereign, such trial should be conducted in the same manner as in the case of an indictment for murder; see *Treason*.

The last two cases of execution for high-treason:

I. William Cundell, alias Connell, and John Smith; tried on a special commission, 6 Feb. 1812, being two of fourteen British subjects taken in the enemy's service in the isles of France and Bourbon. Mr. Abbot, afterwards lord Tenterden and chief justice, and sir Vicary Gibbs, attorney-general, conducted the prosecution, and Mr. (afterwards lord) Brougham defended the prisoners. The defence was, that they had assumed the French uniform to aid their escape to England. They were hanged and beheaded on the lodge of Horsemen-lane jail on 16 March, 1812.

All the other convicts were pardoned, upon condition of serving in colonies beyond the seas.

Hippophagy, see *Horse*.

Hippopotamus (Greek *ἵπποπόταμος*, river-horse), a native of Africa, known to, but incorrectly described by, ancient writers. Hippopotami were exhibited at Rome by Antoninus, Commodus, and others, about 138, 180, and 218. The first brought to England arrived 25 May, 1850, and was placed in the Zoological Gardens, Regent's Park, London (died 11 March, 1878); another, a female, four months old, was placed there in 1854. One born here, 21 Feb. 1871, and another born 1 Jan. 1872, lived a few days only; another born 5 Nov. 1872. Two young ones, born at Paris in May, 1858, and June, 1859, were killed by their mother. One born at Amsterdam, 29 July, 1865.

Histology (from *ἱστός*, a web), the science which treats of the tissues which enter into the formation of animals and vegetables; mainly prosecuted by the aid of the microscope. Schwann, Valentin, Kölliker, Quekett, and Robin are celebrated for their researches. Prof. Quekett's "Lectures on Histology" were published in 1852 and 1854.

History. The Bible, the Parian Chronicle, the histories of Herodotus ("the father of history") and Ctesias, and the poems of Homer are the foundations of early ancient history. Later ancient history is considered as ending with the destruction of the Roman empire in Italy, 476. Modern history dates from the age of Charlemagne, about 800. There was not a professorship of modern history in either of our universities until the years 1724 and 1736, when Regius professorships were established by George I. and George II.—*Royal Historical Society*, London, established 1868, Earl Russell president, 1872. A commission was appointed 31 Aug. 1869, to examine historical MSS. in the possession of institutions and private families, and to publish any considered desirable. It has issued several reports, 1870 et seq.

Hittites, descendants of Heth, second son of Canaan, a commercial tribe, from whom Abraham bought a grave for his wife, 1860 B.C. (Gen. xiii.). They opposed Joshua, 1451 B.C.; and the Egyptians, about 1340 B.C.

The castle of Jerablus, a mound and ruins, 20 miles below Beledjik, on the Euphrates; was visited by Henry Maundrell, 1699; by Dr. Pococke, 1745; and by J. H. Skene and Mr. George Smith (died 1876), who agreed in considering the remains to be those of Carchemish, the ancient capital of the Hittites, captured and annexed by Sargon, king of Assyria (about 721 B.C.). The site had been held successively by Hittites, Assyrians, Babylonians, Greeks, Romans, and Arabs. A rich harvest may be expected from its exploration.

Hobart Town, or **HOBARTON**, a seaport and capital of Van Diemen's Land, was founded in 1804 by col. Collins, the first lieutenant-governor, who died here in 1810.

Holland (*Hollow land*, or, some say, *Wooded land*), a kingdom, N. W. Europe, the chief part of the northern Netherlands, composed of land rescued from the sea, and defended by immense dikes. It was inhabited by the Batavi in the time of Cæsar, who made a league with them. It became part of Gallia Belgica, and afterwards of the kingdom of Austrasia. From the tenth to the fifteenth century it was governed by counts under the German emperors. In 1861, the population of the kingdom in Europe was 3,521,416; of the colonies, 18,175,910; of both in 1863, 21,805,607; of the kingdom Jan. 1873, 3,767,263; 1876, 3,865,456; colonies, about 25,110,000; 1879, kingdom, 4,037,010.

Holloway Hospitals. Thomas Holloway, proprietor of the popular ointment, etc., offered the government 250,000*l.* to erect for the use of the middle classes an asylum for the insane, and hospitals for incurables and convalescents. The asylum was erected at St. Anne's Hill, near Virginia Water, 1878 et seq.

Holmfirth Flood. On 5 Feb. 1852, the Bilberry reservoir above Holmfirth, near Huddersfield, Yorkshire, burst its banks, and levelled four mills and many ranges of other buildings, killing more than 90 persons, and devastating property estimated at above half a million.

Holstein and Schleswig (N. W. Germany), duchies once belonging to Denmark. The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the ninth century, and afterwards formed part of the duchy of Saxony. In 1106 or 1110, Adolphus of Schauenberg became count of Holstein: his descendants ruled till 1459, when Adolphus VII. died without issue, and the states of Holstein and Schleswig elected Christian, king of Denmark, his nephew, as their duke, through fear of his arms. In 1544, his grandson, Christian II., divided his states among his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family reigned in Denmark till the decease of Frederick VII., 15 Nov. 1863. From a younger branch (the dukes of Holstein-Gottorp) descended, through marriage, the kings of Sweden from 1751 to 1818, and the reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar. In 1773, Catherine II. of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, etc. The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814, and on 28 May, 1831, constituent assemblies were granted to them. Since 1844 disputes have been rife between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German Confederacy, in which they were supported by Prussia; war ensued, which lasted till 1850, when they submitted to Denmark. The agitation in the duchies, encouraged by Prussia, revived in 1857. The Germans in Schleswig desired it to be made a member of the German Confederation, like Holstein; but both duchies demanded a local government more independent of Denmark, which changes were resisted by that power. For the events of the war of 1864, see *Denmark*. By the convention signed at Gastein (*which see*), 14 Aug. 1865, the government of Holstein was left with Austria, and that of Schleswig with Prussia. The whole of Holstein and part of Schleswig were ceded to Prussia by the treaty of Prague, signed 23 Aug. 1866. Population in 1860, 1,004,473. The 5th clause, directing N. Schleswig to be given to Denmark if the people voted for it, was not acted on, although claimed; and was abrogated, Feb. 1879.

Holy Alliance was ratified at Paris, 26 Sept. 1815, between the emperors of Russia (its originator) and Austria and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions, with a view to perpetuating the peace they had achieved. The compact was severely censured in this country as opposed to rational liberty.

Holy Maid of Kent. Elizabeth Barton was incited by the Roman Catholic party to oppose the Reformation by pretending to inspirations from heaven. She foretold the speedy and violent death of Henry VIII. if he divorced Catherine of Spain and married Anne Bol-eyn, and direful calamities to the nation. She and her confederates were executed at Tyburn, 5 May, 1584.

Holy Places in PALESTINE. These places have been a source of contention between the Greek and Latin churches for several centuries. In the reign of Francis I. they were placed under Latin monks, protected by the French government; but the Greeks from time to time obtained firmans from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from the sacred buildings, which were committed to the care of the Greeks by a hatti-scherif, or imperial ordinance.

The holy sepulchre partially destroyed by fire and rebuilt by the Greeks, who claim additional privileges, and cause fresh dissensions. 1808
 The Russian and French governments sent envoys (M. Dashkoff and M. Marcellus) to adjust the dispute; an arrangement prevented by the Greek revolution. . . . 1821
 The subject again agitated, and the Porte proposed that a mixed commission should adjudicate on the rival claims. M. Titoff, the Russian envoy, acting on behalf of the Greeks, and M. Lavalette, the French envoy, on that of the Latins, took up the question very warmly. A firman issued by the Porte, confirming and consolidating the rights previously granted to the Greek Christians, and declaring that the Latins had no right to claim exclusive possession of certain holy places specified, but permitting them to possess a key of the church at Bethlehem, etc., as in former times. 9 March, 1852
 The French government acquiesced with much dissatisfaction; but the Russian envoy still desired the key to be withheld from the Latin monks. M. D'Ozeroff made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kainardji in 1774, and demanded that the firman of 9 March, 1852, should be read at Jerusalem, although it militated against his pretensions, which was accordingly done. The dispute still continued, the Porte being exposed to the attacks of both the Russian and French governments. March, 1853
 Prince Menschikoff arrives at Constantinople as envoy extraordinary, and, in addition to the claims respecting the holy places, made demands respecting the protection of the Greek Christians in Turkey which led to the war of 1854-5 (see *Russo-Turkish War*). . . . 28 Feb. "

Holy Roman Empire. The German empire received this title under the emperor Otho I. the Great, crowned at Rome by pope John XII., 2 Feb. 962; see *Rome and Germany*.

Holy Rood or Cross. A festival instituted on account of the recovery of a large piece of the cross by the emperor Heraclius, after it had been taken away, on the plundering of Jerusalem, about 615. The feast of the Invention (or Finding) of the Cross is on 3 May; that of the Exaltation of the Cross, 14 Sept. At Buxley abbey, in Kent, was a crucifix, called the *Rood of Grace*; at the dissolution it was broken in pieces as an imposture by Hilsey, bishop of Rochester, at St. Paul's cross, London, 1536.

ease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ.—*Brande*. Infinitesimal doses of medicine, such as the millionth of a grain of aloes, have been employed, it is said, with efficacy. The system requires the patient to regulate his diet and habits carefully. It has led to a more accurate study of the materia medica. Introduced into England, 1827. The Hahnemann hospital was opened in Bloomsbury square, 16 Sept. 1850. "The World's Convention of Homœopathic Physicians" opened at Philadelphia, 26 June, 1876. London School of Homœopathy, founded 15 Dec. 1876. Homœopathic congress met at Liverpool, 14 Sept. 1877.

Homœouision and Homoiouision (Greek, *ὁμοούσιον*, same essence; *ὁμοιούσιον*, similar essence or being), terms employed with respect to the nature of the Father and the Son in the Trinity. The orthodox party adopted the former term as a party cry at the council of Nice, 325; the Arians adopted the latter at Seleucia, 359.

Homs, Syria. Here Ibrahim Pacha and the Egyptians severely defeated the Turks, 8 July, 1832.

Honduras, discovered by Columbus in 1502, and conquered by the Spaniards 1523, is one of the republics of Central America; see *America*. Great Britain ceded the Bay Islands to Honduras, 28 Nov. 1859. President, gen. J. M. Medina, elected 1 Feb. 1864, and in 1869. Provisional president, C. Arias (Dec. 1872). P. Leiva, 1875; M. A. Soto, 29 May, 1877. War with San Salvador, May, 1871, and May, 1872. The town of Omoa, Spanish Honduras, was bombarded by H.M.S. *Niobe*, to obtain redress for injuries to British subjects, 19 Aug. 1873. Population, about 350,000 (1877).

British Honduras, Central America, was settled by English from Jamaica soon after a treaty with Spain in 1667. They were often disturbed by the Spaniards, and sometimes expelled, till 1783. Balize or Belize, the capital, is a great seat of the mahogany trade. In 1861 the population was 25,635, and the revenue, 35,757*l*. Governor, James R. Longden, 1867; William W. Cairns, 1870; major Robert Miller Mundy, 1874; F. P. Barlee, 1877.

Honeymoon. It was a custom to drink of diluted honey for thirty days, or a moon's age, after a wedding feast, and hence arose the term *honeymoon*, of Teutonic origin. Attila the Hun drank, it is said, so freely of *hydromel* on his marriage-day that he died of suffocation, 453.

Hong-Kong, an island off the coast of China, was taken by capt. Elliott, 23 Aug. 1839, and ceded to Great Britain 20 Jan. 1841. Its chief town is Victoria, built in 1842, and erected into a bishopric in 1849. Sir John Bowring, governor from 1854 to 1859, was succeeded by sir Hercules Robinson. Governors: sir Richard G. MacDonnell, 1865; sir Arthur Edward Kennedy, 1872; John Pope Hennessy, Nov. 1876.

Honi soit qui mal y pense, "Evil be to him who evil thinks." It is mythically said that the countess of Salisbury, at a ball at court, happening to drop her garter, the king, Edward III., took it up and presented it to her with these words, which afterwards became the motto of the order of the Garter; see *Garter*.

Honor. Temples were erected to Honor by Scipio Africanus, about 197 B.C.; and by C. Marins, about 102 B.C.—The *Legion of Honor* was created by Bonaparte in 1802.

Honveds, the militia of Hungary. They supported the rebellion against the emperor in 1849, but on the completion of the changes whereby the independence of Hungary was secured, in 1868, they offered a loyal address to the emperor-king.

Hooks and Codfish, party names; see *Holland*, 1347.

Hoop-petticoat, see *Crinoline*.

Hops, in use in England in 1425.—*Harleian MS.* Introduced from the Netherlands into England about

1524, and used in brewing; but the physicians having represented that they were unwholesome, their use was prohibited in 1528.—*Anderson*. In the year ending 5 Jan. 1853, there were 46,157½ acres under hops in England and Wales, chiefly in Herefordshire, Kent, and Worcestershire, which paid 447,144*l*. duty; the quantity yielded was 51,102,494 lbs., whereof 955,855 lbs. were exported. The duty on hops was repealed in 1862, after many applications. An act for preventing fraud in the trade was passed in June, 1866.—The Hop and Malt Exchange, Southwark, was opened in Oct. 1867.—Large quantities are raised in the United States, especially in western New York, Wisconsin, Michigan, California, and Vermont. The production in the United States has rapidly increased. It amounted in 1850 to 3,497,029 lbs.; in 1860 to 10,991,996 lbs.; in 1870 to 25,456,669 lbs.

Horatii and Curiatii, see *Rome*, 669 B.C.

Horn; **Hornpipe**. The horn is thought to be, next to the reed, the earliest wind-instrument, and has been found among most savage nations. It was first made of horn, hence the name; afterwards of brass, with keys for the semitones, in the last century.—The dance called the Hornpipe is supposed to be so named from its having been performed to the Welsh *più-corn*, that is hornpipe, about 1300.—*Spencer*. Many hornpipes were composed in the eighteenth century. The "College Hornpipe" was very popular.

Horne Tooke, etc. The trial of Messrs. Hardy, Tooke, Joyce, Thelwall, and others, on a charge of high-treason, caused a great sensation. They were taken into custody on 20 May, 1794. Mr. Hardy was tried 29 Oct., and, after a trial of eight days, was honorably acquitted. John Horne Tooke was tried and acquitted, 20 Nov.; and Mr. Thelwall was acquitted, 5 Dec.; the others were discharged. Acts were passed to prohibit Mr. Thelwall's political lectures in 1795.

Horology, see *Clocks*. The British Horological Institute, Clerkenwell, London, established in 1858, for the benefit of watchmakers, publishes a monthly journal.

Horse. The people of Thessaly were excellent equestrians, and probably first among the Greeks who broke them in for service in war; whence probably arose the fable that Thessaly was originally inhabited by centaurs. "Solomon had 40,000 stalls of horses for his chariots, and 12,000 horsemen," 1014 B.C. 1 Kings iv. 26. The Greeks and Romans had some covering to secure their horses' hoofs from injury. In the ninth century horses were only shod in time of frost. Shoeing was introduced into England by William I., 1066; see *Races*.

The horse-tax was imposed in 1784. Its operation was extended, and its amount increased, in 1796; and again in 1808. The existing duty upon "horses for riding" only, in England, amounts to about 350,000*l*. per year. 1862
Annual license duty on horses and mules, 10*s*. 6*d*. each; horse-dealers' license, 12*l*. 10*s*. (act passed 1869). 1870
Mr. J. S. Rarcy, an American, made a great sensation in London by taming vicious and wild horses, and even a zebra from the Zoological Gardens. His system is founded on a profound study of the disposition of the animal, and on kindness. He initiated many illustrious persons in his method (on 20 March, lord Palmerston and twenty others) binding them to secrecy; from which they were released in June, when his book was reprinted in England without his consent. 1858
He was engaged to instruct cavalry officers and riding masters of the army. July, 1859
He gave a lecture to the London cabmen, which was well received, 12 Jan. 1860; and in the same year he received a present of 20 guineas from the Society for the Prevention of Cruelty to Animals. May, 1860
Great annual *horse-shows* held at the Agricultural Hall, Islington, began. July, 1864
Horse-flesh. An establishment for the sale of it as human food was opened at Paris on 9 July, 1866, with success, and its use as food strongly advocated. About 150 persons (including sir Henry Thompson and sir John Lubbock) dined on horse-flesh at the Langham hotel, London. 6 Feb. 1868
A great Franco-Anglo-American horse, mule, and donkey banquet was held at Paris. 3 April, 1875

Horse Guards. The regiment is said to have been instituted in the reign of Edward VI., 1550, and received by Charles II. 1661. The first troop of Horse Grenadier Guards was raised in 1693, and was commanded by gen. Cholmondeley; and the second troop, commanded by lord Forbes, was raised in 1702. There was a reduction of the Horse and Grenadier Guards; and Life Guards, as now established, were raised in their room, 26 May, 1788.—*Philips*. The present edifice called the Horse Guards was erected about 1758. In the front are two small arches, where horse-soldiers, in full uniform, daily mount guard. In the building was formerly the office of the commander-in-chief, now in Pall Mall.

Hospital Sundays are said to have begun at Birmingham, 13 Nov. 1859. Glasgow began hospital Sundays about 1841. It is said the present system of hospital Sunday began at Manchester in 1870. Near the end of 1872, it was proposed that collections for the benefit of hospitals and dispensaries in London should be annually made on one Sunday in the year at all places of worship. A committee for effecting this met at the Mansion House, 31 Jan. 1873; and, soon after, 15 June was appointed as the day for the collection. The hospital Sunday system was adopted in the United States in 1874.

Host, ELEVATION OF THE, introduced into Roman Catholic worship, and prostration, said to have been enjoined about 1201. Pope Gregory IX. was the first pontiff who decreed a bell to be rung as a signal for the people to adore the host, 1228.—*Rees*.

Hot Blast, see *Blowing-machine*.

Hôtel de Ville, Paris, the residence of the chief magistrate, the prefect of the Seine, was begun in 1683, and completed, after his own design, by Dominico de Cor-

tona, 1628. Here La Fayette introduced Louis Philippe, the citizen-king, to the people, Aug. 1830; and here the republic was proclaimed, 26 Feb. 1848. The communists, who had established themselves here, set fire to the building, 24 May, 1871, after their total defeat. The Hôtel was ordered to be rebuilt, April, 1873.

Hôtel Dieu, see *Paris*, 656, 1877.

Hour. The early Egyptians divided the day and night each into twelve hours, a custom adopted by Jews or Greeks probably from the Babylonians. The day is said to have been first divided into hours from 293 B.C., when L. Papirius Cursor erected a sun-dial in the temple of Quirinus at Rome. Previously to the invention of water-clocks (*which see*), 158 B.C., the time was called at Rome by public criers. In England, the measurement of time was, in early days, uncertain: one expedient was by wax-candles, three inches burning an hour, and six wax-candles burning twenty-four hours—said to have been invented by Alfred, A.D. 886; see *Day*.—For *Hours of Prayer*, see *Breviary*.—The *Hour*, daily conservative newspaper, first appeared 24 March, 1873; last time, 11 Aug. 1876.

House Duty was imposed in 1695. Its rate was frequently changed till its repeal. It was reimposed as a substitute for the window-tax in 1851. In the year 1872-3 it produced 1,243,818*l.*; in 1875-6, 1,421,052*l.*; see *Taxes*.

House of Commons, Lords, etc., see *Parliament, Lords, and Commons*.

Household Suffrage, after one year's residence, was introduced into parliamentary elections for boroughs by the reform act passed 15 Aug. 1867. Attempts have been frequently made to extend household suffrage to counties, and have failed: Mr. G. O. Trevelyan's proposal lost in the commons (287 to 173), 13 May, 1874; (268 to 166), 7 July, 1875; (264 to 165), 30 May, 1876; (276 to 220), 29 June, 1877; (271 to 219), 22, 23 Feb. 1878; (291 to 226), 4 March, 1879.

Houseless Poor Act (Metropolitan), passed 1864; made perpetual, 1865; see *Poor*.

Howard Association, instituted in 1866, under the patronage of the late lord Brougham, for the improvement of prison discipline and prevention of crime; see *Prisons*. The annual award of a Howard medal was determined on by the Statistical Society of London, Dec. 1873.

Howard Association, UNITED STATES. This voluntary organization distinguished itself for courageous self-sacrifice in caring for the sick of Southern cities during the yellow-fever epidemics of 1878-9. The members nursed 24,000 patients in New Orleans alone between 17 Aug. and 26 Oct. 1868, and expended in charity during the same time \$380,185.83. The association makes no distinction among sufferers on account of race or religion, and not the least of its services is the judicious dispensation of funds contributed by the charitable throughout the country.

Howard Family. John Howard, son of Margaret, the heiress of the Mowbrays, was created earl marshal and the seventh duke of Norfolk in 1483. He was slain with his master, Richard III., at Bosworth, 22 Aug. 1485. His son was restored to the earldom of Surrey in 1489; in reward for having gained the victory of Flodden, 9 Sept. 1513, he was created the eighth duke of Norfolk in 1514. Thomas, the tenth duke, was beheaded for conspiracy against queen Elizabeth on behalf of Mary queen of Scots, in 1572. Henry Fitzalan Howard, now the twenty-first duke of Norfolk, and the fifteenth of the Howard family, premier duke and earl of England and hereditary earl marshal, was born in 1817.

Howard Medal. One was awarded by the Statistical Society to the best essay "On the Improvements in Education during the Eighteenth and Nineteenth Centuries" in Nov. 1879.

Howitzer, a German piece of ordnance, ranking between a cannon and a mortar, came into use early in the eighteenth century.

Huascar, see *Peru*, 1877 and 1879.

Hubbardton (Vermont), BATTLE AT, 7 July, 1777.

Hubertsburg (Saxony). The treaty between the empress, the king of Prussia, and the elector of Bavaria, signed here 15 Feb. 1763, ended the Seven Years' war, whereby Prussia gained Silesia.

Huddersfield, a manufacturing town, W. R. Yorkshire, chiefly the property of the Ramsden family. Sir John Ramsden built the town-hall, 1765. The theatre was burned 15 Feb. 1880; the new market-hall opened 31 March, 1880.

Hudibras. The first three cantos of this political satire, by Samuel Butler, appeared in 1663; the other parts in 1664 and 1678.

Hudson's Bay, discovered by Sebastian Cabot, 1512, and rediscovered by capt. Henry Hudson when in search of a northwest passage to the Pacific Ocean, 1610, had been visited by Frobisher. The "governor and company of adventurers of England trading to Hudson's Bay" obtained a charter from Charles II. in 1670. The "fertile belt" was settled by lord Selkirk in 1812. For these territories the bishopric of Rupert's Land was founded, 1849. The charter having expired, the chief part of the company's territories, on the proposition of earl Granville, the colonial secretary (9 March. 1869), were transferred to the Dominion of Canada for 300,000*l.*, and a right to claim a certain portion of land within fifty years, and other privileges; the company having consented to this 9 April, 1869. A portion of the people resisted the annexation, and gen. Louis Riel proclaimed independence and seized the company's treasury, Jan. 1870. On 3 or 4 March he tried and shot Thomas Scott, a Canadian, who had escaped from his custody. Col. (afterwards sir) Garnet J. Wolseley conducted a Canadian expedition to the territories (now named Manitoba), and issued a proclamation to the loyal inhabitants, 23 July, saying "our mission is one of peace." Riel was unsupported and offered no resistance. The lieutenant-governor, Adams George Archibald, arrived 3 Sept.; see *Manitoba*.

Hue and Cry, the old common-law process of pursuing "with horn and with voice," from hundred to hundred, and county to county, all robbers and felons. Formerly the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken; but by subsequent laws it is made answerable only for damage committed by riotous assemblies. The pursuit of a felon was aided by a description of him in the *Hue and Cry*, a gazette established for advertising felons in 1710.—*Ashe*.

Huguenots, a term (derived by some from the German *Eidgenossen*, confederates; by others from Hugues, a Genevese Calvinist) applied to the Reformed party in France, followers of Calvin. They took up arms against their persecutors in 1561. After a delusive edict of toleration, a great number were massacred at Vassy, 1 March, 1562, when the civil wars began, which lasted, with some intermission, till the edict of Nantes in 1598 (revoked in 1685). On the revocation of the edict of Nantes many Huguenots fled to the United States, settling in South Carolina, Virginia, and New York. The massacre of St. Bartholomew's day, 24 Aug. 1572, occurred during a truce; see *Calvinists, Protestants, Bartholomew, Edict, and Camisard*. S. Smiles's "History of the Huguenots" appeared in 1867. Baird's "Rise of the Huguenots" was published in 1879. The crypt in Canterbury cathedral assigned to French Protestants in 1550 is still used by them for divine worship.

Hull (E. Yorkshire), a rising commercial place in 1200, was named Kingston-upon-Hull in 1296 by Edward I., who purchased the town, formed the port, and granted a charter. Great fire, damage about 100,000*l.*, 15 Aug.

1864. Royal Albert dock opened by the prince of Wales, 21 July, 1869.

Hulse's Foundations. The rev. John Hulse, who died in 1790, bequeathed his estates in Cheshire to the university of Cambridge for the advancement of religious learning: by the maintenance of two scholars; the payment of a prize of 40*l.* annually for a theological dissertation; the establishment of the office of Christian advocate (made a professorship of divinity 1 Aug. 1860); and the payment of a lecturer, to be chosen annually. The first Hulsean lectures were given by the rev. Christopher Benson in 1820.

Humaitá, a strong post on the river Paraguay, fortified at a great cost with a battery of 300 cannon by Lopez, the president of Paraguay, and believed to be impregnable, was passed by the Brazilian iron-clads 17 Feb. 1868. On the 19th Casias, the Brazilian general, stormed a work to the north of Humaitá, and captured many stores. Humaitá itself, after a severe siege, was abandoned, 24 July, 1868.

Humane Society, Royal (London), for the recovery of persons apparently drowned, was founded in 1774 by Drs. Goldsmith, Heberden, Towers, Lettson, Hawes, and Cogan, but principally by the last three. The society has above 280 depots supplied with apparatus. The principal one was erected in 1794 on a spot of ground given by George III. on the north side of the Serpentine river, Hyde park. The motto of this society is appropriate: *Latent scintilla forsan*, "A small spark may perhaps lie hid;" see *Drowning*.

Humanism, a name given to the philosophical study of man's personality as distinguished from a class, especially advanced by Petrarch and other energetic advocates of the revival of the study of ancient classic literature, termed the "new learning," and ("litera humaniores") the age of the *renaissance*, in the fourteenth, fifteenth, and sixteenth centuries, whereby freedom of thought and language was greatly promoted.

Humanitarians, a small sect in London, founded by Mr. Kaspary, a German Jew. Their moral principles are set forth in "The Fifteen Doctrines of the Religion of God," written in 1866. These include pantheism and the transmigration of souls.

Humanity, RELIGION OF, see *Positive Philosophy* and *Secularism*.

Humiliati, a congregation of monks said to have been formed by some Milanese nobles who had been imprisoned by Frederick I., 1162. The order had more than ninety monasteries, but was abolished for luxury and cruelty by pope Pius V., and the houses were given to the Dominicans, Cordeliers, and other communities in 1570.

Humming-birds. Mr. Gould's beautiful collection of the skins of these birds exhibited at the Zoological Gardens, London, in 1851, was bought, with other birds, for the British Museum for 3000*l.*, April, 1881. His elaborate work on them in five folio volumes, with richly colored plates, was completed in 1862.

Hundred, a Danish institution, was a part of a shire, so called, as is supposed, from its having been composed of a hundred families at the time the counties were originally divided, about 897. The hundred-court is a court-baron held for all the inhabitants of a hundred instead of a manor.

Hundred Days, a term given to Napoleon's restoration, dating from his arrival in Paris, 20 March, to his departure on 29 June, 1815.

Hundred Years' War, in French history, commenced with the English invasion in 1337.

Hungary, part of the ancient Pannonia and Dacia, was subjected to the Romans about 106, and retained by them till the third century, when it was seized by the Goths, who were expelled about 376 by the Huns; see *Huns* and *Attila*. After Attila's death in 453, the Gepidae, and in 500 the Lombards, held the country. It was acquired by the Avars about 568, and retained by them

till their destruction by Charlemagne in 799. About 890 the country was settled by a Scythian tribe named Vengours, or Ungri (whence the German name *Ungarn*), and the Magyars, of Finnish origin. The chief of the latter, Arpad (889), was the ancestor of a line of kings (see *below*). The progress of the Magyars westward was checked by their defeat by the emperor Henry the Fowler, 934. Population of the kingdom, including Transylvania, Fiume, Croatia, and Slavonia, 31 Dec. 1869, 15,509,455; see *Austria*.

Huns, a race of warlike Asiatics, said to have conquered China about 210 B.C., and to have been expelled therefrom about A.D. 90. They invaded Hungary about 876, and drove out the Goths. Marching westward, under Attila, they were thoroughly beaten at Châlons by the consul Aëtius, 451; see *Attila*.

Hunting, an ancient pastime. The "Bokys of Hawking and Huntynge," by Dame Julyana Barnes, was printed at St. Alban's, 1486.

Huntingdon, see *Whitefieldites*.

Hurricanes, see *Cyclones*.

Hussars, Hungarian militia, provided by the landholders; instituted by Matthias Corvinus, about 1359. (*Hussar* is derived from *huss*, 20; and *ar*, price.) The British Hussars were enrolled in 1759.

Hussites. After the death of Huss,† many of his followers took up arms in 1419, and formed a political party under John Ziska, and built the city of Tabor. He defeated the emperor Sigismund, 11 July, 1420, and a short truce followed. Ziska, blinded at the siege of Rabi, beat all the armies sent against him. He died of the plague, 18 Oct. 1424, and is said to have ordered a drum to be made of his skin to terrify his enemies even after death. Two Hussite generals, named Procopius, defeated the imperialists in 1431, and a temporary peace ensued. Divisions took place among the Hussites, and on 30 May, 1434, they were defeated, and Procopius the

elder slain at Bömischbrod or Lippau. Toleration was granted by the treaty of Iglau, and Sigismund entered Prague 23 Aug. 1436. The Hussites opposed his successor, Albert of Austria, and called Casimir of Poland to the throne; but were defeated in 1438. A portion of the Hussites existed in the time of Luther, and were called "Bohemian Brethren."

Hustings (said to be derived from *house court*, an assembly among the Anglo-Saxons), an ancient court of London, being its supreme court of judicature, as the court of common council is of legislature. The court of *hustyns* was granted to the city of London, to be holden and kept weekly, by Edward the Confessor, 1052. One was held to outlaw defaulters, 6 Dec. 1870. Winchester, Lincoln, York, etc., were also granted hustings courts.

Hutchinsonians included many eminent clergy, who did not form any sect, but held the opinions of John Hutchinson of Yorkshire (1674-1737); they rejected the Newtonian system, and contended that the Scriptures contain a complete system of natural philosophy. His work, "Moses' Principia," was published in 1724. He derived all things from the air, whence, he said, proceeded fire, light, and spirit, types of the Trinity. In 1712 he invented a timepiece for finding the longitude, and died in 1737.

Hydaspes, a river in India, where Alexander the Great defeated Porus, after a severely contested engagement, 327 B.C.

Hyde Park (London, W.), the ancient manor of Hyde, belonging to the abbey of Westminster, became crown property at the dissolution, 1535. It was sold by parliament in 1652; but was resumed by the king at the restoration in 1660. The Serpentine was formed 1730-3.

† The clergy having instigated the pope to issue a bull against heretics, John Huss (born in Bohemia in 1373), a zealous preacher of the Reformation, was cited to appear before a council of divines at Constance, the emperor Sigismund sending him a safe conduct. He presented himself accordingly, but was thrown into prison, and after some months' confinement was adjudged to be burned alive, which he endured with resignation, 6 or 7 July, 1416. Jerome of Prague, his intimate friend, who came to this council to support and second him, also suffered death by fire, 30 May, 1418, although he also had a safe conduct.

Hydraulic Press, see under *Hydrostatics*.

Hydrochloric Acid, or **CHLORHYDRIC ACID**, the only known compound of chlorine and hydrogen, was discovered by Dr. Priestley, 1772; its constitution determined by Davy, 1810. It is also called *muratic acid* and *spirits of salts*; see under *Alkalies*.

Hydrogen (from the Greek *ὕδρω*, water, and *γεννᾶω*, I generate). Paracelsus observed a gas rise from a solution of iron in oil of vitriol, about 1500; Turquet de Mayerne discovered its inflammability, 1656; as did Boyle, 1672; Lemery noticed its detonating power, 1700. In 1766 Cavendish proved it to be an elementary body; and in 1781 he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burned, water is produced. Subsequently Lavoisier decomposed water into its elements, and gave hydrogen its present name instead of "inflammable air." One volume of oxygen combines with two volumes of hydrogen to form water. Hydrogen is never found in the free state. It was liquefied by Raoul Pictet and Cailletet, end of 1877.

Hydrogenium, a hypothetical metal. In a paper read before the Royal Society, 7 Jan. 1869, Mr. Thomas Graham, master of the mint, suggested that a piece of the metal palladium, into which hydrogen had been pressed, became an "alloy of the volatile metal hydrogeneum."

Hydrography is the description of the surface waters of the earth. The first sea-chart is attributed to Henry the Navigator, in the sixteenth century. There is a hydrographic department in the British admalty, by which a series of charts has been issued.

Hydrometer, the instrument by which are measured the gravity, density, and other properties of liquids. The oldest mention of the hydrometer occurs in the fifth century, and may be found in the letters of Synesius to Hypatia; but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found.—*Beckmann*. Archimedes was killed in 212 B.C., and Hypatia was torn to pieces at Alexandria, A.D. 415. Robert Boyle described a hydrometer in 1675. Baume's (1762) and Sykes's (about 1818) have been much employed.

Hydriopathy, a term applied to the treatment of diseases by cold water, practised by Hippocrates in the fourth century B.C., by the Arabs in the tenth century A.D., and revived by Dr. Currie in 1797. A system was suggested in 1825 by Vincenz Priessnitz, of Grafenberg, in Austrian Silesia. The rational part of the doctrine was understood and maintained by Dr. Sydenham before 1689. Priessnitz died 26 Nov. 1851.—*Brande*.

Hydrostatics, etc., were probably first studied in the Alexandrian school about 300 B.C.

Hygieopolis (city of health), planned by Dr. B. Ward Richardson in 1876. A company was proposed for its erection, Jan. 1877. No result.

Hygiene (Hygieia, goddess of health), see *Life* and *Sanitary*.

Hygrometer, an instrument for measuring the moisture in the atmosphere. That by Saussure (who died in 1799) is most employed. It consists of a human hair boiled in caustic lye, and acts on the principle of absorption.—*Brande*. Daniell's hygrometer (1820) is much esteemed.

Hymns. The song of Moses is the most ancient, 1491 B.C. (Exod. xv.). The Psalms date from about 1060 B.C. to about 444 B.C. (from David to Ezra). The hymns of the Jews were frequently accompanied by instrumental music. Paul (A.D. 64) speaks of Christians admonishing one another "in psalms and hymns and spiritual songs" (Col. iii. 16). Hilary, the bishop of Arles, in France, is said to have been the first who composed hymns to be sung in Christian churches, about 431. The hymns of Dr. Watts (died 1784), of John Wesley (died 1791), and of his brother Charles (died 1788), are used by English churchmen and dissenters. "Hymns, Ancient and Modern," edited by rev. sir Henry Baker, first appeared in 1860.

Hypnotism (Greek *ὑπνος*, sleep), or nervous sleep, terms given by Mr. Braid (in 1843) to a sleep-like condition produced in a person by steadily fixing his mind on one particular object. Minor surgical operations have, it is said, been performed without pain on persons in this state.

Hypothec, Law of, in Scotland, gives landlords a preferential right to levy for rent and follow and seize crops and cattle. A bill for its abolition was brought in annually since 1874. One was read a second time 19 March, 1879, but did not pass till 24 March, 1880 (48 Vict. c. 12). It came into operation 11 Nov. 1881.

Hypsometer, a thermometrical barometer for measuring altitudes, invented by F. J. Wollaston in 1817; much improved by Regnault about 1847.

Hyrcania, Asia, near the Caspian, a province subject to Persia, B.C. 334; held by Parthians, 244. It is now Mazenderan, a Persian province.

Hythe, Kent, a Cinque-port. A school of musketry was established here in 1854, under the charge of major-gen. Charles Crawford Hay. He resigned in 1867. Railway to Sandgate opened, 9 Oct. 1874.

Iambic Verse. Iambe, an attendant of Metanira, wife of Celeus, king of Sparta, when trying to exhilarate Ceres, while the latter was travelling over Attica in quest of her daughter Proserpine, entertained her with jokes, stories, and poetical effusions; and from her, free and satirical verses have been called *Iambics*.—*Apollodorus*. Iambic verses were first written about 700 B.C. by Archilochus, who had courted Neobule, the

daughter of Lycambes; but, after a promise of marriage, the father preferred another suitor, richer than the poet; whereupon Archilochus wrote so bitter a satire on the old man's avarice that he hanged himself.—*Herodotus*.

Iberia, see *Georgia* and *Spain*.

Ioe. Galileo observed ice to be lighter than water,

about 1597; see *Congelation*, where is a notice of the ice-making machines of Harrison and of Siebe. In 1841 there were sixteen companies in Boston, U. S., engaged in exporting ice, brought from Wenham lake and Fresh and Spy ponds, about 7 miles from that city. The trade was begun by Mr. Tudor in 1806. 156,540 tons were sent from Boston alone in 1854. In New York, in 1855, 305,000 tons were stored up, of which 20,000 were for exportation. During the summer of 1880, in consequence of the mild winter preceding, ice was so scarce and costly in New York that a number of cargoes were imported from Norway. The Wenham Lake Company import ice largely from their ponds near Christiania, Norway, from whence 43,359 tons were shipped to Great Britain in 1865.

Regulation and other properties, exhibited by prof. Faraday. In 1850, became the subject of investigation by eminent physicists of the day, especially J. D. Forbes, Dr. Tyndall, and sir William Thomson. "Icy night" or "silver thaw" in London, 22 Jan. 1867. After a severe frost came rain freezing as it fell. Many accidents occurred in consequence of the glassy pavements and roads.

Iceland (North Sea), discovered by Norwegian chiefs, about 861; according to some accounts, it had been previously visited by a Scandinavian pirate.

Iceland has suffered much by volcanic eruptions, especially in 1783; and on 29 March, 1875, whole districts of pasture-land were devastated.

Iceni, a British tribe which inhabited chiefly Suffolk and Norfolk. In 61, while Suetonius Paulinus was reducing Mona (Anglesey), they marched southwards and destroyed Verulam, London, and other places, with great slaughter of the Romans; but were defeated by Suetonius, near London, and their heroic queen Boadicea, or Boudicea, died or committed suicide.

"*Ich dien*," *I serve*, the motto under the plume of ostrich feathers found in the helmet of the king of Bohemia after he was slain at the battle of Cressy, at which he served as a volunteer in the French army, 26 Aug. 1246. Edward the Black Prince, in respect to his father, Edward III., who commanded that day, though the prince won the battle, adopted the motto, which has since been borne with the feathers by the heirs to the crown of England.

Ichthyology, the science of footprints, treats of the impression made in mud or sand by the animals of former ages. Dr. Duncan discovered the footprints of a tortoise in the sandstone of Annandale, in 1828; since then numerous discoveries have been made by Owen, Lyell, Huxley, and others.

Ichthyology, the science of fish. Eminent writers are Willoughby, Ray, Valenciennes, Cuvier, Owen, Agassiz, etc. Yarrell's "British Fishes" (1836-59) is a classical work; see *Fish*.

Iconium (Syria). Here Paul and Barnabas preached, 38. Soliman the Seljuk founded a kingdom here in 1074, which lasted till 1307, when it was conquered by the Turks. It had been subdued by the Crusaders in 1097 and 1190; see *Konieh*.

Iconoclasts (image-breakers). The controversy respecting images (which had been introduced into churches for popular instruction about 300) was begun about 726, and occasioned much disturbance and loss of

life in the Eastern empire. Leo Isauricus published two edicts for demolishing images in churches in that year, and enforced them with great rigor in 786. The defenders of images were again persecuted in 752 and 761, when Constantine forbade his subjects becoming monks. The worship of images was restored by Irene in 780. This schism was the occasion of the second council of Nice, 787. Theophilus banished all the painters and statuary from the Eastern empire, 832. The iconoclasts were finally excommunicated at the eighth general council at Constantinople, 869-870. This controversy led to the separation of the Greek and Latin churches. Many images in churches were destroyed in England and Scotland during the Reformation and the civil war, 1641-8.

Idaho, a northern territory of the United States of North America, was organized as such on 3 March, 1868.

Ides (Latin, *Idus*) were eight days in the Roman and church calendar, following the Nones. They were reckoned backward. In March, May, July, and October, the 8th Idus was on the 8th of the month, the 7th on the 9th, etc., the 1st, or *Ides*, being the 15th. In the other months the 8th *Ides* fell on the 6th, and the 1st on the 13th. On the Idus of March (the 15th), 44 B.C., Julius Cæsar was assassinated.

Idiots. About 1855 there were in England, exclusive of lunatics, pauper idiots, or idiots protected in national institutions—males, 3372; females, 3893; total, 7265; see *Lunacy*. The Idiot Asylum at Earlswood, near Reigate, Surrey, began in 1847; was chartered, 1862; additional buildings were founded by the prince of Wales, 28 June, 1869. The foundation of the Imbecile Asylum, Caterham, was laid by Dr. Brewer, M.P., 17 April, 1869. The number of idiots in the United States in 1870 was 24,527. There are many asylums for these unfortunates and some institutions for their improvement.

Idols. The public worship of idols was introduced by Ninus, king of Assyria, 2059 B.C.—*Vossius*. Images are mentioned in Gen. xxxi. 19, 30, 1739 B.C. The Jews frequently deserted the worship of God for idols till their captivity, 588 B.C. Constantine, emperor of Rome, ordered all the heathen temples to be destroyed, and all sacrifices to cease, A.D. 330.—*Dufrenoy*. Idolatry was revived in Britain by the Saxons about 478, but it gave way in Britain, after the coming of Augustin, about 597; see *Iconoclasts*, *Week*.

Idstedt (N. Germany). Here the insurgent army of Holstein and Schleswig, commanded by William, was defeated by the Danes, 25 July, 1850.

Ilium (Asia Minor). A city was built here by Dardanus, and called Dardania, 1480 B.C. Troy (*which see*), another city, was founded by Troas, about 1841 B.C.; and Ilus, his successor, called the country *Ilium*; see *Homer*.

Illinois, a western state of the United States, was settled by the French in 1749; acquired by the British, 1763; made a territory, 1809; and admitted into the

Union as a state, 3 Dec. 1818. Capital, Springfield. Population, 1880, 3,078,769.

Illuminated Books. The practice of adopting ornaments, drawings, and emblematical figures, and even portraits, to enrich MSS., is of great antiquity. Varro wrote the lives of 700 illustrious Romans, which he embellished with their portraits, about 70 B.C.—*Plin. Nat. Hist.* Some beautiful missals and other works were printed in the fifteenth and sixteenth centuries et seq., and fine imitations have lately appeared.

Illuminati, heretics who sprang up in Spain, where they were called Alombrados, about 1575. After their suppression in Spain, they appeared in France. One of their leaders was friar Anthony Buchet. They professed to obtain grace and perfection by their sublime manner of prayer. A secret society bearing this name, opposed to tyranny and priestcraft, was founded in Ingolstadt, Bavaria, by Dr. Adam Weishaupt, in May, 1776, and was suppressed in 1784-5.

Illustrated London News, the earliest publication of the kind, established by Mr. Herbert Ingram, M.P., first appeared on 14 May, 1842.

Immigration into the United Kingdom first estimated in the Emigration Report for 1875. In 1871, 49,157; in 1874, 118,129; in 1875, 94,228; in 1876, 93,557, in 1877, 81,848. Compare this with *Emigration*.

Immortals (Greek, ἀθάνατοι), the flower of the Persian army, limited to 10,000 in number, and recruited from the nobility alone, about 500 B.C. The name was also given to the body-guard of the emperors at Constantinople in the fourth and fifth centuries.

Impeachment. The first impeachment by the commons house of parliament, and the first of a lord chancellor, Michael de la Pole, earl of Suffolk, was in 1386. By statute 12 & 13 Will. & Mary, 1700, it was enacted that no pardon under the great seal shall be pleaded to an impeachment by the commons in parliament.

Impeachment of Warren Hastings, 13 Feb. 1788 to 25 April, 1795; acquittal.

Imperial Guard of France was created by Napoleon from the guard of the Convention, the Directory, and the Consulate, when he became emperor in 1804. It consisted at first of 9775 men, but was afterwards enlarged. It was subdivided in 1809 into the old and young guard. In Jan. 1814 it numbered 102,706. It was dissolved by Louis XVIII. in 1815; revived by Napoleon III. in 1854. It surrendered with Metz to the Germans, 27 Oct. 1870; and was abolished by the defence government soon after. It took part in the Crimean war in 1855.

Impostors. The following are among the most extraordinary:

Mahomet promulgated his creed, 604; see *Mahometanism*.
Aldebert, a Gaul, in 743, pretended he had a letter from the Redeemer, which fell from heaven at Jerusalem; he seduced multitudes to follow him into woods and forests, and to live in imitation of John the Baptist. He was condemned by a council at Rome in 745.
Gonzalvo Martin, a Spaniard, pretended to be the angel Michael in 1359: he was burned by the Inquisition in Spain in 1360.

George David, son of a waterman at Ghent, styled himself the son of God, sent into the world to adopt children worthy of heaven: he denied the resurrection, preached in favor of a community of women, and taught that the body only could be defiled by sin; he had many followers; died at Baile, 1556, promising to rise again in three years.

Otrellaf, a monk, pretended to be Demetrius the son of Ivan, czar of Muscovy, whom the usurper Boris had put to death; he maintained that another child had been substituted in his place: he was supported by Poland; his success led the Russians to invite him to the throne, and deliver into his hands Feodor, the reigning czar, and all his family: his imposture discovered, he was assassinated in his palace, 1606.

Sabbata Levi, a Jew of Smyrna, amused the Jews and Turks a long time at Constantinople and other places by personating our Saviour, 1666.

Joseph Smith; see *Mormons*.

Apparition of Our Lady of Salette; the imposture exposed and several persons prosecuted, April, 1846. The superstition revived and flourishing, Aug. 1872.

Pilgrimage of about 20,000 persons to Lourdes, in the Pyrenees, on account of alleged miracles (the Virgin was said to have appeared to two girls, 11 Feb. 1858), 6 Oct. 1872; see *France*.

IN BRITISH HISTORY.

A man pretending to be the Messiah, and a woman assuming to be the Virgin Mary, were burned, 1222.

Jack Cade assumed the name of Mortimer; see *Cade*, 1450.

In 1487, Lambert Simnel, tutored by Richard Simon, a priest, supported by the duke of Burgundy, personated the earl of Warwick. Simnel's army was defeated by Henry VII, and he was made a scullion in the king's kitchen.

For Warbeck's imposture in 1492, see *Warbeck*.

Elizabeth Barton, styled the Holy Maid of Kent, spirited up to hinder the Reformation by pretending to inspirations from heaven, foretelling that the king would have an early and violent death if he divorced Catherine of Spain and married Anne Boleyn. She and her confederates were executed at Tyburn, 21 April, 1534.

In 1553 (first year of Mary's reign, after her marriage with Philip of Spain), Elizabeth Croft, a girl 18 years of age, was secreted in a wall, and with a whistle made for the purpose, uttered many seditious speeches against the queen and the prince, and also against the mass and confession, for which she did penance.

William Hackett, a fanatic, personated our Saviour, and was executed for blasphemy, 1591.

Valentine Greatrix, an Irish impostor, who pretended to cure all diseases by stroking the patient: his imposture deceived the credulous, and occasioned very warm disputes in Ireland and England about 1666. Boyle and Flamsteed believed in him.

Dr. Titus Oates, see *Oates*.

Robert Young, a prisoner in Newgate, forged the hands of the earls of Marlborough, Salisbury, and other nobility to a pretended association for restoring king James: the lords were imprisoned, but, the imposture being detected, Young was fined 1000*l.*, and put in the pillory, 1692. He was afterwards hanged for coming.

Three French refugees pretend to be prophets, and raise tumults; convicted as impostors, Nov. 1707.

Mary Tofts of Godalming, by pretending she bred rabbits within her, so imposed upon many persons (among others, Mr St Andre, surgeon to the king), that they espoused her cause, 1726.

The Cock lane ghost impostures by William Parsons, his wife, and daughter, 1762; see *Cock-lane Ghost*.

Johanna Southcote, who proclaimed her conception of the Messiah, and had a multitude of followers; she died 27 Dec. 1814.

W. Thom, see *Thomites*.

Louis XVII, see *France*, list of sovereigns.
(See *Abstinence*.)

Impressionistes, a name given to artists who aim at producing rapid unstudied effects independent of the canons of art, such as Manet, Duez, and others in France. In England Mr. Whistler exhibited such pictures in 1877, including moonlight scenes, etc., painted in two days, showing great sense of color. For Mr. Ruskin's criticisms, see *Trials*, 1878.

Impressment of Seamen, affirmed by sir M. Foster to be of ancient practice. The stat. 2 Rich. II. speaks of impressment as a matter well known, 1378. The first commission for it was issued 29 Edw. III. 1355. Pressing, either for the sea or land service, declared to be illegal by the parliament, Dec. 1641, but practised till present times. Impressment was not resorted to in the Russian war, 1854-5.

Imprisonment for Debt, see *Arrests*, *Debtors*, and *Ferrari's Arrest*.

Impropriation (applying ecclesiastical property to lay purposes). On the suppression of abbeys in 1539, their incomes from the great tithes were distributed

among his courtiers by Henry VIII.; and their successors constitute 7597 lay impropriators.

Incas, see *Peru*.

Incendiaries. The punishment for arson was death by the Saxon laws and Gothic constitutions. In the reign of Edward I., incendiaries were burned to death. This crime was made high-treason by stat. 8 Hen. VI. 1429; and was denied benefit of clergy, 21 Hen. VIII. 1528. Great incendiary fires commenced in and about Kent, in Aug. 1830; and in Suffolk and other counties since. The punishment of death was remitted, except in special cases, in 1827. The acts relating to arson were amended in 1837 and 1844.

Incest. Marriage with very near relations, almost universally forbidden, took place in Egypt, Persia, and Greece. For recent cases, see *Portugal*, 1760, 1777, and 1826. The table of kindred in the Book of Common Prayer was set forth in 1563. For the Hebrew law, see *Leviticus*, chap. xviii. (1490 B.C.)

Inch. It was defined in 1824, by act of parliament, that 39.13929 inches is the length of a seconds pendulum in the latitude of London, vibrating *in vacuo* at the sea-level, at the temperature of 62° Fahrenheit; see *Candle and Standard*.

Inchcape Bell, see *Bell Rock*.

Inclosure Act, to facilitate the inclosure and improvement of commons, appointing commissioners, etc., 8 & 9 Vict. c. 118, passed 8 Aug. 1845; another act passed in 1876; see *Commons*.

Income-tax. In 1512, parliament granted a subsidy of two fifteenths from the commons and two tenths from the clergy, to enable the king to enter on a war with France. In Dec. 1798, Mr. Pitt proposed and carried, amid great opposition, resolutions for increased taxes "as an aid for the prosecution of the war" with France.

Graduated duties on income imposed, beginning with 60*l.* per annum, by the act passed 9 Jan. 1799.

The "property tax" passed which levied a rate of 5 per cent. on all incomes above 150*l.* and lower rates on smaller incomes, 11 Aug. 1803.

Increased to 6*l.* per cent. 1805; 10 per cent., embracing the dividends at the bank, 1806.

In 1800 the tax produced 5,716,572*l.*; in 1804, 4,650,000*l.*; in 1806, 11,500,000*l.*; in 1808, 16,548,985*l.*; in 1815, 14,978,557*l.* The tax produced from lands, houses, rentages, etc., 8,657,937*l.*; from funded and stock properties, 2,885,506*l.*; the profits and gains of trade, 3,831,088*l.*; and salaries and pensions, 1,174,456*l.* Repealed 18 March, 1816, on motion of H. Brougham.

Sir Robert Peel's bill imposing the present tax at a rate of 7*d.* in the pound (2*l.* 1*s.* 4*d.* per cent.) per ann. (for three years) passed 22 June, 1842.

It produced about 5,350,000*l.* a year; and led to repeal of about 12,000,000*l.* indirect taxes.

Renewed for three years, 1845; and 1848.

Large meetings assembled in Trafalgar square, London (for the ostensible purpose of opposing the income-tax); rioting ensued, which was soon quelled, 6, 7 March, 1848.

Tax continued for one year in 1851 and 1852.

The tax of 7*d.* limited to seven years (till 1860); to be gradually reduced in amount; but all incomes from 100*l.* to 150*l.* made liable to 5*d.* in the pound for all that period: the tax also extended to Ireland, June, 1853.

In consequence of the Crimean war, the rate was doubled, 14*d.*, 1854.

2*d.* (making 16*d.*) added to the tax on incomes above 150*l.*, and 11*d.* on those between 100*l.* and 150*l.*; the former being 1*s.* 4*d.*, the latter 11*d.* in the pound, 1855.

The former assessment reduced to 7*d.*, the latter to 5*d.*, 1857. Both became 5*d.*, 1858.

The former raised to 9*d.*, the latter to 6*d.*; and the tax on incomes, derived from lands, tenements, etc., raised from 3*d.* to 5*d.* for England, and from 2*d.* to 4*d.* for Scotland and Ireland, July, 1859.

The assessment on incomes raised—on those above 100*l.* to 7*d.*; on those above 150*l.* to 10*d.*

[The object of the increase was to provide for a deficiency occasioned by extra expenditure for defending the country, April, 1860.]

A committee to inquire into the working of the income-tax appointed, 14 Feb. 1861.

Reduction of the last assessment from 7*d.* to 6*d.*, and from 10*d.* to 9*d.* for three quarters of the financial year 1861-2.

The rates of 6*d.* and 9*d.* to continue, April, 1862.

The rate of 7*d.* on all chargeable incomes; 3*d.* on farms, etc., in England; and 2*d.* in Scotland and Ireland. Incomes

under 100*l.* a year exempted; those above 100*l.* and under 200*l.* allowed an abatement on 6*th* June, 1863.
 The rate of 6*d.* on chargeable incomes, with some exemptions and abatement, 13 May, 1864.
 The rate of 4*d.* on chargeable incomes, with same exemptions and abatement, May, 1865; continued, 1866 and 1867.
 Raised to 5*d.* (for year ending 1 April, 1868), to provide for Abyssinian war, Nov. 1867.
 Raised to 6*d.* (for 1868-9), May, 1868.
 Reduced to 5*d.* in the pound, April, 1869; to 4*d.*, April, 1870.
 Raised to 6*d.* on account of reorganization of army, abolishing purchase, 1871. Reduced to 4*d.*, April, 1872.
 Renewed agitation against the tax; conference at Birmingham, 22 May; at the Mansion House, London, proposed formation of a National Anti-Income-tax League, 13 Dec. 1872.
 Reduced to 3*d.* from 6 April, 1873; to 2*d.*, 23 April, 1874.
 Mr. C. Lewis's motion for reducing or abolishing the tax defeated (139-38), 3 July, 1874.
 Raised to 3*d.*; incomes under 150*l.* to be exempt; 120*l.* of incomes under 400*l.* exempt, April, 1876.
 Raised to 5*d.* (through preparations for war), April, 1878.
 Raised to 6*d.* by Mr. Gladstone, June; act passed, 12 Aug. 1880.
 Reduced to 5*d.* by Mr. Gladstone; budget 4 April, 1881.

end of every session of parliament for persons who transgress through ignorance of the law. The practice began in 1716.

Independents, or CONGREGATIONALISTS, hold that each church or congregation is independent of all others in religious matters; that there is no absolute occasion for synods or councils, whose resolutions may be taken for advice, but not as decisions to be peremptorily obeyed; and that one church may advise or reprove another, but has no authority to excommunicate. Robert Brown preached these doctrines about 1585, but, after thirty-two imprisonments, he eventually conformed to the Established church. A church was formed in London in 1593, when there were 20,000 Independents. They were driven by persecution to Holland, where they formed several churches; that at Leyden was under Mr. Robinson, often regarded as the author of *Independency*. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, himself an Independent, obtained them toleration, in opposition to the Presbyterians. The Independents published an epitome of their faith, drawn up at a conference at the Savoy, in 1658; and the Congregational Union of England and Wales, formed in 1831, published their "declaration of faith, order, and discipline," in 1833. In 1851, they had 3244 chapels for 1,067,760 persons in England and Wales; see *Worship*. The first Independents in Scotland were the Glasites (*which see*). The first Independent church in America was founded by the followers of John Robinson, at Plymouth, New England, in 1620.

Income-tax in the UNITED STATES. The necessity of raising large revenues during the civil war led to the imposition of an income-tax in the United States in 1863. Under the first law, incomes of \$600 or less were exempt, and the tax was 5 per cent. on incomes between \$600 and \$5000, 7 per cent. on those above \$5000 and less than \$10,000, and 10 per cent. on all above \$10,000. Subsequent legislation raised the exemption first to \$1000 and then to \$2000. The largest amount collected from this tax in one year was \$61,000,000 in 1866. The tax ceased in 1872.

Incumbents' Resignation Act, with provision for pensions, passed 13 July, 1871.

Index Expurgatorius, a catalogue of the books, the reading of which is prohibited by the Church of Rome, first made by the Inquisitors, and approved by the Council of Trent, 1559. The Index by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity was confirmed by a bull of pope Clement VIII. in 1595. Many of the works of the great authors of France, Spain, Germany, and England are thus prohibited. On 25 June, 1864, Hugo's "*Les Misérables*" and other books were added to the number; and many others since.

Index Society, established by the librarians of various London scientific and literary institutions and societies, and literary men, to form a library of indexes, and to make indexes to rare serial works, important books, etc., 17 Dec. 1877.

India, or HINDOSTAN. The Hindoo histories ascribe their origin to a period ages before the ordinary chronologies. A race of kings is mentioned as reigning 2300 B.C., and Buddhism is said to have been introduced 566 B.C. Several ancient nations, particularly the Tyrians and Egyptians, carried on commerce with India. It was partially conquered by Darius Hystaspis, who formed an Indian satrapy, in 512 B.C., and by Alexander, 327 B.C., and subsequently the intercourse between India and the

Roman empire was much increased. The authentic history of Hindostan commences with the conquest of Mahmud Ghuzni, 1001.—*Rennell. See Secretaries, Bengal, Bombay, Calcutta, Madras, and Oude* for further details.* For the new route to India, see *Waghorn*. About 450 native states in India, 1876.

[The Mogul empire now became merely nominal, independent sovereignties being formed by petty princes. In 1761, Shah Alum II., attacking the English, was defeated at Patna, 15 Jan. In 1764, after the battle of Buxar, he was thrown upon the protection of the English, who established him at Allahabad. After the victory at Delhi, in 1803, gen. Lake restored the aged monarch to a nominal sovereignty, which descended at his death to his son, Akbar Shah. Akbar died in 1837, and was succeeded by the last king of Delhi (his son), who received a pension of about 125,000l. per annum. He joined the mutiny in 1857; was tried in 1858, and transported to Rangoon; died there, 11 Nov. 1862.]

† On the introduction of the improved (Enfield) musket in the Indian army, greased cartridges had been brought from England. These were objected to by the native soldiers, and the issue of them was immediately discontinued by orders in Jan. 1857. A mutinous spirit, however, gradually arose in the Bengal native army. In March several regiments were disbanded, followed by others, till in June the army had lost by disbandment and desertion about 30,000 men. On 5 April, a sepoy, and on 20 April, a jemadar, or native lieutenant, were executed. At the end of May 34 regiments were lost. In April, 85 of the 3d Bengal native cavalry at Meerut refused to use their cartridges. On 9 May they were committed to jail. On Sunday, the 10th, a mutiny in the native troops broke out; they fired on their officers, killing col. Finnis and others. They then released their comrades, massacred many Europeans, and fired the public buildings. The European troops rallied and drove them from their cantonments. The mutineers then fled to Delhi (which see).

* Runjeet Singh, long the ruler of the Sikhs and the Punjab, lived in amity with the British. After his death, 27 June, 1839, several of his successors (children and grandchildren) were in turn assassinated. During the minority of his grandson Dhuleep Singh, the favorite of the Maha Ranee, Lall Singh, ruled; and, finding the army ungovernable, sanctioned the unprovoked attack on the British, as given above.

India Company, East. The first commercial intercourse of the English with the East Indies was a private adventure of three ships fitted out in 1591. Only one of them reached India; and, after a voyage of three years, the commander, captain Lancaster, was brought home in another ship, the sailors having seized his own; but his information gave rise to a mercantile voyage, and the establishment of a company, whose first charter, in Dec. 1600, was renewed in 1609, 1657, 1661, 1693, and 1744. Its stock in 1600 consisted of 72,000*l.*, when it fitted out four ships. Meeting with success, it continued to trade, and India stock sold at 500*l.* for a share of 100*l.* in 1683.

A new company (the "English") was chartered in 1698, and the old (the "London") suspended from trading for three years; the two were united.....	1702
New East India Company established.....	1708
Privileges of the company continued till 1783.....	1744
Affairs of the company were brought before parliament, and a committee exposed a series of intrigues and crimes.....	Aug. 1772
As remedial measures, two acts passed (one authorized a loan of 1,000,000 <i>l.</i> to the company; the other celebrated as the <i>India bill</i>) effected most important changes in the constitution of the company and its relations to India. A governor general was appointed to reside in Bengal, to which the other presidencies were then made subordinate; a supreme court of judicature was instituted at Calcutta; the salary of the governor was fixed at 25,000 <i>l.</i> per year; that of the council at 10,000 <i>l.</i> each; and of the chief judge at 8000 <i>l.</i> ; the affairs of the company were controlled; all the departments were re-organized, and all the territorial correspondence was henceforth to be laid before the British ministry, June,	1773
Mr. Pitt's bill appointing the Board of Control (<i>which see</i>), passed.....	18 May, 1784
The company's charter was renewed for twenty years.....	1793
Trade with India thrown open.....	1813
Trade to China opened; charter renewed till 1854.....	1833
The government of India was continued in the hands of the company till parliament should otherwise provide.....	1853
In consequence of the mutiny of 1857, and the disappearance of the company's army, the government of India was transferred to the crown, the Board of Control was abolished, and a Council of State for India instituted by the act 21 & 22 Vict. c. 106, which received the royal assent.....	2 Aug. * 1858
The company's political power ceased on 1 Sept. and the queen was proclaimed as Queen of Great Britain and the Colonies, etc., in the principal places in India amid much enthusiasm.....	1 Nov. "
The company to be dissolved, 1 June, 1874, and dividends redeemed, by the "East India Stock Dividend Redemption Act," passed.....	15 May, 1873
The East India House built 1739; enlarged and a new front erected, 1799; sold with the furniture 1861; pulled down in Sept. and Oct.....	1862

India, Council of, established by act of parliament, 2 Aug. 1858, in the place of the Board of Control (*which see*). It consists of 15 members (salary 1200*l.* a year), 8

Indian Civil Service College, established at Cooper's Hill, Surrey, 1870.

Indian Education and Improvement. Many efforts were made for the education of the American Indians early in the history of the country, and one of the chief purposes of the foundation of William and Mary College in Virginia (1693) was to provide for the education of red men. In the Indian Territory (established 1833) a system of common schools exists, and the tribes settled there have made good progress in civilization. They have an organized government, farms, shops, etc., and even maintain a newspaper, printed partly in English and partly in an Indian dialect. Under the administration of president Hayes (4 March, 1877, to 4 March, 1881) much was done in the direction of education, in pursuance of a policy which contemplates the civilization of the wild tribes by the education of their children in the midst of civilized surroundings. The schools at Carlisle, Pa., and Hampton, Va., are largely employed in this work. So far as it is possible, the policy of the government now is to encourage agriculture and stock-raising among the Indians, and to induce them to abandon the tribal relation and accept lands in severalty; the purpose of this system is in the end to bring the Indians to the status of individual citizens, with the opportunities, the privileges, and the responsibilities of citizens. The following statement for 1880 indicates the extent of the progress made in this direction:

In the Indian Territory there are 60,560 civilized and 17,750 uncivilized, but controlled, Indians. The civilized tribes cultivated, in 1880, 314,398 acres of land, producing 336,424 bushels of wheat, 2,346,042 bushels of Indian corn, 124,568 bushels of oats and barley, and 16,800 bales of cotton. They owned 297,040 cattle and 400,282 hogs. Indians not belonging to the five civilized tribes of the Indian Territory cultivated 170,847 acres producing 415,777 bushels of wheat, 666,430 bushels of corn, and 222,439 bushels of oats and barley, besides vegetables and hay. They owned 78,812 cattle and 864,137 sheep. Among the Indians not belonging to the five civilized tribes, there were 110 day schools, and 60 boarding schools, with 316 teachers and 7000 pupils. In all the schools special attention is given to industrial education.

Indian Institute, Oxford; established 1878; discussion respecting a proposed building in Nov. 1880.

Indiana, a western state of North America. It was included in Ohio till 1801; was constituted a territory in 1809, and admitted into the Union 11 Dec. 1816; capital, Indianapolis.

* Lord Palmerston brought in a bill for the purpose on 12 Feb., which was accepted by the house on 18 Feb. He resigned on the following day, and the bill dropped. A similar bill was introduced by Mr. Disraeli on 12 March; but, many of its details being objected to, it was withdrawn. On lord John Russell's proposition, the house proceeded to consider the matter by way of resolutions; on 17 June, lord Stanley brought in the above-mentioned bill, being the third on the subject introduced during the session.

Indians, the aboriginal inhabitants of North America. The total number of Indians within the United States, exclusive of Alaska, in 1880, was 255,938, of whom all but about 18,000 are under the control of the government agents.

Indiction, a cycle of tributes of corn demanded every fifteen years, not known before the time of Constantine. The first examples in the Theodosian code are of the reign of Constantius, who died 361.—In memory of the great victory obtained by Constantine over Mezentius, 8 Cal. Oct. 312, the council of Nice ordained that the accounts of years should be no longer kept by the Olympiads, but by the Indiction, which has its epocha 1 Jan. 313. It was first used by the Latin church in 342.

Indigo, the dye obtained from the woad plant, *Isatis tinctoria*, was used by the Egyptians and other ancient nations; and the processes are described by Pliny. After the passage of the Cape of Good Hope, in 1497, it was gradually superseded by the Eastern indigo, got from the *indigofera*. The mention of indigo occurs in English statutes in 1581. Its cultivation was begun in Carolina in 1747. The quantity imported into Great Britain in 1840 was 5,831,269 lbs.; in 1845, 10,127,488 lbs.; in 1850, 70,482 cwt.; in 1859, 63,237 cwt.; in 1861, 83,109 cwt.; in 1866, 74,256 cwt.; in 1869, 86,721 cwt.; in 1870, 79,255 cwt.; in 1871, 106,307 cwt.; in 1874, 85,707 cwt.; in 1876, 88,722 cwt.; in 1877, 60,640 cwt.; in 1879, 80,146 cwt.

After long-continued experiments, especially by prof. A. Baeyer, the dye has been prepared artificially from its chemical elements in coal-tar. 1869-80
 Prof. H. E. Roscoe, at the Royal Institution, proved that the properties of the artificial and natural indigo were identical. 27 May, 1881

Indium, a metal discovered in the arsenical pyrites of Freiberg, by F. Reich and T. Richter, in 1863. Its name is due to its giving an indigo blue ray in its spectrum.

Induction of electric currents, discovered by Faraday, and announced in his "Experimental Researches," published in 1831-2. Ruhmkorff's magneto-electric induction coil was constructed in 1850; see under *Electricity*.

Inductive Philosophy, based on the results of observations and experiments, really *common-sense*, is especially expounded by Bacon in the second book of his "Novum Organum," published 1620.

Indulgences, in the early church, were the moderation of ecclesiastical punishment. The papal system for the absolute pardon of sin, commenced by Leo III. about 800, were granted in the eleventh century by Gregory VII., and by Urban II. and by others in the twelfth century, as rewards to the crusaders. Clement V. was the first pope who made public sale of indulgences, 1313. In 1517 Leo X. published general indulgences throughout Europe, and the resistance to them led to the Reformation.

Industrial and Provident Societies' Acts, 1852 and 1862, were amended by acts passed 1867, 1871, and 1876.

Industrial Exhibitions, in Great Britain, are now frequent. One for South London was opened at Lambeth, 1 March, 1864; for North London, by earl Russell, at the Agricultural Hall, Islington, 17 Oct. 1864; for West London, at the Floral Hall, Covent Garden, 1 May, 1865; for the city of London, at Guildhall, 6 March, 1866; one was opened at York, 24 July, 1866; and several since. The Workmen's International Exhibition, Agricultural Hall, London, was opened 16 July; closed, 31 Oct. 1870.

Industrial Schools Act, 21 & 22 Vict. c. 48 (1857), was enacted to make better provision for the care and education of vagrant, destitute, and disorderly children. Another act was passed 1861. These acts were consolidated by an act passed in Aug. 1866. Forty-seven of these schools had been certified under these acts up to 29 Sept. 1864. The act was extended to Ireland, 1868. England and Wales, 1872, 71 schools (4870 boys, 1516 girls).

Infallibility of the Pope, in regard to faith and morals, was decreed by the Vatican Council, and promulgated 18 July, 1870. The doctrine was much opposed in Germany, and led to the constitution of the church named "Old Catholics" (which see). Mr. Gladstone's pamphlets, "The Vatican Decrees in their Bearing on Civil Allegiance," published Nov. 1874, and "Vaticanism," in Feb. 1875.

Infant Schools began in New Lanark, Scotland, in 1815; in London in 1818.

Infanticide, especially female, was very prevalent in barbarous countries. Lord Macartney stated that 20,000 infants were killed annually; it is now gradually decreasing in India. On 12 Nov. 1851, Mr. Kaikes induced the Chohan chiefs to agree to resolutions against it, and a great meeting in the Punjab was held for the same purpose, 14 Nov. 1853. Much suspicion was caused in London in 1867 through the deaths of children farmed out, or given up to persons advertising for children to adopt, with a premium. The agitation revived, June, 1870. Margaret Waters was convicted of the murder of John Cowen, an illegitimate infant, by poison and neglect, 23 Sept. 1870. She had adopted about 40 children, receiving a few pounds as premium; in four years many had died. John and Catherine Barnes of Tranmere, near Birkenhead, convicted of manslaughter, 29 Oct. 1879; a gross case; see *Trials*, 1879. The Infant Life Protection act passed 25 July, 1872. Female infanticide prohibited in China about June, 1873.

Infantry, foot-soldiers, their organization much improved during the wars of Charles V. and Francis I., in the sixteenth century. The British army comprised 99 regiments of regular infantry in 1858, when the Canadians raised a regiment, which is termed the 100th. The number, now 109, includes the nine regiments formerly in the pay of the East India Company, and several colonial corps. Marshal Soult (or marshal Bugeaud) said, "The British infantry is the finest in the world; happily there is not much of it." In 1875, 125,805.

Infants' Relief Act, passed 7 Aug. 1874, to amend the law relating to contracts made by persons under age.

Infirmaries. Ancient Rome had no houses for the cure of the sick; diseased persons were carried to the temple of Esculapius for cure. Institutions for the accommodation of travellers, the indigent, and sick were founded by the emperor Julian about 362; and infirmaries or hospitals were frequently built to cathedrals and monasteries. The emperor Louis II. caused infirmaries situated on mountains to be visited, 855. In Jerusalem the knights and brothers attended on the sick. There

were hospitals for the sick at Constantinople in the eleventh century. The oldest mention of physicians and surgeons established in infirmaries occurs in 1457.—*Beckmann*. See *Hospitals*.

Influenza, an epidemic which prevailed in England in 1831, 1833, 1836, and 1847, appears to have been known in the sixteenth century.

Informers, upon penal statutes, compounding with defendants without leave of the court, were punishable with fine and pillory, by 18 Eliz. c. 5 (1576). Their share of a penalty was regulated by 2 & 3 Vict. c. 71 (1839).

Ingor, a river rising in the Caucasus and falling into the Black Sea. Omar Pacha, marching to the relief of Kara, crossed this river on 6 Nov. 1855, with 10,000 men, and attacked the Russians, 12,000 strong, who, after a struggle, retreated with the loss of 400 men. The Turks had 68 killed and 242 wounded. Kara, however, was not saved.

Ink. The ancient black inks were composed of soot and ivory-black, and Vitruvius and Pliny mention lamp-black; but they had ink of various colors, as red, gold, silver, and purple. Red ink was made of vermilion and gum. INDIAN-INK was brought from China, and must have been in use by the people of the East from the earliest ages. INVISIBLE, or SYMPATHETIC, inks were known at early periods. Ovid (A.D. 2) teaches young women to write with new milk. Receipts for preparing invisible ink were given by Peter Borel in 1653, and by Le Mort in 1669.—*Beckmann*.

Inkerman (Crimea). The Russian army (about 40,000) having received reinforcements, and being encouraged by the presence of the grand-dukes Michael and Nicholas, attacked the British (9000) near the old fort of Inkerman, before daybreak, 5 Nov. 1854. They were kept at bay for six hours till the arrival of 6000 French. The Russians were then repulsed, leaving 9000 killed and wounded. The loss of the allies was 462 killed, 1952 wounded, and 191 missing. Sir George Cathcart, and gens. Strangways, Goldie, and Torrens, were among the slain. On 15 Nov. 1855, an explosion of about 100,000 lbs. of gunpowder occurred near Inkerman, and caused great loss of life.

Inland Revenue Board was constituted in Feb. 1849. It comprises the boards of *Excise*, *Stamps*, and *Taxes* (which see). The law respecting the inland revenue amended 1871.

Innsbruck, capital of the Tyrol, captured by Maurice of Saxony in 1552; by the Bavarians in 1709; by the French and Bavarians, 1805. Much fighting took place in 1809, and Innsbruck changed masters several times, being finally taken by the Austrians, 12 Aug.

Inoculation, see *Small-pox*. Lady Mary Wortley Montagu introduced inoculation from small-pox to England from Turkey. In 1718 she had her son inoculated at Adrianople with success. She was allowed to have it first tried in England on seven condemned criminals, 1721; and in 1722 two of the royal family were inoculated. The practice was preached against by many of the bishops and clergy until 1760. Dr. Mead practised inoculation very successfully up to 1754; and Dr. Dimsdale of London inoculated Catherine II., empress of Russia, in 1768. Of 5964 who were inoculated in 1797-9, only three died. An inoculation hospital was established in 1746. *Vaccine* inoculation was introduced by Dr. Jenner, 21 Jan. 1799; he had discovered its virtue in 1796, and had been making experiments during the intermediate three years. Inoculation was forbidden by law in 1840; see *Vaccination* and *Sheep*.

Inquisition, or **HOLY OFFICE**. Previous to Constantine (306) heresy and spiritual offences were punished by excommunication only; but shortly after his death capital punishments were added, and inquisitors were appointed by Theodosius, 382. Priscillian was put to death in 384. Justinian decreed the doctrine of the four holy synods as to the Holy Scriptures and their canons to be observed as laws, 529; hence the penal code against heretics. About 800 the power of the Western bishops was enlarged, and courts were established for trying and punishing spiritual offenders, even with death; the punishment being termed in Spain *auto-da-fé*, "an act of faith." In the twelfth century many heresies arose; and during the crusades against the Albigenses, Gregory IX., in 1233, established by rules the inquisitorial missions sent out by Innocent III., 1210-15, and committed them to the Dominicans. Pietro da Verona (styled Peter Martyr), the first inquisitor who burned heretics, assassinated by an accused gonfalonier, 6 April, 1252, was canonized.

Pierre de Castelnau sent against the Albigenses, 1210; St. Dominic made the first inquisitor-general. 1215

Insects. About 200,000 species known, Jan. 1877. An exhibition of these creatures, illustrating their structure, food, and habits, was opened in the gardens of the Tuileries at Paris, 7 Sept. 1874; at the Westminster Aquarium, 9 March, 1878; and in the Zoological Gardens, Regent's Park, 1881; see *Entomology*.

Insolvency. The first insolvent act was passed in 1649, but it was of limited operation; a number of acts of more extensive operation were passed at various

periods, and particularly in the reign of George III. The benefit of the act known as the Great Insolvent Act was taken in England by 50,733 insolvents from the time of its passing (in 1814) to March, 1827—a period of thirteen years. Since then the acts relating to insolvency have been several times amended. Persons not traders, or being traders whose debts are less than 300*l.*, might petition the court of bankruptcy, and propose compositions, and have *pro tem.* protection from all process against their persons and property, by 6 Vict. c. 116 (1842). In 1861, by a new bankruptcy act, the business of the insolvent debtors' court was transferred to the court of bankruptcy; and a number of imprisoned debtors were released in Nov. 1861.—In May, 1837, a commercial crisis occurred in the United States. Failures to the amount of more than \$100,000,000 occurred. Banks generally suspended specie payment. A general bankrupt law was passed by Congress, 9 Aug. 1841. Another crisis occurred in 1857. The banks throughout the United States suspended specie payment, but soon resumed. During the civil war of 1861-4 the banks suspended specie payment, which they resumed 1 Jan. 1879; see *Bankrupts*.

Intendment of Crimes. In cases of treason, wounding, burglary, etc., intention proved was made as punishable as crime completed, by 7 Geo. II. 1734. The rigor was modified by sir Robert Peel's revision of the statutes, 4-10 Geo. IV. 1823-9.

Interdict, or **ECCLESIASTICAL CENSURE**, seldom decreed in Europe till the time of Gregory VII. (1073), but often afterwards. When a prince was excommunicated, all his subjects retaining their allegiance were excommunicated also, and the clergy were forbidden to perform any part of divine service, or any clerical duties, save the baptism of infants, and taking the confessions of dying penitents. In 1170, pope Alexander put all England under an interdict; and when king John was excommunicated in 1208, the kingdom lay under a papal interdict for six years. England was put under an interdict, on Henry VIII. shaking off the pope's supremacy, 1535; and pope Sixtus V. published a crusade against queen Elizabeth of England in 1588, see *Excommunication*.

Interest, see *Usury*. The word interest was first used in an act of parliament of the 21st James I. 1623, wherein it was made to signify a lawful increase by way of compensation for the use of money lent. The rate fixed by the act was 8l. for the use of 100l. for a year, in place of usury at 10l. before taken. The commonwealth lowered the rate to 6l. in 1651; confirmed in 1660; and by an act of the 13th of queen Anne, 1713, it was reduced to 5l. The restraint being found prejudicial to commerce, it was totally removed by 17 & 18 Vict. c. 90 (1854).

Investiture OF ECCLESIASTICS, was a cause of discord between the pope and temporal sovereigns in the middle ages; and led to actual war between Gregory VII. and the emperor Henry IV., 1075-85. The pope endeavored to deprive the sovereign of the right of nominating bishops and abbots, and of investing them with the cross and ring. Henry V. gave up the right, by treaty, Feb. 1111; but other sovereigns resolutely refused to concede it.

Invincible Armada, or SPANISH ARMADA, see *Armada*.

Invocation OF THE VIRGIN AND SAINTS to intercede with God. This practice of the Roman Catholic church has been traced to the time of Gregory the Great, 593. The Eastern church began (in the fifth century) by calling upon the dead, and demanding their suffrage as present in the divine offices.

Iodine (from the Greek *ιώδης*, violet-like), was discovered by M. De Courtois, a manufacturer of saltpetre at Paris in 1812, and investigated by M. Clement, 1813. On the application of heat it rises in the form of a dense violet-colored vapor, easily evaporates, and melts at 220 degrees; it changes vegetable blues to yellow, and a seven-thousandth part converts water to a deep yellow color, and starch into a purple.

Iona, *Ioolmkill*, or *Hii*, one of the Hebrides. About 565 St. Columba founded a monastery here, which flourished till the eighth and ninth centuries, when it was frequently ravaged by the Norsemen. Other religious bodies afterwards were formed here, and the isle was long esteemed sacred.

Ionian (Asia Minor). About 1040 B.C. the Ionians, a Pelasgic race, emigrated from Greece, and settled here and on the adjoining islands. They built Ephesus, Smyrna, and other noble cities. They were conquered by the great Cyrus about 548 B.C.; revolted 504, but were again subdued. After the victories of Cimon, Ionia became independent and remained so till 387, when it was once more subjected to Persia. It formed part of the dominions of Alexander and his successors; was annexed to the Roman empire, 133, and conquered by the Turks.—Ionia was renowned for poets, historians, and philosophers.

Ionian Islands (on W. coast of Greece): Corfu (the capital), Cephalonia, Zante, Ithaca, Santa Maura, Cerigo, and Paxo. They were colonized by the Ionians, and partook of the fortunes of the Greek people; were subject to Naples in the thirteenth century, and in the fourteenth to Venice. Population in 1862, 234,123.

Ipsus (Phrygia), BATTLE OF, Aug. 301 B.C., when Seleucus was confirmed in his kingdom of Syria by the defeat and death of Antigonus, king of Asia. The latter led into the field an army of about 70,000 foot and 10,000 horse, with 75 elephants. The former had 64,000 infantry, besides 10,500 horse, 400 elephants, and 120 armed chariots.—*Plutarch*.

Ipswich (Suffolk), the Saxon Gippeswic, was ravaged by the Danes, 991 and 1000. Wolsey was born here, 1471; and founded a school in 1525. The port was greatly improved by the erection of wet-docks, 1837-42. The railway to London was opened 25 June, 1846; and the new town-hall, 29 Jan. 1868.

Iquique, see *Chili*, 1879.

Ireland, anciently named Eri or Erin, Ierne and Hibernia, is said to have been first colonized by Phœnicians. Some assert that Partholani landed in Ireland about 2048 B.C.; that the descent of the Damnonii was made about 1463 B.C.; and that this was followed by the descent of Heber and Heremon, Milesian princes, from Galicia, in Spain, who conquered Ireland, and gave to its throne a race of 171 kings; see *Church of Ireland and Population*.

* The list of Irish sovereigns printed in previous editions has been omitted. The Irish writers carry their succession of kings very high. The learned antiquary Thomas Innes, of the Scots' College of Paris, expressed his wonder that "the learned men of the Irish nation have not, like those of other nations, yet published the valuable remains of their ancient history whole and entire, with just translations, in order to separate what is fabulous, and only grounded on the traditions of their poets and bards, from what is *certain history*." O'Flaherty, Keating, Toland, Kennedy, and other modern Irish historians have rendered all uncertain by deducing their history from the Deluge with as much assurance as they deliver the transactions of Ireland from St. Patrick's time - *Anderson*. The "Annals of the Four Masters," edited by Dr. Donovon, were published in Irish and English in 1848.

† Lord justices and deputies, and latterly LORD-LIEUTENANT. It has been several times proposed to abolish the viceroyalty of Ireland, but without success. The last time 25 March, 1858.

Ireland Forgeries. In 1786 W. H. Ireland made public the Shakespeare manuscripts which he had forged, and deceived many critics. The play "Vortigern" was performed at Drury-lane theatre on 2 April, 1796. He shortly after acknowledged the forgery, and published his "Confessions" in 1805. He died in 1835.

Ireland, Young, a party (or rather "school") formed for the regeneration of the country, founded by Thos. Osborne, Charles Gavan Duffy (who established and conducted *The Nation* from 1842 to 1855), Smith O'Brien, and others in 1840. Some of their proceedings led to the state trials of 1843 and 1848. Mr. Duffy (afterwards premier of Victoria, Australia, and K. C. M. G.) published "Young Ireland, a Fragment of Irish History, 1840-50," in 1880.

Iridium and Osmium. In 1804 Tennant discovered these two rare metals in the ore of platinum, in which, in 1845, Claus discovered a third, Ruthenium. Iridium is said to be the heaviest known metal, 1878; see *Weights*.

Irish Church, see *Church of Ireland*. The Irish Presbyterian Church act, passed 16 June, 1871, regulates the management of certain trust properties for that church.

Irish Land Bills, see *Ireland*, 1870, 1880-1, and *Addenda*.

Irish Society, THE HONORABLE, the name given

to a committee of citizens of twelve London companies invited by king James I. to colonize the confiscated lands in the north of Ireland, termed the Ulster plantations, including Londonderry and Coleraine, 1613. The committee received a charter, which was taken away in 1637, and restored after various changes 1670. The affairs of this company and its methods of business were discussed in parliament in 1868 and 1869.

Irish University Bill (to combine Trinity College and the Catholic College), introduced by Mr. I. Butt, 16 May, 1876; withdrawn.

Iron found on Mount Ida by the Dactyles, owing to the forest having been burned by lightning, 1432 B.C.—*Arundelian Marbles* [1407, *Hales*; 1283, *Clinton*]. The Greeks ascribed the discovery of iron to themselves, and referred glass to the Phœnicians. Moses relates that iron was wrought by Tubal-Cain (Gen. iv. 22). Swedish iron is very celebrated, and Dannemora is the greatest mine of Sweden.—The weekly publication *Iron* began 18 Jan. 1873; see *Steel*.

Belgium an early seat of the iron manufacture; coal said to have been employed at Marche-les-dames, 1340.

British iron cast by Ralph Page and Peter Baude in Sussex, 1543.—*Rymers's Fæderia*.

Iron-mills used for slitting iron into bars for smiths by Godfrey Bocha, 1590.

Tinning of iron introduced from Bohemia, 1681. Till about 1730 iron ores were smelted entirely with wood charcoal, which did not wholly give way to coal and coke till 1788.

The operation termed *puddling*, and other very great improvements in the manufacture, invented by Mr. Henry Cort, about 1781, who did not reap the due reward of his ingenuity. He died in 1800.

Mr. Henry Bessemer patented his method of manufacturing iron and steel, 17 Oct., 5 Dec. 1855; 12 Feb. 1866.

Strike of the puddlers and lock-out of the masters in Staffordshire, Northumberland, etc., lasted during March, April, and May, 1865.

Iron-workers of Great Britain determine to form one trades-union, with one executive, Oct. 1866.

Strike of iron-workers in the north over, 31 Dec. 1866.

Mr. Wm. Robinson announced a method of making wrought iron from cast iron by means of magnetism, July, 1867.

Mr. John Heaton's process for making steel announced about Nov. 1867; discussed Oct. 1868.

One of the finest, thickest, and heaviest armor-plates ever rolled in the world was pressed into the very perfection of a manufactured armor-plate at the great Atlas Iron-works of sir John Brown & Co., Sheffield. The size of it when in the furnace was a little over 20 feet long by about 4 feet broad and 21 inches thick. Its rough weight was over 21 tons. It was built up in the furnace before being rolled by five mould plates, each 3 inches thick, and one solid plate of 6 inches. This mass, when reduced by intense heat to the consistency of dough, was withdrawn from the furnace, and in the course of less than a quarter of an hour was passed between the enormous rollers many times, was reduced to a compact slab of iron of a uniform thickness of 15 inches, and then passed on to its bed to cool till fit for having its rough edges planed down to the proper dimensions, 6 Sept. 1867. Armor-plate 24 inches thick rolled at same works, Oct. 1876.

Iron forts (cost about 1,000,000*l.*; made by Whitworth & Co. at Manchester) put up at Spithead early in 1872.

Mr. Crampton's iron furnace, in which definite proportions of coal-dust and air are introduced under pressure, was tried at Woolwich and was reported successful, May, 1873.

In 1855, 3,217,154 tons of pig-iron were produced; in 1857, 3,659,447 tons; in 1865, 4,819,254 tons; in 1869, 5,445,757 tons; in 1873, 6,666,451 tons; in 1876, 6,555,997 tons; in 1879, 5,996,337 tons.

Iron Manufacture: between 1865-75 the capital invested rose from 7,000,000*l.* to 29,000,000*l.* Number of puddling furnaces rose from 3462 to 7159; also great increase in blast furnaces.

Great depression since 1876: due to excessive production and increased and cheap manufacture of steel, 1878-9.

Exports of Iron and Steel from United Kingdom: 1860, 1,502,500 tons; 1865, 1,687,071 tons; 1870, 2,825,575 tons; 1875, 2,457,306 tons; 1879, 2,883,484 tons.

The production of pig-iron in the United States in net tons was, for 1870, 2,052,821; for 1880, 3,781,021.

The total iron and steel production in the United States in net tons was: 1870, 3,655,215; 1880, 7,265,140.

Iron and Steel Institute, the duke of Devonshire, president, held its first meeting in London, 22 June, 1863, first provincial meeting at Merthyr-Tydvil, 6 Sept. 1870; first foreign meeting at Liege, 18 Aug. 1873; second at Paris, 16 Sept. 1878.

Iron Cross, an order of knighthood established by Frederick William III. of Prussia, 10 March, 1813, to honor patriotic bravery in the war against France; was revived by William I. in the Franco-Prussian war, and awarded by him to his son for his victory at Wissembourg, 4 Aug. 1870. About 40,000 persons were decorated in 1870-1.

Iron Crown (of Italy), of gold and precious stones, set in a thin ring of iron, said to have been forged from a nail of Christ's cross, was made by order of Theodelinde for her husband, Agilulf, king of the Longobards, 591. She presented it (to be kept) to the church at Monza. Charlemagne was crowned with this crown, and after him all the emperors who were kings of Lombardy; Napoleon I. at Milan, on 26 May, 1805, put it on his head, saying, "*Dieu me l'a donnée; gare à qui y touchera*" ("God has given it to me; woe to him who touches it"). The crown was removed from Monza to Mantua by the Austrians on 23 April, 1859. After the peace of Vienna in 1866, the crown was given up to gen. Menabrea on 11 Oct., and presented to king Victor Emmanuel at Turin on 4 Nov. The order of the "Iron Crown of Italy," instituted by Napoleon, 26 May, 1805, was abolished in 1814, but revived by the emperor of Austria, 12 Feb. 1816; see *Gotha*. The order of the Crown of Italy was instituted by king Victor Emmanuel, 20 Feb. 1868.

Iron Mask, THE MAN WITH THE.* A mysterious prisoner in France, wearing a mask and closely confined under M. de St-Mars, at Pignerol (1679), Exilles (1681), Sainte-Marguerite (1687), and at the Bastille (1698), where he died, 19 Nov. 1703. He was of noble mien, and was treated with profound respect; but his keepers had orders to despatch him if he uncovered. M. de St-Mars himself always placed the dishes on his table, and stood in his presence.

Irrigation, practised in the East and in Egypt from the most remote ages. It was strenuously advocated for India by sir A. Cotton and others at the Social Science Congress at Manchester, Oct. 1866. In 1865 acts were passed for utilizing London sewage in the irrigation of grass land, and the results are said to be generally favorable. The subject was much discussed, Aug. 1873. A method of producing artificial rain from ponds by means of steam-power, patented by Isaac Brown of Edinburgh, was tried by Mr. Coleman at Stoke

Park, and reported successful; see *Sewage and Intermittent Filtration*.

Irun, a frontier village of Spain. On 16 May, 1837, the British auxiliary legion, under gen. Evans, marched from St. Sebastian to attack Irun (held by the Carlists), which, after a desperate resistance, was carried by assault, 17 May.

Irvingites, followers of Edward Irving,† now called the "Holy Catholic Apostolic Church." They use a liturgy (framed in 1842 and enlarged 1858), and have church officers named apostles, angels, prophets, etc. In 1852 lighted candles were placed on the magnificent altar, and burning of incense during prayers was prescribed. The Gothic church, in Gordon square, was solemnly opened 1 Jan. 1854. It is said that all who join the church offer it a tenth of their income. They had 80 chapels in England in 1851.

Isandula, ISANDLANA, or ISANDLWANA, termed the "English Cremera;" see *Zululand*, 22 Jan. 1879.

Isauria, a province in Asia Minor, conquered by the Romans B.C. 78; by the Saracens A.D. 650; was retaken by the emperor Leo III., who founded the Isaurian dynasty, 718, which ended with Constantine VI. in 797. Isauria was incorporated with Turkey 1387.

Isaernia (S. Italy). Here the Sardinian general Cialdini defeated the Neapolitans, 17 Oct. 1860.

Islam, or ISLĀM, submission to God, the name given to *Mahometanism* (which see).

Isle of France, *Man*, &c.; see *Mauritius, Man*, etc.

Isles, BISHOPRIC OF. This see contained not only the Hebrides, or Western Isles, but the Isle of Man, which for nearly 400 years had been a separate bishopric. The first bishop of the Isles was Amphibalus, 360; see *Iona*. Since the revolution (when this bishopric was discontinued) the Isles have been joined to Moray and Ross, or to Ross alone. In 1847, however, Argyll and the Isles were made a seventh post-revolution and distinct bishopric; see *Bishops*.

Isly (N.W. Africa). Here Abd-el-Kader, the Arab chief, was totally defeated by the French, under Bugeaud, 14 Aug. 1844.

Ismail (Bessarabia). After a long siege by the Russians, who lost 20,000 men before the place, the town was taken by storm, 22 Dec. 1790; when Suwarrow, the most merciless warrior of modern times, put the brave Turkish garrison (30,000 men) to the sword and delivered up Ismail to pillage, and ordered the massacre of 6000 women. It was again captured by the Russians 26 Sept. 1809, and retained till the treaty of Paris in 1856, when it was ceded to Moldavia.

Ispahan was made the capital of Persia by Abbas the Great, in 1590. It lost its supremacy in 1796, when Teheran became the capital.

Israel, KINGDOM OF, see *Jews*.—Handel's oratorio "Israel in Egypt" first performed 4 April, 1789.

Issus (Asia Minor), the site of Alexander's second great battle with Darius, whose queen and family were captured, Oct. 333 B.C. The Persian army, according to Justin, consisted of 400,000 foot and 100,000 horse; 61,000 of the former and 10,000 of the latter were left dead on the spot, and 40,000 were taken prisoners. Here the emperor Septimius defeated his rival Niger, A.D. 194.

† Edward Irving was born 15 Aug. 1792, and was engaged as assistant to Dr. Chalmers, at Glasgow, in 1819. In 1823 he attracted immense crowds of distinguished persons to his sermons at the Scotch church, Hatton Garden. A new church was built for him in Regent square in 1827. Soon after he propounded new doctrines on the human nature of Christ; and the " utterances of Unknown Tongues," which began in his congregation with a Miss Hall and Mr. Taplin, 16 Oct. 1831, were countenanced by him as of divine inspiration. He was expelled from the Scotch church 15 March, 1833. His church, reconstituted with the threefold cord of a sevenfold ministry, was removed to Newman street. He died 8 Dec. 1834.

* The following conjectures have been made as to his identity: An Armenian patriarch forcibly carried from Constantinople (who died ten years before the mask); the duc de Vermandois, son of Louis XIV., reported to have perished in the camp before Duxmude; the duc de Beaufort, whose head is reported to have been taken off before Candia; James, duke of Monmouth, executed on Tower hill; a son of Anne of Austria, queen of Louis XIII., either by cardinal Mazarine or by the duke of Buckingham; the twin brother of Louis XIV. (a conjecture received by Voltaire and others); Fenouquet, an eminent statesman in the time of Louis XIV.; and a count Mattholi, secretary of state to Charles III., duke of Mantua. M. Delort and the right hon. Azar Ells (afterwards lord Dover) endeavored to prove Mattholi to have been the person. The mask, it seems, was not made of iron, but of black velvet, strengthened with whalebone, and fastened behind the head with a padlock.

Ister, see *Danube*.

Isthmian Games received their name from the isthmus of Corinth, where they were observed; instituted by Sisyphus about 1406 B.C., in honor of Melicertes, a sea-god.—*Leglet*. Re instituted in honor of Neptune by Theseus about 1239 B.C.; and their celebration was held so sacred that even a public calamity did not prevent it. The games were revived by Julius Cæsar, 60 B.C.; and by the emperor Julian, A.D. 362.

Istria was finally subdued by the Romans, 177 B.C. After various changes it came under the rule of Venice in 1378, and was annexed 1420. It was obtained by Austria, 1796; by France, 1806; by Austria, 1814.

Italia Irredenta ("unredeemed Italy"), a secret society which first appeared in Italy Nov. 1877, and said to have 200 committees, the chief at Naples. Its professed object is to add to the Italian kingdom Trieste, the Tyrol, and other Austrian provinces on the Adriatic.

In 1879 col. Haymerle, an Austrian military resident at Rome, published "*Res Italice*," freely discussing the subject. The Italians were much annoyed, and the publication was disavowed by the Austrian government.

Italian Association for the Advancement of Science, first met at Pisa, under the patronage of the grand-duke of Tuscany, in 1837. It met in Rome 20 Oct. 1873.

Italian Benevolent Society, London, founded by the king of Italy and others, 1861.

Italian Catholic Church (between two and three thousand persons); first bishop, Domenico Pannelli; a synod met at Naples in 1875.

Its statute (of 62 articles) asserts that the Catholic church is nothing but the society of all believers in Jesus Christ, and that he only is its supreme head and pastor; rejects all miracles since the death of the Apostles; declares that the Catholic faith is only that revealed in the Holy Scriptures, etc.

Italian Language, based on Latin, is said by Dante to be formed of a selection of the best portions of the different dialects. Pure elegant poetry was written by Guido Cavalcanti, who died 1301; and good prose by Malaspini, about 1250.

The following terms are often used with reference to certain periods in the history of Italian literature and art:

1. **Trecento** (three hundred), from the birth of Dante (1265) to the death of Boccaccio (1375), which two, with Petrarca, are styled "the triumvirate of the Trecento."
2. **Quattrocento** (four hundred), from 1375 to the revival of Italian literature by Lorenzo de' Medici in the fifteenth century. During this period Latin was revived, to the prejudice of Italian.
3. **Cinquecento** (five hundred), from about 1480 to 1596. A sensuous style of art, founded on the heathen mythology, began to prevail.
4. **Sixcento** (six hundred), from 1590 to 1700. The bad taste which prevailed during this period is ascribed to the influence of the Spaniards and the Jesuits throughout Italy. *Scientiati* is a term of reproach.

The *Trecento* and *Cinquecento* were the most flourishing periods.

Italian Republic was the name given to the remodelled Cisalpine republic. Napoleon Bonaparte presided, Jan. 1802.

Italy (either from *Italus*, an early king, or *italus*, a bull calf) was called the garden of Europe. The invading Pelasgians from Greece, and the Aborigines (Umbrians, Oscans, and Etruscans) combined, form the Latin race, still possessing the southern part of Europe. The history of Italy is soon absorbed into that of Rome, founded 753 B.C. Previous to the fifteenth century it was desolated by intestine wars and the interference of

the German emperors; since then Spain, France, and Germany struggled for the possession of the country, which has been divided among them several times. Spain predominated in Italy during the sixteenth and seventeenth centuries; yielded to the house of Austria at the beginning of the eighteenth. The victories of Bonaparte in 1797-8 changed the government of Italy; but the Austrian rule was re-established at the peace in 1814. In 1848 the Milanese and Venetians revolted and joined Piedmont, but were subdued by Radetzky; see *below*. The hostile feeling between Austria and Piedmont gradually increased till war broke out in April, 1859. The Austrians were defeated, and the kingdom of Italy, comprising Piedmont, Sardinia, Lombardy, Tuscany, Modena, Parma, the Romagna, Naples, and Sicily, was re-established 17 March, 1861, by the Italian parliament (consisting of 443 deputies from 59 provinces). On 29 Oct. 1861, the internal government was reorganized; the 59 provinces were placed under prefects, subject to four directors-general. In 1861 the population was 21,728,529. War with Austria was declared 18 June, 1866; and on 3 Oct. peace was signed at Vienna, and Venetia was ceded to Italy; see *below* for the events. The kingdom of Italy was consummated by the occupation of Rome as the capital, 1870. Estimated population of the kingdom, 1862, 25,003,635 (Rome was aided in 1870); 1878, 28,209,620. For other details see *Rome* and the various Italian cities throughout the volume.

Ithaca, kingdom of Ulysses, see *Ionian Isles*. It was explored by Dr. Schliemann in 1878, few discoveries being made.

Itineraries. The Roman Itinerarium was a table of the stages between important places. The "Itineraria Antonini," embracing the whole Roman empire, usually ascribed to the emperor Aurelius Antoninus and his successors, A.D. 138-180, was probably based upon the survey made by order of Julius Caesar, 44 B.C. The "Itinerarium Hierosolymitanum" was drawn up for the use of the pilgrims about A.D. 333.

J.

J was distinguished from **I** by the Dutch scholars of the sixteenth century, and introduced into the alphabet by Giles Beys, printer, of Paris, 1550.—*Dufremoy*.

Jacobins, the original name of the Dominicans (*schick see*). The Jacobin Club (first called "Club Breton") consisted of about forty gentlemen and men of letters, who met in the hall of the Jacobin friars at Paris, in Oct. 1789, to discuss political and other questions. Similar societies were instituted in all the principal towns of the kingdom. The club was closed 11 Nov. 1794.

Jacobites, a Christian sect, so called from Jacob Baradeus, a Syrian, about 541; *see Eutychians*.—The partisans of James II. (Latin, Jacobus II.) were so named after his expulsion from England in 1688.

Jacquard Loom, for figured fabrics, invented by Joseph Marie Jacquard of Lyons, and patented 23 Dec. 1801.

Jacquerie, a term applied to bands of revolted peasants (headed by one Caillot, called Jacques Bonhomme), who ravaged France during the captivity of king John in 1358, and were quelled with much bloodshed. Similar insurrections occurred in Germany. One was termed the *Bundschuh*, from the large shoe especially worn by peasants, in 1502; and another termed the Bund (or league) of the Poor Conrad, 1514 and 1524, which also cost about 100,000 lives, and led to the insurrection of the Anabaptists.

Jaffa, a seaport of Syria, celebrated in Scripture as Joppa, whence Jonah embarked (about 862 B.C.), and where Peter raised Tabitha from the dead (A.D. 38); in mythology the place whence Perseus delivered Andromeda. Jaffa was taken by the caliph Omar in 636; by the Crusaders, 1099; by Saladin, 1193; by Louis IX., 1252; and by Bonaparte, 7 March, 1799: the French were driven out by the British in June, the same year. Here, according to sir Robert Wilson, were massacred 2800 prisoners by Bonaparte; but this is doubted. Jaffa suffered by an earthquake in Jan. 1837, when it is said that 13,000 persons were killed.

Jagellons, a dynasty which at times reigned over Lithuania, Poland, Hungary, and Bohemia, beginning with Jagellon, duke of Lithuania (husband of Hedwig, daughter of Louis of Hungary, 1384), who became king of Poland as Ladislas III. or V. in 1399, and ending with Sigismund II., who died in 1572.

Janina, see *Albania*.

Janissaries (Turkish *ieni tchéri*, new soldiers), an order of infantry in the Turkish army, originally, young prisoners trained to arms; were first organized by Orcan, about 1330, and remodelled by his son Amurath I., 1360; their numbers being increased by following sultans. In later days they degenerated from their strict discipline, and several times deposed and killed the sultans. During an insurrection, 14, 15 June, 1826, when nearly 3000 of them were killed, the Ottoman army was reorganized by Mahmud II., and a firman was issued on 17 June abolishing the Janissaries.

Jansenists, persons who embraced the doctrines of Cornelius Jansen, bishop of Ypres, who died in 1638. The publication of his "Augustinus," 1640, in which he maintained the doctrine of free grace, kindled a fierce controversy, and was condemned by a bull of pope Urban VIII. in 1642. Through the Jesuits, Jansenism was condemned by Innocent X. in 1653, and by Clement XI. in 1713, by the bull *Unigenitus*. This bull the French church rejected. Jansenism still exists at Utrecht and Haarlem; see *Port-Royalists*. Loos, archbishop of Utrecht, died, June, 1873.

January derives its name from Janus, an early Roman divinity. January was added to the Roman calendar by Numa, 713 B.C. He placed it about the winter solstice, and made it the first month, because Janus was supposed to preside over the beginning of all business. In 1751 the legal year in England was ordered to begin on 1 Jan. instead of 25 March.

Janus, TEMPLE OF, at Rome, was erected by Romulus, and kept open in time of war, and closed in time of peace. During above 700 years it was shut only under Numa, 714 B.C.; at the close of the first Punic war, 235 B.C.; and under Augustus, 29, 25, and 5 B.C.

Japan, an Asiatic empire, composed of Japan, or Nippon, and about 3850 isles, with between 35,000,000 and 40,000,000 inhabitants. It was visited by Marco Polo, the Venetian traveller, in the thirteenth century, and by Mendez Pinto, a Portuguese, about 1535 or 1542; whose countrymen shortly after obtained permission to found a settlement. The Jesuit missionaries followed, and made a number of converts, who sent a deputation to pope Gregory XIII. in 1585; but a fierce persecution of the Christians began in 1590, aggravated, it is said, by the indiscreet zeal and arrogance of the Jesuits, thousands of the converts suffered death; and the Portuguese were utterly expelled, 1637-42. The Dutch trade with Japan commenced about 1600 under severe restrictions, and has since been frequently suspended; other nations, except Chinese, being excluded. The learned Engelbert Kämpfer visited Japan in 1690, and published an account of it with plates.

Jarnac (W. France). On 13 March, 1569, the duke of Anjou, afterwards Henry III. of France, here defeated the Huguenots under Louis, prince of Condé, who was killed in cold blood by Montesquieu. The victor (seventeen years of age), on account of his success here and at Moncontour, was chosen king of Poland.

A Jarnac Stroke, a term of opprobrium, is derived from the Seigneur de Jarnac, who, in a duel with La Chataigneraie, for a great insult, disabled his antagonist by an unexpected wound in the ham 1547

Jasmine, or **JESSAMINE** (*Jasminum officinale*), native of Persia, etc., was brought hither from Circassia before 1548. The Catalonian jasmine came from the East Indies in 1629, and the yellow Indian jasmine in 1656.

Jassy, the capital of Moldavia, frequently occupied by the Russians; taken by them in 1739, 1769, and 1828. A treaty between them and the Turks was signed here, 9 Jan. 1792.

Java, a large island in the Eastern Archipelago, is said to have been reached by the Portuguese in 1511, and by the Dutch in 1595. The latter, who now possess it, built Batavia, the capital, about 1619; see *Batavia*. The atrocious massacre of 20,000 of the unarmed natives by the Dutch, sparing neither women nor children, to possess their effects, took place in 1740. The island capitulated to the British, 18 Sept. 1811. The sultan was dethroned by the English, and the hereditary prince raised to the throne, in June, 1813. Java was restored to Holland in 1814. The English promoted free labor instead of forced; but the Dutch reverted to the old system, and in 1830 abolished free labor, introducing the "culture system," by which the government controls the cultivation of the land and buys the produce at its own price. In Aug. 1860, the Swiss soldiers here, aided by the natives, mutinied, but were soon reduced, and many suffered death. The diminished prosperity of Java led to warm discussions in the Dutch chamber in 1866.

Jawakies, see *India*, 1877-8.

Jean de Luz, St. (S. France, near the Pyrenees). Soult's strong position here was taken by gen. Hill and marshal Beresford, 10 Nov. 1813.

Jedda, the port of Mecca, Arabia. On 15 June, 1858, the fanatic Mahometans massacred 26 of the Christian inhabitants, among them the English and French consuls and part of their families; but many fled to the shipping. On the delay of justice, commodore Pullen, with the *Cyclops*, bombarded the town, 25, 26 July. On 6 Aug. eleven of the assassins were executed; the ring-leaders afterwards.

Jeddo, or **YEDDO** (the name was changed to Tokio about 1869), the capital of Japan, on the island of Nippon. Here was signed the treaty with Great Britain, 26 Aug. 1858; see *Japan*. 5000 houses destroyed by fire, 8 Dec. 1873.

"Je Maintiendrai"—"I will maintain," the motto of the house of Nassau. When William III. came to the throne of England, he continued this, but added "the liberties of England and the Protestant religion," at the same time ordering that the old motto of the royal arms, "*Dieu et mon droit*," should be retained on the great seal, 1689.

Jemappes (N. W. Belgium), the site of the first pitched battle gained by the French republicans (under Dumouriez), in which 40,000 French troops drove out 19,000 Austrians, who were intrenched in woods and mountains, defended by redoubts and many cannon, 6 Nov. 1792. The number killed on each side was reckoned at 5000.

Jena and Auerstadt (Central Germany), where two battles were fought, 14 Oct. 1806, between the French and Prussians. The French were commanded at Jena by Napoleon, and at Auerstadt by Davoust; the Prussians by prince Hohenlohe at the former place, and the king of Prussia at the latter. The Prussians were defeated, losing nearly 20,000 killed and wounded, and nearly as many prisoners, and 200 field-pieces; the French lost 14,000 men. Napoleon advanced to Berlin, and issued the Berlin decree (*which see*).

Jenkins's Ear, an ear of Robert Jenkins, captain of a merchant-vessel, was torn off, with many insults, by a Spanish pirate in 1731. He appeared before parliament in 1738, when the convention of the Pardo was severely discussed.

Jersey. The chief island of the Channel archipelago (which includes Guernsey, Sark, Alderney, etc.), formerly held by the Romans in the third and fourth centuries after Christ—Jersey being termed *Cæsarea*. The isles were captured by Rollo, and thus became an appanage of the duchy of Normandy, and were united to the crown of England by his descendant, William the Conqueror. The inhabitants of the Channel Islands preferred to remain subjects of king John at the period of the conquest of Normandy by Philip Augustus, and, while retaining the laws, customs, and (until lately) the language of their continental ancestors, have always remained firm in their allegiance to England. Almost every war with France has been characterized by an attack on Jersey, the most formidable of which, under the baron de Rullecour, was defeated by the English garrison and Jersey militia, commanded by major Pierson, 6 Jan. 1781. Mr. J. Bertrand Payne, in his "Armorial of Jersey" and his "Gossiping Guide," has exhaustively treated the general and family history of the island. Jersey became a place of refuge for M^r. Rouher, Baroche, Drouin de Lhuys, and other distinguished French imperialists, Sept. 1870. Some of the Trappists and other monks expelled from France settled in Jersey, 1880-1. The population of the Channel Isles in 1861 was 90,978, in 1871, 90,563.

Jerusalem, called also **SALEM**, 1918 B.C. (Gen. xiv. 18). Its king was slain by Joshua, 1451 B.C. It was taken by David, 1048 B.C., who dwelt in the fort, calling it the city of David; see *Jews* and *Holy Places*. Population about 28,000.

"*Jerusalem Delivered*," the great Italian epic by Tasso, was published in 1580.

Jervis's Acts, 11 & 12 Vict. cc. 42, 43 (1848), relate to legal proceedings against criminals.

Jester is described as "a witty and jocosely person kept by princes to inform them of their faults, and of those of others, under the disguise of a waggish story." Several of our kings, particularly the Tudors, kept jesters. Rahere, the founder of St. Bartholomew's priory, West Smithfield, London, 1133, is said to have been a court jester and minstrel. There was a jester at court in the reigns of James I. and Charles I., but we hear of no licensed jester afterwards.

Jesuits, the Society or Company of Jesus, was founded by Ignatius Loyola, a page to Ferdinand V. of Spain, subsequently an officer in his army, and afterwards canonized. Having been wounded in both legs at the siege of Pampeluna, in 1521, he devoted himself to theology, and renounced the military for the ecclesiastical profession. He dedicated his life to the Blessed Virgin as her knight; made a pilgrimage to the Holy Land, and on his return laid the foundation of his society at Paris, 16 Aug. 1534. He presented his institutes in 1539 to pope Paul III., who made many objections; but Ignatius adding to the vows of chastity, poverty, and obedience a fourth of implicit submission to the holy see, the institution was confirmed by a bull, 27 Sept. 1540. The number of members was not to exceed sixty, but that restriction was taken off by another bull, 14 March, 1543; and popes Julius III., Pius V., and Gregory XIII. granted many privileges. Loyola died 31 July, 1556. Francis Xavier and other missionaries, the first brethren, carried the order to the extremities of the habitable globe; but it met with great opposition in Europe, particularly in Paris; see *Paraguay* and *Jansenists*. The order still exists in many European states contrary to the laws.

Jesuit's Bark, called by the Spaniards fever-wood, from the cinchona (or chinchona) tree, discovered, it is said, by a Jesuit, about 1535 (and used by the order). Its virtues were not generally known till 1633 or 1638, when it cured of fever the wife of the viceroy (Chinchona) at Peru; hence termed *Puleis comitissa*. It was sold at one period for its weight in silver, and was introduced into France in 1649; and is said to have cured Louis XIV. of fever when he was dauphin. It came into general use in 1680, and sir Hans Sloane introduced it here about 1700. The cinchona plant, largely planted in the Neilgherry hills, India, in 1861, is said to be thriving greatly, and also in Ceylon; see *Quinine*.

Jesus Christ, the SAVIOUR OF THE WORLD, stated to have been born on Monday, 25 Dec. A.M. 4004, in the year of Rome 752; but this event should be dated four years before the commencement of the common era; see *Nativity*. The following dates are given by ecclesiastical writers:

Jeu de Paume (the tennis court). The king having closed the hall of the assembly at Versailles, the third estate (*tiers-état*) met in this place, and swore not to dissolve till a constitution was established, 20 June, 1789. (It is the subject of a painting by David.)

Jewelry was received by Rebekah as a marriage gift, 1857 B.C. (Gen. xxiv. 53). Pliny the elder says he saw Lollia Paulina (wife of Caius Caesar, and afterwards Caligula) wearing ornaments valued at a sum equal to 322,916*l.* sterling. Jewels were worn in France by Agnes Sorel in 1434, and encouraged in England about 1685. The standard of gold for jewelry, except wedding-rings, was lowered by parliament in 1854.

Jewish Disabilities, see under *Jews*, 1269-1867.

Jewish Era and Calendar. The Jews usually employed the era of the Seleucids until the fifteenth century, when a new mode of computing was adopted. They date from the Creation, which they consider to have been 3760 years and 3 months before the commencement of our era. To reduce Jewish time to ours, subtract 3761 years. The Jewish year consists of either twelve or thirteen months, of 29 or 30 days. The civil year commences with the month Tisri, immediately af-

ter the new moon following the autumnal equinox; the ecclesiastical year begins with Nisan.

Jew's Harp (probably Jaws' harp), an ancient instrument. Charles Eulenstein produced remarkable effects with Jew's harps at the Royal Institution, London, 15 Feb. 1828.

Jeynes, or Jains, a sect of Buddhists in India. They do not recognize a creator, but believe matter to be eternal, and refrain from destroying life, considering animals to be sacred.

Jeypoor, one of the four principal Rajpoot states of India, tributary to the British. The new capital, Jeypoor, termed the Paris of India, was built in the last century. The Maharaja, friendly to the British, by whom he was supported, died in Sept. 1880; he nominated a successor, installed 30 Sept. 1880.

Jihad, or religious warfare against unbelievers, although inculcated in the Mahometan law, was prohibited by the Sheehs, and only permitted by the Sunnites in some cases; certainly not with any nation with whom they had made a treaty of peace. The jihad was preached by fanatics in India in 1871, and prohibited by government.

Jingo Party, a name given (in 1878) to persons who preferred war with Russia to submission to her aggressive policy. A popular song said—

"We don't want to fight, but, by jingo, if we do.
 We've got the ships, we've got the men, and we've got the money too."

"By jingo" occurs in Jarvis's "Don Quixote," and in the "Vicar of Wakefield."

Joan of Arc, the Maid of Orleans, born at Domremy, imagined that she had a divine commission to expel the English, who, under the earl of Salisbury, were besieging Orleans. Charles VII. entrusted her with the command of some French troops, and she raised the siege, and entered Orleans with supplies, 29 April, 1429; and the English, who were before the place from 12 Oct. preceding, abandoned the enterprise 8 May following. She captured several towns in the possession of the English, whom she defeated in a battle near Patay, 18 June, 1429. She was wounded several times herself, but never shed any blood with her own hand. She was taken at the siege of Compiègne, 25 May, 1430; and, after a trial, burned for a witch at Rouen, 30 May, 1431. A statue of Joan of Arc, the work of the late princess Marie of France, was inaugurated at Orleans, 13 Sept. 1851, and the 435th anniversary of the deliverance of the city was celebrated there on 14 May, 1865; see *Patay*. The anniversary of her death celebrated 30 May, 1878.

Jockey Club, instituted in the reign of George II. (1727-60), is mentioned in Heber's "Racing Calendar," 1758. Rules were made in 1828, afterwards revised; see *Races*.

John Bull, a nickname given to Englishmen, is said to be derived from Dr. Arbuthnot's satire "John Bull," published 1712.—*Brewer*.—"John Bull," a comedy, by George Colman the younger, was performed 1805.—The *John Bull*, a Tory newspaper, supported by Theodore Hook, was first published 1820.

John Doe and Richard Roe, names well known, as standing pledges for the prosecution of suits. In early times real and substantial persons were required to pledge themselves to answer to the crown for an amercement, or fine, set upon the plaintiff, for raising a false accusation, if he brought an action without cause, or failed in it; and in 1285, 13 Edw. I., sheriffs and bailiffs were, before they made deliverance of the distress, to receive pledges for pursuing the suit, and for the return of the property, if return were awarded. But this becoming a matter of

form, the fictitious names of Doe and Roe were used, until the form was declared to be no longer necessary by the Common-law Procedure act, 1852.

John O'Groat's House, an ancient house formerly situated on Duncan's Bay Head, the most northerly point of Great Britain, deriving its name from John of Groat, or Groot, and his brothers, originally from Holland, said to have settled here about 1489.

The house was of an octagon shape, being one room, with eight windows and eight doors, to admit eight members of the family, the heads of different branches of it, to prevent their quarrels for precedence at table. Each came in by this contrivance at his own door, and sat at an octagon table, at which, of course, there was no chief place or head.

THE KNIGHTS OF ST. JOHN (*Johanniterrittler*), a Lutheran order of high rank, founded by Frederick William III. of Prussia, 23 May, 1812, and reorganized 15 Oct. 1852. These knights co-operated with the Knights of St. John of Malta and various other bodies in rendering energetic assistance to the wounded during the Franco-Prussian war, in 1870-1; the chief office being at the ancient gate of the priory of St. John, Clerkenwell, London, E. C.; the duke of Manchester being a prior of the order.

The *St. John Ambulance Association* originated with the order of St. John in 1877; its object is to disseminate practical information respecting first aid to sufferers by accidents, and to register names of persons qualified to act as nurses in time of war; 75 centres have been established in Great Britain, and, independently of these, 70 classes have received instruction. Sir E. A. Lechmere, chairman; John Furley, Esq., director; capt. Perrott, secretary.

John's Gate, St. (St. John's Square, Clerkenwell, London), a fine vestige of monastic building, was the gate of the priory of St. John of Jerusalem (suppressed in 1540), and was the place where the *Gentleman's Magazine* was first published, 6 March, 1731. The house was often visited by Dr. Johnson, Garrick, and their friends. The gate was purchased for the Order of the Knights of St. John by sir Edmund A. H. Lechmere, Bt., secretary of the English league. The first meeting held here 24 June, 1874.

Joint-stock Companies (good and bad) have been very numerous during the present century (especially in 1825, 1846, 1866, and 1872). Many acts have been passed for their regulation; the most important in 1844, 1855, 1857, and 1858. An important act for the incorporation, regulation, and winding-up of trading companies and other associations, passed in 1862, was amended in 1867; see *Companies and Limited Liability*.

Juan Fernandez, an island in the Pacific, named from its discoverer in 1567. Alexander Selkirk, a native of Scotland, left on shore here by his captain in Nov. 1704, and lived alone till he was discovered by capt. Rogers in 1709. He died lieutenant of H.M.S. *Weymouth*, 1723. A monument to his memory was erected on the island in 1868, then colonized by Germans. From his narrative De Foe is said to have derived his *Adventures of Robinson Crusoe*, first published in 1719.

Juan, San, a small island near Vancouver's Island. The possession of this island, on account of its commanding the straits between British Columbia and the United States territories, led to disputes between the two countries, owing to the doubtful interpretation of the treaty of Washington respecting the boundaries, 12 June, 1846; see *United States*, 1859 and 1860. The matter (by the treaty of Washington, 8 May, 1871) was referred for arbitration to the emperor of Germany, who decided in favor of the United States, Oct. 1872. The isle was evacuated by the British 22 Nov. following.

Jubilees. The Jews were commanded to celebrate a jubilee every fifty years, 1491 B.C. (Lev. xxv. 8). Among the Christians a jubilee every century was instituted by pope Boniface VIII. in the year 1300. It was ordered to be celebrated every fifty years by pope Clement VI.; and by Urban VI. every thirty-third year; and by Sixtus V. every twenty-fifth year.

Juggernaut, or "Lord of the World," one of the incarnations of Krishna, is an idol formed of an irregular pyramidal black stone, with two rich diamonds to represent eyes, the nose and mouth are painted vermilion. The number of pilgrims that visit the god is stated at 1,200,000 annually. Formerly some were crushed by the wheels of the car (so lately as Aug. 1864); a great many never returned, and, to the distance of fifty miles, the way was strewn with human bones. The temple of Juggernaut has existed about 800 years. The state allowance to the temple was suspended by the Indian government in June, 1851. The festival was kept, June, 1872. Twelve persons were said to be killed by accident, Aug. 1873. The festival of 1878 reported a failure.

Jugurthine War. Jugurtha murdered his cousin, Hiempsal, king of Numidia, and usurped his throne, 118 B.C. He gave Adherbal a share in the government, but killed him in 112. He then provoked the Romans to war. Cæcilius Metellus was first sent against him, and defeated him in two battles; and Marius brought him in chains to Rome to adorn his triumph, 106 B.C., where he was put to death in 104. This war has been immortalized by the pen of Sallust.

Julian Period (by Joseph Scaliger, about 1583), a term of years produced by the multiplication of the lunar cycle 19, solar cycle 28, and Roman indiction 15. It consists of 7980 years, and began 4713 years before our era. It has been employed in computing time to avoid the ambiguity attendant on reckoning any period antecedent to our era, an advantage in common with the mundane eras used at different times. By subtracting 4713 from the Julian period, our era is found; if before Christ, subtract the Julian period from 4714. For *Julian era*, see *Calendar* and *Year*.

Juliers, a Prussian province; made a duchy in 1356; became the subject of contention on the extinction of the ruling family in 1609; was allotted to Neuburg in 1659; seized by the French in 1794; and ceded to Prussia in 1815.

July, the seventh, originally fifth, Roman month, named by Marc Antony from *Julius Cæsar*, the dictator of Rome, who was born in it.

June, the sixth month, owes its name to *Junius*, which some derive from *Juno*, and others from *Juniores*, this being the month for the young, as May was for aged persons. Ovid, in his "Fasti," introduces Juno as claiming this month.

Junius's Letters began in the *Public Advertiser*, 21 Jan. 1769.

They have been ascribed to Mr. Burke, Mr. William Gerard Hamilton, commonly called Single-speech Hamilton, John Wilkes, Mr. Dunning (afterwards lord Ashburton), sergeant Adair, the rev. J. Rosenbagen, John Roberts, Charles Lloyd, Samuel Dyer, gen. Lee, the duke of Portland, Hugh Boyd, lord George Sackville, and sir Philip Francis. The last named is generally considered to have been the author. Junius said, "I am the depository of my own secret, and it shall perish with me." The work of Mr. Chabot and hon. E. T. B. Twissleton was considered decisive of sir Philip Francis being Junius, May, 1871.

Junker Party (*Junker*, German for *young noble*), a term applied to the aristocratic party in Prussia, which came into power under Otho von Bismarck-Schönhausen, appointed prime-minister, 9 Oct. 1862. Their political organ is the *Kreuz-Zeitung*.

Juno, the planet discovered by M. Harding, of Lilienthal, near Bremen, 1 Sept. 1804. Its distance from the sun is 254 millions of miles, and it accomplishes its revolution in four years and 128 days, at the rate of nearly 42,000 miles an hour. Its diameter is estimated by German astronomers at 1424 English miles.

Junta. The Spanish provincial juntas, or councils, declared against the French in 1808, and incited the people to insurrection.

Jupiter, known as a planet to the Chaldeans, it is said, 3000 B.C. The discovery of the satellites, incorrectly attributed to Simon Mayr (Marius) in 1609, was made by Galileo on 8 Jan. 1610; see *Planets*. Jupiter's moons were all invisible on 21 Aug. 1867; a very rare occurrence.—**JUPITER AMMON'S** temple in Libya was visited by Alexander, 332 B.C. Cambyses's army sent against it perished miserably, 525 B.C. The Greek Zeus was the Roman Jupiter.

Juridical Society was established in Feb. 1855, and opened with an address by sir R. Bethell on 12 May following.

Juries. Trial by jury was introduced into England during the Saxon heptarchy, mention being made of six Welsh and six Anglo-Saxon freemen appointed to try causes between the English and Welsh men of property, and made responsible, with their whole estates, real and personal, for false verdicts.—*Lambard*. By most authorities their institution is ascribed to Alfred about 886. In *Magna Charta*, juries are insisted on as the great bulwark of the people's liberty. When either party is an alien born, the jury shall be one half denizens, and the other half aliens, stat. 28 Edw. III. 1353. By the common-law a prisoner upon indictment or appeal might challenge peremptorily thirty-five, being under three juries; but a lord of parliament, and a peer of the realm, who is to be tried by his peers, cannot challenge any of his peers. An act for the trial by jury in civil cases in Scotland was passed in 1815. An act to consolidate and amend the laws relating to juries in Ireland was passed 4 Will. IV. 1833. A new act respecting juries, regulating their payment, etc., was passed 9 Aug. 1870. The clause respecting their payment was rescinded by act passed 28 Feb. 1871. Laws respecting juries in Ireland amended, 14 Aug. 1871. New Juries bill brought in by the attorney-general, sir John Coleridge, Feb. 1873. Juries are summoned to assist the coroner in investigating the causes of sudden or violent death.—**GRAND JURIES** (of not less than 12 or more than 23 persons) decide whether sufficient evidence is ad-

duced to put the accused on trial. The constitution of 1791 established the trial by jury in France. An imperial decree abolished trial by jury throughout the Austrian empire, 15 Jan. 1852. Trial by jury began in Russia, 8 Aug. 1866. A true bill for libel granted against alderman sir F. Truscott in his absence, who was honorably acquitted, 18 Sept. 1879.

CORRECTION OF JURIES.—It is said that in early times the suits used to feed the jury empannelled in their action, and hence arose the common-law of denying sustenance to a jury after the hearing of the evidence. A jury may be detained during the pleasure of the judge if they cannot agree upon a verdict; and may be confined without meat, drink, or fire, candle-light excepted, till they are unanimous. Some jurors have been fined for having fruit in their pockets when they were withdrawn to consider of their verdict, though they did not eat it.—*Leon Dyer*, 137. A jury at Sudbury not being able to agree, and having been some time under duress, forcibly broke from the court where they were locked up, and went home, 9 Oct. 1791.—*Phillips*. In Scotland, Guernsey, Jersey, and France, juries decide by a majority; in France, since 1831, a majority of two thirds is required.

"Juste Milieu," according to Louis Philippe (in 1830), is the only principle of government which can secure the welfare of France.

Justices, Lords, were appointed by English sovereigns to govern during their absence; especially by William III., and George I. and II. (1695-1760). George III. never left England. In Sept. 1821, when George IV. went to Hanover, lords justices were appointed, the duke of York being the first. No such appointment has been made during the present reign, it having been decided by the law authorities in 1843 to be unnecessary when the queen went to France. Ireland was sometimes temporarily ruled by lords justices.—Two lords justices of the court of appeal in chancery, having rank next after the chief baron of the exchequer, were appointed from 1 Oct. 1851, salary 6000*l*. For recent changes see *Court of Judicature and Appeal*.

Justices of the Peace are unpaid local magistrates, invested with extensive powers in minor cases, but subject to supersession and punishment by the King's Bench for an abuse of their authority. They were first nominated by William I. in 1076.—*Stor*. Persons termed conservators of the peace in each county were appointed by 1 Edw. III. c. 2, 1327; and their duties were defined in 1360. The form of a commission of the peace settled by the judges, 23 Eliz. 1580.—*Hawkins*. See *Eyre*.

Justiciars. In ancient times the kings of England used to hear and determine causes; but it is declared by law that if the king cannot determine every controversy, he, to ease himself, may divide the labor among persons, men of wisdom and fearing God, and out of such to appoint judges. The Saxon kings of England appointed a judge after this manner, who was, in fact, the king's deputy. After the Norman conquest, the person invested with that power had the style of *Capitalis Justiciarius*, or *Justiciarius Angliæ*. These judges continued until the erection of the courts of King's Bench and the Common Pleas. The first justiciars of England were Odo, bishop of Bayeux, and William Fitz-Osborne, in 1067; and the last was Philip Basset, in 1261, or Hugh le Despencer, 1263 (Henry III.). Authorities vary.

Justinian Code compiled by a commission appointed by the emperor Justinian I. Feb. 528, wherein was written what may be termed the statute law (scattered through 2000 volumes reduced to fifty). It was promulgated April, 529. To this code Justinian added the Digest or Pandects, the Institutes, and Novels, promulgated 16 Nov. 534. These compilations have since been called, collectively, the Body of Civil Law (*Corpus Juris Civilis*).

Jute, the fibres of two plants, the chonch and isbund (*Corchorus olitorius* and *Corchorus capsularis*), since 1830 extensively cultivated in Bengal for making gunny-cloth, etc. Jute has been much manufactured at Dundee as a substitute for flax, tow, etc., and in July,

1862, assertions were made that it could be employed as a substitute for cotton. In 1853, 275,578 cwt.; in 1861, 904,092 cwt.; in 1871, 8,454,120 cwt.; in 1874, 4,270,164 cwt.; in 1875, 3,416,617 cwt.; in 1877, 3,649,877 cwt. of undressed jute were imported into the United Kingdom.

Jutland (Denmark), the home of the Jutes who settled in our southern counties. South Jutland was taken by the allies in 1813, and restored in 1814.

Juvenile Offenders. In 1838 an act was passed for instituting a prison for instructing and correcting juvenile offenders, and the military hospital at Parkhurst in the Isle of Wight was appropriated for this purpose. An act for their committal to reformatories was passed in 1854.

Kagosima, see *Japan*, 1863.

Kainardji (Bulgaria). Here a treaty was signed, July, 1774, between the Turks and Russians, which opened the Black Sea and gave the Crimea to the latter.

Kalafat, on the Danube, opposite the fortress of Widdin. This place was fortified by the Turks under Omar Pacha when they crossed the river, 28 Oct. 1853. In December, prince Gortschakoff, with the Russian

army, determined to storm their intrenchments. The conflict lasted from 31 Dec. to 9 Jan. 1854, when the Russians were compelled to retire. Among these conflicts one occurred at Citate, 6 Jan.; see *Citate*. Kalafat was invested 28 Jan., and gen. Schilders attacked it vigorously on 19 April without success, and the blockade was raised 21 April.

Kalakh, ancient capital of middle Assyria; where many discoveries have been made by Layard and others; see *Assyria*.

Kaleidoscope, an optical instrument, which, by an arrangement of mirrors, produces a symmetrical reflection of various transparent substances placed between, was invented by Dr. (afterwards sir David) Brewster of Edinburgh; it was suggested in 1814 and perfected in 1817; see *Debusscope*.

Kamptulicon, a substance used for flooring, patented by Elijah Galloway in 1843, and manufactured since 1851 by Messrs. Tayler, Harvey, & Co. It is composed of India-rubber and cork, combined by masticating machines.

Kamtschatka, a peninsula, E. coast of Asia, was discovered by Morosco, a Cossack chief, 1690; taken possession of by Russia in 1697; and proved to be a peninsula by Behring in 1728. Four months, commencing at our midsummer, may be considered as the spring, summer, and autumn here, the rest of the year being winter. The amiable capt. Clarke, a companion of capt. Cook, died in sight of Kamtschatka, 22 Aug. 1779, and was buried in the town of St. Peter and Paul, in the peninsula.

Kandahar, see *Candahar*.

Kangaroos, animals indigenous to Australia (first seen by capt. Cook, 22 June, 1770), were bred at San Donato, the estate of prince Demidoff, in 1853, and since.

Kansas, a western state of the United States, organized as a territory 30 May, 1854; admitted into the Union 29 Jan. 1861. During the greater part of 1855 et seq. this state was a scene of anarchy and bloodshed

through fruitless efforts to make it a slave state; see *Slavery in America*.

Karaites (or **READERS**), the Protestants of Judaism, a remnant of the Sadducees, formed into a sect by Anan-ben-David in the eighth century. They profess adherence to the Scriptures alone, and reject the Talmud and Rabbinical traditions. They still exist in Turkey, Poland, the Crimea, and other parts of the East. Their name is of uncertain origin.

Karrack, see *Currack*.

Kars, a town in Asiatic Turkey, captured by the Russians under Paskiewich, 15 July, 1828, after three days' conflict. In 1855 it was defended by gen. Fenwick Williams, with 15,000 men, and with three months' provisions and three days' ammunition, against the Russian general Mouravieff, with an army of 40,000 infantry and 10,000 cavalry. The siege lasted from 18 June to 28 Nov. 1855. The sufferings of the garrison were very great from cholera and want of food. The Russians made a grand assault on 29 Sept., but were repulsed with the loss of above 6000 men, and the garrison were overcome by famine alone.—*Sandwith*. Kars was restored to Turkey, Aug. 1856.

On accepting gen. Williams's proposal for surrendering, gen. Mouravieff said: "Gen. Williams, you have made yourself a name in history; and posterity will stand amazed at the endurance, the courage, and the discipline which this siege has called forth in the remains of an army. Let us arrange a capitulation that will satisfy the demands of war, without disgracing humanity." In 1856 the general was made a baronet, with the title of sir William Fenwick Williams of Kars, and granted a pension.

The Russians besieging Kars compelled to retire by Mukhtar Pacha. . . . about 13 July, 1877

The first stone of the building was laid by the archbishop of Canterbury, 25 April, 1868; the building was dedicated 23 June, 1870; the chapel, the gift of William Gibbs, was dedicated and the library opened 25 April, 1876.

Keeper of the King's Conscience. The early chancellors were priests, and out of their supposed moral

control of the king's mind grew the idea of an equity court in contradistinction to the law courts. A bill in chancery is a petition through the lord chancellor to the king's conscience for remedy in matters for which the king's common-law courts afford no redress. The keeper of the king's conscience is therefore now the officer who presides in the court of chancery; see *Chancellor* and *Lord Keeper*.

Keeper (Lord) of the Great Seal of England differed only from the lord chancellor in that the latter had letters-patent, whereas the lord keeper had none. Richard, a chaplain, was the first keeper under Ranulph, in 1116. The two offices were made one by 5 Eliz. 1562.—*Cowell*. See *Chancellor*.—The office of lord keeper of the great seal of SCOTLAND was established in 1708, after the Union.

Kenilworth Castle (Warwickshire) was built about 1120, by Geoffrey de Clinton, whose grandson sold it to Henry III. It was enlarged and fortified by Simon de Montfort, to whom Henry gave it as a marriage portion with his sister Eleanor. Queen Elizabeth conferred it on her favorite, Dudley, earl of Leicester. His entertainment of the queen commenced 19 July, 1575, and cost the earl daily 1000*l.*

After the battle of Evesham and defeat and death of Simon de Montfort, by prince Edward (afterwards Edward I.), 1265, Montfort's younger son, Simon, shut himself up in Kenilworth castle, which sustained a siege for six months against the royal forces of Henry III., to whom it at length surrendered. Upon this occasion was issued the "Dictum de Kenilworth," or "ban of Kenilworth," enacting that all who had borne arms against the king should pay him the value of their lands for periods varying from 7 years to 6 months.

Kennington Common (Surrey). The Chartist demonstration, 10 April, 1848, took place on the common. It was directed to be laid out as a public pleasure-ground in 1852.

Kherson, an ancient Dorian colony (deriving its name from Chersonesus, a peninsula), came under the sway of the great Mithridates about 120 B.C.; and afterwards of that of Rome, A.D. 30. It continued important, and its possession was long disputed by the Russians and Greeks. Justinian II. cruelly treated it. It was taken by Vladimir, grand-duke of Russia in 988, when he and his army received Christian baptism, and he married the emperor's sister Anne, who obtained Kherson as her dowry. The city was destroyed by the Lithuanians; and the Turks found it deserted when they took possession of the Crimea in 1475. What ancient

remains the Turks and Tartars had spared, the Russians conveyed away for the construction of Sebastopol.

Kherson, a Russian city on the Dnieper, founded 1778. Potemkin, the favorite of Catherine, who died at Jassy in 1791, is buried here, and John Howard, the English philanthropist, who died here, 20 Jan. 1790, is buried about three miles from the town, where an obelisk has been erected to his memory by the czar Alexander I.

Kiel, chief town of Holstein, a seaport, and a member of the Hansatic league in 1300. The university was founded in 1665. By a treaty between Great Britain, Sweden, and Denmark, signed here 14 Jan. 1814, Norway was ceded to Sweden; see *Norway*. An extraordinary assembly of the revolted provinces, Schleswig and Holstein, met here 9 Sept. 1850. By the convention of Gastein between Austria and Prussia, 14 Aug. 1865, the former was to govern Holstein, but Kiel to be

held by Prussia as a German federal port. This was annulled in 1866 by the issue of the war.

Kilcullen (Kildare). Here a large body of the insurgent Irish defeated the British forces commanded by gen. Dundas, 23 May, 1798. The general, in a subsequent engagement, overthrew the rebels near Kilcullen bridge, when 300 were slain.

Kildare (E. Ireland). The Curragh, or race-course, here was once a forest of oaks. Here was the nunnery of St. Bridget, founded by her in the fifth century, and here was a building called the fire-house, where, it is supposed, the nuns kept the inextinguishable fire which existed till the Reformation. The see was one of the earliest episcopal foundations in Ireland; St. Conlath, who died 519, the first prelate. The first Protestant bishop was Thomas Lancaster, in 1550. The see is valued, by an extent returned 39 Hen. VIII., at 69*l*. 11*s*. 4*d*. Irish per year. Kildare was united to Dublin in 1846; see *Dublin*. The insurrection in Kildare, which swelled into the rebellion, commenced 23 May, 1798. On that night, lieut. Gifford of Dublin and a number of other gentlemen were murdered by insurgents. This rebellion was quelled in 1799. The Curragh is now a military camp.

Kilfenora (Clare), a bishopric, said to have been founded by St. Fachnan. Cardinal Paparo, in 1152, rendered it a suffragan see to Cashel, but in 1660 it was annexed to Tuam, and to Killaloe in 1752.

Kilkenny (S.E. Ireland), an English settlement about 1170. The castle was built 1195, by Wm. Marshall, earl of Pembroke. At the parliament held here by Lionel, duke of Clarence, 1367, the statute of Kilkenny was passed.* After a siege, the town surrendered to Cromwell, 28 March, 1650, on honorable terms.

Killala (Mayo) was invaded by a French force, landing from three frigates, under gen. Humbert, 22 Aug. 1798. The invaders were joined by the Irish insurgents, and the battles of Castlebar and Coloneoy followed; and the French were defeated at Ballynamuck, 8 Sept. same year.

Killala (Sligo), an early see. The author of the Tripartite life of St. Patrick says that "in 434 he came to a pleasant place where the river Muadas (Moy) empties itself into the ocean; and on the south banks of the said river he built a noble church called Kil-Aladh, of which he made one of his disciples, Muredach, the first bishop." The see of Achonry was united to Killala in the seventeenth century; and both were united to Tuam in 1839; see *Tuam* and *Bishops*.

Killaloe (Clare), a see supposed to have been founded by St. Molua, whose disciple, St. Flannan, son to king Theodoric, consecrated at Rome by John IV. in 639, was also bishop. At the close of the twelfth century, Roscrea was annexed to Killaloe, and Kilfenora has been held with it. Cloufent and Kilmacduach were united to them in 1836.

Killiecrankie (a defile in Perthshire). Here the forces of William III., commanded by gen. Mackay, were defeated by the adherents of James II. under Graham of Claverhouse, viscount Dundee, who fell in the moment of victory, 17 or 27 July, 1689.

Kilmacduach (Galway). This see was held with Cloufent, from 1602. St. Coleman was its first bishop, in the seventh century. It was valued, 29 Eliz., 1586, at 13*l*. 6*s*. 8*d*. per annum. It is united to Killaloe.

Kilmalmain Hospital (Dublin), the noble asylum of aged and disabled soldiers in Ireland, built by

Wren, was founded by Arthur, earl of Granard, marshal-general of the army in Ireland, 1675; and the duke of Ormond perfected the plan in 1679.

Kilmallock (Limerick). An abbey was founded here by St. Mochoallóg, or Molach, about 645, and an abbey of Dominicans was built in the thirteenth century.—*Warr*. A charter was granted to Kilmallock by Edward VI., and another by Elizabeth in 1584. The town was invested by the Irish forces in 1598, but the siege was raised by the earl of Ormond. There was much fighting here in 1641 and 1642; see *Fenians*, March, 1867.

Kilmore (Armagh), an ancient town, whose bishops were sometimes called Brefinenses, from Brefney, and sometimes Triburnenses, from Triburna, a village; but, in 1454, the bishop of Triburna, by assent of pope Nicholas V., erected the parish church of St. Fedleimid into a cathedral. Florence O'Connacy, the first bishop, died in 1231. Valued, 15 Jas. I., with Ardagh, at 100*l*. per annum. The joint see of Elphin and Ardagh was united to it in 1841.

Kilsyth (central Scotland). Here Montrose defeated the Covenanters, 15 Aug. 1645, and threatened Glasgow.

Kimberley's Act, see under *Crime*.

Kimberidge Clay. Rev. H. Moule announced his successful use of this clay for fuel and gas-making, March, 1874; practicability doubted.

Kinburn, a fort, at the confluence of the rivers Bug and Dnieper. Here Suwarrow defeated the Turks, 28 June, 1788. Kinburn was taken by the English and French, 17 Oct. 1855. Three floating French batteries, said to be the invention of the emperor, on the principle of horizontal shell-firing, were very effective. On the 18th the Russians blew up Oczakoff, a fort opposite.

Kinder-garten (children's garden), a system of education devised by Froebel, but practically carried out by Mr. and Mrs. Ronge, in Germany, in 1849, and in England in 1851. The system, founded mainly on self-tuition, and enlivened by toys, games, and singing, is set forth in Ronge's "Kinder-garten," published in 1858; and has been partially adopted in English schools. The Froebel Society established 1874.

King Philip's War. Philip, son of Massasoit, the friend of the Pilgrim fathers at New Plymouth, New England, was induced by real and imaginary wrongs to make war upon the European settlers in order to exterminate them. His home was at Mount Hope, R. I. He struck his first blow at Swansea on the 4th of July, 1675. The white settlers sprang to arms. Philip ordered other New England tribes to join him, and during the remainder of that year and the spring of 1676, there was alarm and bloodshed in nearly all the more remote New England settlements. The Indians were finally subdued; Philip was chased from one hiding-place to another; and finally, in 1676, he was shot in a swamp by a faithless Indian. His head was carried in triumph to Plymouth, and his little son, the last survivor of his family, was sold for a bond-slave in Bermuda.

King-of-arms: three for England—Garter, Clarenceux, and Norroy; Lyon king-at-arms for Scotland, and Ulster for Ireland. These offices are very ancient: Clarenceux is so named from Lionel, third son of Edward III., the sovereign who founded the order of the Garter; see *Garter*. Lionel having by his wife the honor of Clare, was made duke of Clarence; which dukedom afterwards escheating to Edward IV., he revived the office of Clarence king-at-arms. The office of Bath king-of-arms, created in 1725, was changed to Gloucester king-of-arms, 14 June, 1726. Ulster was substituted, it is said, in lieu of Ireland king-of-arms, by Edward VI., 1553; but the monarch himself named it as a new institution.

King's Advocate, see *Queen's*.

King's Bench, or **QUEEN'S BENCH,** COURT OF, obtained its name from the king sometimes sitting here on a high bench, and the judges, to whom the judicature belongs in his absence, on a low bench at his feet. This court in ancient times was called *Curia Domini Regis*. The court of queen's bench sat for the last time July, 1875; see *Supreme Court*. Chief-justice Cockburn received the freedom of London, 9 March, 1876; said to be the first case of the kind. The queen's bench division of the high court of justice till 1881 consisted of the chief-justice of England and four judges. The chief-justice of the queen's bench division is now chief-justice of England; the exchequer and common-pleas division were abolished in 1881.

King's Bench Prison (Southwark), near the site of one of the oldest prisons of London, long used for the confinement of debtors. Here, it is said, prince Henry (afterwards Henry V.) was committed by justice Gascoigne. The prison was burned down by the London rioters, 7 June, 1780; see *Gordon's No-Popery Riots*. It was rebuilt in 1781, and contained about 230 rooms. Formerly, the debtors were allowed to purchase the liberties, to enable them to have houses or lodgings without the walls, or to purchase day-rules, to go out of the prison under certain regulations. The rules included St. George's Fields, etc. A consequence of the bankruptcy act, 1861, was the release of many insolvent debtors; and an act was passed in 1862 "for discontinuing the queen's prison and removal of the prisoners to Whitecross street prison." The buildings, used as a military prison, were pulled down and the site sold, 1879-80.

King's Book, or "*Valor Ecclesiasticus temp. Henrici VIII.*," the return of the commissioners appointed in 1534 to value the first-fruits and tenths granted to the king. An edition by John Bacon ("*Liber Regis*") was published in 1780, and it was printed for the Record Commission, 1810-25.

King's Bounty, an annual grant of 1000*l.*, began early in the reign of George III. and continued till 10 George IV. 1829.

King's Colleges, see *Aberdeen and Cambridge*. King's College, London, incorporated 14 Aug. 1829, and opened 8 Oct. 1831. It was incorporated with the university of London in 1837. The hospital was founded in 1839. The dining-hall and kitchen fell in, through drainage, 8 A.M., 6 Dec. 1869; no lives were lost.

King's Counsel, the first under the degree of sergeant was sir Francis Bacon, made so, *honoris causa*, without patent or fee, in 1604, by James I. The first modern king's counsel was sir Francis North, afterwards lord keeper, in 1663.

King's County (Ireland), formed out of confiscated

property, and so named from Philip, king of Spain, the husband of queen Mary of England, in 1556.

King's Cross Market, N. London, opened 7 Aug. 1668; did not succeed.

King's Evil (scrofula), formerly supposed to be cured by the king's touch; the first being Edward the Confessor, in 1058. In the reign of Charles II. 92,107 persons were touched; and, according to Wiseman, the king's physician, they were nearly all cured! Queen Anne officially announced in the *London Gazette*, 12 March, 1712, her intention to touch publicly. The custom was dropped by George I., 1714.

King's Mountain, BATTLE OF. Major Patrick Ferguson was sent by Cornwallis to embody the loyal militia west of the Broad River, in South Carolina. With 1500 of them he was on his way to join the main army, when, on 7 Oct. 1780, while encamped upon a spur of King's Mountain, he was attacked by 1800 federal militia under several colonels, and totally defeated. Shelby, Cleveland, and Campbell were the chief leaders of the federals. Ferguson was killed, and a small monument marks the spot of his burial. 300 of his men were killed or wounded, and about 800 of them made prisoners, with 1500 stand of arms. The Americans lost only 20 men.

King's Speech. The first from the throne is said to have been by Henry I., 1107.

King's Theatre, see *Opera-house*.

Kingsdown's Act, 24 & 25 Vict. c. 114 (1861), relates to wills.

Kingston, the shire town of Ulster county, N. Y., was settled by the Dutch and Huguenots. It is memorable in the United States as the place where the first constitution of the state of New York was framed, in 1777, and the first legislature was convened under it; also as having been wantonly destroyed by a British marauding expedition up the Hudson in the autumn of the same year.

Kingston, Jamaica, was founded in 1693, after the great earthquake in 1692 which destroyed Port Royal; it was constituted a city, 1802. An awful fire here ravaged a vast portion of the town, and consumed 500,000*l.* of property, 8 Feb. 1782; another fire in 1843. The bishopric was established in 1856; see *Jamaica*.

Kingston Trial. The duchess of Kingston was arraigned before the lords in Westminster Hall, on a charge of bigamy, having married first capt. Hervey, afterwards earl of Bristol, and next, during his lifetime, Evelyn Pierrepont, duke of Kingston, 15-22 April, 1776. She was found guilty, but, on pleading the privilege of peerage, the punishment of burning in the hand was remitted, and she was discharged on paying the fees.

Kingstown (Dublin). The harbor here was commenced in June, 1817. The name was changed from Dunleary in compliment to George IV., who here embarked for England at the close of his visit to Ireland, 3 Sept. 1821. The Kingstown railway from Dublin was opened 17 Dec. 1834.

Kissing the hands of great men was a Grecian custom. Kissing was a mode of salutation among the Jews, 1 Sam. x. 1, etc. The "kiss of charity," or "holy kiss," commanded in the Scriptures (Rom. xvi. 16, etc.), was observed by the early Christians, and is still recognized by the Greek church and some others. Kissing the pope's foot (or the cross on his slipper) began with Adrian I. or Leo III. at the close of the eighth century.

Kit-kat Club, of above thirty noblemen and gentlemen, instituted in 1703, to promote the Protestant succession. The duke of Marlborough, sir Richard Walpole, Addison, Steele, and Dr. Garth were members. It took its name from its dining at the house of Christopher Kat, a pastry-cook in King street, Westminster.

Kitt's, see *Christopher's*, St.

Kladderadatsch, the German "Punch," first published in Berlin, by Albert Hoffmann, the proprietor, originally a bookseller's assistant. He amassed a fortune, and died 10 Aug. 1880, aged 62.

Kneeling. The knee was ordered to be bent at the name of Jesus (see Phil. ii. 10), about the year 1275, by the order of the pope. The ceremony of a vassal kneeling to his lord is said to have begun in the eighth century.

Knights. The word knight is derived from the Saxon *Cniht*, a servant (i. e. servant to the king, etc.). The institution of the Roman knights (*Equites* or horsemen, from *equus*, a horse) is ascribed to Romulus, about 750 B.C., when the curiæ elected 300. Knighthood was conferred in England by the priest at the altar, after confession and consecration of the sword, during the Saxon heptarchy. The first knight made by the sovereign with the sword of state was Athelstane, by Alfred, A.D. 900.—*Spelman*. The custom of ecclesiastics conferring the honor of knighthood was suppressed in a synod held at Westminster in 1100.—*Ashmole's Institutes*. All persons having ten pounds yearly income were obliged to be knighted, or pay a fine, 38 Hen. III. 1254.—*Salmon*. On the decline of the empire of Charlemagne, all Europe being reduced to a state of anarchy, the proprietor of every manor became a petty sovereign; his mansion was fortified by a moat, and defended by a guard, and called a castle. Excursions were made by one petty lord against another, and the women and treasure were carried off by the conqueror. At length the owners of rich fiefs associated to repress these marauders, to make property secure, and to protect the ladies, binding themselves to these duties by a solemn vow and the sanction of a religious ceremony. Cervantes' "Don Quixote," a satire on knight-errantry, was published in 1605; see *Runneret*, *Chicubry*, *Tournaments*, *Holy Sepulchre*, *John*, and *Michael*.

FEMALE KNIGHTS. It is said that the first were the women who preserved Tortosa from the Moors in 1149 by their stout resistance. Large immunities were granted to the women and their descendants. Several female orders appear in the previous list. Ladies have been admitted to several male orders.

KNIGHTS OF GLTY AND KERRY, IN IRELAND. The heads of two branches of the family of Fitzgerald, who still enjoy the distinctions bestowed on their ancestors by sovereigns in the thirteenth century. The 19th knight of Kerry died 6 Aug. 1890.

KNIGHTS OF THE SHIRE, OR OF PARLIAMENT. Summoned by the king's writ and chosen by the freeholders, first summoned by Simon de Montfort in 1264, and in a more formal manner 30 Jan. 1264. There are writs extant as far back as 11 Edward I. 1263. The knights are still girded with a sword when elected, as the writ prescribes.

Knights of Labor, see United States, 1879.

Knives. In England, Hallamshire (the country around Sheffield) has been renowned for its cutlery for five centuries. Chaucer speaks of the "Sheffield thwytel." Stow says that Richard Mathews, on the Fleet bridge, was the first Englishman who made *fine* knives, etc., and that he obtained a prohibition of foreign ones, 1663. Clasp or spring knives became common about 1650, coming originally from Flanders.—*Amfscleaving machines* were patented by Mr. George Kent in 1844 and 1852, others have been invented by Masters, Price, etc.; see *Forks*.

Know-Nothings, a society which arose in 1853 in the United States. Their principles were embodied in the following propositions (at New York, 1855). They possessed several newspapers and had much political influence:

1. The Americans shall rule America.
 2. The Union of these States.
 3. No North, no South, no East, no West.
 4. The United States of America—as they are—one and inseparable.
 5. No sectarian interference in our legislation or in the administration of American law.
 6. Hostility to the assumption of the pope through the bishops, etc., in a republic sanctified by Protestant blood.
 7. Thorough reform in the naturalization laws.
 8. Free and liberal educational institutions for all sects and classes, with the Bible, God's holy word, as a universal text book.
- A society was formed in 1866 in opposition to the above, called *Know Nothings*. Both bodies were absorbed into the two parties Democrats and Republicans at the presidential election in Nov. 1866.

Knoxville (Tennessee), SICKER OR. Gen. Burnside, with the army of the Ohio, occupied Knoxville on 3 Sept. 1863. The Confederate general Buckner, upon his advance, evacuated East Tennessee and joined Bragg at Chattanooga. Early in November, gen. Longstreet, with 17,000 men, advanced against Knoxville. On the 14th he crossed the Tennessee. Burnside engaged him on the 16th at Campbell's Station, and repulsed his attacks, thus gaining time for the concentration of his army in Knoxville. Longstreet advanced and laid siege to the town. He made two furious assaults upon the place (18 and 29 Nov.), in both of which he was repulsed. But, in the meantime, Grant had defeated Bragg at Chattanooga, and Sherman, with 25,000 men, was on the way to relieve Knoxville. Longstreet, compelled to raise the siege, retired up the Holston river, but did not entirely abandon East Tennessee until the next spring, when he again joined Lee in Virginia.

Knutsford (Cheshire). The foundation-stone of St. Paul's college for the northern counties here was laid 24 Sept. 1873.

Koh-i-noor, or "Mountain of Light," the East India diamond; see *Diamonds*.

Kolin, or KOLLIN (Bohemia). Here the Austrian

general Daun gained a signal victory over Frederick the Great of Prussia, 16 June, 1757. In commemoration, the military order of Maria Theresa was instituted by the empress-queen.

Köln, see Cologne.

Komorn, or COMORN (Hungary), an ancient fortress town, often taken and retaken during the wars with Turkey. Near it the Hungarians defeated the Austrians, 11 July, 1849, but surrendered the town 1 Oct.

Konish (formerly Iconium). Here the Turkish army was defeated by the pacha of Egypt, after a long, sanguinary fight, 21 Dec. 1692. The grand-vizier was taken prisoner.

Königsrätz (Bohemia). Near here was fought the decisive battle between the Austrians commanded by marshal Benedek, and the Prussians commanded by their king, William I., 3 July, 1866. Prince Frederick Charles halted at Kamenez on Monday, 2 July, his troops commenced their march at midnight, and the first shot was fired about 7.30 A.M. 3 July. The attack began at Sadowa (after which the battle is also named) about 10 o'clock, and a desperate struggle ensued, the result appearing uncertain, till the army of the crown-prince of Prussia arrived about 12.30. When Chlum, which had been taken and lost seven times by the Prussians, was taken for the eighth time, the fate of the day was decided; and the retreat of the Austrians, at first orderly, became a hasty, disastrous flight. About 400,000 men were engaged in this battle, one of the greatest in modern times. The Austrians are said to have lost 174 guns, about 40,000 killed and wounded, and 20,000 prisoners. The Prussians lost about 10,000 men. The victory gave the supremacy in Germany to Prussia, unity to North Germany, and Venice to Italy; and led to the legislative independence of Hungary.

Königsberg, the capital of east Prussia, was founded by the Teutonic Knights in 1255, and became the residence of the grand-master in 1457. It joined the Hanseatic League in 1385. It was ceded to the elector of Brandenburg in 1667, and here Frederick III. was crowned the first king of Prussia in 1701. It was held by the Russians 1758-64, and by the French in 1807. Here king William I. and his queen were crowned, 18 Oct. 1861.

Königsstein Tun (Nassau, Germany), most capacious, was built by Frederick Augustus, king of Poland, in 1725. It was made to hold 233,667 gallons of wine; and on the top, which was raised in, was accommodation for twenty persons to regale themselves. The famous tun of St. Bernard's was said to hold 800 tons; see *Heidelberg Tun*.

Kookas, a warlike reforming sect in N.W. India, founded by Balak Ram about 1845, and after his death, about 1855, headed by Ram Singh, who preached the restoration of the old Sikh religion, which venerated cattle and punished their slaughterer. After several outrages against the Mahometans, an outbreak of the Kookas took place near Ludiana, which was vigorously suppressed, 15 Jan. 1872, by commissioner Cowan, who ordered 49 prisoners to be blown from cannon, 17 Jan. Several others were tried and executed by commissioner Forsyth soon after. For this severity Mr. Cowan was ordered to be dismissed, and Mr. Forsyth removed to another station, April, 1872. The Kooka leaders claim 800,000 followers; but the probable number is about one-tenth.

Koran, or ALKORAN (AL K'URAN), the sacred book of the Mahometans, was written about 610, by Mahomet (who asserted that it had been revealed to him by the angel Gabriel in twenty-three years), and published by Abu-Bekr about 635. Its general aim was to unite the professors of idolatry and the Jews and Christians in the worship of one God (whose unity was the chief point inculcated), under certain laws and ceremonies, exacting obedience to Mahomet as the prophet. The leading article of faith preached in it compounded of an eternal

truth and a necessary fiction—namely, that there is only one God, and that Mahomet is the apostle of God.—*Gibbon*. The Koran was translated into Latin in 1143; into French, 1647; into English by Sale, 1734; and into other European languages, 1763 et seq. It is a rhapsody of 6000 verses, divided into 114 sections; see *Mahometanism*, etc.

Koreish, an Arab tribe which had the charge of the Caaba, or sacred stone of Mecca, and strenuously opposed the pretensions of Mahomet. It was defeated by him and his adherents, 623–30.

Kossova, see *Cossova*.

Kosztá Affair. Martin Kosztá, a Hungarian refugee, when in the United States in 1850, declared his intention of becoming an American citizen, and went through the preliminary forms. In 1853 he visited Smyrna, and on 21 June was seized by a boat's crew of the Austrian brig *Huzzar*. By direction of the American minister at Constantinople, capt. Ingraham, of the American sloop *St. Louis*, demanded his release; but, having heard that the prisoner was to be clandestinely transported to Trieste, he demanded his surrender by a certain time, and prepared to attack the Austrian vessel on 2 July; Kosztá was then given up. On 1 Aug., the Austrian government protested against these proceedings in a circular addressed to the European courts, but eventually a compromise was effected, and Kosztá returned to the United States.

Koyunjik, the site of the ancient Nineveh (*which see*).

Kraal, a Dutch name for a South African village; see *Zululand*.

Krasnoi (central Russia). Here the French defeated the Russians, 15 Aug. 1812; and here they were themselves defeated after a series of conflicts, 14–18 Nov. following.

Kreasote, see *Creasote*.

Kremlin, a palace at Moscow, built by Demetri, grand-duke of Russia, about 1376. It was burned down in Sept. 1812, and rebuilt in 1816; partly burned about 23 July, 1879.

Kriegsspiel, see under *War*.

Kromschroder Gas, a new hydrocarbon (air saturated with petroleum spirit), was tried in May, 1873, at Great Marlow, for street-lighting, and reported successful. The gas was said to be cheap and quickly generated, the combustion giving a brilliant white smokeless light.

Kroumirs, see *Tunis*.

Krupp's CAST-STEEL FACTORY, Essen, Rhenish Prussia, established 1810. About 10,500 men employed, exclusive of about 5000 miners and others (1876).

Kryptograph, see *Cryptograph*.

Ku-Klux-Klan, the name of a secret society in the southern states of the United States, bitterly opposed to the exercise of the electoral franchise by the negroes. Early in 1868, this society issued lists of proscribed persons, who, if they did not quit the country after warning, became liable to assassination. Gen. Grant endeavored to suppress this society in April. Its repression by the militia in Arkansas was ordered, Nov. 1868, and it became the subject of legislation at Washington, June, 1871, under which many persons were tried and convicted for lawless outrages and murders. The Ku-Klux outrages were generally committed at night, the men being masked and even their horses being disguised. The vigorous prosecution of Ku-Klux offenders speedily destroyed the organization.

Kuldja, a revolted province of China; was seized by Russia in 1871, and restored by treaty in 1879.

Kulturkampf, the conflict in Prussia respecting worship; see *Prussia*, 1873 et seq.

Kunnersdorf, BATTLE OF, see *Cunnersdorf*.

Kunobitza, in the Balkan. Here John Hunniades, the Hungarian, defeated the Turks, 24 Dec. 1443.

Kurdistan, Western Asia (the ancient Assyria), subject partly to Turkey and Persia. In Oct. 1880, the Kurds, savage tribes, nominal Mahometans, invaded and ravaged Persia, and were subdued after fierce conflicts with their chief, Obeid-ullah, a Turkish sheik, Nov., Dec. 1880. It was stated in June, 1881, that he had surrendered.

Kurrachee, a flourishing port in N.W. India, was taken by the British, 3 Feb. 1839.

Kushk-i-Nakhud, see *Maiwand*.

Kustrin, or *Custrin* (Prussia), a fortified town, besieged and burned by the Russians, 22 Aug. 1758; taken by the French in 1806; given up, 1814.

Kyrle Society (named after John Kyrle, who died 1724, extolled by Pope as the Man of Ross), started by Misses Miranda and Octavia Hill in 1875, and founded in 1877 by prince Leopold, princess Louise, the duke of Westminster, and others, with the object of "bringing beauty home to the people" by means of decorative art, gardening, music, etc. First public meeting held 27 Jan. 1881.

L.

Labarum, see *Standards*.

Laboratory. The Royal Institution laboratory, the first of any importance in London, was established in 1800, and rebuilt 1872. In it were made the discoveries of Davy, Faraday, Tyndall, and Frankland; see *Royal Institution*. The Royal Laboratory, Woolwich Arsenal, was reorganized in 1855.

Laborers, STATUTE OF, regulating wages, enacted 1349, 1357. A conference of philanthropists on the condition of agricultural laborers was held at Willis's Rooms, Westminster, 28 March, 1868.—LABORING CLASSES Dwelling-house acts, passed 1855, and May, 1866; see *Agriculture*, *Artisans*, and *Working-men*.

Labrador (North America), discovered by Sebastian Cabot, 1497; visited by Corte Real in 1500; made a Moravian missionary station in 1771.

Labuan, an Asiatic island, N.W. Borneo; ceded to the British in 1846, and given up to sir James Brooke in 1848. The bishopric was founded 1855. Governor,

John Pope Hennessy, 1867; sir H. E. Bulwer, 1871; Herbert Taylor Usher, 1875; Chas. Cameron Lees, 1879; see *Borneo*.

Laburnum, *Cytisus Laburnum*, called also the golden chain, was brought to these countries from Hungary, Austria, etc., about 1576.—*Ashe*.

Labyrinth. Four are mentioned: the first, said to have been built by Dædalus, in the island of Crete, to secure the Minotaur, about 1210 B.C.; the second, of Arsinoe, in Egypt, in the isle of Mæris, by Psammeticus, king of that place, about 688 B.C.; the third, at Lemnos, remarkable for its sumptuous pillars, which seems to have been a stalactite grotto; and the fourth, at Clusium, in Italy, erected by Porsenna, king of Etruria, about 520 B.C.—*Pliny*. The labyrinth of Woodstock is connected with the story of Fair Rosamond; see *Rosamond*. The maze at Hampton Court was formed in the sixteenth century.

Lace of very delicate texture was made in France and Flanders in 1320. Its importation into England

was prohibited in 1483; but it was used in the court costume of Elizabeth's reign. Dresden, Valenciennes, Mechlin, and Brussels have long been famous for their fine lace. An ounce weight of Flanders thread has been frequently sold for four pounds in London; and its value, when manufactured, has been increased to forty pounds, ten times the price of standard gold. A framework knitter of Nottingham, named Hammond, is said to have invented a mode of applying his stocking-frame to the manufacture of lace from studying the lace on his wife's cap, about 1768.—*MacCulloch*. So many improvements have been made in this manufacture, particularly by Heathcote (1809, 1817, etc.), Morley and Leaver (1811, etc.), that a piece of lace which about 1809 cost 17*l.* may now be had for 7*s.* (1853).—*Ure*. The process of "gassing," by which cotton lace is said to be made equal to fine linen lace, was invented by Samuel Hall of Basford, near Nottingham. He died in Nov. 1862. Seguin's "*La Dentelle*," *Histoire*," etc., published 1874.

Lacedæmon, or **LACONIA** (*Tzakonia*), see *Sparta*.

La Colle Mills, ATTACK ON, in Lower Canada, not far from Rouse's Point, by 3000 Americans of gen. Wilkinson's division, on 30 March, 1814. The mill was fortified, and garrisoned by 200 British soldiers under major Hancock. The Americans lost 16 killed and 122 wounded, the British loss was 10 killed and 46 wounded.

Lacteals (absorbent vessels connected with digestion) were discovered in a dog by Jasper Asellius of Cremona, 1622, and their termination in the thoracic duct by Pecquet, 1651; see *Lymphatics*.

Ladocœa, in Arcadia. Here Cleomenes III., king of Sparta, defeated the Achæan League, 226 B.C.

Ladrone Isles (N. Pacific), belonging to Spain, discovered by Magellan in 1520. He first touched at the island of Guam. The natives having stolen some of his goods, he named the islands the *Ladrones*, or Thieves. In the seventeenth century they obtained the name of Marianna islands from the queen of Spain.

Lady. The masters and mistresses of manor-houses, in former times, served out bread to the poor weekly, and were therefore called *Lafords* and *Leflurs*; signifying *bread-givers* (from *hlaf*, a loaf): hence Lords and Ladies. Wedgewood considers this fanciful, and derives the words from the Anglo-Saxon *laford*, lord, and *hlæf-dig*, lady.—**LADY-DAY** (March 25), a festival instituted about 350, according to some authorities, and not before the seventh century according to others, see *Annunciation*. The year, which previously began on this day, was ordered to begin on Jan. 1, in France in 1564; and in Scotland, by proclamation, on 17 Dec. 1599; but not in England till 3 Sept. 1752, when the style was altered.

Lady-birds. About 18 Aug. 1869, great flights of these insects alighted on the southeast coasts of England, and advanced inland as far as London. A similar event occurred in 1867.

Laffeldt (Holland). Here marshal Saxe defeated the English, Dutch, and Austrians, 2 July, 1747.

Lagos, in the Bight of Benin (Africa), was assaulted and taken by the boats of a British squadron under commodore Bruce, 26, 27 Dec. 1851. This affair arose out of breaches of a treaty for the suppression of the slave-trade. In 1861 the place was ceded to the British government, and created a settlement: Henry Stanhope Freeman, first governor; see *Gold Coast Colony*.

Lagos Bay (Portugal). Here was fought a battle between admiral Boscawen and the French admiral De la Clue, who lost both his legs in the engagement, and died next day, 17, 18 Aug. 1759. The *Centaure* and *Moderate* were taken, and the *Redoutable* and *Océan* ran on shore and burned; the scattered remains of the French fleet got into Cadiz.

La Hogue (N.W. France), BATTLE OF, 19 May, 1692, when the English and Dutch fleets under admirals Russell and Rooke defeated the French fleet commanded by admiral Tourville. The English burned thirteen of

the enemy's ships, and destroyed eight more, thus preventing a descent upon England.

Lahore (N.W. India) was taken by Baber about 1520, and was long the capital of the Mongol empire. It fell into the power of the Sikhs in 1798. It was occupied by sir Hugh Gough, 22 Feb. 1846, who in March concluded a treaty of peace; see *Durbar*. Visit of the prince of Wales, 18 Jan. 1876.

Laing's Nek, see *Transvaal*, 1881.

Lake Champlain, a long and narrow body of water in northern New York, discovered by Champlain, an eminent French navigator, in 1609. In the French and Indian war, the American war for independence, and the last war between the United States and Great Britain, this lake became the theatre of important events. Upon its western shore stood the fortresses of Ticonderoga and Crown Point, where first the French and English, and then the English and Americans, contested for dominion. On the lake below these fortresses naval engagements between British and American vessels, the latter under gen. Arnold, took place in 1776. In front of Plattsburg British and American vessels had a sharp conflict on 11 Sept. 1814, when the latter were victorious; see *Battle of Plattsburg*, and *Battles, Naval Battles (United States)*.

Lake Dwellings contain relics of the stone, iron, and brass ages. Herodotus (about 450 B.C.) described the Pæonians as living on platforms in Lake Prasias. In 1855 Dr. Keller discovered the remains of lake habitations which had been supported on piles in several Swiss lakes ages ago. His book was published in England in 1866. The artificial fortified islands termed "Crannoges" discovered in some Irish lakes are attributed to the ninth and tenth centuries. They have been frequently used as places of refuge.

Lake Erie. On the shores and waters of this lake great historical events have occurred. Once French expeditions sailed to place missionaries and trading-stations in the West, and military ones at the close of the Indian war, in connection with the important post of Detroit. Along its shore, from Detroit to Buffalo, were stirring scenes during the last war between the United States and Great Britain; and near its western end an important naval engagement took place on 10 Sept. 1813, between an American fleet under commodore Perry and a British fleet under commodore Barclay. The Americans were victorious. Then Perry sent to gen. Harrison his noted despatch, "We have met the enemy, and they are ours!" See *Battles, and Naval Battles (United States)*.

Lake Ontario, the most easterly of the chain of great American lakes. Its shores and waters were the scenes of engagements between the Americans and British during the last war between the United States and Great Britain, in 1812-14; see *York, Sackett's Harbor, Oswego, Sandy Creek, Fort Niagara, and Naval Battles (United States)*.

Lake Poets, a term applied to Wordsworth (1770-1850), Coleridge (1772-1834), and Southey (1774-1843), from their residence in the neighborhood of the lakes of Westmoreland.

Lake Regillus (Italy), where, tradition states, the Romans defeated the Latin auxiliaries of the expelled Tarquins, about 499 B.C.

Lamaism, the religion of Mongolia and Thibet (dating about 1357), is a corrupt form of Buddhism (*which see*).

Lambeth Palace. A considerable portion was built early in the thirteenth century by Hubert Walter, archbishop of Canterbury. The tower of the church was erected about 1375, and other parts of the edifice in the fifteenth century. Simon of Sudbury, archbishop of Canterbury, was killed here by the followers of Wat Tyler, who attacked the palace, burned the furniture and books, and destroyed the registers and public papers, 14 June, 1381. The domestic portion of the palace was

greatly enlarged for archbishop Howley (who died 1846) by Mr. Blore, at an expense of 52,000*l*. The palace was reopened after restoration, Oct. 1873; see *Cathedral, Articles*, and *Pro-Anglican Synod*. Lambeth bridge was freed from toll 24 May, 1879.

Lamian War, 323 a.c., between Athens and her allies (excited by Demosthenes, the orator), and Antipater, governor of Macedonia. Antipater fled to Lamsia, in Thessaly, and was there besieged. He escaped thence and defeated his adversaries at Crannon, 323 a.c.

Lammas-day, the 1st of August, one of our four cross quarter-days of the year. Whitsunide was the first, Lammas the second, Martinmas the third, and Candlemas the last; and such partition of the year was once equally common with the present divisions of Lady-day, Midsummer, Michaelmas, and Christmas. Some rents are yet payable at each of these quarterly days in England, and very generally in Scotland. *Lammas* probably comes from the Saxon *lammæsse*, loaf mass, because formerly upon that day our ancestors offered bread made of new wheat. Anciently, those tenants that held lands of the cathedral church of York were by tenure to bring a lamb alive into church at high-mass.

Lampeter College (Cardiganshire) was founded by bishop Burgess in 1522, and incorporated 1528. Henry James Prince, founder of the Agapemous (which see), was one of the revivalist Lampeter Brotherhood instituted among the students here about 1836.

Lamps. The earthen lamp of Epictetus the philosopher sold after his death for 3000 drachmas. Lamps with horn sides said to be the invention of Alfred. London streets were first lighted with oil-lamps in 1661, and with gas-lamps in 1814. A lamp "constructed to produce neither smoke nor smell, and to give considerably more light than any lamp hitherto known," was patented by M. Aimé Argand in 1784, and was brought into general use in England early in the present century. On his principle are founded the lamps invented by Carcel about 1803, and since 1825 the moderator lamps of Lavoisier, Haidrot, and Neuburger; see *Safety-lamp*. Paraffine oil and naphtha spirit are now much used in lamps.

Lanark (W. Scotland) was a Roman station, and made a royal burgh 1103.

Lancashire was created a county palatine by Edward III. for his son John of Gaunt, who had married the daughter of Henry, first duke of Lancaster, in 1359, and succeeded him in 1361. The court of the duchy chamber of Lancaster was instituted in 1376. On the accession of Henry IV., in 1399, the duchy merged into the crown. Net revenue to the queen in 1806, 25,000*l*.; total receipts, 42,545*l*.; see *Cotton*.

Lancaster, supposed to have been the *Ad Alramen* of the Romans. Lancaster was granted by William I. or II. to Roger de Pontou, who erected a castle upon its hill. It was taken by the Jacobites, Nov. 1718, and Nov. 1745. It was disfranchised for bribery by the Reform act of 1867.

Lancasterian Schools, based on a system of education by means of mutual instruction, devised by Joseph Lancaster about 1796, were not much patronized till about 1808. The system led to the formation of the British and Foreign School Society in 1805, whose schools are unsectarian, and use the Bible as the only means of religious instruction. Lancaster was accidentally killed at New York in 1838.

Lancasterians, see *Ross*.

Lancera, see *Regiments*.

"**Lancet**," a weekly medical journal, established and edited by Thomas Wakley, surgeon (afterwards coroner for Middlesex and M.P. for Finsbury), first published 5 Oct. 1823. An injunction obtained by Mr. Abernethy against the publication of his lectures in the *Lancet* was dissolved by the lord chancellor in 1825. Mr. Wakley died 16 May, 1862. The proprietors of the *Lancet* have

at various times employed medical men as commissioners of inquiry. The reports of the Analytical Sanitary commission of the *Lancet* in 1861-4 were published by Dr. A. H. Hamall, as "Food and its Adulterations," in 1855. The *Lancet* commissioners (three physicians) inquired into the state of workhouse infirmaries in London, 1865, and in the country, 1867.

Land is said to have been let generally in England for 1*l*. per acre, 36 Hen. VIII, 1544. The whole rental of the kingdom was about 6,000,000*l*. in 1600; about 14,000,000*l*. in 1688. In 1798 Mr. Pitt proposed his income-tax of 10 per cent. on an estimate of 100 millions, taking the rent of land at 50 millions, that of houses at 10 millions, and the profits of trade at 40 millions; but in his estimate were exempted much land and the inferior class of houses. The rental of the United Kingdom was estimated at 59,500,000*l*. in 1851. An act for rendering the transfer of land more easy was passed in 1602; see *Agriculture, Domesday (Old and New)*.

A species of *land tax* was exacted in England in the tenth century which produced 82,000*l*. (see *Domesday*) in . . . 1018
Land banks were proposed by Yarranton in . . . 1690
The *land tax* grew out of a subsidy scheme of 4*l*. in the pound (which produced 800,000*l*. in 1697) imposed . . . 1699
Ministers were left in a minority in the house of commons on the *Land tax bill* in 1767, it being the first instance of the kind on a money bill since the Revolution. Its rate varied in different years from 1*l*. to 4*l*. in the pound.

Mr. Pitt made the tax perpetual at 4*l*. in the pound, but introduced his plan for its redemption . . . 3 April, 1798
The tax in 1810 produced 1,618,357*l*. in 1820, 1,308,450*l*.; in 1830, 1,422,610*l*.; in 1840, 1,290,822*l*.; in 1850, 1,151,612*l*.; in year 1872-3, 1,108,224*l*.; in 1878-9, 1,080,177*l*. From the Revolution to the year 1800, the land tax had yielded 227,000,000*l*.

Land tax and house duty (to 31 March). in 1878, 2,668,000*l*.; 1879, 2,696,000*l*.; 1877, 2,872,000*l*.; 1876, 2,976,000*l*.; 1870, 1,075,811*l*. (land tax only).

Land Allotments. Lord Greybrooke's successful experiment in Kew of allotting small portions of land to poor families to assist them and relieve the parish poor rates . . . 1819

[The little colony was first called *Poorer Gardens*, but afterwards *New Village*, and it is calculated that 200*l*. per annum were saved to the parish.]

Landed Estates Court, established to "facilitate the sale and transfer of land in Ireland" (see *Encumbered Estates act*) . . . 1850

The *Land Registry Office* for transfer of land opened in 1862, reported to be a failure by a commission. Mar. 1870

Land Credit Company (for Silisia), established by Frederick the Great (see *Credit Foncier*), 1763.

Land League, see under *Leagues and Ireland*, 1878.

Landen, or NEANWYNEN (Belgium). Near here the French under marshal Luxembourg defeated the allies, commanded by William III. of England, chiefly through the cowardice of the Dutch, 19 July (a.n. 29), 1698. The duke of Berwick, illegitimate son of James II., fighting on the side of France, was taken prisoner.

Landgrave (from *land*, and *graf*, a count), a German title, which commenced in 1180 with Louis III. of Thuringia, and became the title of the house of Hesse about 1268.

Landlord, see *Rent*.

Landlord and Tenant Act (Ireland), passed 1 Aug. 1870.

Landshut (Silisia), where the Prussians were defeated by the Austrians under marshal Laudohn, 20 June, 1760.

Landalips. Landalips are due to decay of the rocks or excessive saturation of the soil by rain.

Rosberg mountain behind the Rigi slipped down, burying villages and hamlets with above 800 inhabitants. 1806
 Lyme Regis, Dorset, a strip of chalk cliff three fourths of a mile long, between 100 and 150 feet high, undermined by rain, slid forward on the beach, carrying fields, houses, and trees. 24-27 Dec. 1839
 Naini or Nynee Tal, a sanitary hill-station in the Himalayas, India, was destroyed by the descent of the mountain; about 30 valuable British lives (including major Martin Morphy, col. Fred. Sherwood Taylor, and capt. F. T. Goodeve, H. S. F. Haynes, and A. Balderston) and 200 natives perished. 18 Sept. 1880
 Near Northwich, Cheshire, salt-works stopped, 6 Dec. et seq. "

Landwehr (German for *land-defence*), the militia of Germany, especially of Prussia, which was very effective in the war with Austria in 1866, and in that with France in 1870. No ranks in life are exempt from this service, and many persons in foreign countries returned to serve in 1870.

Langdale's Act, LORD, 7 Will. IV. & 1 Vict. c. 26 (1837), relates to copyholds, etc.

Langensalka (N. Germany). Here the Hanoverian army, on its way to join the Bavarians, was attacked by the Prussians, who were defeated, with the loss of about a thousand killed and wounded and 912 prisoners, 27 June, 1866. The victory was of little avail, for the Hanoverians were soon surrounded by Falckenstein, and compelled to capitulate on honorable terms on 29 June.

Langobardi, see *Lombards*.

Langside (S. Scotland), where the forces of the regent of Scotland, the earl of Murray, defeated the army of Mary queen of Scots, 13 May, 1568. Mary fled to England and crossed the Solway Frith, landing at Workington, in Cumberland, 16 May. Soon afterwards she was imprisoned by Elizabeth.

Language must either have been revealed originally from heaven, or is the fruit of human invention. The latter opinion is embraced by Horace, Lucretius, Cicero, and most of the Greek and Roman writers; the former by the Jews and Christians, and many modern philosophers. Some suppose Hebrew to have been the language spoken by Adam; others say that the Hebrew, Chaldee, and Arabic are only dialects of the original tongue. "And the whole earth was of one language and of one speech" (Gen. xi. 1).* George I. in 1724, and George II. in 1736, appointed regius professors of modern languages and of history to each of the universities of England.

The original European languages were thirteen, viz.: Greek, Latin, German, Slavonian, spoken in the east; Welsh; Biscayan, spoken in Spain; Irish; Albanian, in the mountains of Epirus; Tartarian; the old Illyrian; the Jazygian, remaining yet in Liburnia; the Chaucin, in the north of Hungary; and the Finnic, in east Friesland.

From the Latin sprang the Italian, French, Spanish, and Portuguese.

The Turkish is a mixed dialect of the Tartarian.

From the Teutonic sprang the present German, Danish, Swedish, Norwegian, English, Scotch, etc.

There are 3424 known languages, or rather dialects, in the world. Of these, 937 are Asiatic; 587 European; 276 African; and 1624 American languages and dialects.—*Adelung*. In 1861 and 1862 professor Max Müller lectured on the "Science of Language" at the Royal Institution, London. He divides languages into three families:

I. ARYAN (in Sanskrit, *noble*).

Southern Division.—India (Prakrit and Pali; Sanskrit; dialects of India; Gipey).

Iranic (Persi; Armenian, etc.).

Northern Division.—Celtic (Cymric; Cornish, Welsh, Manx, Gaelic, Breton, etc.).

Italic (Oscan; Latin; Umbrian)—Italian, Spanish, Portuguese, French, etc.).

Illyric (Albanian).

* *Eminent Linguists*.—Anas Montanus, editor of the Antwerp Polyglot Bible (1527-98); sir William Jones (1746-94); cardinal Giuseppe Mezzofanti (1774-1849) is said to have known 114 languages or dialects, and 60 well; and Niebuhr (1776-1831) knew 20 languages in 1807, and more afterwards; Hans Conon von der Gabelentz knew many languages critically: he died 3 Sept. 1874, aged nearly 67.

Hellenic (Greek and its dialects).

Wendic (Lettic: Old Prussian; *Slavonic dialects*—Bohemian, Russian, Polish, Lithuanian, etc.).

Teutonic (*High-German*: Modern German; *Low-German*: Gothic, Anglo-Saxon, Dutch, Frisian, English; *Scandinavian*: Old Norse, Danish, Swedish, Norwegian, Icelandic).

II. SEMITIC: *Southern*—Arabic (including Ethiopic and Amharic); *Middle*—Hebraic (Hebrew, Samaritan, Phœnician inscriptions); *Northern*—Aramaic (Chaldee, Syriac, Cuneiform inscriptions of Babylon and Nineveh).

III. TURANIAN (from *Tura*, swiftness).

Northern Division.—Tungusic (Chinese, etc.), Mongolic, Turkic, Samoyedic, and Finnic.

Southern Division.—Taic (Siamese, etc.), (Himalayas), Malayic (Polynesia, etc.), Gangetic, Lonitic (Burmese, etc.), Munda, Tamulic.

Langue d'Oc, see *Troubadours*.

Languedoc (a province, S. France), formed part of the Roman Gallia Narbonensis; was named Gothia, as having been held by the Visigoths 409, who were expelled by the Saracens; in turn driven out by Charles Martel in the eighth century. In the dark ages the country was named Septimania (probably from its containing seven important towns): afterwards Languedoc (from its dialect, see *Troubadours*), about 1270, when annexed to the monarchy. It suffered during the persecutions of the Albigenses and Huguenots.

Landown, near Bath (Somersetshire). The parliamentary army under sir William Waller was here defeated, 5 July, 1643.

Lanterns of scraped horn were invented in England, it is said, by Alfred; and it is supposed that horn was used for window lights also, as glass was not generally known, 872-901.—*Stow*. London was lighted by suspended lanterns with glass sides, 1415.

Lanthanum, a rare metal discovered in the oxide of cerium by Mosander in 1839.

Laocoön, an exquisite work of Grecian art, in marble, modelled by Agesander, Athenodorus, and Polydorus, all of Rhodes, and other eminent statuaries (about A.D. 70); it represents the death of the Trojan hero Laocoön, priest of Neptune, and his two sons, as described by Virgil.—*Æneid*, ii. 200. It was discovered in 1506 in the Sette Salle near Rome, and purchased by pope Julius II. It is now in the Vatican.

Laodicea, see *Seven Churches*.

Laon (N. France). A succession of actions between the allies (chiefly the Prussians) and the French was fought under the walls of the town, which ended in the defeat of the latter with great loss, 9, 10 March, 1814. Laon surrendered to the Germans, 9 Sept. 1870. As the last man of the garde mobile left the citadel, a French soldier, in contravention of the capitulation, blew up the powder-magazine, causing great destruction to the town and fortress. The grand-duke William of Mecklenburg Schwerin was bruised, and 95 German riflemen and 800 French gardes mobiles were killed or wounded: gen. Theremin du Hame, the commander, was wounded. The French attributed the explosion to accident.

Laparo-elytrotomy, an operation, the introduction of which was a highly important advance in surgery, was devised and performed by Dr. T. G. Thomas, of New York, in 1870. Dr. A. T. C. Skene, of Brooklyn, N. Y., first successfully performed the operation, Oct. 1875.

La Perouse's Voyage. In 1785 La Perouse sailed from France for the Pacific, with the *Boussole* and *Astrolabe* under his command, and was last heard of from Botany Bay, in March, 1788. Several expeditions were subsequently despatched in search of Perouse; but no certain information was obtained until capt. Dillon, of the East India ship *Research*, ascertained that the French ships had been cast away on the New Hebrides, authenticated by articles which he brought to Calcutta, 9 April, 1828.

Lapland, or **SAMELAND** (N. Europe), nominally subject to Norway in the thirteenth century, and now to

Sweden and Russia. Several Laplanders were exhibited at the Westminster Aquarium, Nov. 1877.

La Plata, see *Argentine Republic*, and *Wrecks*, 1874.

Larceny (French, *larcin*; Latin, *latrocinium*), see *Theft*.

Larentalia, see *Laurentalia*.

Largs (Ayrshire, S. Scotland). Here the great expedition of Haco of Norway was finally defeated by Alexander III. after a succession of skirmishes, 3 Oct. 1263.

La Rothière (France). Here the French, commanded by Napoleon, defeated the Prussian and Russian armies, with great loss, after a desperate engagement, 1 Feb. 1814. This was one of Napoleon's last victories.

Laryngoscope, an instrument consisting of a concave mirror, by which light is thrown upon a small plane mirror placed in the posterior part of the cavity of the mouth. By its means the vocal chords of the interior of the larynx, etc., are exhibited, and have been photographed. It was invented by Mr. Manuel Garcia, and reported to the Royal Society 24 May, 1855. One constructed by Dr. Türck was greatly modified, in 1857, by Dr. Czermak, who exhibited its successful action in London in 1862. A similar apparatus is said to have been constructed by Mr. John Avery, a surgeon in London, in 1846.

La Salette, see *Pilgrimages*.

Lateran, a church at Rome, dedicated to St. John, "the mother of all the churches," was originally a palace of the Laterani, a Roman family, and was given to the bishops of Rome by Constantine, and inhabited by them till their removal to the Vatican in 1377. Eleven councils have been held there.

Latham House (Lancashire) was heroically defended for three months against the parliamentarians by Charlotte, countess of Derby. She was relieved by prince Rupert, 27 May, 1644. The house was, however, surrendered 4 Dec. 1645, and dismantled.

Lathe. The invention is ascribed to Talus, a grandson of Dædalus, about 1240 B.C. Pliny ascribes it to Theodore of Samos, about 600 B.C. Great improvements have been made in recent times.

Latin Kingdom, EMPIRE, etc., see *Latium, Eastern Empire*, 1204, and *Jerusalem*.

Latin Language (founded on the Oscan, Etruscan, and Greek), one of the original languages of Europe, and from which sprang the Italian, French, and Spanish, see *Latium*. A large portion of our language is derived from the Latin. It ceased to be spoken in Italy about 581; and was first taught in England by Adelmus, brother of Ina, in the seventh century. The use of Latin in law deeds in England gave way to the common tongue about 1000; was revived in the reign of Henry II.; and again was replaced by English in the reign of Henry III. It was finally discontinued in religious worship in 1558, and in conveying and in courts of law in 1731 (by 4 Geo. II. c. 25). A corrupt Latin is still spoken in Roumelia. The foreign pronunciation of Latin (*a*, ah; *e*, a; *i*, e, etc.) was adopted in English universities and many schools about 1875-6.

Latin Union, that of France, Italy, Belgium, and Switzerland, to maintain the use of the same coinage, from 1865 to 1880.

Latitat, an ancient writ directing the sheriff to apprehend persons to be brought before the king's bench court, had its name from its being supposed that the person was lying hid, and could not be found in the county to be taken by bill. The writ was abolished by the Uniformity of Process act, 23 May, 1832.

Latitude. First determined by Hipparchus of Nice, about 162 B.C. It is the extent of the earth or the heavens, reckoned from the equator to either pole. Maupertuis, in 1787, in latitude 66.20, measured a degree of latitude, and made it 69.493 miles. Swanberg, in 1803, made it 69.292. At the equator, in 1744, four astronomers made it 68.732; and Lambton, in latitude 12, made it 61.743. Mudge, in England, made it 69.148. Cassini, in France, in 1718 and 1740, made it 69.12; and Biot, 68.769; while a recent measurement in Spain makes it but 68.63—less than at the equator, and contradicts all others, proving the earth to be a prolate spheroid (which was the opinion of Cassini, Bernoulli, Euler, and others), instead of an oblate spheroid; see *Longitude*.

Latitudinarians, a name given to certain theologians who endeavored to reconcile the church and non-conformists in the seventeenth century—such as Hales, Chillingworth, Tillotson, and Burnet.

Latium, now CAMPANIA (Italy), the country of Latinus, king of Janiculum, 1240 B.C. Laurentum was the capital of the country in the reign of Latinus, Lavinium in that of Æneas, and Alba in that of Ascanius; see *Italy* and *Rome*.

Lauenburg, a duchy, N. Germany; was conquered from the Wends by Henry the Lion of Saxony about 1152; ceded to Hanover, 1689; incorporated with the French empire, 1810; ceded to Denmark, 1815; annexed by Prussia, 14 Aug. 1865; possession taken 15 Sept. following; see *Gastein*. Population in 1855, 50,147.

Laufach, Bavaria (S.W. Germany), was taken by the Prussians under Wrangel, on 13 July, 1866, after a sharp action, in which the Hessians were defeated, the Prussian needle-gun being very efficacious.

Laundry, London and Provincial Steam Laundry, Battersea, erected by a company; opened in 1880.

Laureate, see *Poet Laureate*.

Laurel was sacred to Apollo, god of poetry; and from the earliest times the poets and generals of armies, when victors, were crowned with laurel. Petrarch was crowned with laurel, 8 April, 1341.—The *Prunus laurocerasus* was brought to Britain from the Levant before 1629; the Portugal laurel, *Prunus Lusitanica*, before 1648; the royal bay, *Laurus Indica*, from Madeira, 1665; the Alexandrian laurel, *Ruscus racemosus*, from Spain, before 1713; the glaucous laurel, *Laurus aggregata*, from China, 1806 or 1821.

Laurentalia were festivals celebrated at Rome in honor of Acca Laurentia, or Larentia, said to have been either the nurse of Romulus and Remus, or a rich dissolute woman who bequeathed her property to the Roman

people. The festival commenced about 621 B.C., and was held on the last day of April and the 23d of December.

Laurium Mines, see *Greece*, 1872.

Laurustinus, *L'iburnum Tinus*, an evergreen shrub, was brought to England from the south of Europe before 1596.

Lausanne, capital of the canton of Vaud, Switzerland. Here Gibbon completed his "Decline and Fall," 27 June, 1787. The International Workmen's Congress assembled here Sept. 1867.

La Valetta, see *Malta*.

Lavalette's Escape. Count Lavalette, for joining the emperor Napoleon on his return in 1815, was condemned to death, but escaped from prison in the clothes of his wife, 20 Dec. 1815. Sir Robert Wilson, Mr. Michael Bruce, and capt. J. H. Hutchinson, aiding the escape, were sentenced to three months' imprisonment in the French capital, 24 April, 1816. Lavalette was permitted to return to France in 1820, and died in retirement in 1830.

La Vendée (W. France). The French royalists of La Vendée took arms in March, 1793, and were successful in a number of hard-fought battles with the republicans, between 12 July, 1793, and 1 Jan. 1794, when they experienced a severe reverse. Their leader, Henri comte de La Rochejaquelein, was killed, 4 March, 1794. A short peace was made at La Jaunay, 17 Feb. 1795. The war was terminated by gen. Hoche in 1796, and a treaty of peace was signed at Luçon, 17 Jan. 1800; see *Chouans*.

Lavender, *Larandula spica*, brought from the south of Europe before 1568.

Law, see *Canons*, *Codes*, *Common-law*, *Civil Law*, *Crime*, *Digest*, *Supreme Court*. The Jewish law was given by God, and promulgated by Moses, 1491 B.C.

The laws of Phoroneus, in the kingdom of Argos (1807 A.C.), were the first Attic laws; they were reduced to a system by Draco, for the Athenians, 623 B.C.; whose code was superseded by that of Solon, 594 A.C.

The Spartan laws of Lycurgus were made about 844 B.C.; they remained in full force for about 700 years, and formed a race totally different from all others living in civilized society.

The Roman laws of Servius Tullius, 566 B.C., were amended by the Twelve Tables, published in 449 B.C., and remained in force till Justinian, nearly a thousand years.

BRITISH LAWS.

The British laws of earliest date were translated into the Saxon in A.D. 590

Lord Mansfield, lord chief justice of the King's Bench, declared "that no fiction of law shall ever so far prevail against the real truth of the fact as to prevent the execution of justice" 21 May, 1784
Many legal technicalities were got rid of by 14 & 15 Vict. c. 100. The act for the improvement of the administration of criminal justice passed 7 Aug. 1851

LAWYERS.

Pleaders of the bar, or barristers, are said to have been first appointed by Edward I. 1291
"No man of the law" to sit in parliament, by stat. of 46 Edw. III. and 6 Hen. IV. 1372
This prohibition was declared to be invalid by Coke and unconstitutional by Blackstone; attention was drawn to it in July, 1871; and the statutes were repealed 1871
Sergeants, the highest members of the bar, were alone permitted to plead in the court of common pleas. The first king's counsel under the degree of sergeant was sir Francis Bacon, in 1604
Law Association charity for widows founded in 1817
Incorporated Law Society formed in 1823; plan enlarged, 1825; a charter obtained, 1831; renewed, 1846. The building in Chancery lane, from the designs of Vulliamy, was commenced in 1829
Juridical Society established in 1865
A professorship of international law, at Cambridge, en-

dowed by bequest of Dr. William Whewell, master of Trinity College. 1867
Law Times established 8 April, 1843
Law Journal Jan. 1866
The establishment of a legal university strongly advocated by the lord chancellor and others Jan. 1871
The council of legal education put forth a scheme involving many changes Nov. 1872
Legal Practitioners' Society established Nov. 1873
(See *Barrister*, *Counsel*.)

LAW REFORM.

LAW AMENDMENT SOCIETY founded in 1843. It holds meetings during the session of parliament, and publishes a journal and reports. Its first chairman was lord Brougham, who introduced the subject of Law Reform by a most eloquent speech in the house of commons, on 7 Feb. 1828. Many acts for law reform have been passed since, and vigorous measures proposed.

Royal commission to inquire into the operation and constitution of the English courts of law, etc., issued 18 Sept. 1867.

The Judicature Commission (appointed 1867) recommended the consolidation of all the superior courts into one supreme court divided into chambers, April, 1869. It issued its fifth and last report Sept. 1874.

The High Court of Justice bill, introduced into the house of lords, 18 March, 1870, was dropped near the end of the session.

Royal Commission on the administrative departments of Courts of Justice (lord Lister and others) appointed 4 Oct. 1873.

Supreme Court of Judicature bill introduced by lord chancellor Selborne for establishing a High Court of Justice, and a High Court of Appeal, 13 Feb.; passed 5 Aug. 1873.

Its operation deferred from 2 Nov. 1874 to 1 Nov. 1875. The abolition of the house of lords as an Appeal Court rescinded, 1875.

(See *Supreme Court* for details.)

LAW COURTS.—Commissioners appointed in 1859 reported in favor of the concentration of the law courts in London on a site near Carey street, Chancery lane, about 7 acres, on which stood about 400 houses. The estimated expense was about 1,500,000*l.*, which it was recommended to take from the accumulated Chancery fund, termed "Suitors' fund." Acts of parliament to carry out the plan were passed in 1865 and 1866.

Competitive designs were invited, and, after much discussion (public and professional), Mr. Street's design was selected, 30 May, 1868; much attacked, but approved by the commission, Aug. 1870; contracts signed 17 Feb. 1874, and the works were begun immediately by Bull & Son, to be finished in 1881.

There are to be 18 courts, varying in size; a central hall, 231 feet long, 48 feet wide, 30 feet high; principal entrance in the Strand.

Offices in Eastern Block occupied 21 April, 1879.

LAW REPORTS.—A new and more economical plan of preparing and publishing law reports was finally adopted by a committee of barristers on 11 March, 1865 (see *Fear-books*).

Law's Bubble. John Law of Edinburgh (born 1681) was made comptroller-general of the finances of France, upon the strength of a scheme for establishing a bank, and an East India and a Mississippi company, by the profits of which the national debt of France was to be paid off; see *Mississippi*. He first offered his plan to Victor Amadeus, king of Sardinia, who told him he was not powerful enough to ruin himself. The French ministry accepted it; and in 1716 he opened a bank in his own name, under the protection of the duke of Orleans, regent of France, and the deluded rich subscribed for shares both in the bank and the companies. In 1718 Law's was declared a royal bank, and the shares rose to upwards of twenty-fold the original value; so that in 1719 they were worth more than eighty times the amount of all the current specie in France. In 1720 this fabric of false credit fell to the ground, spreading ruin throughout the country. Law died in poverty at Venice in 1729. The South Sea Bubble in England occurred in 1720; see *South Sea*.

Layamon's Brut, or Chronicle of Britain, a poetical semi-Saxon paraphrase of the Brut of Wace, made between 1100 and 1230, was published with a literal translation by sir Frederick Madden in 1847.

Laybach (near Trieste, in Illyria). A congress met here in Jan. 1821, and was attended by the sovereigns

of Austria, Russia, Prussia, and Naples. It broke up in May, after having issued two circulars stating it to be their resolution to occupy Naples with Austrian troops, and put down popular insurrections.

Layer's Conspiracy. Christopher Layer, a barrister, conspired with other persons to seize George I., the prince of Wales, lord Cadogan, and the principal officers of state; to seize the Tower, to plunder the Bank, and bring in the Pretender. Layer was hanged, 17 May, 1723. Bishop Atterbury was accused of complicity and attainted, but permitted to quit the country. Layer was hanged for enlisting soldiers for the Pretender.

Lazarists (the Priests of the Mission), a congregation devoted to education, founded by St. Vincent de Paul, 1625, were so named from their first establishment in a house which once belonged to the military order of St. Lazarus. They are also called *Vincentines*.

Lazaro, St. (N. Italy). Here the king of Sardinia and the imperialists defeated the French and Spaniards after a long and severe conflict, 4 June, 1746.

Lazistan, a Turkish province in the pachalik of Trebizond, on the Black Sea. Batoum, its seaport, was ceded to Russia by the treaty of Berlin, 13 July, 1878. The inhabitants at first resisted the change, but submitted on persuasion, many emigrating.

Lazzarites, see *Italy*, 1878.

Lazzaroni (from *lazzaro*, Spanish for a pauper or leper), a term applied by the Spanish viceroys to the degraded beings in Naples, half-clothed and houseless. No man was born a lazzaro; and he who turned to a trade ceased to be one. The viceroy permitted the lazzaroni to elect a chief with whom he conferred respecting the imposts on the goods brought to the markets. In 1647, Masaniello held the office, and made an insurrection; see *Naples*. In 1793, Ferdinand IV. enrolled several thousands of lazzaroni as pikemen (spontoneers), who generally favored the court party; on 15 May, 1848, they were permitted, on the king's behalf, to commit fearful ravages on the ill-fated city.—*Colletta*.

Lead is found in various countries, chiefly Great Britain, Spain, and the United States, and is abundant in various parts of Britain, and in some places richly mixed with silver ore. The famous Clydesdale mines were discovered in 1513. Pattinson's valuable method for extracting the silver was made known in 1829. The lead-mines of Cumberland and Derbyshire yield about 15,000 tons per annum. British mines produced 65,529 tons of lead in 1855; 69,266 tons in 1857; 67,181 tons in 1865; 73,420 tons in 1870; 58,777 in 1875; 58,667 tons in 1876; 50,012 in 1879. The lead deposits of the United States are found chiefly in the Mississippi valley and the Sierra Nevada mountains.

Lead pipes for the conveyance of water were brought into use in 1236
In 1859, 23,690 tons of pig and sheet lead were imported, and 18,414 tons exported; in 1866, 36,946 tons imported; 27,388 tons exported; in 1875, 79,825 tons imported, 35,398 tons exported, in 1879, 102,089 tons imported, 36,776 tons exported.

Lead discovered in the Mississippi valley by Le Sueur, 1700-1

Mining leases issued by the government under act of 1807

In 1822
Mining became general 1826-7
Mineral lands thrown open to purchase 1847
Production of lead in the United States, 1829, 5000 tons; 1839, 10,000 tons; 1847, 25,000 tons; 1870, 52,293 tons.

Lead, Black, see *Graphite*.

Leadenhall Market, London, founded by sir Richard Whittington in 1408, and presented to the city. A granary was added by sir Simon Cope, lord mayor, 1419. The demolition of the old market began in Sept. 1880; first stone of new one laid 28 June, 1881.

Leagues. Four kings combined to make war against five, about 1913 B.C. (Gen. xiv.). The kings of Canaan combined against the invasion of the Israelites, 1451 B.C. The more eminent Greek leagues were the *Ætolian*, pow-

erful about 320 B.C., which lasted till 189 B.C. and the *Achaean*, revived 280 B.C., which was broken up by the conquest of Greece by the Romans, 146 B.C. The fall of these leagues was hastened by dissension.

Hansatic League 1140
Lombard leagues against the emperors (see *Lombards*),

National Irish Land League ostensibly formed to buy up farms for the tenants; supported by Mr. Parnell and others, 1879; its enforcement of stringent rules against landlords and loyal tenants created a reign of terror; led to legislation (see *Ireland*) 1890-1
"National Land League of Great Britain" formed; Mr. Justin McCarthy president 26 March, 1881

Leap-year, or **BISSEXTILE**, originated with the astronomers of Julius Caesar, 45 B.C. They fixed the solar year at 365 days 6 hours, comprising, as they thought, the period from one vernal equinox to another; the six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added was called intercalary, and was placed a day before the 24th of February, the sixth of the calends, which was reckoned *twice*, hence called *bissextile*, or *twice sixth*. This added day with us is 29 Feb.; see *Calendar*. This arrangement makes the year nearly three minutes longer than the astronomical year: to obviate this, 1700 and 1800 were not, and 1900 will not be, leap-years, but 2000 will be one; see *Julian Year*, *Gregorian Calendar*, etc.

Learning and the Arts flourished among the Greeks, especially under Pisisstratus, 537 B.C., and under Pericles, 444 B.C.; and with the Romans at the commencement of the Christian era, under Augustus. The Greek refugees caused their revival in Italy, particularly after the taking of Constantinople by the Turks in 1453, and the invention of printing shortly before—the period of the *Renaissance*. Leo X. and his family (the *Medici*) greatly promoted learning in Italy in the sixteenth century, when literature revived in France, Germany, and England; see *Literature* and authors under *Greek*, *Latin*, *English*, and other languages.

Lease (from the French *laisser*, to let), a kind of conveyance invented by sergeant Moore, soon after the statute of uses, 27 Henry VIII. 1535. Acts relating to leases were passed in 1856 and 1858. *Forged Leases* case, see *Trials*, Jan. 1878.

Leather was very early known in Egypt and Greece, and the thongs of manufactured hides were used for ropes, harness, etc., by all ancient nations. The Gordian knot was made of leather thongs, 330 B.C. A leather cannon was proved at Edinburgh, fired three times, and found to answer, 23 Oct. 1778.—*Phillips*. The duty on leather imposed 1697, produced annually in England 450,000*l.*, and in Ireland about 50,000*l.* It was abolished 29 May, 1830. Many bankruptcies were declared in the leather trade in the autumn of 1860 in England.

In the case of Lawrence, Mortimore, & Co., enormous fraudulent dealings in bills were disclosed. A plan for making artificial leather out of cuttings, etc., was made known in 1860.—*Leather cloth* (invented by Messrs. J. R. & C. P. Crockett of Newark, U.S., and patented in 1849) is unleached cotton coated with a mixture of boiled linseed-oil and turpentine, and colored. The Leather Cloth Company, London, successors to Messrs. Crockett, were established 1859. An exhibition of leather manufactures at Northampton in the autumn of 1873; at the Agricultural Hall, London, 15–23 Sept. 1880.

Lech, a river (S. Germany) near which, at a village named Rain, the cruel imperialist gen. Tilly was defeated by the Swedes, under Gustavus Adolphus, 5 April, 1632, and died of his wounds.

Lectiary, the Roman Catholic service-book containing lessons from the Bible; see *Common Prayer*.

Lectures. Those on physic were instituted by Dr. Thomas Linacre, of the College of Physicians (founded by Henry VIII.), about 1502. *Clinical lectures* at the bedside of the patients in hospitals are said to have been given (by Dr. John Rutherford) in Edinburgh about 1748; in Dublin about 1785; in London (by sir B. C. Brodie) 1813–17. Mr. G. Macilwain, about 1824, gave surgical clinical lectures in connection with a dispensary; see *Gresham College*, *Boyle's Lectures*, *Royal and London Institutions*, etc. The political lectures of Thelwall, commenced in Jan. 1795, were interdicted by an act of parliament. In the autumn of 1857 and since, many distinguished noblemen and gentlemen lectured at mechanics' institutes. An act passed in 1835 prohibited the publication of lectures without the consent of the lecturers. Public lectures have been very popular in the United States since about 1855. In 1860 more than 200 professional lecturers were enrolled, and the number whose names are now on the books of the lecture bureaux is even greater than that.

Leeds (Yorkshire), the Saxon *Loidis*, once a Roman station, received a charter in 1627. Population in 1861, 207,165; in 1871, 259,212.

Leek, the Welsh emblem, in consequence of a command from Dewi, or David, afterwards archbishop of St. David's in 519. On the day that king Arthur won a great victory over the Saxons, Dewi is said to have ordered the soldiers to place a leek in their caps.

Leesburg Heights, see *Ball's Bluff*.

Leeward Isles, West Indies: Antigua, Barbuda, Montserrat, St. Christopher's, Nevis, Anguilla, Virgin Isles, and Dominica. Governor-general of the British Isles, col. Stephen John Hill, 1863; sir R. C. C. Pine, 1869; sir H. Turner Irving, 1873; hon. Geo. Berkeley, 1874. An act for their federation passed 21 Aug. 1871.

Legacies. In 1780 receipts for legacies were sub-

jected to a stamp-duty, and in 1796 the legacy-duty was imposed. The impost was increased several times subsequently, particularly in 1805, 1808, and 1845. In 1853 the legacy-duty was extended to landed or real property; see *Succession Duty Act and Wills*. John Camden Neild, an eccentric miser, died 30 Aug. 1852, bequeathing about 250,000l. to the queen. Received for legacy and succession duties in year 1870–1, 2,963,872l.; 1875–6, 3,548,966l.; 1876–7, 3,675,802l.

Legal Practitioners' Society, for reforming abuses, etc., established Nov. 1878.

Legates (*legatus*). Roman ambassadors; and also governors of the provinces into which Augustus divided the empire, 27 B.C. Legates are also ambassadors from the pope. The legate's court in England, erected in 1516 by cardinal Wolsey, to prove wills, and for the trial of offences against the spiritual laws, was soon discontinued.

Legations were the twenty administrative divisions in the States of the Church, governed by legates. They rebelled in 1859–60, and are now included in the kingdom of Italy; see *Rome*.

Leghorn (*Livorno*, Tuscany), a mere village in the fifteenth century, owes its prosperity to the Medici family. It suffered dreadfully by an earthquake in 1741; and was entered by the French army, 27 July, 1796, but the British property had been removed. It was held by the French 1796–9, and retaken 1800. It was unsuccessfully attacked by the British and Italian forces in Dec. 1813. The Austrians took this city from the insurgents, 12, 13 May, 1849, and quelled a slight insurrection, July 6, 1857. In June, 1857, above 60 persons were killed at the theatre, through an alarm of fire; see *Tuscany*.

Legion, *Legio*, a corps of soldiers in the Roman armies, first formed by Romulus, when it consisted of 3000 foot and 300 horse, about 720 B.C. When Hannibal was in Italy, 216 B.C., the legion consisted of 5200 soldiers; and under Marius, in 88 B.C., it was 6200 soldiers besides 700 horse. There were ten, and sometimes as many as eighteen, legions kept at Rome. Augustus had a standing army of 45 legions, together with 25,000 horse and 37,000 light-armed troops, about 5 B.C.; and the peace establishment of Adrian was thirty of these formidable brigades. A legion was divided into ten cohorts, and every cohort into six centuries, with a *rexillum*, or standard, guarded by ten men. The peace of Britain was protected by three legions. The French army has been divided into legions since Francis I.; see *Thundering Legion*.

Legion of Honor, a French order embracing the army, civil officers, and other individuals distinguished for services to the state; instituted by Napoleon Bonaparte, when first consul, 19 May, 1802. The order was confirmed by Louis XVIII. in 1815, and its constitution modified in 1816 and 1851. The honor was conferred on many British subjects who distinguished themselves in the Russian war, 1854–6, and in the Paris exhibitions of 1855 and 1867. The palace and offices were burned by the communists, 23 May, 1871.

Legitimists, a term (since 1814) applied to those who support the claims of the elder branch of the Bourbon family to the throne of France, whose present representative is Henry, duc de Bordeaux, called comte de Chambord, born 29 Sept. 1820. They held a congress at Lucerne on 24–29 June, 1862, and agreed to continue a pacific policy. The party was active in Feb. 1871–5. Their efforts to recover power have proved ineffectual; see *France*.

Legnago, a fortress on the Adige, N. Italy, one of the Quadrilateral. It was captured by the French in 1796; but reverted to the Austrians in 1815. It was surrendered to the Italians in Oct. 1866.

Legnano (Lombardy). Here the emperor Frederick Barbarossa was defeated by the Milanese and their

allies, 29 May, 1176, and the treaty of Constance ensued in 1183.

Leicester (central England), a bishopric for a short time in the eighth century, returned two members to parliament in the reign of Edward I. Here Richard III. was buried, 25 Aug. 1485; and here cardinal Wolsey died, 29 Nov. 1530. During the civil war, Leicester was taken by Charles I., 31 May, and by Fairfax, 17 June, 1645. The stocking manufacture was introduced in 1680. New town-hall opened 8 Aug. 1876.

Leicester Square (London), see *Globe*. After remaining some time in a disreputable state, Mr. Albert Grant bought up the enclosure, and, after renovating it by the aid of an architect and gardener, and setting up statues and busts, presented it to the Metropolitan Board of Works, 2 July, 1874.

Leighlin (W. Carlow), a see founded by St. Lasarian about 628. Burchard, the Norwegian, the son of Garmond, founded or endowed the priory of St. Stephen of Leighlin. Bishop Doran, appointed in 1523, was murdered by his archdeacon, Maurice Cavenagh, who was hanging on the spot where the crime was committed.—*Beutson*. In 1600 Leighlin was united to Ferns; the combined see united to Ossory in 1835; see *Ferns* and *Bishops*.

Leiningen (or LINANGE), a principality partly in Bavaria, Baden, and Hesse, mediatised in 1806. The present prince, Ernest, born 9 Nov. 1830, a captain in the British navy, is the son of prince Charles, the half-brother of queen Victoria. Feodore, dowager princess of Hohenlohe-Laungenburg, the queen's half-sister, died 23 Sept. 1872, aged nearly 65. The first husband of the duchess of Kent, prince Emich of Leiningen, died 4 July, 1814.

Leinster, a kingdom in 1167, now one of the four provinces of Ireland, divided into four archbishoprics by pope Eugenius III., at a national synod held at Kells, 9 March, 1151-2, and in which his holiness was represented by cardinal Paparo. The abduction of Devorgilla, wife of O'Ruar, a lord of Connaught, by Dermot, king of Leinster, in 1152, is asserted to have led to the landing of the English and the subsequent conquest. The province of Leinster gave the title of duke to Schomberg's son in 1690. The title became extinct in 1719, and was conferred on the family of Fitzgerald in 1766.

Leipsic (Saxony), an ancient city, famous for its university (founded 1409) and its fair (1458). At Breitenfeld, near here, Gustavus Adolphus, king of Sweden, defeated the imperialists under Tilly, 7 Sept. 1631; and the imperialists were again defeated here by the Swedes under Torstensen, 23 Oct. 1642. Here took place, on 16, 18, 19 Oct. 1813, "the battle of the nations," between the French army and its allies, commanded by Napoleon (160,000), and the Austrian, Russian, and Prussian armies (240,000 strong). The French were beaten, chiefly owing to 17 Saxon battalions, their allies, turning upon them in the heat of the engagement. 80,000 men perished on the field, of whom more than 40,000 were French, who also lost 65 pieces of artillery and many standards. The victory was followed by the capture of Leipsic, of the rear-guard of the French army, and of the king of Saxony and his family. The fiftieth anniversary was celebrated 18 Oct. 1863. The *Leipsic book fair* began 1545. The new supreme court for all Germany opened here 1 Sept. 1879.

Leith, the port of Edinburgh, was burned by the earl of Hertford in 1544. It was fortified by the French partisans of queen Mary in 1560, and surrendered to the English. The "Agreement of Leith," between the superintendents and ministers, was made Jan. 1572. The docks were begun 1720.

Leith Hill, near Dorking, Surrey; a lofty tower, commanding a view over twelve or thirteen counties (according to Evelyn), was erected here by Richard Hull in 1766.

Leitha, a river dividing the Austrian territories; see *Austria*.

Leleges, a Pelasgic tribe which inhabited Laconia about 1490 B.C., and after many contests merged into the Hellenes.

Le Mans, a French city, department of the Sarthe. Here the retreating French general Chanzy was overtaken and defeated by the Germans under prince Frederick Charles and the grand-duke of Mecklenburg, after some conflicts, 10, 11 Jan. 1871. Le Mans was entered 12 Jan. In six days' fighting about 22,000 French made prisoners.

Lemures. The ancients supposed that the soul, after death, wandered over the world, and disturbed the peace of the living. The happy spirits were called *Lares familiares*; and the unhappy, *Lemures*. The Roman festival *Lemuralia*, kept on 9, 11, 13 May, is said to have been instituted by Romulus about 747 B.C., to propitiate the spirit of the slaughtered Remus.

Lennie Mutiny, see *Mutinies*, 1875.

Lent (from the Saxon *lenten*, spring), the forty days' fast observed in the Roman Catholic church from Ash-Wednesday to Easter-day, said to have been instituted by pope Telesphorus, 130. In early times Lent commenced on the Sunday, now called the first Sunday in Lent; and the four days beginning with Ash-Wednesday were added by pope Felix III. in 487, in order that the fasting days should amount to forty. Lent was first observed in England by command of Ercombert, king of Kent, in 640 or 641.—*Baker's Chron.* Flesh was prohibited during Lent; but Henry VIII. permitted the use of *white meats* by a proclamation in 1543, which continued in force until, by proclamation of James I., in 1619 and 1625, and by Charles I., in 1627 and 1681, flesh was again wholly forbidden; see *Ash-Wednesday*, *Quadragesima*.

Leon, KINGDOM OF, see under *Spain*.

Leonards' Acts, LORD ST., 22 & 23 Vict. c. 85; 23 & 24 Vict. c. 88 (1859-60), relate to legal proceedings.

Leonine City (*Città Leonina* or *Borgo*), formerly a suburb, now included in the city of Rome, was founded by Leo IV., pope 847-55, and named *Leopolis*. It comprehends the castle of St. Angelo, the hospital of San Spirito, the Vatican palace and gardens, and St. Peter's. Its possession was allotted to pope Pius IX. when the Italian royal troops entered Rome, 20 Sept. 1870. About 1500 inhabitants of the Leonine City voted for union with the kingdom of Italy, 2 Oct. 1870.

Leonines, hexameter and pentameter verses, rhyming at the middle and the end, are said to have been first made by Leoninus, a canon, about the middle of the twelfth century, or by pope Leo II., about 682.

Leopold's (Prince) Annuity Act (passed 7 Aug. 1874), provided for him 15,000*l.* a year, from 7 April, 1874, when he came of age.

Lepanto (near Corinth), BATTLE OF, 7 Oct. 1571, when the combined fleets of Spain, Venice, Genoa, Malta, and Pius V., commanded by don John of Austria, defeated the whole maritime force of the Turks, and completely checked their progress.

Leprosy, a skin disease described in Lev. xiii. (B.C. 1490), which prevailed in ancient times throughout Asia. It has now almost disappeared from Europe. It chiefly affected the lower classes, yet occasionally proved fatal to the very highest personages. Robert Bruce of Scotland died of leprosy in 1329. A hospital for lepers was founded at Granada, by queen Isabella of Castile, about 1504, and a large number of leper-houses were founded in Britain. Dr. Edmondson met with a case in Edinburgh in 1809.

Lerida, the ancient Ilerda, E. Spain, founded by the Carthaginians. Near it Julius Cæsar defeated Pompey's lieutenants, 49 B.C. It was made the residence of the kings of Aragon, 1149. It was captured for Philip V. by the French under the duke of Orleans, 13 Oct. 1707, and by Suchet, 13 May, 1810.

Lettres de Cachet, sealed letters issued by the kings of France since about 1670, by virtue of which those persons against whom they were directed were thrown into prison or exiled. The National Assembly decreed their abolition, 1 Nov. 1789.

Lettuce, introduced into England from Flanders about 1520. It is said that when queen Catherine wished for a salad she had to send to Holland or Flanders for lettuce.

Leuctra, in Boeotia, N. Greece, where the Thebans under Epaminondas defeated the superior force of Cleombrotus, king of Sparta, 8 July, 371 B.C. 4000 Spartans, with their king, were slain. The Spartans gradually lost their preponderance in Greece.

Leudes (from the German *Leute*, people), native feudal vassals, faithful to the German and French sovereigns in the sixth and seventh centuries.

Leuthen (S. Prussia), see *Lissa*.

Levant (the East), a term applied to Greece, Turkey, Asia Minor, etc. Levant companies in London were established in 1581, 1593, and 1605.

Levellers, a fanatical party in Germany, headed by Münzer and Storck in the sixteenth century, who taught that all distinctions of rank were usurpations on the rights of mankind. At the head of 40,000 men, Münzer commanded the sovereign princes of Germany and the magistrates of cities to resign their authority, and on his march his followers ravaged the country. The landgrave of Hesse at length defeated him at Frankenhausen, 15 May, 1525; 7000 of the enthusiasts fell in the battle, and the rest fled; their leader was taken and beheaded at Mülhausen. The English "Levellers," powerful in parliament in 1647, were put down by Cromwell in 1649, and their leader Lilburn imprisoned. At the period of the French revolution some Levellers appeared in England. A "Loyal Association" was formed against them by Mr. John Reeves, Nov. 1792.

Levels. The great Level of the Fens is a low-lying district of about 2000 square miles in Lincolnshire, Huntingdonshire, Cambridgeshire, and Norfolk, said to have been overflowed by the sea during an earthquake, 368. It was long afterwards an inland sea in winter and a noxious swamp in summer, and was gradually drained by the Romans, the Saxons, and especially by the monks during the reigns of the Plantagenet kings. One of the first works on a large scale was carried out by Morton, bishop of Ely, in the reign of Henry VII. A General Drainage act was passed, by the advice of lord Burghley, in 1601; but little work was done till the reign of James I., who, in 1621, invited over the great Dutch engineer Cornelius Vermuyden, to assist in the general drainage of the country. After completing several great works, Vermuyden agreed (in 1629) to drain the "Great Level." He was at first prevented from proceeding with his undertaking through a popular outcry against foreigners; but eventually, aided by Francis, earl of Bedford, in spite of the great opposition of the people, for whose benefit he was laboring, he declared his great work complete in 1652. He also reclaimed much valuable land at Axholme, in Lincolnshire, 1626-30, and many Dutch and French Protestants settled here about 1634, and a few of their descendants still remain.—There are the Middle, Bedford, South, and North Levels.

The drainage of the Great Level employed the talents of Rennie (about 1807), and of Telford (1822), and of other eminent engineers.

The Middle Level commission cut through certain barrier banks, and replaced them by other works. 1844
These were reported unsound in March, and the outfall sluice at St. Germain's, near King's Lynn, gave way, 4 May, 1862

High tides ensuing; about 6000 acres of fertile land were inundated, causing a loss of about 25,000*l*. After unwearied, and for a while unsuccessful, efforts, a new

coffer-dam was constructed under the superintendence of Mr. Hawkshaw, which was reported sound. . . . July, 1862
Another inundation, begun through the bursting of a marsh-land sluice near Lynn, was checked. . . . 4 Oct. "
New outfall sluice opened. 26 Nov. 1877

Leverian Museum, formed by sir Ashton Lever, exhibited to the public at Leicester House, London. It was offered to the public in 1785 by the chance of a guinea lottery, and won by Mr. Parkinson in 1785, who sold it by auction, in lots, May-July, 1806.

Lewes (Sussex), where Henry III., king of England, was defeated by Montfort, earl of Leicester, and the barons, 14 May, 1264.—*Blaauw*. The king, his brother Richard, king of the Romans, and his son Edward, afterwards Edward I., were taken prisoners. One division of Montfort's army, a body of Londoners, gave way to the furious attack of prince Edward, who, pursuing the fugitives too far, caused the battle to be lost; see *Evesham*.

Lexington, MASS., BATTLE OF, fought 19 April, 1775. This was the beginning of the American revolution. The British, 800 strong, marched to Lexington and Concord during the night of 18 April, for the purpose of destroying the stores of the patriots. They were met at Lexington by 70 patriots, whom they fired upon and dispersed. The patriots from the region round about speedily gathered under arms, and successfully opposed the British at Concord, compelling their retreat and severely harassing them on the march. British loss, 273; American, 103.—LEXINGTON, Missouri, fortified by the federals, was attacked by the confederate general Price on 29 Aug., and, after a gallant resistance by col. Mulligan, surrendered on 21 Sept. 1861.

Leyden (Holland), *Lugdunum Batavorum*, important in the thirteenth century. Between 31 Oct. 1573, and 3 Oct. 1574, when it was relieved, it endured two sieges by the armies of Spain, during which 6000 of the inhabitants died of famine and pestilence. In commemoration the university was founded, 1575. In 1699 two thirds of the population perished by a fever, which, it was said, was aggravated by its improper treatment by prof. De la Boe. The university was almost destroyed by a vessel laden with 10,000 pounds' weight of gunpowder blowing up, and demolishing a large part of the town, and killing numbers of people, 12 Jan. 1807. The *Leyden jar* was invented about 1745 by Kleist, Muschenbroek, and others; see *Electricity*.

The third centenary of the foundation of the university celebrated joyfully. 8 Feb. 1875

Libel. By the Roman laws of the Twelve Tables, libels which affected the reputation of another were made capital offences. In the British law, whatever renders a man ridiculous, or lowers a man in the opinion and esteem of the world, is deemed a libel. "The greater the truth the greater the libel," the well-known law maxim of a high authority, is now disputed; see *Trials*, 1788, 1790, 1792, 1803, 1808 et seq., 1868, and (note) *Patents* and *Times*.

Dispersing slanderous libels made felony. 1848

William Prynce, a Puritan lawyer, fined 500*l*., placed in the pillory, where his ears were cut off, and imprisoned, for writing "Histriomastix," a condemnation of stage-plays, which was considered to be a libel on the queen, who favored them, 1633; he was tried and further punished for his satirical writings in. 1637

Fox's Libel bill, which enlarged the discretionary power of juries in cases of libel, thrown out by the lords in 1791; passed in. 1792

Blasphemous and seditious libels, on the second offence, made punishable with transportation. 1819

An action for libel was brought in the court of King's Bench by a bookseller named Stockdale against Messrs. Hansard, the printers to the house of commons. This act on related to an opinion expressed in a parliamentary report of a book published by Stockdale, 7 Nov. 1836. Lord Denman, in giving judgment, said he was not aware that the authority of the house of commons could justify the publication of a libel—an opinion which led to some proceedings on the part of the house, and to other actions by Stockdale. 1837-9

Verdicts were given in his favor; and in Nov. 1839, the sheriffs took possession of Hansard's premises. This caused much excitement in parliament, and they were ordered to appear at the bar of the house of commons, and were formally committed to the custody of the sergeant at arms, 21 Jan., but immediately discharged: the conflict was maintained by the law officers and the commons till..... Liberia, the republic of freed and indigenous negroes on the coast of Upper Guinea, West Africa, was founded in 1822 by the American Colonization Society, which was established by Henry Clay in 1816; capital, Monrovia. The independence of Liberia was proclaimed 24 Aug. 1847; recognized by Europe in 1848; by America in 1861. It is stated to be flourishing. The president visited the International Exhibition of London in 1862. Presidents: Daniel B. Warner, elected 1864; James Spriggs Payne, installed 6 Jan. 1868; E. J. Roy, president, Jan. 1870, was deposed Oct. 1871; escaped from prison; drowned, Feb. 1872. J. J. Roberts, the first president, re-elected Jan. 1872 and 1874; died 25 Feb.; J. Spriggs Payne, elected 8 June, 1876; A. W. Gardner, 1878. Population, about 718,000.

Another <i>licensing act</i> passed	30 July, 1874

Lichfield (Staffordshire). The see of Mercia (at Lichfield) was founded about 656; removed to Chester, 1075; to Coventry, 1102. In 1121 Robert Peche was consecrated bishop of Lichfield and Coventry. By an order in council, Jan. 1837, the archdeaconry of Coventry was added to the see of Worcester, and Dr. Samuel Butler became bishop of Lichfield. This see has given three saints to the Roman church; and to the British nation one lord chancellor and three lord treasurers. It is valued in the king's books at 559*l.* 18*s.* 2*d.* Present income, 4500*l.*

Lichfield cathedral was first built about 656; the present structure was founded by Roger de Clinton, the 37th bishop, in 1148. Walter de Langton (bishop in 1296), built the chapel of St. Mary, now taken into the choir, and under bishop Heyworth (1420) the cathedral was perfected. The building was despoiled at the Reformation, and was scandalously injured in the Parliamentary war (when its monuments, its fine sculptures, and beautifully painted windows were demolished). It was repaired at the Restoration, 1660; in 1784; and by Gilbert G. Scott, 1860-3. In Lichfield castle, king Richard II. kept his Christmas festival, 1397, when 200 tuns of wine and 2000 oxen were consumed. A charter was granted to Lichfield constituting it a city, by Edward VI., 1549.

BISHOPS OF LICHFIELD AND COVENTRY.

1781. James, earl of Cornwallis, died 1824.
1824. Hon. Henry Ryder, died 31 March, 1836.

BISHOPS OF LICHFIELD.

1836. Samuel Butler, died 4 Dec. 1839.
1839. James Bowstead, died 11 Oct. 1843.
1843. John Lonsdale, died 19 Oct. 1867.
1867. Geo. Aug. Selwyn, late bishop of New Zealand, died 11 April, 1878.
1878. William Dalrymple MacLagan, consecrated 24 June.

Lichfield House Compact, said to have been made between the Whig government and Daniel O'Connell in 1835 at Lichfield House, 13 St. James's square.

Licinian Laws. In 375 a.c., C. Licinius Stolo and L. Sextius, tribunes of the people, promulgated various *rogationes*, or laws, to weaken the power of the patricians and benefit the plebs: one was to relieve the plebeians from their debts; another enacted that no person should possess more than 500 jugera of the public land, or more than 100 head of large cattle or 500 of small, in the Roman states; and the third, that one of the consuls should be a plebeian. After much opposition these were carried, and L. Sextius became the first plebeian consul, 365. Another law, 56 a.c., of this name, imposed a severe penalty on party clubs, or societies assembled for election purposes; and another, about 103 a.c. (brought forward by P. Licinius Crassus), limited the expenses of the table.

Liebenau (Bohemia). Here was fought the first action of the Seven Weeks' war, 26 June, 1866; when the Austrians were compelled to retreat by the Prussians under gen. Von Horn.

Liechtenstein, a principality, S. Germany. Population in 1876, 8664. Constitutional charter, 26 Sept. 1862. Prince John II., born 5 Oct. 1840, succeeded his father, Alois Joseph, 12 Nov. 1858.

Liege (Belgium), a bishopric, under the German empire, from the eighth century till 1795. Liege frequently revolted against its prince-bishops. After a severe contest, the citizens were beaten at Brusthem, 28 Oct. 1467, and Liege taken by Charles the Bold, duke of Burgundy, who treated them with great severity. In 1482 Liege fell into the power of De la Marck, the Boar of Ardenne, who killed the bishop, Louis of Bourbon, and was himself defeated and killed. Liege was taken by the duke of Marlborough, 23 Oct. 1702; and by the French and others, at various times, up to 1796, when it was annexed to France. It was incorporated with the Netherlands in 1814, and with Belgium in 1830. Iron-works were established at Liege in the sixteenth century, and have been greatly enlarged by the Cockerills in the nineteenth; see *Seraing*. An international volunteer shooting contest held here, Sept. 1869. The Iron and Steel Institute met here, 18 Aug. 1873.

Liegnitz, see *Pfaffendorf*.

Lieutenants, LORDS, for counties, were instituted in England, 3 Edw. VI., 1549, and in Ireland in 1831. Their military jurisdiction abolished by Army Regulation act, 1871. For the lords lieutenants of Ireland, see *Ireland*.

Life Peerages. A bill for creating them was read a second time in the lords, 27 April, 1869, but afterwards rejected. Two peers for life created to act as appeal judges, 5 Oct. 1876; see *Lords*.

Life, Preservation of. An international exhibition of objects relating to public health and safety was opened by the king of Belgium at Brussels, 26 June; a congress met 27 Sept. 1876.

Life-assurance Companies Act, passed 9 Aug. 1870, requires the companies to publish annual returns of receipts, expenditure, etc.

Life-boat, etc., see *Wrecks*.

The *American Life raft*, composed of cylinders lashed together, sailed from New York, 4 June, 1867, navigated by three men, capt. John McKee and Messrs. Miller and Mullane, and arrived at Southampton, 25 July following.

LIFE-RAMMUSSES, the apparatus of capt. Manby (brought into use in Feb. 1868), effects a communication with the distressed vessel by a rope, thrown by a shot from a mortar with a line attached to it. For the night, a night ball is provided with a hollow case of thick paste-board, and a fuse and quick match, and charged with dry balls, and a sufficiency of powder to inflame them. The fuse is so graduated that the shell shall explode at the height of 300 yards. The balls spread a brilliant light for nearly a minute, and give a clear view of every surrounding object. In 20 years, 59 vessels and 410 of their crews and passengers had been saved. Capt. Manby died 18 Nov. 1864, aged 69.

The **BOAT LOWERING APPARATUS**, in consequence of many being lost when boats were lowered from the *Assama* in 1862, invented by Mr. Charles Clifford of London in 1866, has been much approved of, and has been generally adopted in the royal navy.

Capt. Kynaston's hooks were approved by admiral sir Baldwin Walker in 1862, and by a committee on the subject in 1872.

Exhibition of life boats, life rafts, etc., at the London Tavern, opened 18 April, 1873.

Bickel's Life raft, reported good on trial in East India docks.....1 Oct. 1874

Capt. Boyton's *Life preserving dress* (of India-rubber), with means for signalling at sea, tried by him on the Thames successfully, 23 Jan. and 6 March, at Cowes, before the queen, while in the water he fired rockets, caught fish, etc. 6 April, nearly crossed the Channel from Dover (paddled two miles an hour), stopped by the French pilot.....April, 1875

Christie's Life saving raft tried on the Thames, could not be sunk.....17 March, "

Edmund Thompson's Life raft, partially successful off Poplar.....23 April, "

Boyton race on the Thames by six young men, three prizes awarded by the duchess of Teck.....10 Aug. "

Life-guard, WASHINGTON'S. This corps, varying in numbers, at different times, from 80 to 250 men, was formed in the spring of 1776. The men were not less than 5 feet 9 inches nor more than 5 feet 10 inches in height, and selected from the various regiments of the Continental army for their moral and personal perfections. Their usual duty was to protect the person, baggage, and papers of the commander-in-chief. The last survivor of this corps was Uzal Knapp, of Orange county, N. Y., who died in Jan. 1856, and was buried at the foot of the flag-staff in front of Washington's headquarters at Newburg, on the Hudson. A neat freestone monument erected over his remains was dedicated on 18 June, 1860, at which time there was a large civic and military procession.

Life-guardia, see Guards.

Life-insurance, see Insurance.

Life-ships. To promote the construction and use of these the Hans Bussk Life-ship Institute was founded, Oct. 1869. The life-ship *Peronelle* was launched at Southampton, 25 Aug. 1873.

Light. The law of refraction discovered by Snellius about 1624. The motion and velocity of light discovered by Hæuaur, and after him by Cassini, and calculated by Roemer (1676) and Bradley (1729). Its velocity ascertained (about 1667) to be about 190,000,000 of miles in sixteen minutes, or nearly 300,000 miles in a second, which is a million of times swifter than the velocity of a cannon ball. The light of the sun takes eight minutes and eight seconds for its transmission through the space in the earth; see *Emission Theory*. The undulatory theory of light, its polarization, and its chemical action have all been made known in the present century, by Dr. Thomas Young, Fresnel, Matus, Arago, Biot, Brewster, Wheatstone, Ritter, Niepce, Daguerre, Draper, Talbot, Tyndall, etc.; see *Optics, Photography, Color-science, Fluorescence*.

Velocity of Light. Direct determination by the toothed-wheel method by Fizeau agreed with the astronomical result.....1849

Fourcort, with the revolving mirror, gave 298,000 kilometres in a second of mean time.....1866

Cornu's improved tooth wheel apparatus gave 300,400 kilometres in a second of mean time.....1874

Mr. William Crookes, F.R.S., considered that he had demonstrated the mechanical action of light by experiments with delicate balances in the highest procurable vacuum, and calculated the force of the sun's rays upon the earth to be 2.5 tons to the square mile, 1873-4. His apparatus was termed *Radiometer* (which see). After much investigation, Mr. Crookes admitted that the action was not due to radiation, but to difference of heat absorption and the reaction of residual air. Mr. Crookes at the Royal Society announces experiments respecting an ultra gaseous state of matter, supporting the emission theory.....5 Dec. 1878

Dr. C. William Siemens reported to the Royal Society that the electric light acts on vegetation like solar light.....4 Dec. 1880

Light-house, called Pharos (now *pharos*, French; *fuaro*, Italian), from one erected at Pharos, near Alexandria, Egypt, 550 feet high, said to have been visible forty-two miles, about 285 a.c. There was one at Messina, at Rhodes, etc. The light was obtained by fire. A coal-fire light was exhibited at Tynemouth castle, Northumberland, about 1638. The first true light-house erected in England was the Eddystone light-house (which see), in 1758-60. Lights were exhibited in various places by the corporation of the Trinity-house early in the sixteenth century. 2814 light-houses in the world (1867).

BRITISH LIGHT-HOUSES.

The Commissioners on Lights, etc. (1861), report 171 shore-lights in England, 113 in Scotland, and 73 in Ireland (total, 357), and 47 floating lights.

11 light-houses building, April, 1867.

The French have 224 light-houses on shore.

The source of light in our light-houses is principally oil; but in harbor lights gas has been successfully used. Glass reflectors were used in 1780, and copper ones in 1807. A common coal fire light was discontinued at St. Helens so recently as 1822. Fresnel's Dioptric system (which see), devised about 1819, was adopted for the first time in England by Messrs. Wilkins, at the direction of the corporation of the Trinity house, 1 July, 1836.

The most brilliant artificial light ever produced—derived from magneto-electricity by a machine devised by prof. Holmes—was first employed at the South Foreland light-house, near Dover, on 8 Dec. 1858, and at Dungeness (or Dungeness) in 1862. Mr. Holmes's arrangement, and a similar one constructed by M. Berli, were shown at the International Exhibition, London, in 1862.

Gas-light tried successfully at Howth Bailey light-house, Dublin Bay, July, 1869.

Mr. Wigham's trifurc light, glass bell round the gas-light, prisms below the bell, and prisms forming a cupola: tried near Dublin, approved by Dr. Tyndall, July, 1873.

C. William Siemens's magneto-electric light used at the Lizard, 29 March, 1878.

The cost of erecting the three great British light-houses—viz.: the Skerryvore (west coast), 166 feet high, £3,1361; the Bishop Rock, Scilly Isles, 168 feet high, 34,5461; and the Bell Rock, Scotland, 117 feet high, 61,3311.

LIGHT-HOUSES IN THE UNITED STATES.

Since 1789, all light-houses on the United States coast have been maintained at the expense of the national government (no light dues being charged upon commerce). The cost of the service for the fiscal year ending 30 June, 1879, was \$1,708,700. The appropriation for the fiscal year ending 30 June, 1882, was \$2,628,400, of which \$475,600 was for new works.

Many of the light-houses of the United States are unsurpassed by any in the world, and are of exceedingly difficult construction. The most noted is that of Minot's Ledge, in Massachusetts Bay. The difficulties of erecting this light-house cannot be exaggerated. The first one was erected in 1847. It was supported on iron piles 12 inches in diameter. These were firmly braced and tied together with wrought-iron bands. The structure was finished in 1849, and stood till the terrible storm of April, 1861, when the iron supports were twisted as if they had been made of straw, and the whole structure was swept away. In 1862 congress appropriated money to rebuild the light. The design was a granite tower in the shape of the frustum of a cone. The base is 30 feet in diameter, and the whole height 99 feet. The lower 40 feet are solid. Some idea of the difficulty of the work may be formed when it is known that, though every

moment when the tide left the rock uncovered was taken advantage of, it was a year before the first layer of stones for the foundation was securely laid. It was first lighted in 1860.

Lightning-conductors were first set up for the protection of buildings by Franklin shortly after 1752, when he brought down electricity from a thunder-cloud. Richmann of St. Petersburg was killed while repeating these experiments, Aug. 1752. The first conductor in England was set up at Payne's Hill, by Dr. Watson. In 1766 one was placed on the tower of St. Mark's, at Venice, which has since escaped injury, although frequently injured by lightning previously. A powder magazine at Glogau, in Silesia, was saved by a conductor in 1782; and, from the want of one, a quantity of gunpowder was ignited at Brescia in 1767, and above 3000 persons perished. In 1762, Dr. Watson recommended conductors to be used in the navy; and they were employed for a short time, but soon fell into disuse from want of skill and attention. Mr. (afterwards sir William) Snow Harris devoted his attention to the subject from 1820 to 1854, and published a work, in 1843, detailing his experiments. In 1830, above thirty ships were fitted up with his conductors, and in 1842 his plans were adopted, and his conductors are now manufactured in the royal dock-yards. In 1854 parliament granted him 5000*l*.

Ligny (near Fleurus, Belgium), where Napoleon defeated the Prussian army under Blücher, 16 June, 1815; see *Waterloo*.

Liguorians, or **REDEMPTORISTS**, a Roman Catholic order, established in 1732 by Alfonso di Liguori, and approved by pope Benedict XIV. in 1749.

Ligurians, a Celtic tribe, N. Italy, invaded the Roman territory, and were defeated 238 B.C. They were not subjugated till 172 B.C. The **LIGURIAN REPUBLIC**, founded in May, 1797, upon the ruins of the republic at Genoa, was incorporated with France in 1805, and then merged into the kingdom of Italy.

Lilac-tree, *Syringa*. The Persian lilac from Persia was cultivated in England about 1638; the common lilac by Mr John Gerard about 1597.

Lilli-burlero, part of the refrain of a popular song ridiculing the Irish papists, 1688. The words are attributed to lord Wharton, the music to Henry Purcell.

Lille, see *Lisle*.

Lilly, a native of Persia, Syria, and Italy, was brought

to England before 1460; the *martagon* from Germany, 1596.

Lilybæum, a strong maritime fortress of Sicily, besieged by Pyrrhus, king of Epirus, 276 A.C., and relieved by the Carthaginians, 275 A.C. It was taken by the Romans, 241 A.C., after a siege of nine years, which led to the end of the second Punic war.

Lima (Peru). In 1534, Pizarro, marching through Peru, was struck with the beauty of the valley of Rimac, and there he founded this city, and gave it the name of *Ciudad de los Reyes*, or city of the kings, 1535. Here he was assassinated, 26 June, 1541. Awful earthquakes occurred here, 1586, 1630, 1687, and 28 Oct. 1746. In 1854-5, thousands perished by yellow-fever. Mr. Sullivan, the British consul, was assassinated at Lima, 11 Aug. 1857; see *Peru*, 1872.

Limburg (Netherlands), a duchy in the tenth century; acquired by the dukes of Brabant about 1288; added to Burgundy about 1429; passed to the house of Austria in 1477; became one of the United Provinces, 1609; conquered and annexed to the French republic, 1795; restored to the Netherlands, 1814; divided between Holland and Belgium, 1830; completely separated from the German Confederation by treaty, 11 May, 1867.

Lime, or **LINDEN, TREE**, probably introduced in the sixteenth century. The limes in St. James's park are said to have been planted at the suggestion of Evelyn, who recommended multiplying odoriferous trees, in his "Fumifugium" (1661). A lime-tree planted in Switzerland in 1410 existed in 1720, the trunk being 36 feet in circumference.

Lime-light, produced by the combustion of oxygen and hydrogen or carburetted hydrogen on a surface of lime. This light evolves little heat and does not vitiate the air. It is also called **Drummond Light**, after its inventor, lieut. Thomas Drummond, who successfully produced it as a first-class light in 1826, and employed it on the Ordnance Survey. It is said to have been seen at a distance of 112 miles. It was tried at the South Foreland light-house in 1861. Lieut. Drummond was born 1797, died 15 April, 1840. To him is attributed the maxim that "property has its duties as well as its rights."

Limerick, anciently *Lumneach* (S. W. Ireland). About 550, St. Munchin is said to have founded a bishopric and built a church here, which latter was destroyed by the Danes in 853. Donald O'Brien, king of Limerick, founded the cathedral about 1200. Limerick obtained its charter in 1195, when John Stafford was made first provost, and its first mayor was Adam Servant, in 1198. It was taken by Ireton after six months' siege in 1650. In Aug. 1690 it was invested by the English and Dutch, and surrendered on most honorable terms, 3 Oct. 1691.* An awful explosion of 218 barrels of gunpowder greatly shattered the town, killing 100 persons, 1 Feb. 1694. Another explosion of gunpowder here killed many persons, 2 Jan. 1837. Awful and destructive tempests, 6, 7 Jan. 1839. A new graving-dock was opened by the lord lieutenant, earl Spencer, 13 May, 1873.

Limitations, **STATUTE OF**, 21 James I. c. 16 (1623). By it actions for trespass or debt, or simple contract, must be commenced within six years after the cause of action, and actions for assault, menace, or imprisonment within four years. The Real Actions Limitation act, 1874, came into operation 1 Jan. 1879.

Limited Liability. An act for limiting the liability of joint-stock companies, 18 & 19 Vict. c. 133 (passed 1855), was several times amended 1856-8. On

* By the treaty it was agreed that all arms, property, and estates should be restored; all attainders annulled, and all outlawries reversed; and that no oath but that of allegiance should be required of high or low; the freedom of the Catholic religion was secured; relief from pecuniary claims incurred by hostilities was guaranteed; permission to leave the kingdom was extended to all who desired it; and a general pardon proclaimed to all then in arms.—*Burns*. This treaty was annulled by the Irish parliament, 1693. Limerick is still called "the city of the broken treaty."

31 May, 1864, "3830 joint-stock companies had been formed and registered on the limited-liability principle, and 938 had ceased to exist." Much calamity in 1866 was occasioned by the abuse of the system. The Companies act of 1862 was amended in 1867. 1241 registered in 1874; about 12,500, 1856-76. The principle adopted by some joint-stock banks in 1879-80; see under *Banks*.

Limoges Affair, see *France*, Dec. 1877.

Limours Murders, N.-central France. Several barbarous murders, especially of aged people, took place here, Jan., Sept., Nov., 1873, and Jan. 1874; several persons denounced, proved innocence. In June, 1874, one Poirier confessed to similar murders at Nogent and other places in Nov. 1873 and Jan. 1874. Executed at Chartres, 29 Sept. 1874.

Lincelles (N. France), where the allied English and Dutch armies defeated the French, 18 Aug. 1793. Gen. Lake commanded three battalions of foot-guards.

Lincoln, the Roman *Lindum Colonia*, and, at the period of the Conquest, rich and populous. It was taken several times by Saxons and Danes. The castle was built by William I. in 1086. Without Newport gate upon Lincoln plain was fought the battle between the partisans of the empress Maud, commanded by the earl of Gloucester, and the army of Stephen, in which the king was defeated and taken prisoner, 2 Feb. 1141. Louis, dauphin of France, invited over by the discontented barons in the last year of king John's reign, was acknowledged by them as king of England here; but the nobility, summoned by the earl of Pembroke to Gloucester to crown Henry III., marched against Louis and the barons, and defeated them in a most sanguinary fight (called the Fair of Lincoln), 20 May, 1217; and Louis withdrew.

Lincoln, BISHOPRIC OF. Sidnacester, or Lindisse and Dorchester, two distinct sees in Mercia, were united about 1078, and the see was removed to Lincoln by bishop Remigius de Feschamp, who built a cathedral (1086), afterwards destroyed by fire, but rebuilt by bishop Alexander (1127) and bishop Hugh of Burgundy. The diocese is very large, although the dioceses of Ely (1109), Oxford, and Peterborough (1541) were formed from it, and were further enlarged in 1837. The see was valued at the dissolution of monasteries at 2065*l.* per annum; and after many of its manors had been seized upon, it was rated in the king's books at 894*l.* 10*s.* 1*d.* Present income, 5000*l.* It has given three saints to the church of Rome, and to the civil state of England six lord chancellors. The great bell of the cathedral, called *Great Tom of Lincoln*, weighs four tons eight pounds.

RECENT BISHOPS.

1787. George Pretyman (afterwards Toulmin), translated to Winchester, 1820.
1820. Hon. George Pelham, died 1 Feb. 1827.
1827. John Kaye, died 19 Feb. 1852.
1852. John Jackson, translated to London, 1869.
1869. Christopher Wordsworth, consecrated 24 Feb.

Lincoln Tower, Westminster Bridge road, was erected by the united subscriptions of Britons and Americans, as a memorial of the abolition of slavery, and of Abraham Lincoln, president. The foundation was laid by gen. Schenck, then American minister here, 9 July, 1874; and the head-stone was placed by the rev. Newman Hall, minister of Surrey chapel, 28 Sept. 1875. The tower, which is 220 feet high, cost about 7000*l.* The church, named Christ church (to replace Surrey chapel), and schools adjoining (cost about 60,000*l.*), were dedicated 4 July et seq. 1876. The rev. Rowland Hill's body was removed from Surrey chapel and placed here, 14 April, 1881.

Lincoln's Inn (London) derives its name from Henry de Lacy, earl of Lincoln, who erected a mansion on this spot in the reign of Edward I., which had been the bishop of Chichester's palace. It became an inn of court, 1310. The gardens of Lincoln's-inn fields were laid out by Inigo Jones about 1620, and erroneously said

to occupy the same space as the largest pyramid of Egypt, which is 764 feet square; Lincoln's-inn square being 821 feet by 625 feet 6 inches. William, lord Russell, was beheaded in Lincoln's-inn fields, 21 July, 1683. The square (formed in 1618) was enclosed with iron railings about 1737. The new hall and other buildings were opened 30 Oct. 1845, and the square planted. The theatre in Lincoln's-inn fields was built in 1635; rebuilt in 1714; made a barrack in 1756, and pulled down in 1848.

Lindisfarne, or HOLY ISLAND, on the coast of Northumberland, became a bishop's see, 635. It was ravaged by the Danes under Regnar Lodbrok in 793, and the monastery destroyed by them in 875. The see was then removed to Chester-le-street, and to Durham in 995 (or 990).

Linen. Pharaoh arrayed Joseph in vestures of fine linen, 1716 B.C. (Gen. xli. 42).

First manufactured in England by Flemish weavers, under the protection of Henry III. 1253
A company of linen-weavers established in London. 1308
The art of staining linen known. about 1579
A colony of Scots in the reign of James I., and other Presbyterians who fled from persecution in succeeding reigns, planted themselves in the northeast part of Ireland, and there established the linen manufacture, which was liberally encouraged by the lord deputy Wentworth in 1634; by William III. 1698
Hemp, flax, linen, thread, and yarn, from Ireland, permitted to be exported duty free. 1696
Irish linen board established in 1711; the Linen Hall, Dublin, opened 1728; the board abolished. 1828
A board of trustees to superintend the Scotch linen manufacture established. 1727
Duty on linen taken off. 1860
Dunfermline in Fifeshire, Dundee in Angushire, and Barnsley in Yorkshire, are chief seats of our linen manufacture.

Linlithgow Bridge (near Edinburgh), near which the forces of the earl of Angus, who held James V. in their power, defeated the forces of the earl of Lennox, who, after receiving promise of quarter, was killed by sir James Hamilton, 1526. Mary queen of Scots was born in the palace of Linlithgow, 8 Dec. 1542; James V., her father, dying of a broken heart, 14 Dec.

Linnaean System of botany, arranged by Linné, or Linnaeus, a Swede, 1725-30. He classed the plants according to the number and situation of the sexual parts, and made the flower and fruit the test of his various genera. Linnaeus lived from 1707 to 1778. His library and herbarium were purchased by sir James E. (then Dr.) Smith, and given to the *Linnaean Society* in London, which was instituted in 1788, and incorporated 26 March, 1802.

Lion. True lions belong to the Old World exclusively. They existed in Europe, Egypt, and Palestine, but have long disappeared from those countries; their present country being Africa. A Lion named Pompey died in the Tower of London in 1760, after 70 years' confinement.

Mr. Gordon Cumming, the lion-slayer, published his "Sporting Adventures in South Africa" in 1850
Van Amburgh was very successful in taming lions; but many have perished through rashness. The Lion-queen was killed at Chatham, 1850; and Massarti (John McCarthy) was killed by a lion. 3 Jan. 1872
Lion Sermon preached annually on 16 Oct. at St. Katherine Cree church, London, in memory of the escape of sir John Gayer from a lion in Arabia. 16 Oct. 1630

Lion and Unicorn, the former English, the latter Scottish, became the supporters of the royal arms on the accession of James I. in 1603. The lions in Trafalgar square, designed by sir Edwin Landseer, were uncovered 31 Jan. 1867.

Lippau, see *Istusites*.

Lippe, a constitutional principality (N.W. Germany). Population, 1875, 112,452. Prince Leopold, born 1 Sept. 1821; succeeded his father, Leopold, 1 Jan. 1851; died 8 Dec. 1875—his brother Waldeemar, born 18 April, 1824, succeeded. Lippe became a member of the North German Confederation 18 Aug. 1866.

Lippstadt, see *Lützen*.

Liquefaction, see *Gases*.

Lisbon (Olisippo and Felicitas Julia of the ancients) was taken by the Arabs about 716, and became important under the Moorish kings, from whom it was captured by Alfonso I. of Portugal in 1147. It was made the capital of Portugal by Emanuel, 1506. Lisbon has suffered much by earthquakes, and was almost destroyed by one, 1 Nov. 1755; see *Earthquakes*. The court fled to the Brazils, 10 Nov. 1807; and on 30 Nov. the French, under Junot, entered Lisbon, and held it until the battle of Vimeira, in which they were defeated by the British, under sir Arthur Wellesley, 21 Aug. 1808. A military insurrection at Lisbon, 21 Aug. 1831, was soon suppressed, and many soldiers were executed; see *Portugal*. A pleasure-boat on the Tagus upset; about 60 drowned, 26 May, 1875

Lisbon Steam Tramway Company, favored by duke of Saldanha, ambassador in London; company promoted by baron Albert Grant and others; tramway could not be made (see *Trails*). July, 1876

Lisle (now Lille), N. France, has a strong citadel by Vauban. It was besieged by the duke of Marlborough and the allies; and, though deemed impregnable, was taken after a three months' siege in 1708. It was restored by the treaty of Utrecht in 1713, in consideration of the demolition of the fortifications of Dunkirk. Lisle sustained a severe bombardment from the Austrians, who were obliged to raise the siege, 7 Oct. 1792.

The French Association for the Advancement of Science met here. 20 Aug. 1874

Lismore (S. Ireland). St. Carthage, first bishop, 636, says, "Lismore is a famous and holy city, of which nearly one half is an asylum where no woman dare enter." The castle (built by king John when earl of Moreton, 1185), burned in 1645, was rebuilt with great magnificence by the duke of Devonshire. The cathedral, built 636, was repaired by Cormac, son of Muretus, king of Munster, about 1130. The bishopric was united to that of Waterford, about 1363; and both to Cashel in 1839.

Lissa, or LEUTHEN (Silesia). Here the king of Prussia vanquished Charles of Lorraine; 6000 Austrians were slain, 5 Dec. 1757.—**Lissa**, in Poland, was laid in ruins by the Russian army in the campaign of 1707.—**Lissa**, an island in the Adriatic. Near here the Italian fleet, commanded by Persano, was defeated with severe loss by the Austrian fleet, commanded by Tegethoff, 20 July, 1866.

The Italians had 23 vessels, 11 of which were iron-clads, and the Austrians had 23 vessels, 7 only being iron-clads.

Persano, when in sight of the enemy, quitted his ship, the *Ré d'Italia*, and hoisted his flag on the *Affondatore*. His iron-clads did not keep well together.

During the action, the iron-clad *Pulstro* took fire and exploded, and all on board perished (except 19 out of 200 men), exclaiming, *Viva il Ré! Viva Italia!* The *Ré d'Italia* was surrounded and sunk by the Austrians. The *Ré di Portobello* disabled the Austrian line-of-battle ship *Kaiser*, and compelled her to run ashore. Both parties soon after retired from the conflict, which had lasted four hours.

Admiral Persano was tried for misconduct and dismissed the service (see *Italy*). 15 April, 1867

Battle of Lissa.

Capt. Wm. Hoste, in the *Amphion*, with two other frigates; the *Active*, capt. J. A. Gordon; the *Cerberus*, capt. H. Whitby; and the *Vulgar*, 22 gun ship, capt. P. Hornby, defeated a Franco-Venetian squadron which attacked him; he captured two vessels, the *Corona* and *Bellona*; he was badly wounded, 13 March, 1811

Litanies (Greek *litaneia*, supplication) were first used in processions, it is said, about 469; others say about 400. Litanies to the Virgin Mary were first introduced by pope Gregory I. about 595. The first English litany was commanded to be used in the Reformed churches by Henry VIII. in 1544.

Literary Club (at first called "The Club" and "Johnson's Club"), founded by Dr. Johnson and sir Joshua Reynolds in 1764. Hawkins, Topham Beauclerk,

Goldsmith, Burke, and Bennet Langton were among the first members. The opinion formed of a new work by the club was speedily known all over London, and had great influence. The club still exists. Hallam, Macaulay, the marquess of Lansdowne, and bishop Blomfield were members; Dr. Milman, dean of St. Paul's, was in the chair at the centenary dinner on 7 June, 1864.

Literary Congress, INTERNATIONAL, met at Paris (Victor Hugo, president), 17 June; and founded "International Literary Association," 28 June, 1878; met in London, 9-14 June, 1879; at Lisbon, 20 Sept. 1880; to be at Vienna, Sept. 1881.

Literary Fund, ROYAL, was founded in 1790, to relieve literary men of all nations, by David Williams,* the friend of Benjamin Franklin, and incorporated in 1818. The king of the Belgians presided at the annual dinner, 8 May, 1872.

Literary Property, Societies, etc., see *Copyright, Societies*, etc.

Literary Production Committee of authors; proposed formation, with the object of obtaining a good price for their works, July, 1878.

Literature (see *Letters*) comprehends eloquence, poetry, history, language, and their subdivisions.

Lithium, a metal, the lightest substance in nature except the gases (its specific gravity being 0.59), is obtained from an alkaline substance termed *lithia*; discovered by M. Arfwedson, a Swede, in 1817.

Lithofracteur, or "STONE-BREAKER," an explosive material, a modification of dynamite (composed of gun-cotton, nitro-glycerine, with the constituents of gunpowder, and other substances), invented by professor Engels of Cologne, and made by Krebs in 1869. It was occasionally used by the Germans in the war of 1870-1, and was tried and well reported of for power and safety at Nant Mawy quarries, near Shrewsbury, 9, 10 May, 1871, and again on 20 Feb. 1872, before the government explosive committee, with similar results.

Lithography (drawing on stone). The invention is ascribed to Alois Sennefelder, about 1796; and shortly afterwards the art was announced in Germany, and was known as polyautography. It became partially known in England in 1801 et seq., but its general introduction is referred to Mr. Ackermann of London, about 1817. Sennefelder died in 1841. Improvements have been made by Engelmann and many others; see *Printing in Colors*.

Lithotomy. The surgical operation of cutting for the stone, it is said, was performed by Ammonius, about 240 B.C. The "small apparatus," so called from the few instruments used in the operation, was practised by Celsus, about A.D. 17. The "high apparatus" was practised (on a criminal at Paris) by Colot, 1475; by Franco, on a child, about 1566; and in England, by Dr. Douglass, about 1519. The "lateral operation," invented by Franco, much performed in Paris by Frère Jacques, in 1697, has been greatly improved. The "great apparatus" was invented by John de Romanis, and described by his pupil Marianus Sanctus, 1524.

Lithotripsy (or bruising the stone). The apparatus produced by M. Leroy d'Etiolles in 1822 has since been improved.

Prizes of 6000 and 10,000 francs were awarded M. Jean Civiale for his method of operation, 1827 and 1829.

* Floyer Sydenham, an eminent Greek scholar, of Wadham college, Oxford, and translator of some of the works of Plato, was arrested and thrown into prison for a trifling debt due for his frugal meals, and there, in 1788, died of a broken heart in want and misery, when nearly eighty years of age. The sympathy excited gave rise to this institution, since well supported. Williams was in early life a dissenting minister, and wrote on education. He was consulted by the early revolutionary party in France as to the form of a constitution for that country; he, Dr. Priestley, sir James Mackintosh, and other distinguished Englishmen having been previously declared French citizens. He died 29 June, 1816.

Lithuania, formerly a grand-duchy, N.E. of Prussia. The natives (belonging to the Slavonic race) long maintained their independence against the Russians and Poles. In 1386 their grand-duke, Jagellon, became king of Poland, and was baptized. Lithuania was not incorporated with Poland till 1501, when another duke, Casimir, became king of that country. The countries were formally united in 1569. The larger part of Lithuania now belongs to Russia, the remainder to Prussia.

Liturgies (from the Greek *laĩros*, public, and *épyon*, work). The Greek and Roman liturgies are very ancient, having been committed to writing about the fourth and fifth centuries. The Roman church recognizes four: the Roman or Georgian, the Ambrosian, the Gallican, and the Spanish or Mosarabic. The Greek church has two principal liturgies: St. Chrysostom's and St. Basil's, and several smaller ones. Parts of these liturgies are attributed to the Apostles, to St. Ignatius (250), to St. Ambrose (died 397), and to St. Jerome (died 420).

The present English Liturgy was first composed, and was approved and confirmed by parliament, in 1547-8. The offices for morning and evening prayer were then put into nearly the same form in which we now have them.

At the solicitation of Calvin and others, the liturgy was reviewed and altered. 1551
It was first read in Ireland, in the English language, in 1550, and in Scotland, where it occasioned a tumult, in 1637, and was withdrawn. 1638
The liturgy was revised by Whitehead, formerly chaplain to Anne Boleyn, and by bishops Parker, Grindall, Cox, and Pilkington, dean May, and secretary Smith.
John Knox is said to have used a liturgy for several years. The rev. Robert Lee, of Edinburgh, introduced a form of prayer in public worship, but gave it up when ordered to discontinue it in May, 1839; he soon after resumed it, and the discussion on the subject ceased only at his death. 14 March, 1868
(See *Common Prayer*.)

Liveries of the City of London. The term is derived from the custom of the retainers of the lord mayor and sheriffs wearing clothes of the form and color displayed by those functionaries. It was usual for the wardens of companies to deliver a purse containing 20s. to the lord mayor on 1 Dec. to obtain for individuals, so desiring, sufficient cloth to make a suit, and the privilege of wearing the livery. This added to the splendor of the lord mayor's train when the civic court went forth.—*Ashe*. Liveries were regulated by statute in 1392, and frequently since. The nobility gave liveries to their retainers; see *Companies*.

Liverpool (W. Lancashire) is supposed to be noticed in Domesday-book under the name *Emedune*, or *Smedune*.* Soon after the Conquest, William granted that part of the country situated between the rivers Mersey and Ribble to Roger of Poitiers, who, according to Camden, built a castle here about the year 1089. It afterwards was held by the earls of Chester and dukes of Lancaster. Population of the parliamentary borough in 1851, 375,995; in 1861, 443,938; in 1871, 493,405.

* In other ancient records its appellations are *Litherpul* and *Lyrrpul*, signifying probably, in the ancient dialect, the lower pool; though some have deduced its etymology from a pool frequented by an aquatic fowl, called the "Liver," or from a sea-weed of that name; and others from its having belonged to a family of the name of Lever, whose antiquity is not sufficiently established to justify their conclusion.

Lloyd's (London), at the Royal Exchange. About 1710, a coffee-house, kept by Edward Lloyd, Abchurch lane, became a place of meeting of merchants. After several removals it was established finally at the Royal Exchange in 1774, and remained there till the fire in 1838, when it was removed till the present building was completed in 1844. Here resort eminent merchants, etc.; and here are effected many insurances on ships and merchandise. Lloyd's is supported by subscribers who now pay annually 5*l.* 5*s.*, formerly 4*l.* 4*s.* The books kept here contain an account of the arrival and sailing of vessels, and are remarkable for their early intelligence of maritime affairs. In 1803, the subscribers instituted the *Patriotic Fund* (which see). The *Austrian Lloyd's*, an association for general, commercial, and industrial purposes, was founded at Trieste, by Baron Bruck, in 1833. It has established regular communication between Trieste and the Levant by means of a fleet of steamers carrying the mails, and publishes a journal.

 A subscription loan (18,000,000*l.*), to carry on the war against France, filled up in London in 15 hours and 20 minutes (see *Loyalty Loans*), 5 Dec. 1796.

French loan on 9 July, 1855, on account of the war with Russia. The French legislature passed a bill for raising by loan 750 million francs (90,000,000*l.* sterling). On the 30th the total subscribed in France amounted to 3,652,591,986 francs (about 146,103,679*l.*), nearly five times the amount required; 2,533,828,450*fr.* were from Paris; from the departments, 1,118,763,535*fr.* The number of subscribers was 316,864. No less than 231,920,155 francs were made up by subscription of 50 francs and under. About 600 millions came from foreign countries. The English subscription of 150,000,000 francs was returned, as double the amount required had been proffered. The French government raised a loan of 20,000,000*l.* for the Italian war from its own people without difficulty, May, 1859. A *Turkish loan*, in 1854, at 7½ per cent., recommended by lord Palmerston; a loan of 5,000,000*l.*, at 4 per cent., on the security of England and France, was taken up by Rothschild in Aug. 1855, and was well received: the stock rose to a small premium.

French loan for 17,600,000*l.* announced 29 Jan. 1868.

French loan for 2,000,000,000 francs (80,000,000*l.*); nearly twice the amount subscribed in France alone, 28 June, 1871; another loan (of 120,000,000*l.* at 6½ per cent.), for speedy payment of the indemnity and evacuation of the provinces held by the Germans; announced 26 July 1872; above twice the amount subscribed; see *France*.

Foreign Loans Committee: appointed to inquire concerning certain loans to Honduras, Costa Rica, and Paraguay, in their report comment on the exaggerated statements respecting the revenues and resources of the states in the prospectuses, the efforts of the contractors to make fictitious markets; the proceedings on the stock exchange to main-

tain their prestige, the secrecy adopted in the proceedings: "the best security against the recurrence of such evils will be found, not so much in legislative enactments as in the enlightenment of the public as to their real nature and origin, thus rendering it more difficult for unscrupulous persons to carry out schemes... which have ended in so much discredit and disaster," July, 1875.

Lobsters and Crabs. The size at which they are to be sold is regulated by the Fisheries act, 1877.

Local Government Act, passed in 1888, was amended in 1891.

Local Government Board (a new department of the government, comprising the supervision of the public health and local government, together with the powers and duties of the Poor-law Board) was established in pursuance of an act passed 14 Aug. 1871. First president, Mr. James Stansfeld, appointed president of the Poor-law Board, March, 1871. Mr. (now Sir John) Lambert, C.B., first secretary, appointed Sept. 1871.

Local Loans Act, passed 18 Aug. 1875.

Lochleven Castle (Kinross), built on an isle in Loch Leven, it is said by the Picts, was the royal residence of Alexander III. and his queen when taken from it to Stirling. It was besieged by the English in 1301, and in 1334. Patrick Graham, first archbishop of St. Andrews, imprisoned for attempting to reform the church, died here about 1478. The earl of Northumberland was confined in it, 1569. It was the place of queen Mary's imprisonment in 1567, and of her escape on Sunday, 2 May, 1568.

Look Hospital, established 1747; the asylum, 1787.

Look's Act, 23 & 24 Vict. c. 127 (1860), relates to legal proceedings.

Look-outs, see *Strikes*.

Locks, early used by the Egyptians, Greeks, Romans, and the Chinese. Dannon has engraved an Egyptian lock of wood. Du Cange mentions locks and padlocks as early as 1381.

Barron's locks (on the many-tumbler principle) were patented in 1774, Hramah's in 1789, and Chubb's "detector" locks in 1818.

Mr. E. Heekott Doulson (now Sir Edmund Beckett) invented a lock asserted to be secure against picking, in 1892. New locks have been produced by Messrs. Day and Newell, Yale, Andrews, and others, especially in America. Mr. Hobbs, an American, exhibited his own locks in the Crystal Palace in 1851, and showed great skill in picking others.

Locomotives, see *Railways*. The use of steam locomotives on ordinary roads is regulated by acts passed in 1861, 1865, and 1878.

Loori, a people of Northern Greece. They resisted Philip of Macedon, were aided by the Athenians and Thebans, and defeated by him at Charonea, 7 Aug. 338 B.C.

Locusts, one of the plagues of Egypt, 1491 A.C. (Exod. x.). Owing to the putrefaction of vast swarms in Egypt and Libya, upwards of 800,000 persons are said to have perished, 128 A.C. Palestine was infested with such swarms that they darkened the air; and, after devouring the fruits of the earth, they died, and their intolerable stench caused a pestilential fever, A.D. 406. A similar catastrophe occurred in France in 678. A swarm of locusts settled upon the ground about London, and consumed the vegetables; great numbers fell in the streets; they resembled grasshoppers, but were three times the

size, and their colors more variegated, 4 Aug. 1748. They infested Germany in 1749, Poland in 1750, and Warsaw in June, 1816. They are said to have been seen in London in 1857. Russia was infested by them in July, 1808; Algeria, severely, in 1866 and in 1874; Sardinia, in 1868; Kansas, Nebraska, and Minnesota, U.S., 1873-4.

Lodgers paying 10*l.* a year for a whole year for apartments without furniture acquired the suffrage, by Reform act passed 15 Aug. 1867. Act to protect their goods from distraint, passed 16 Aug. 1871.

Lodging-houses. An act placing common lodging-houses under the watch of the police was passed in 1851. In that year a model lodging-house erected by prince Albert appeared at the Great Exhibition. Since then, blocks of lodging-houses for the poor have been erected by baroness Burdett-Coutts and others. Mrs. Peabody's donation of 12 March, 1862, has been appropriated for a similar purpose; see *Peabody*. On 19 Nov. 1868, the city of London voted 20,000*l.* and a piece of land in Victoria street (now Farringdon road) for the purpose. See *London*, 1845.

Lodi (N. Italy). Napoleon Bonaparte, commanding the French army, totally defeated the Austrians, under Beaulieu, after a bloody engagement at the bridge of Lodi, 10 May, 1796. The republican flag floated in Milan a few days after.

Logarithms, the indexes of the ratio of numbers one to another, were invented by baron Napier of Merchiston, who published his work in 1614. The invention was completed by Mr. Henry Briggs at Oxford, who published tables, 1616-18. The method of computing by means of marked pieces of ivory was discovered about the same time, and hence called *Napier's bones*.

Logic, "the science of reasoning." Eminent works on it are by Aristotle; Bacon, "Novum Organon;" Locke "On the Understanding;" and modern treatises on logic, by archbishop Whately, Sir William Hamilton, and Mr. John Stuart Mill.

Earl Stanhope's *Demonstrator*, or *Logical Machine*, invented in the latter part of the eighteenth century, was described by rev. Robert Harley to the British Association, 19 Aug. 1878.

In his "Principles of Science," 1874, Mr. Wm. Stanley Jevons describes his "Logical Abecedarium" and "Logical Signs." G. Boole on "Laws of Thought," 1852.

J. Venn's "Symbolic Logic," July, 1891.

Logierian System of musical education, commenced by J. B. Logier, in Jan. 1815, and introduced into the chief towns of the United Kingdom, Prussia, etc. He died 1846.

Log-line, used in navigation, about 1570; first mentioned by Bourne in 1577. It is divided into spaces of 50 feet, and the way which the ship makes is measured by a half-minute sand-glass, which bears nearly the same proportion to an hour that 50 feet bear to a mile; the line used in the royal navy is 48 feet.

Logograph, apparatus invented by Mr. W. H. Barlow, about 1874, to give graphic representation of the vibratory motions of the air-waves of speech, somewhat resembling a telegraphic message.

Logographic Printing, in which the commoner words were cast in one mass, was patented by Henry Johnson and Mr. Walker of the *Times* in 1788. Anderson's "History of Commerce," vol. iv., was printed by these types in 1789.

Logroño, see *Najera*.

Loi des Suspects, enacted by the French convention, 17 Sept. 1793, during the Reign of Terror, filled the prisons of Paris. The Public Safety bill, of a similar character, was passed 18 Feb. 1856, shortly after Orsini's attempt on the life of the emperor Napoleon III.

Lollards (by some derived from the German *lollen*, to sing in a low tone), the name given to the first reformers of the Roman Catholic religion in England, the

followers of Wicliffe. The sect is also said to have been founded in 1315 by Walter Lollard, who was burned for heresy at Cologne in 1322. The Lollards are said to have devoted themselves to acts of mercy. The first Lollard martyr in England was William Sawtree, parish priest of St. Osith, London, 12 Feb. 1401, when the Lollards were proscribed by parliament, and numbers of them were burned alive. Sir John Cobham, lord Oldcastle, a follower of Wicliffe, was accused of treason and condemned, Sept. 1413. He escaped to Wales, where he was captured, and brought to London and burned, 25 Dec. 1418. Lollards' Tower, part of the bishop's prison, was near St. Paul's, not Lambeth palace.—*Dr. Mailland.*

Lombard Merchants, in England, were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice.—*Anderson.* Lombard usurers were sent to England by pope Gregory IX. to lend money to convents, communities, and private persons who were not able to pay down the tenths which were collected throughout the kingdom with great rigor that year, 13 Hen. III. 1299. They had offices in the street named after them to this day. Their usurious transactions caused their expulsion from the kingdom in the reign of Elizabeth.

Lombardists, disciples of Peter Lombard, the schoolman, bishop of Paris, author of the "Book of Sentences," who died in 1164.

Lombardy (N. Italy) derived its name from the Langobardi, a German tribe from Brandenburg, said (doubtfully) to have been invited into Italy by Justinian to serve against the Goths. Their chief, Alboin, established a kingdom which lasted from 568 to 774. The last king, Desiderius, was dethroned by Charlemagne. (For a list of the Lombard kings, see *Italy*.) About the end of the ninth century the chief towns of Lombardy fortified themselves, and became republics. The first *Lombard league*, consisting of Milan, Venice, Pavia, Modena, etc., was formed to restrain the power of the German emperors, in 1167. On 29 May, 1176, they defeated the emperor Frederick Barbarossa at Legnano, and eventually compelled him to sign the peace of Constance in 1183. In 1226 another *league* was formed against Frederick II, which was also successful. After this, petty tyrants rose in most of the cities, and foreign influence quickly followed. The Guelph and Ghibelline factions greatly distracted Lombardy, and from the fifteenth century to the present time it has been contended for by the German and French sovereigns. The house of Austria obtained it in 1748, and held it till 1797, when it was conquered by the French, who incorporated it with the Cisalpine republic, and in 1805 with the kingdom of Italy. On the breaking-up of the French empire in 1815, the LOMBARD-VENETIAN KINGDOM was established by the allied sovereigns and given to Austria, who had lost her Flemish possessions. Lombardy and Venice revolted, and joined the king of Sardinia in March, 1848; but they did not support him well, and were again subjected to Austria after his defeat at Novara, 23 March, 1849. An amnesty for political offences was granted in 1856. Great jealousy of Sardinia was felt by Austria after 1849. In 1857 diplomatic relations were suspended; and in April, 1859, war broke out; the Austrians crossing the Ticino and entering Piedmont. The French emperor declared war against Austria, and immediately sent troops into Italy. The Austrians were defeated at Montebello, 20 May; Palestro, 30, 31 May; Magenta, 4 June; and Solferino, 24 June. By the peace of Villafranca (11 July), the largest part of Lombardy was ceded to Louis Napoleon, who transferred it to the king of Sardinia. It now forms part of the new kingdom of Italy, to which Venetia was also surrendered by the treaty of Vienna, 3 Oct. 1867.

Lonato (Brescia, N. Italy). Here Napoleon Bonaparte defeated Wurmser and the Austrians, 3 Aug. 1796.

London. Some assert that a city existed on the spot 1107 years before the birth of Christ, and 354 years

before the foundation of Rome*—that it was the capital of the Trinobantes, 54 a.c., and long previously the seat of their kings. In A.D. 61 it was known to the Romans as Londinium, or Colonia Augusta, and the chief residence of the merchants. It is said, but not truly, to have derived its name from Lud, an old British king, who was buried near where Ludgate formerly stood; but its name is from *Llyn-din*, the "town on the lake."† It became the capital of the Saxon kingdom of Essex, and was called *Lundenceaster*. In 1860, London and the suburbs were estimated to cover 121 square miles (11 miles each way, being three times as large as in 1800); in 1880, 122 square miles. The population of the metropolitan districts in 1851 was 2,362,236; in 1861, 2,808,862; in 1871, 3,264,530; in 1881 (3 April), 3,814,571. The population of the "city" in 1801, 156,859; in 1811, 120,909; in 1821, 125,434; in 1831, 125,574; in 1841, 125,008; in 1851, 122,440; in 1861, 112,063; in 1871, 74,897; in 1881, 50,526. * The fables of Geoffrey of Monmouth state that London was founded by Brute, a descendant of the Trojan Aeneas, and called New Troy, or Troy-novant, until the time of Lud, who surrounded it with walls, and gave it the name of Caer Lud, or Lud's town, etc.—*Leigh*.

† The original walls of London said to have been the work of Theodosius, Roman governor of Britain, 379; but they are supposed to have been built about 300. There were originally four principal gates, but the number increased; and among others were the Praetorian way, Newgate, Dowgate, Cripplegate, Aldgate, Aldersgate, Ludgate, Bridgegate, Moorgate, Bishopsgate, and the Postern on Tower hill. Eight gates were removed in 1760-1, and the last of the city boundaries, Temple Bar (rebuilt 1670-2), was removed early in Jan. 1878.

‡ It is still preserved in the city archives. This charter is written in beautiful Saxon characters, on a slip of parchment six inches long and one broad, and is in English as follows: "William the king greeteth William the bishop, and Godfrey the portreeve, and all the burgesses within London, friendly. And I acquaint you that I will that ye be all there law-worthy as ye were in king Edward's days. And I will that every child be his father's heir, after his father's days. And I will not suffer that any man do you any wrong. God preserve you."

§ Stow incorrectly states this charter to have been given in 1209, but it bears date 19 May in the 16th year of king John's reign, which began in 1199. This charter was acted on at that period in various instances, as many of the mayors were afterwards continued in their offices for several years together; and the same right was exerted in the case of Mr. Alderman

Wood, who filled the office of lord mayor during two succeeding years, those of 1816 and 1817.—*Leigh*.

* This terrible pestilence broke out in India, and, spreading itself westward through every country on the globe, reached England. Its ravages in London were so great that the common cemeteries were not sufficient for the interment of the dead, and various pieces of ground without the walls were assigned for burial-places. Among these was the waste land now forming the precincts of the Charterhouse, where upwards of 50,000 bodies were then deposited. This disorder did not subside till 1357.—*Leigh*.

† This proclamation or decree was dated from Nonesuch, 7 July, 1580, and it was forbidden to erect new buildings where none had before existed in the memory of man. The extension of the metropolis was deemed calculated to encourage the increase of the plague, create a trouble in governing such multitudes, a dearth of victuals, multiplying of beggars, and inability to relieve them; an increase of artisans more than could live together; impoverishing other cities for lack of inhabitants. The decree stated that lack of air, lack of room to walk and shoot, etc., arose out of too crowded a city. A proclamation to the same effect was also issued by James I.

London Bridge. One is said to have existed 970. A bridge built of wood, 1014, was partly burned in 1184. The late old bridge was commenced about 1176 by Peter of Colechurch, and completed in 1208, with houses on each side, connected together by large arches of timber which crossed the street.

A fire at the Southwark end brought crowds on the bridge, the houses at the north end caught fire likewise, and prevented their escape; and upwards of 3000 persons lost their lives, being either killed, burned, or drowned. July, 1513
 The bridge rustered in 1800, again destroyed by fire in 1871, 13 Feb. 1892, and Sept. 1795
 All the houses pulled down 1796
 Water works begun, 1802, destroyed by fire 1774
 The toll discontinued 27 March, 1798
 In 1892 the corporation advertised for designs for a new bridge, that by John Rennie was approved, and the works were executed by his sons John and George. The first pile was driven 300 feet to the west of the old bridge, 15 March, 1826, the first stone was laid by the lord mayor, alderman Garrett 15 June, 1826
 The bridge opened by William IV. and his queen, 1 Aug. 1826
 The cost was 800,000l.
 Plans for widening the bridge rejected 1875
 It was reported that on 17 March, 1880, there passed over London bridge 20,486 vehicles (of which 4488 were cabs, and 4288 omnibuses, and 107,914 persons (107,974 on foot, and 60,886 in vehicles).

London Institution "for the advancement of literature and the diffusion of useful knowledge," in imitation of the Royal Institution, was founded in 1805, by sir Francis Baring, bart., and others, at 8 Old Jewry, Cheapside, and incorporated 30 April, 1815. Prof. Porson, the first librarian, died 25 Sept. 1808. The present building in Finsbury circus was opened on 21 April, 1819; the first lecture was delivered by Mr. W. T. Brande, on 5 May following. Mr. W. R. Grove, Q.C. (afterwards justice) (the inventor of the Voltaic battery which bears his name), was the first professor of experimental philosophy, 1840-6. The institution possesses an excellent library, lecture-room, and laboratory. Thomas Baring, M.P., long president, died 18 Nov. 1873; succeeded by Dr. Warren De la Rue.

London Library (circulating), at first in Pall Mall, now in St. James's square, was founded by lord Eliot and others, 24 June, 1840, and opened 1 May, 1841. The latest catalogue was printed in 1875.

London Missionary Society, established 1795. In 1878 there were 151 European and 543 ordained native missionaries; receipts in 1877, 114,853*l*.

London Philanthropic Society was founded, 1841, to supply bread and coal to the poor.

London Sacred Harmonic Society, formed after the dismissal of Mr. Surman, conductor of the Sacred Harmonic Society, 6 March, 1848; gave last concert 22 Dec. 1856.

London Stone. A stone said to have been placed by the Romans in Cannon street, then the centre of the city, 15 A.C. London stone was known before the time of William I. It was removed from the opposite side of the way in 1742; and again moved to its present position in the wall of St. Swithin's church, 1798. It was against this stone that Jack Cade struck his sword, exclaiming, "Now is Mortimer lord of this city!" 1450.

London, University of. The "London University" was founded by the exertions of lord Brougham, Thomas Campbell, and others; the deed of settlement dated 11 Feb. 1826. The building was commenced 30 April, 1827 (when the first stone was laid by the duke of Sussex); and was opened by an inaugural lecture from prof. Bell, 1 Oct. 1828. On 28 Nov. 1836, two charters were granted: by one the "London University" was changed to "University College," and by the other the University of London was established, with a chancellor and other officers. New charters were granted to the latter on 5 Dec. 1837 and 21 April, 1856. It has power to grant degrees to students of the universities of the United Kingdom, and of many collegiate establishments; and to women, by a supplemental charter, 1878. Its offices were long in Burlington House, Piccadilly, London. The university was enfranchised by the Reform act of 1867, and Robert Lowe was elected the first M.P. 17 Nov. 1868; succeeded by sir John Lubbock, June, 1880. The new buildings in Burlington gardens, erected by Mr. Pennethorne, were inaugurated by the queen 11 May, 1870.—*University Hall*, Gordon square, was founded in 1847.—*University College*, new buildings opened, Oct. 1880.

London Water Supply.

Metropolitan Board of Works undertook to supply water from the Chalk, and also from the Thames above Teddington, with two sets of pipes, for 12,000,000*gals*. 1878
Negotiations with the water companies by Mr. Smith, begun Oct. 1879; annuities proposed to be given to the companies, 29,734,261*l*., with additional payments

making in all a capital payment of 33,018,836*l*.; yearly interest to be paid by the consumers, 1,240,673*l*.

London Water-supply Commission (sir William Harcourt, chairman) appointed 3 June, reported recommending water-supply to be placed under control of some responsible body (or water trust) to be created; non-acceptance of Mr. Smith's proposal; that the undertakings of existing companies be purchased upon fair and reasonable terms—if not, the endeavor to obtain an independent supply; signed. 3 Aug. 1880

Londonderry, or **DERRY** (N. Ireland), mentioned 546. An abbey here was burned by the Danes in 788. A charter was granted to the London companies in 1615. The town was surprised, and sir George Powlett, the governor, and the entire garrison were put to the sword by rebels, in 1606. It was besieged by O'Neill in 1641. A grant was made of Derry, with 210,000 acres of land, to various companies in London, in 1619, when it took its present name. The siege of Derry by James II.'s army commenced 20 April, 1689. The garrison and inhabitants were driven to the extremity of famine; but, under the rev. George Walker, they defended it until the siege was raised by gen. Kirke, on 30 July. James's army, under the French general Rosen, retired with the loss of about 9000 men. Foyle College act passed, 1874. A grand iron bridge over the Foyle opened 1 Jan. 1878.

Lone Star, a secret society formed in 1848, in Alabama and other southern states of the North American Union, for the "extension of the institutions, power, influence, and commerce of the United States over the whole of the western hemisphere, and the islands of the Atlantic and Pacific oceans." The first acquisitions to be made by the order were Cuba and the Sandwich Islands. The knowledge of the existence of this society reached England in Aug. 1852.

Long Island, BATTLE OF, 27 Aug. 1776, between the British troops under sir William Howe, and the Americans, who suffered a severe defeat, after a well-fought action, losing 500 men killed and wounded and 1000 prisoners. Under cover of a fog Washington succeeded in withdrawing his army across the East river before the British could take advantage of their victory.

Long Parliament met 3 Nov. 1640; was forcibly dissolved by Cromwell 20 April, 1653.

Longevity. Methuselah died aged 969, 349 A.C. (Gen. v. 27). Gollur M'Crain of the Isle of Jura, one of the Hebrides, is mythically said to have kept 180 Christmases in his own house, and died in the reign of Charles I. being the oldest man in anything approaching to authentic records for upwards of 3000 years.—*Greig*. "In 1014 died Johannes de Temporibus, who lived 361 years (b)"—*Stone*. Thomas Parr, a laboring man of Shropshire, was brought to London by the earl of Arundel in 1635, and said to be in his 158th year (?) and in perfect health; he died 15 Nov. in the same year. Henry Jenkins, of Yorkshire, died in 1670, and was buried in Bolton churchyard, 6 Dec., aged 169 years (?). The researches of sir G. Cornwall Lewis, prof. Owen, Mr. Wm. J. Thoms (in his "Human Longevity," May, 1873), and others, have disproved many alleged cases of longevity; and few statements of lives extending much beyond a century can be relied on. There were no records of baptism till the sixteenth century.

Longitude, determined by Hipparchus, at Nice, who fixed the first degree in the Canaries, 163 B.C. Harrison made a time-keeper, in 1759, which in two voyages was found to correct the longitude within the limits required by the act of parliament, 12 Anne, 1714; and obtained the reward; see *Harrison's Timepiece*. The chronometers of Arnold, Earnshaw, and Breguet are highly esteemed. Chronometers are now received on trial at Greenwich Observatory. The act relating to the discovery of the longitude at sea was repealed in 1828. The Bureau des Longitudes at Paris was established in 1795.

Loom, was used by the Egyptians. The weaver's, otherwise called the Dutch, loom was brought into use in London from Holland, about 1678. There were in 1825 about 250,000 hand-loom in Great Britain, and 75,000 power-loom, each being equal to three hand-loom making twenty-two yards each per day. The steam-loom was introduced in 1807; see *Cotton, Electric Loom, Jacquard, Pneumatic Loom*.

Loosahais, a predatory nomadic Indian tribe, about 800 miles east of Calcutta. They frequently robbed the British tea plantations, killing the planters and carrying off their children. An expedition to chastise them was successful, Dec. 1871.

Lopez Expeditions. Gen. Lopez, a native Cuban, formed an expedition in the United States to invade

Cuba, excite the people to insurrection, and secure the independence of the island. He landed at Cardenas, in Cuba, with about 600 men, in April, 1850. After an obstinate engagement he took the town, but in a skirmish with government troops soon afterwards he lost many men. Lopez, with others, escaped and returned to the United States. In the summer of 1857 Lopez made another attempt with 400 men, chiefly Americans. On 11 Aug. he landed on the northern coast of Cuba, where he left Col. Crittenden, a Kentuckian, and 100 men, and started to the interior, expecting to be joined by the people. He was disappointed. His little army was attacked and dispersed, Crittenden and his party were captured, taken to Havana, and shot. Lopez and six of his companions were also captured, and afterwards executed at Havana by the garrote.

Lord, see *Lordy*.—When printed in the English Bible in small capitals, **Lord** stands for Jehovah, the self-existing God, the name first revealed to Moses, 1491 B.C. (Exod. vi. 3). When **Lord** is in ordinary type, it represents *Adonai*, *lord* or *master*.

Lords.* The nobility of England date their creation from 1066, when William Fitz-Osborn is said to have been made earl of Hereford by William I.; and afterwards Walter d'Evreux, earl of Salisbury; Copai, earl of Northumberland; Henry de Ferrers, earl of Derby; and Gerodun (a Fleming), earl of Chester. Twenty-two other peers were made in this sovereign's reign. The first peer created by patent was lord Beauchamp of Holt Castle, by Richard II., in 1387. In Scotland, Gilchrist was created earl of Angus by Malcolm III., 1087. In Ireland, sir John de Courcy was created baron of Kinsale, etc., in 1181; the first peer after the obtaining of that kingdom by Henry II.

Lords, House of. The peers of England were summoned *ad consensendum*, to consult, in early reigns, and by writ, 6 & 7 John, 1205; but the earliest writ extant is 49 Hen. III. 1265. The commons did not form a part of the great council of the nation until some ages after the Conquest; see *Parliament*. The house of lords includes the spiritual as well as temporal peers of Great Britain. The bishops are supposed to hold certain ancient baronies under the king, in right whereof they have seats in this house. Some of the temporal lords sit by descent, and some by creation; others by election, since the union with Scotland in 1707, and with Ireland, 1801.—Scotland elects 16 representative peers, and Ireland 28 temporal peers for life. The house of lords, in Jan. 1881, consisted of 4 princes of the blood, 3 archbishops, 22 dukes, 19 marquesses, 188 earls, 82 viscounts, 271 barons, and 94 bishops: in all 612.

* Peers of England are free from all arrests of debts, as being the king's hereditary councillors; therefore a peer cannot be outlawed in any civil action, and no attachment lies against his person; but execution may be taken upon his lands and goods. For the same reason, they are free from all attendance at courts leet or borough courts; or, in case of a riot, from attending the peace confidants. He can act as a justice of the peace in any part of the kingdom. See Baron, Part. six.

Loretto, near Ancona, Italy. Here is the *Casa Santa*, or Holy House, in which it is pretended the Virgin Mary lived at Nazareth, and said to have been carried by angels into Dalmatia from Galilee in 1291, and brought here a few years after. The Lady of Loretto, gaudily dressed, stands upon an altar holding the infant Jesus in her arms, surrounded with gold lamps. Loretto was taken by the French in 1797; the holy image, which had been carried to France, was brought back with pomp, 5 Jan. 1803.

L'Orient (W. France). Lord Bridport, off this port, defeated the French fleet, 23 June, 1795. The loss of the French was severe; that of the British inconsiderable.—The French flag-ship *L'ORIENT* blew up during the battle of the Nile, 1 Aug. 1798. Admiral Brueys and about 900 men perished.

Lorraine (Lotharingia), formerly a French, now a German, province, became a kingdom under Lothaire (son of the emperor Lothaire I.) about 855; and was divided at his death, in 869, part of it being made a duchy. From the first hereditary duke, Gerard, nominated by the emperor Henry III. in 1048, descended the house of Lorraine, represented now by the emperor of Austria, whose ancestor, the empress Maria Theresa, married in 1736 Francis, formerly duke of Lorraine, then of Tuscany. Lorraine, given to the dethroned king of Poland, Stanislaus I., for life, was at his death, in 1766, united to France; see *Nancy*. Lorraine was the seat of war in Aug. 1870, and about the fifth part, including Metz and Thionville, was annexed to Germany at the peace, 26 Feb. 1871.

Lots. Casting lots, as an appeal to God, was sacred among the Jews, Prov. xvi. 33. It was employed in the division of the land of Canaan, about 1444 B.C., by Joshua (xiv.), and in the election of Matthias the apostle, A.D. 33, Acts i.—Lots for life or death have been frequently cast. For an instance, see *Wales*, 1649, note.

Lotteries are said to have originated in Florence about 1530, and to have been legalized in France in 1539, and soon became common. They were prohibited by pope Benedict XIII. (1724-30), and sanctioned by Clement XII. (1730-40). See *Art Union* under *Arts*.

James Parke, 10 Jan. 1856; the house of lords opposed his sitting and voting as a peer for life, and on 25 July, 1856, he was created a peer in the usual way, with the title of Lord Wensleydale of Walton. He died in 1864. A bill for creating life peerages was read a second time (in the lords) 27 April, 1869, but afterwards rejected.

Louvre, in Paris, is said to have been a royal residence in the reign of Dagobert, 628. It was a prison-tower constructed by Philippe Augustus in 1204. It afterwards became a library, and Charles VI. made it his palace (about 1364). The new buildings, begun by Francis I. in 1528, were enlarged and adorned by successive kings, particularly Louis XIV.—Napoleon I. turned it into a museum, and deposited in it the finest

collection of paintings, statues, and treasures of art known in the world. The chief of those brought from Italy have since been restored to the rightful possessors. The magnificent buildings of the new Louvre, begun by Napoleon I. and completed by Napoleon III., were inaugurated by the latter in great state, 14 Aug. 1857. The library was destroyed and other buildings much injured by the communists, May, 1871.

Lubeck, a city in N. Germany, one of the four republics of the German Confederation, was built in the twelfth century, and was chief founder of the Hanseatic League about 1240, which lasted till 1630. Lubeck was declared a free imperial city about 1226; but was frequently attacked by the Danes. The French took it by assault, 6 Nov. 1806, and Napoleon incorporated it with his empire in 1810. On his fall in 1814 it became once more a free imperial city. It joined the North German Confederation 18 Aug. 1866. Population in 1871, 52,158; in 1875, 56,912.

Lucanians, a warlike people of S. Italy, defeated Alexander of Epirus at Pandosia, 332 B.C.; were subdued by the Romans, 272; revolted after the battle of Cannæ, 216; were reduced by Scipio, 201; again revolted, 90; admitted as Roman citizens, 88.

Lucca (central Italy), a Roman colony, 177 B.C., a Lombard duchy, A.D. 1327; a free city about 1370; took an active part in the civil wars of the Italian republics. It was united with Tuscany, and given as a principality to Eliza Bonaparte by her brother Napoleon I., 1805. Lucca, as a duchy, was given to Maria Louisa, widow of Louis, king of Etruria, in 1814. It was exchanged by her son Charles Louis for Parma and Placentia in 1847; was annexed to Tuscany, and with it became part of the kingdom of Italy in 1860.

Lucerne (Switzerland) became independent in 1332, and joined the confederation. The city Lucerne is said to derive its name from a light (*lucerna*) set up to guide travellers. It dates from the eighth century, and was subject to the abbots of Murbach, who surrendered it to the house of Hapsburg. It was taken by the French in March, 1798, and was for a short time capital of the Helvetic republic; which, as the focus of insurrection against the French, was suppressed Oct. 1802. As a Catholic canton, Lucerne was very active on behalf of education by the Jesuits, 1844; see *Switzerland*.

Lucia, St. (West Indies), first settled by the English, 1639; expelled by the natives; settled by French in 1650; taken by the British several times in the subsequent wars. Insurrection of the French negroes, April, 1795. St. Lucia was restored to France at the peace of 1802; but was seized by England, 1803, and confirmed to her in 1814. Population in 1871, 81,811; 710 whites. In 1876, 34,848; 910 whites.

Lucifer-matches came into use about 1834. Friction matches were invented by Walker of Stockton-on-Tees, 1829. In March, 1842, Mr. Reuben Partridge patented machinery for manufacturing the splints. In 1845, Schrötter of Vienna produced his amorphous phosphorus (by heating ordinary phosphorus in a gas which it cannot absorb), by the use of which lucifers are rendered less dangerous, and the manufacture less unhealthy. *Phosphoros* (Greek) and *lucifer* (Latin) both signify *light-bearer*.

Mr. Lowe's proposed tax on lucifers (with "*Ex luce lucellum*" on the box) was much opposed and withdrawn, April, 1871. For their exertions, a drinking-fountain at Bow was inaugurated as a memorial to Bryant and May, 5 Oct. 1872. The match manufacture was made a monopoly in France in Oct. 1872, for 750,000.

Luconnow, the capital of Oude since 1675; see *Oude*, and *India*, 1857. Visit of prince of Wales, Jan. 1876.

Luddites. Large parties of men under this designation, derived from Ned Lud, an idiot, who once broke some frames in a passion, commenced depredations at Nottingham, breaking frames and machinery, Nov. 1811. Skirmish with the military there, 29 Jan. 1812. Serious riots occurred again in 1814; and numerous bodies of unemployed artisans committed great excesses in 1816 et seq. Several of these Luddites were tried and executed, 1818 and 1818; see *Derby*.

Lugdunum, see *Leyden* and *Lyons*.

Luminous Paint, invented by Mr. W. H. Balmain, of University College, London; patented by Ihlee and Horne, of London.

Phosphorescent materials, lime and sulphur mixed with oil or water; clock-faces, statues, etc., painted with this mixture, exposed to light, remain luminous for some time.

Lunar Society, Birmingham, about 1780. The members, Joseph Priestly, James Watt, Erasmus Darwin, Dr. Withering, and others, met near the full of the moon, to discuss philosophy and politics.

TREATMENT OF THE INSANE.

Till the end of the last century lunatics were treated with cruel severity; see Conolly "On the Treatment of the Insane," 1864.	
The insane were exhibited at Bethlem as a show for 1d. or 2d. till	1770
Enlightened principles of treatment were introduced by William Tuke at the Society of Friends' "Retreat," at York, and by Pinel, at the Bicêtre, Paris, with very great success.	1792
Esquirol succeeds Pinel, and strongly recommends instruction in the management of mental disorders.	1810
Exposure of enormous cruelties in the Bethlem hospital. This led to gradual improvements, and at last to the total abolition of mechanical restraints at Lincoln, 1837; and at Hanwell Asylum (under the superintendence of Dr. John Conolly) and at other places.	1815

In 1861, there were in Ireland nearly 15,000 lunatics of all classes; in Scotland in 1851, 3362 in charge; in 1855, 7403, of which only 3328 were under the protection of the law.

Lunatics in the United States. In 1870, the latest date for which returns are available, there were in the United States 37,432 insane persons, and 74 institutions for their reception and treatment. The Friends' asylum, Philadelphia, established in 1817, and the McLean asylum at Somerville, Mass., established 1818, are the oldest existing institutions of this character in the United States.

Lund Hill, near Barnsley, in S. Yorkshire. While the miners were dining in the pit, 19 Feb. 1857, the inflammable gas took fire and exploded. About 189 miners perished. In April and May bodies were still being extricated. There had been great laxity of discipline in the pit. 7000*l.* were subscribed for the bereaved.

Lundy's Lane, BATTLE OF, near Niagara Falls, fought 24 July, 1814. This desperate battle, between 2600 Americans and 4500 British, began about sunset and ended at midnight. The British were driven from the field and their principal battery captured; but they reoccupied their position during the night. American loss, 852; British, 878.

Luneburg, see *Brunswick*.

Luneville (France), PEACE OF, concluded between the French republic and the emperor of Germany, confirmed the cessions made by the treaty of Campo Formio, stipulated that the Rhine, as far as the Dutch territories, should form the boundary of France, and recognized the Batavian, Helvetic, Ligurian, and Cisalpine republics, 9 Feb. 1801.

Lupercalia, a yearly festival observed at Rome on 15 Feb. in honor of Pan, destroyer of wolves (*lupi*), instituted by the Romans, in memory of Romulus and Remus, according to Plutarch; but, according to Livy, brought by Evander into Italy. These feasts are said to have been abolished in 496, by pope Gelasius, on account of their great disorders.

Lusatia, a marquisate in N. Germany, given to John of Bohemia, 1319; obtained by Matthias of Hungary, 1478; ceded to Saxony in 1635.

Lusiad, the great epic poem of the Portuguese, written in honor of their discoveries in India, by Luis de Camoens, and published by him at Lisbon, 1572. The English translations are by sir Richard Fanshawe, 1655; by William Julius Mickle, 1775, and others; the latest and best by J. J. Aubertin, 1878.

Lusitania, see *Portugal*.

Lustrum, an expiatory sacrifice made for the Roman people, at the end of every five years, after the census had been taken, 472 B.C. Every fifth year was called a *lustrum*; and ten, fifteen, or twenty years were commonly expressed by two, three, or four *lustra*. The number of Roman citizens was, in 293 B.C., 272,308; 179 B.C., 273,294; 70 B.C., 450,000; 28 B.C., 4,164,060; A.D. 48, 5,984,072. The last lustrum took place 74.

Lute, an ancient instrument of Oriental origin (Arabic, *al'ud*); said to have been brought to Mecca in the

sixth century A.D., and thence to Europe. J. S. Bach and others composed for the Western lute in the eighteenth century.

Lutheranism,* the form of Christianity professed by the majority of the people of the north of Germany, Prussia, Denmark, and Sweden. The doctrines are mainly embodied in Luther's catechisms, in the Augsburg Confession, and in the *Formula Concordiæ* of the Lutherans, published in 1580. Their first university was founded at Marburg in 1527, by Philip, landgrave of Hesse. The Luther memorial at Worms was unveiled in presence of the king of Prussia and other sovereigns, 25 June, 1868.

Lutine, see *Wrecks*, 1799.

Lutzen, or LUTZENGEN (N. Germany). Here Gustavus Adolphus, king of Sweden, defeated the imperialists under Wallenstein, 16 Nov. 1632, but was himself killed; and here the French army, commanded by Napoleon, defeated the combined armies of Russia and Prussia, commanded by gen. Wittgenstein, 2 May, 1813. The battles of Bautzen and Wurschen immediately followed (19-21 May), both in favor of Napoleon. The allies were compelled to pass the Oder, and an armistice was agreed to, afterwards prolonged; but, unfortunately for the French emperor, this did not produce peace.

Luxemburg, a grand-duchy held by the king of Holland. Luxemburg, the capital, once considered the strongest fortified city in the world, has been many times besieged and taken: by the French in 984, 1443, 1479, 1542-3; by the Spaniards in 1544; by the French in 1684; restored to Spain in 1697; taken by the French in 1701; given to the Dutch as a barrier town, but ceded to the emperor at the peace in 1713. It withstood several sieges in the last century. It surrendered to the French after a siege, from Nov. 1794 to July, 1795; and was retaken by the allies in May, 1814. Population of the grand-duchy, 1867, 199,958; 1875, 205,158.

* Martin Luther was born at Eisleben, 10 Nov. 1483; studied at Erfurt, 1501; was professor of philosophy at Wittenberg, 1508; resisted the sale of indulgences, 1517; defended himself at Augsburg, 1518; at Worms, 1520; was excommunicated, 16 June, 1520; began his German Bible, 1521; married Katherine de Bora, 1525; published his German Bible complete, 1534; died 18 Feb. 1546.

(about 560 B.C.), to the Persians (546 B.C.), to Alexander the Great (333 B.C.), and to his successors the Seleucids. The Romans gave Lycia to the Rhodians (188 B.C.). It became nominally free under the Romans, and was annexed to the empire by Claudius. The marbles brought from Lycia by sir Charles Fellows were deposited in the British Museum, 1840-6.

Lycurgus, see *Laws*.

Lydia, or Mæonia, an ancient kingdom in Asia Minor, under a long dynasty of kings, the last being Croesus, "the richest of mankind." The coinage of gold and silver money, and other useful inventions, are ascribed to the Lydians. Æsop, the Phrygian fabulist, Alcman, the first Greek poet, Thales of Miletus, Anaximenes, Xenophanes, Anacreon of Teos, Heraclitus of Ephesus, etc., flourished in Lydia. The early history is mythical.

Lying-in Hospitals. The first, established in Dublin by Dr. Bartholomew Mosse, a physician, amid strong opposition, was opened March, 1745; see *Hospitals*.

Lymphatics (absorbent vessels connected with digestion), discovered about 1650 by Rudbek in Sweden, Bartholin in Denmark, and Jolyffe in England. Asellius discovered the lacteals in 1622. In 1654, Glisson ascribed to these vessels the function of absorption; and their properties were studied by Wm. and John Hunter, Monro, Hewson, and other great anatomists.

Lynch Law, punishment inflicted by private individuals, independently of the legal authorities, said to derive its name from John Lynch, a farmer, who exercised it upon the fugitive slaves and criminals dwelling in the Dismal Swamp, North Carolina, when they committed outrages upon persons and property which the colonial law could not promptly repress. This mode of administering justice began about the end of the seventeenth century, and still exists in the outlying districts of the United States. Four robbers were taken from prison and hanged by a vigilance committee at New Albany, on the Ohio, 11 Dec. 1868.

Lyndhurst's Act (5 & 6 Will. IV. c. 54), introduced by lord Lyndhurst, rendered valid certain marriages within the forbidden degrees (with deceased wife's sister) up to that time, but prohibited them for the future; passed 31 Aug. 1835.

Lyons (S. France), the Roman Lugdunum, founded by M. Plancus, 43 B.C. The city was reduced to ashes in a single night by lightning, A.D. 59, and was rebuilt in the reign of Nero. It was a free city till its union with France in 1307.

Lyre. Its invention is ascribed to the Grecian Hermès (in Latin Mercury), who, according to Homer, gave it to Apollo, the first that played upon it with method, and accompanied it with poetry. The invention of the primitive lyre, with three strings, is ascribed to the first Egyptian Hermes. Terpander added several strings to the lyre, making the number seven, 673 B.C. Phrynis, a musician of Mitylene, added two more, making nine, 438 B.C.

M.

Macadamizing, a system of road-making invented by Mr. John Macadam, and published by him in an essay, in 1819, having practised it in Ayrshire. He prescribed stones to be broken to six ounces weight, and the use of clean flints and granite clippings. He received 10,000*l.* from parliament; was appointed surveyor-general of the metropolitan roads in 1827, and died in 1836; see *Roads*.

Macao (in Quang-tong, S. China) was given to the Portuguese as a commercial station in 1586 (in return for their assistance against pirates), subject to an annual tribute, which was remitted in 1863. Here Camoens composed part of the "*Lusiad*."

Macaroni. This name, given to a poem by Theophilus Folengo, 1509, continues to designate trifling performances, as buffoonery, puns, anagrams, "wit without

wisdom, and humor without sense." His poem was so called from an Italian cake of the same name, pleasant to the taste, with little alimentary virtue. These poems, in Italy and France, gave rise to *Macaroni academies*, and in England to *Macaroni clubs* (about 1772), when everything ridiculous in dress and manners was called "*Macaroni*."

Maccabees, a name of the Asmoneans, who commenced their career during the persecution of Antiochus Epiphanes, 167 B.C. Mattathias, a priest, resisted the tyranny; and his son, Judas Maccabeus, defeated the Syrians in three battles, 166, 165 B.C.; but fell in an ambush, 161 B.C. His brother Jonathan made a league with the Romans and Lacedæmonians, and after an able administration was treacherously killed at Ptolemais by

Tryphon, 143 B.C. His brother and successor, Simon, was also murdered, 135 B.C. John Hyrcanus, son of Simon, succeeded. His son Judas, called also Aristobulus, took the title of king, 107 B.C. The history of the Macabees is contained in five books of that name, two of which are included in our Apocrypha. Four are accounted canonical by the Roman Catholic church; none by Protestant communions.

Macdonald Affair, see *Prussia*, 1861.

Mace, a weapon anciently used by the cavalry of most nations, was originally a spiked club, hung at the saddle-bow, and usually of metal. Maces were also early ensigns of authority borne before officers of state, the top being made in the form of an open crown, and commonly of silver gilt. The lord chancellor and speaker of the house of commons have maces borne before them. Edward III. granted to London the privilege of having gold or silver maces carried before the lord mayor, sheriffs, aldermen, and corporation, 1354. It was with the mace usually carried before the lord mayor on state occasions that Walworth, lord mayor of London, is said to have knocked the rebel Wat Tyler off his horse, for rudely approaching Richard II., a courtier afterwards despatching him with his dagger, 15 June, 1381. Cromwell, entering the house of commons to disperse its members and dissolve the parliament, ordered one of his soldiers to "take away that bauble," the mace, which was done, and the doors of the house locked, 20 April, 1653.

Macedon (N. Greece). The first kingdom was founded by Caranus, about 814 B.C. It was successively under the protection of Athens, of Thebes, and Sparta, until the reign of Philip, the father of Alexander the Great, who by his political wisdom and warlike exploits made it a powerful kingdom, and paved the way for his son's greatness.

Macedonians, a semi-Aryan sect, followers of Macedonius, made bishop of Constantinople about 341. His appointment was greatly opposed and led to much bloodshed. He was expelled by the decree of a council held 360.

McHenry, Fort, DEFENCE OF. The British fleet that conveyed the troops under gen. Ross to Baltimore (see *North Point*) opened a bombardment upon Fort McHenry, in the harbor, on 13 Sept. 1814. The fort was garrisoned by about 1000 men, under gen. Armistead. They made a most gallant defence during a bombardment of twenty-five hours. The loss was trifling on both sides.

Machiavellian Principles, those of Nicolo Machiavelli of Florence (born 1469, died 1527), in his "Practice of Politics" and "The Prince." By some they are styled "the most pernicious maxims of government, founded on the vilest policy;" by others as "sound doctrines, notwithstanding the prejudice erroneously raised against them." The author said that if he taught princes to be tyrants, he also taught the people to destroy tyrants. "The Prince" appeared at Rome in 1532, and was translated into English in 1761.

Maciejowice (near Warsaw, Poland). Here the Poles were totally defeated by the Russians, and their general, Kosciusko, taken prisoner, 10 Oct. 1794, after a murderous action. He strenuously endeavored to prevent the junction of the Russian and Austrian armies. The statement that he said "Finis Poloniæ!" is contradicted.

Mackinaw, or **MACKINAC**, FORT, was surprised and captured by an allied force of British and Indians on 17 July, 1812. An unsuccessful attempt to recapture it was made on 4 Aug. 1814, by 500 regulars and 400 militia under lieut.-col. George Croghan. The Americans lost 13 killed and 61 wounded.

Madagascar (S.E. coast of Africa), a large island, said to have been discovered by Lorenzo Almeida, 1506. Population, about 5,000,000; 150,000 Christians in 1870.

Madder, the root of the *Rubia tinctoria*, highly valued for dyeing properties. 305,758 cwt. (valued at \$48,932L) were imported into this country in 1868; see *Alizarine*.

Madeira, an island (N.W. coast of Africa), discovered, it is said, in 1344, by Mr. Macham, an English gentleman, or mariner, who fled from France for an illicit amour. He was driven here by a storm, and his mistress, a French lady, dying, he made a canoe, and carried the news of his discovery to Pedro, king of Aragon, which occasioned the report that the island was discovered by a Portuguese, 1345. It is asserted that the Portuguese did not visit this island until 1419 or 1420, or colonize it until 1431. It was taken by the British in July, 1801; and again by admiral Hood and gen. Beresford, 24 Dec. 1807, and retained in trust for the royal family of Portugal, who had emigrated to the Brazils. It was restored to the Portuguese in 1814. Since 1852 the renowned vintages here have been almost totally ruined by the vine disease (oidium). Population, 1872, 120,315.

Madrigal, an unaccompanied song for three or more voices, of which fine examples are by English composers. Madrigals, invented in the Netherlands, were adopted in Italy, where fine specimens were produced. Many were published by Morley, 1594; Weelkes, 1597; Wilbye, 1598; and Bennet, 1599. The Madrigal Society in London began in 1741. English Glee and Madrigal Union founded in 1851. Rimbault's "Bibliotheca Madrigalium" published 1847. The madrigal, "Summer is i cumen in" is attributed to the thirteenth or fourteenth century.

Maestricht (Holland), the ancient *Trajectum ad Mosam*, the capital of Limburg. It revolted from Spain,

and was taken by the prince of Parma in 1579, when a dreadful massacre took place. In 1632 the prince of Orange reduced it after a memorable siege, and it was confirmed to the Dutch in 1648; Louis XIV. took it in 1673; William, prince of Orange, invested it in vain in 1676; but in 1678 it was restored to the Dutch. In 1748 it was besieged by the French, who were permitted to take possession of the city on condition of its being restored at the peace then negotiating. In Feb. 1793, Maestricht was unsuccessfully attacked by the French, but they became masters of it, Nov. 1794. In 1814, it was made part of the kingdom of the Netherlands, and now belongs to Holland.

Mafia, a secret terrorist murderous society in Sicily, comprising persons of all classes; became prominent in 1860. It is opposed to the Camorra. Efforts for the suppression of both were made by the government in 1874-5.

Magazine, at first a miscellaneous periodical publication. There are now magazines devoted to nearly every department of knowledge. The following are the dates of the first publication of the principal magazines, some of which are extinct. In Jan. 1865, 544 magazines; in Jan. 1872, 639 were in course of publication in Great Britain and Ireland; see *Reviews and Newspapers*.

Magazines IN THE UNITED STATES. The following are the principal literary magazines in the United States:

Harper's Magazine	1850
Atlantic Monthly	1857
Lippincott's Magazine	1868
Scribner's Monthly (name changed to The Century, Nov. 1881)	1870

Besides these there are many minor magazines, some of which have been long established, and have large circulation. *Harper's Magazine* and *The Century* are now published in London simultaneously with their appearance in the United States. *The North American Review*, formerly a quarterly periodical, and the *International Review*, formerly bi-monthly, are now monthly magazines. *Harper's Young People*, *St. Nicholas*, and the *Youth's Companion* are the principal magazines for children.

Magdala, a very strong place in Abyssinia (*which see*). On Good Friday, 10 April, 1868, the troops of the emperor Theodore attacked the first brigade of the British army under sir Robert Napier, and were repulsed with great slaughter. On the next day all the European prisoners were given up, but Theodore himself refused to surrender; and on Easter Monday, 13 April, Magdala was stormed, and Theodore himself killed—it is said by his own hand: British loss, 2 killed, 20 wounded; Abyssinian loss, about 500 killed and wounded out of about 5000. Magdala was burned to the ground by the British, 17 April, 1868.

Magdalens AND MAGDALENETTES, communities of nuns, consisting chiefly of penitent courtesans. The order of penitents of St. Magdalen was founded 1272, at Marseilles. The convent of Naples was endowed by queen Sancha, 1324. That at Metz was instituted in 1452. At Paris, 1492. The Magdalen at Rome was endowed by pope Leo X., in 1515, and favored by Clement VIII. in 1594. The Magdalen Hospital, London, was founded in 1758, under the direction of Dr. Dodd. The asylum in Dublin was opened in June, 1766.

Magdeburg (Prussia). The archbishopric was

founded about 967. The city suffered much during the religious wars in Germany. It was besieged and taken by the elector Maurice, Nov. 1550, and Nov. 1551; blockaded for seven months by the imperialists, under Wallenstein, in 1629; and barbarously sacked by Tilly on 10 May, 1631. It was given to Brandenburg in 1648; was taken by the French, 8 Nov. 1806; annexed to the kingdom of Westphalia, 9 July, 1807; restored to Prussia, May, 1813.

The *Magdeburg Experiment* is shown by means of a hollow sphere, composed of two hemispheres, fitting air-tight. When the air is exhausted by the air-pump, the hemispheres are held together by the pressure of the atmosphere, and require great force to separate them. The apparatus was suggested by Otto von Guericke, the inventor of the air-pump. He died in 1686.—*Brande*.

Magellan, STRAIT OF (connecting the Atlantic and Pacific oceans), was passed by Fernando de Magellanus (Magellan), a Portuguese, on 27 Nov. 1520. He gave the latter ocean its name on account of its calmness. Magellan completed the first voyage round the world, with a fleet of discovery fitted out by the emperor Charles I., but was killed in 1521. The Spaniards had a fort here, called Cape Famine, because the garrison perished for want.

Magenta, a small town in Lombardy, near which the French and Sardinians defeated the Austrians, 4 June, 1859. The emperor Louis Napoleon commanded, and he and the king of Sardinia were in the thickest of the fight. It is said that 55,000 French and Sardinians and 75,000 Austrians were engaged. The former are asserted to have lost 4000 killed and wounded, and the Austrians 10,000, besides 7000 prisoners. The French generals Espinasse and Clerc were killed. The arrival of gen. MacMahon during a deadly struggle between the Austrians and the French greatly contributed to the victory. The contest near the bridge of Buffalora was very severe. The Austrians fought well, but were badly commanded. The emperor and king entered Milan on 8 June following; MacMahon and Regnault d'Angely were created marshals of France. A monument erected here in memory of the slain was solemnly inaugurated 4 June, 1872.—The red dye, rosaniline, obtained by chemists from gas-tar, is termed *magenta*; see *Aniline*.

Magi, or WORSHIPERS OF FIRE. The Persians adored the invisible and incomprehensible God as the principle of all good, and paid homage to fire as the emblem of his power and purity. They built no altars nor temples; their sacred fires blazed in the open air, and their offerings were made upon the earth. The magi, their priests, are said to have had skill in astronomy, etc.; hence the term magi was applied to all learned men, till they were confounded with the magicians. Zoroaster, king of Bactria, the reformer of the sect of the Magi, flourished about 550 B.C. This religion was superseded in Persia by Mahometanism, A.D. 652, and the Parsees at Bombay are descendants of the Guebres, or fire-worshippers.

Magic, see *Alchemy*, *Witchcraft*, etc.—The invention of the MAGIC-LANTERN is ascribed to Roger Bacon, about 1260, but more correctly to Athanasius Kircher, who died 1680. See Godwin's "Lives of the Necromancers," 1834, and Ennemoser's "History of Magic," translated by W. Howitt, 1854.

Magistrates, see *Justices*. Stipendiary borough magistrates may be appointed by 5 & 6 Will. IV. c. 76, 1835, and by 26 & 27 Vict. c. 97, 1863. The present arrangement of metropolitan magistrates (the chief sitting at Bow street) was made by acts of parliament in 1792 and 1839. Eleven courts were appointed in 1840. Their salaries raised from 25 March, 1875. Henry Fielding, the novelist, was acting-magistrate for Westminster and at Bow street. He was succeeded by his half-brother, sir John Fielding, in 1761; by

Magna Charta. Its fundamental parts were derived from Saxon charters, continued by Henry I and his successors. On 20 Nov. 1214, the archbishop of Canterbury and the barons met at St. Edmundsbury. On 6 Jan. 1215 they presented their demands to king John, who deferred his answer. On 19 May they were censured by the pope. On 24 May they marched to London, and the king was compelled to yield. The charter was settled by John at Runnymede, near Windsor, 15 June, 1215. It was many times confirmed by Henry III. and his successors. The last king's grand charter was granted in 1224, and was assented by Edward I.; see *Forests*. The original MS. charter is lost. The finest MS. copy, which is at Lincoln, was reproduced by photographs in the "National MSS.," published by government, 1865.

Magna Græcia, the independent states founded by Greek colonists in South Italy, Sicily, etc. Cumæ, in Campania, is said to have been founded in 1034 B.C., Pandusia and Metapontum in 774 B.C. These states were ruined through aiding with Hannibal when he invaded Italy, 216 B.C.

Magnano (N. Italy). Here Scherer and a French army was defeated by the Austrians under Kray, 6 April, 1799.

Magnesia (Asia Minor). Here Antiochus the Great, king of Syria, was defeated by the Scipios, 190 B.C.—*Magnesia alba*, the white alkaline earth used in medicine, was in use in the beginning of the eighteenth century. Its properties were developed by Dr. Black in 1755.

Magnesium, a metal first obtained from magnesia by sir Humphry Davy in 1808, and since produced in larger quantities by Humphry, Deville, and especially by Mr. E. Sonstadt, in 1862-4. Its light when burned is very brilliant, and is so rich in chemical rays that it may be used in photography. Lamps made for burning magnesium wire were employed by the excavators of the tunnel through Mount Cenis. By its light photographs of the interior of the Pyramids were taken in 1865. Larkin's magnesium lamp (in which the metal is burned in the form of a powder) was exhibited at the Royal Institution on 1 June, 1866, and before the British Association at Nottingham in Aug. 1866. An improved magnesium wire lamp is now being used in carrying on the U. S. Geodetic survey. It has been seen and observed upon over lines 50 miles in length, at night, when the atmosphere is better adapted for delicate observations, there being less refraction and radiation than by day.

Magnetism. *Magnes*, a shepherd, is said to have been detained on Mount Ida by the nails in his boots. The attractive power of the loadstone or magnet was early known, and is referred to by Homer, Aristotle, and Pliny; it was also known to the Chinese and Arabians. The Greeks are said to have obtained the loadstone from Magnesia, in Asia, 1000 B.C. Roger Bacon is said to have been acquainted with its property of pointing to the north (1294). The invention of the mariner's compass is ascribed to Flavio Gioia, a Neapolitan, about 1310; but it was known in Norway previous to 1266, and is mentioned in a French poem, 1150; see under *Electricity*.

 Wilde's magneto-electric machine exhibited (see under *Electricity*, p. 237). "
 In the present century, our knowledge of the phenomena of magnetism has also been greatly increased by the labors of Arago, Ampère, Hansteen, Henry, Gauss, Weber, Poggenдорff, Sabine, Lamont, De Moivre, Archibald Smith, etc.; see *Animal Magnetism*.
 In the Royal Institution, London, is a magnet by Lohman, of Haarlem, constructed on the principles of Mr. Elus, which weighs 100 lbs and can sustain 430 lbs. Häcker, of Nuremberg, constructed a magnet weighing 36 grains, capable of sustaining 146 times its own weight. This was exhibited in 1851, also at the Royal Institution.

Magneto-Electricity, the discovery of prof. Faraday; see under *Electricity*. Magneto-electricity has been recently applied to telegraphic and to light-house purposes. The South Foreland light-house, near Dover, was illuminated by the magneto-electric light in the winter of 1858-9 and 1859-60 (the light removed to Dungeness in 1861); the Lizard, by Dr. C. William Siemens's magneto-electric light, 1878; see *Faradisation*.

Magnolia. *Magnolia glauca* was brought here from North America, 1688. The laurel-leaved magnolia (*Magnolia grandiflora*) from North America, about 1784. The dwarf magnolia (*Magnolia pumila*) from China, in 1789; and (also from China) the brown-stalked, 1789; the purple, 1790; and the slender, 1804.

Mahogany is said to have been brought to England by Raleigh in 1595, but not to have come into general use till 1720.

Mahometanism, embodied in the Koran, includes the unity of God, the immortality of the soul, predestination, a last judgment, and a sensual paradise. Mahomet asserted that the Koran was revealed to him by the angel Gabriel during a period of twenty-three years. He enjoined on his disciples circumcision, prayer, alms, frequent ablution, and fasting, and permitted polygamy and concubinage.

 The Mahometans are divided into several sects, the chief being the *Sunnites*, or the orthodox (who recognized as caliph Abubeker, the father-in-law of Mahomet, in preference to Omar and Ali), and the *Shiites* (Sectaries), or *Fatimites*, the followers of Ali, who married Fatima, the prophet's daughter.
 The former (also called *Sunnites*) recognize the "Sunna" (traditions) sayings of Mahomet (supplementary to the Koran) which the Shiites reject. Husan and other sons of Ali were murdered A.D. 680, and a miracle play and a festival in their honor are still observed.
 The Ottoman empire is the chief seat of the *Sunnites*, the sultan being considered the representative of the caliph: Persia has been for centuries the stronghold of the Shiites.
 The Mahometans conquered Arabia, North Africa, and part of Asia, in the seventh century; in the eighth they invaded Europe, conquering Spain, where they founded the caliphate of Cordova, which lasted from 756 to 1031, when it was broken up into smaller governments, the last of which, the kingdom of Granada, endured till its subjugation by Ferdinand in 1492; but the Mahometans were not finally expelled from Spain till 1609

Mahrattas, a people of Hindostan, who originally dwelt northwest of the Deccan, which they overran about 1676. They endeavored to overcome the Mogul, but were restrained by the Afghans. They entered into alliance with the East India Company in 1767, made war against it in 1774, again made peace in 1782, and were finally subdued in 1818. Their prince, Sindiah, is now a pensioner of the British government.

Maid, see *Holy Maid* (Elizabeth Barton), and *Joan of Arc* (Maid of Orleans).

Maida (Calabria), where the French, commanded by gen. Regnier, were signally defeated by the British under major-general sir John Stuart, 4 July, 1806.

Maiden, see *Guillotine*.

Maids of Honor. Anne, daughter of Francis II., duke of Brittany, and queen of Charles VIII. and Louis XII. of France (1483-98), had young and beautiful ladies about her person, called maids of honor. The queen of Edward I. of England is said to have had four maids of honor (1272-1307); queen Victoria has eight.

Mail-coaches, for the conveyance of letters, were first set up at Bristol by Mr. John Palmer, of Bath, 2 Aug. 1784. They were employed for other routes in 1785, and soon became general in England. The mails were first sent by rail in 1838.

Maillots (small mallets), a name given to certain citizens of Paris, who, in March, 1382, violently opposed the collection of new taxes imposed by the duke of Anjou, the regent. They armed themselves with small iron mallets (taken from the arsenal), and killed the collectors; for which they were severely punished in Jan. 1383.

Maiming and Wounding, see *Corentry Act*.

Main Plot, a name given to a conspiracy to make Arabella Stuart sovereign of England in place of James I. in 1603. Lord Cobham, sir Walter Raleigh, and lord Gray were condemned to death for implication in it, but reprieved; others were executed. Raleigh was executed, 29 Oct. 1618.

Maine: 1. a province, N.W. France, seized by William I. of England in 1069. It acknowledged prince

Arthur, 1199; was taken from John of England by Philip of France, 1204; was recovered by Edward III. in 1357; but given up, 1360. After various changes it was finally united to France by Louis XI. in 1481.—2. **MAINE** (North America) was discovered by Cabot, 1497, and colonized by the English about 1638; it became a state of the Union in 1820. The boundary line between the British and the United States territories in Maine was settled by the Ashburton treaty, concluded 9 Aug. 1842. The *Maine liquor law*, prohibiting the manufacture, sale, and use of intoxicating drinks, with certain exceptions, was enacted in 1851. In 1872, it was officially reported to have greatly decreased drunkenness and rendered the trade disreputable.

Maiwand, Afghanistan, about 50 miles from Candahar. On 27 July, 1880, gen. J. Burrows marched from Kushk-i-Nakhud and attacked the army of Ayooob Khan, about 20,000 men, intrenched here on the river Helmund, and, after four hours' severe conflict, was compelled to retreat. About 300 of the British, with many officers, fell (including lieutenant-col. Galbraith, major G. F. Blackwood, captains Garratt, McMath, Cullen, Roberts, and others), especially officers of the 66th regiment; with about 700 of the native troops killed or missing. The British commanders were censured. Ayooob Khan did not improve his victory, and was totally defeated by gen. sir F. Roberts, 1 Sept. 1880; see *Mazra*.

Majesty. Among the Romans, the emperor and imperial family were thus addressed, and also the popes and the emperors of Germany. The style was given to Louis XI. of France in 1461.—*Voltaire*. Upon Charles V. being chosen emperor of Germany in 1519, the kings of Spain took the style. Francis I. of France, at the interview with Henry VIII. of England, on the Field of the Cloth of Gold, addressed the latter as Your Majesty, 1520. James I. used the style "Sacred," and "Most Excellent Majesty."

Majolica Ware, see *Pottery*.

Majorca, see *Balearic Isles*, and *Minorca*. Majorca opposed Philip V. of Spain in 1714; but submitted, 14 July, 1715. Its first railway, from Palma, capital of the Balearic isles, to Inca, 18 miles, opened, 24 Feb. 1875.

Majuba Hill (see *Transvaal*). On Saturday night, 26 Feb. 1881, above 600 men under sir George P. Colley, marching from the camp at Mount Prospect, ascended Majuba hill overlooking Laing's Nek, where the Boers were encamped, to surprise them. The attack of the Boers began 10.30 A.M. of the 27th. Fierce conflicts ensued; eventually overwhelmed by numbers and deadly fire, the British were routed and fled. Sir George Colley fell with his face to the enemy. Boer loss about 150. About 350 British engaged. Loss: killed, 3 officers and about 82 men; many wounded, 122 prisoners, and some missing.

Malabar (W. coast of Hindostan). The Portuguese established factories here in 1505; the English did the same in 1601.

Malacca, on the Malay peninsula, East Indies, was made a Portuguese settlement in 1511. The Dutch factories were established in 1640. The Dutch government exchanged it for Bencoolen in Sumatra in 1824, when it was placed under the Bengal presidency. It is now part of the *Strait Settlements* (which see).

Malaga (S. Spain), a Phœnician town, taken by the Arabs, 714; retaken by the Spaniards, after a long siege, 1487; see *Naval Battles*, 1704. An insurrection against the provisional government was put down with much slaughter, 31 Dec. 1868.

Malakhoff, a hill near Sebastopol, on which was situated an old tower, strongly fortified by the Russians during the siege of 1854-5. The allied French and English attacked it on 17, 18 June, 1855, and, after a conflict of forty-eight hours, were repulsed with severe loss; that of the English being 175 killed and 1126 wounded; that of the French 3338 killed and wounded. On 8 Sept. the

French again attacked the Malakhoff; at 8 o'clock the first mine was sprung, and at noon the French flag floated over the conquered redoubt; see *Sebastopol*. In the Malakhoff and Redan were found 8000 pieces of cannon of every calibre, and 120,000 lbs. of gunpowder.

Maldon (Essex), built 28 a.c., is supposed to have been the first Roman colony in Britain. It was burned by queen Boadicea, and rebuilt by the Romans; burned by the Danes, A.D. 991, and rebuilt by the Saxons. Maldon was incorporated by Philip and Mary. The singular custom of Borough-English is kept up here, by which the youngest son, and not the eldest, succeeds to the burgage tenure on his father's death; see *Borough-English*.

Malegnano, or *Милонано*, modern names of *Marignano* (which see).

Malicious Damages. The law respecting them was consolidated and amended by 24 & 25 Vict. c. 97. This act protects works of art, electric telegraphs, etc., 1861.

Malinea, see *Mecklin*.

Malines' Act, 20 & 21 Vict. c. 67, relating to the powers of women in regard to property, was passed in 1857.

Maló, St. (N.W. France). This port, as a great resort of privateers, sustained a tremendous bombardment by the English under admiral Benbow in 1693, and under lord Berkeley in July, 1695. In June, 1758, the British landed in considerable force in Caneille bay, and went up to the harbor, where they burned upwards of a hundred ships, and did great damage to the town, making a number of prisoners. It is now defended by a very strong castle, and the harbor is very difficult of access.

Malo-Jaroslavits, near Moscow, central Russia, the site of severe encounters between the Russians and the retreating French army, 24 Oct. 1812. The latter were victorious, but with great loss.

Malplaquet (N. France). Here the allies under the duke of Marlborough and prince Eugene defeated the French, commanded by marshal Villars, 11 Sept. 1709. Each army consisted of nearly 120,000 choice soldiers. There was great slaughter on both sides, the allies losing 18,000 men, which loss was but ill repaid by the capture of Mena.

Malt, barley prepared for brewing and distillation. A duty was laid upon malt in 1667; repealed but reimposed 1697 et seq. Important acts for the regulation of malt duties were passed in 1830 and 1837. In March, 1834, there were 6187 licensed maltsters in the United Kingdom. The duty on malt in 1863 amounted to £273,737. In 1864 the duty was remitted on malt used for cattle feeding; and in 1866 an act was passed allowing the excise duty to be charged according to the weight of the grain used. A parliamentary committee to consider repeal of malt tax was agreed to, 14 May, 1867, without success; a motion to repeal the tax was negatived (244 17), 23 April, 1874. Tax abolished, 1880 (when it was 2s. 8½d. a bushel). It ceased 1 Oct. 1880.

Revenue from the malt duties in the year ending 31 March, 1860, 6,391,722; 1864, 6,419,418; 1868, 6,676,464; 1867 (tax reduced), 5,800,930; 1869, 6,644,861; 1869, 6,308,913; 1867, 6,116,445; 1871, 6,978,371; 1872, 6,910,366; 1873, 7,444,152; 1877, 8,110,377; 1878, 7,731,640.

Malt made and retained in the United Kingdom in 1828, 26,205,431 bushels; in 1835, 42,002,012; in 1847, 26,367,818; in 1867, 44,545,649; in 1861, 46,650,100; in 1870, 56,778,814; in 1875, 63,018,076.

Malta (formerly *Melita*), an island in the Mediterranean, held successively by the Phœnicians, Carthaginians, and Romans, which last conquered it, 259 a.c. The apostle Paul was wrecked here, A.D. 62 (Acts xxvii., xxviii.). Malta was taken by the Vandals, 534, by the Arabs, 870, and by the Normans from Sicily, 1090. With Sicily it became successively part of the possessions of

the house of Hohenstaufen, of Anjou (1206), and of Aragon (1260). In 1500 Charles V. gave it to the Knights Hospitallers, who defended it most courageously and successfully, in 1551 and 1565, against the Turks, who were obliged to abandon the enterprise after the loss of 80,000 men. The island was taken by Bonaparte in the outset of his expedition to Egypt, 12 June, 1798. He found in it 1200 pieces of cannon, 200,000 lbs. of powder, two ships of the line, a frigate, four galleys, and 40,000 muskets, besides an immense treasure collected by asperation; and 4500 Turkish prisoners, whom he set at liberty. Malta surrendered to the British under Pigot, 5 Sept. 1800. At the peace of Amiens it was stipulated that it should be restored to the knights. The British, however, retained possession, and the war recommenced between the two nations; but, by the treaty of Paris, in 1814, the island was guaranteed to Great Britain. *La Valetta*, the capital, was founded in 1567 by the grand-master, La Valetta, and completed and occupied by the knights, 16 Aug. 1571. The Protestant college was founded in 1846. A grand new naval dry-dock was opened May, 1871. Governor of Malta and Gozo, sir Patrick Grant, March, 1867; sir C. T. Van Straubensee, 1872. The visit of prince of Wales, 6 April, 1876.

Malta, Knights of. A military religious order, called also Hospitallers of St. John of Jerusalem, Knights of St. John, and Knights of Rhodes. Some merchants of Malá, trading to the Levant, obtained leave of the caliph of Egypt to build a house for those who came on pilgrimage to Jerusalem, and whom they received with zeal and charity, 1048. They afterwards founded a hospital for the reception of pilgrims, from whence they were called Hospitallers (*Latin hospitium*, a guest). The military order was founded about 1099; confirmed by the pope, 1113. In 1119 the knights defeated the Turks at Antioch. After the Christians had lost their interest in the East, and Jerusalem was taken, the knights retired to Acre, which they defended valiantly in 1190. John, king of Cyprus, gave them Limis in his dominions, where they stayed till 1310, in which year they took Rhodes, under their grand-master De Vallaret, and the next year defended it under the duke of Savoy against an army of Saracens. The story that his successors have used F. E. R. T. (*Fortitudo ejus Rhodum tenuit*, or "His valor kept Rhodes") for their device is much doubted. From this they were also called *knights of Rhodes*; but Rhodes being taken by Solymán in 1522, they retired into Candia, thence into Sicily. Pope Adrian VI. granted them the city of Viterbo for their retreat; and in 1530 the emperor Charles V. gave them the isle of Malta. The order was suppressed in England in 1540; restored in 1557; and again suppressed in 1559. St. John's Gate, Clerkenwell, a relic of their possessions, still exists. The emperor Paul of Russia declared himself grand-master of the order in June, 1798. After the death of the grand-master, Tommasi di Comara, in 1806, the order was governed by a lieutenant and a college at Rome, till Pope Leo XIII. made count Conchi a Santa Croce (lieutenant since 14 Feb. 1871) grand-master, 28 March, 1879. The knights sent a hospital establishment into Bohemia during the war in 1866, which afforded great relief to the wounded and sick.

Mamalon, a hill, one of the defences of Sebastopol, was captured by the French, 7 June, 1855.

Malakluka, originally Turkish and Circassian slaves, established by the sultan of Egypt as a body-guard, about 1240. They advanced one of their own corps to the throne of Egypt, May, 1250, and continued to do so until it became a Turkish province, in 1517, when the boys took them into pay, and filled up their ranks with renegades from various countries. On the conquest of Egypt by Bonaparte, in 1798, they retreated into Nubia; but, assisted by the Arnauts, reconquered Egypt from the Turkish government. In 1804, Napoleon embodied some of them in his guard. On 1 March, 1811,

they were decoyed into the power of the Turkish pacha, Mehemet Ali, and slain at Cairo.

Mamertini, sons of Mamers, or Mars, were Campanian soldiers of Agathocles. They seized Messina, in Sicily, in 281 B.C., and when closely besieged by the Carthaginians and Hiero of Syracuse, in 264, they implored the help of the Romans, which led to the first Punic war.

Mammoth, an extinct species of elephant. An entire mammoth, flesh and bones, was discovered in Siberia in 1799. Remains of this animal have since been found at Harwich in 1803, and at places in Europe, Asia, and America.

Man, ANTIQUITY OF. In 1836 M. Boucher de Perthes found some rude flint implements, which he believed to be of human manufacture, mingled with bones of extinct animals, in the old alluvium near Abbeville, in Picardy, France, and also, in 1847, near Amiens. Similar flints have since been found in Sicily by Dr. Falconer, at Brixham by Mr. Pengelly, and lately in various parts of the world. Hence many geologists infer that man existed on the earth many ages earlier than has been hitherto believed.

Some burned bricks found in the Nile are considered to be 20,000 years old, and some bones found in lacustrine deposits in Florida, 30,000 years old.

Man, ISLE OF,* was subdued by Edwin, king of Northumberland, about 620; by Magnus of Norway, 1098; by the Scots, 1266; occupied by Edward at the wish of the inhabitants, 1290; recovered by the Scots in 1313; but taken from them by Montacute, afterwards earl of Salisbury, to whom Edward III. gave the title of king of Man in 1343. It was afterwards subjected to the earl of Northumberland, on whose attainder Henry IV. granted it in fee to sir John Stanley, 1406. It was taken from this family by Elizabeth, but was restored in 1610 to the earl of Derby, through whom it fell by inheritance to the duke of Athol, 1755. He received 70,000*l.* from parliament for all his rights in 1765; and the nation was charged with the further sum of 132,944*l.* for the purchase of his remaining interest in the revenues of the island in Jan. 1829. The countess of Derby held the isle against the parliamentary forces for a time in 1651. The new queen's landing-pier (cost 46,400*l.*) inaugurated by the lieut.-governor, H. B. Loch, 1 July, 1872. Some assert that St. Patrick was the founder of the see, and that Germanus was the first bishop, about 447. It was united to Sodor in 1113. The bishop has no seat in the house of lords, but lord Auckland (bishop, 1847–54) sat by right of his barony. Present income, 2000*l.*

Manassas Junction (Virginia, United States), an important military position, where the Alexandria and Manassas Gap railways meet, near a creek named BULL RUN. 1. It was held by the confederates in 1861, when they were attacked by the federal gen. Irwin McDowell. He began his march from Washington on 16 July, and gained some advantage on the 18th at Centreville. On the 21st was fought the first battle of Bull Run. The federals, who began the fight, had the advantage till about three o'clock P.M., when the confederate gen. Johnston brought up reinforcements, which at first the federals took for their own troops. After a brief resistance, the latter were seized with sudden panic, and, in spite of the utmost efforts of their officers, fled, abandoning a large quantity of arms, ammunition, and baggage. The confederate generals Johnston and Beauregard did not think it prudent to pursue the fugitives, who did not halt till they arrived at Washington. The federal army is said to have had 481 killed, 1011 wounded, 1216 missing. The loss of the confederates was stated to be about 1500. In March, 1862, when the army of the Potomac, under gen. McClellan, marched into Virginia, they found that the confederates had quietly retreated from the camp at Manassas. 2. On 30 Aug. 1862, this place was the site of another great battle between the northern and southern armies. In Aug. gen. "Stonewall" Jackson defeated Banks at Cedar mountain on the 9th, turned the federal flank on the 22d, and, arriving at Manassas, repulsed Pope's attacks on the 29th. On the 30th gen. R. E. Lee joined Jackson with his army, and Pope received reinforcements from Washington. A desperate conflict ensued, which ended in the confederates gaining a decisive victory, compelling the federals to a hasty retreat to Centreville. Jackson pushed forward towards Fairfax Court-house, and again encountered the national forces on 1 Sept. Both sides claimed a victory, but during the night Pope's army retreated towards Washington. Pope was at once superseded, and McClellan resumed the command to march against the confederates, who had crossed the Potomac and entered Maryland; see *United States*.

Manchester (Lancashire), in the time of the Druids, was one of their most popular stations, and had the privilege of sanctuary attached to its altar, in the British language *Meyne*, a stone. It was one of the seats of the Brigantes, who had a castle, or stronghold, called *Mancenion*, or the place of tents, near the confluence of the rivers Medlock and Irwell. The site of this, still called the "Castle Field," was, about 79, selected by the Romans as the station of the *Cohors Prima Frisiorum*, and called by them *Mancunium*; hence its Saxon name *Manceastre*, from which its modern appellation is derived.—*Lucia*.

Two Fenians, Kelly and Deasy, forcibly taken from a			

jected the Old Testament, and composed a system of doctrine from Christianity and the dogmas of the ancient fire-worshippers. Sapor, king of Persia, believed in him at one time, but afterwards banished him. He was burned alive by Bahram or Varanes, king of Persia, in 277. His followers dispersed, and several sects sprang from them.

Manilla (built about 1573), capital of the Philippine isles, a great mart of Spanish commerce. Manilla was taken by the English, 6 Oct. 1762, when the archbishop engaged to ransom it for about a million sterling; never wholly paid. Manilla has suffered greatly by earthquakes. It is stated that nearly 3000 persons perished by one in 1645. In Sept. 1852, the city was nearly destroyed, and on 3 July, 1863, about a thousand lives were lost. The duke of Edinburgh was hospitably entertained here, 19 Nov. 1869; see *Earthquakes*, 1852, 1863, 1880.

Manitoba (see *Rupert's Land and Hudson's Bay*) (North America), a new colony. A Fenian attack on the colony was suppressed by United States troops about 12 Oct. 1871.

Mannheim (S. Germany), founded in 1606, became the court residence of the palatine of the Rhine in 1719; but his becoming elector of Bavaria in 1777 caused the removal of the court to Munich. Mannheim surrendered to the French, under command of gen. Pichegru, 20 Sept. 1795. On 31 Oct. the Austrians under gen. Wurmser defeated the French near the city. Several battles were fought with various success in the neighborhood during the wars of Napoleon I. Kotzebue, the popular dramatist, was assassinated at Mannheim by Sand, a student of Würtzburg, 2 April, 1819.

Manometer (Greek *parís*, thin), an instrument for measuring the rarity of the atmosphere, gases, and vapors. One is said to have been made by Otto von Guericke about 1660, and the "statical barometer" of Robert Boyle was a simple manometer. Various forms of the apparatus were devised by Ramsden (about 1773), by Roy (1777), by Cazalet (1789), and by Bourdon and others. A manometer was constructed for the investigation respecting the elasticity of steam conducted by Prony, Arago, Dulong, and Girard, 1830.

Manors are as ancient as the Saxon times, and imply a territorial district with its jurisdiction, rights, and perquisites. They were formerly called baronies, and still are lordships. Each lord was empowered to hold a court called the court-baron for redressing misdemeanors, and settling disputes between the tenants.—*Cabinet Lawyer*.

Mansion-house, LONDON. The residence of the lord mayor. It is situate at the east end of the Poultry on the site of the ancient Stocks market. It was built of Portland stone by George Dance the elder, 1739–53; repaired and redecored, 1867–8; see *Mayor*.

Attempt to blow up part of Mansion-house; a box of gunpowder (40 lbs.) discovered in a window, east side, about 11 P. M. 16 March, 1881

Mansourah (Lower Egypt). Here Louis IX. was defeated by the Saracens and taken prisoner, 5 April, 1250. He gave Damietta and 400,000 livres for his ransom.

Mantineia (Arcadia, Greece). Here (1) Athenians and Argives were defeated by Agis II. of Sparta, 418 B.C.; (2) and here Epaminondas and the Thebans defeated the combined forces of Lacedæmon, Achaia, Elis, Athens, and Arcadia, 362 B.C. Epaminondas was killed in the engagement, and Thebes lost its power among the Grecian states. The emperor Adrian built a temple at Mantineia in honor of his favorite Alcinoüs. The town was also called Antigonia. Other battles were fought near it.

Mantua (N. Italy), an Etruscan city, near which Virgil was born, 70 B.C. Mantua was ruled by the Gonzagas, lords of Mantua, from 1328 to 1708, when it was seized by the emperor Joseph I. It surrendered to the French, 2 Feb. 1797, after a siege of eight months; retaken by the Austrians and Russians, 30 July, 1799, after a short siege. After the battle of Marengo (14 June, 1800), the French again obtained possession of it. It was included in the kingdom of Italy till 1814, when it was restored to the Austrians, who surrendered it to the Italians, 11 Oct. 1866, after the peace.

Manu, see *Menu*.

Manufactures, see *Silk, Cotton*, etc.

Maoria, see *New Zealand*.

Maple-tree. The *Acer rubrum*, or scarlet maple, was brought here from North America before 1636. The *Acer Negundo*, or ash-leaved maple, before 1688. From the *Acer saccharinum* (introduced here in 1735) the Americans make good sugar.

Maps, see *Charts and Mercator*.

Marañon, see *Amazon*.

Marathon (in Attica). Here, on 28 or 29 Sept. 490 B.C., the Greeks, only 11,000 strong, defeated the Persian army, amounting to about 110,000. The former were commanded by Miltiades, Aristides, and Themistocles. Among the slain (about 6400) was Hippas, the instigator of the war. The Persian army was forced to retreat to Asia; see *Greece*.

Marble. Dipseus and Scyllia, statues of Crete, were the first artists who sculptured marble, and polished their works; all statues previously being of wood, about

568 B.C.—*Pliny*. The edifices or monuments of Rome were constructed of, or ornamented with, fine marble. The ruins of Palmyra are chiefly of white marble. The Marble Arch, London, erected at Buckingham palace, 1830, was removed to Hyde park, March, 1851.

Marburg (W. Germany). The cathedral was founded 1231; and the first Protestant university in 1527. It suffered much during the Seven Years' war, 1753–60.

March, the first month of the year, until Numa added January and February, 713 B.C. Romulus, who divided the year into months, gave to this month the name of his supposed father, Mars; though Ovid observes that the people of Italy had the month of March before the time of Romulus, but placed it differently in the calendar. The year formerly commenced on the 25th of this month; see *Year*.

Marches. The old boundaries between England and Wales, and England and Scotland. The lords marchers of the Welsh borders had viceregal authority; the wardens of the Scotch marches were subordinate officers. These powers were abolished 1536 and 1689.

Marchfeld (Austria). Here Ottocar II. of Bohemia was defeated and slain by his rival, the emperor Rodolph of Hapsburg, 26 Aug. 1278; see *Bohemia*.

Marcionites, followers of Marcion, a heretic, about 150, who preceded the Manichees, and taught similar doctrines.—*Cate*.

Marcomanni, a people of southern Germany, expelled the Boii from Bohemia, and, united with other tribes, invaded Italy about 167, but were repelled by the emperors Antoninus and Verus. They were defeated by the legion called, from a fabled miracle, the Thundering Legion, 179; and finally driven beyond the Danube by Aurelian, 271.

Marengo (N. Italy). Here the French army, commanded by Bonaparte, after crossing the Alps into Piedmont, attacked the Austrians, 14 June, 1800; his army was retreating, when the arrival of gen. Dessaix turned the fortunes of the day. The slaughter on both sides was dreadful. By a treaty between the Austrian general Melas and Bonaparte, signed 15 June, the latter obtained twelve strong fortresses, and became master of Italy.

Mareschals, or MARSHALS, in France, were the esquires of the king, and originally had the command of the vanguard to observe the enemy and to choose proper places for its encampment. Till the time of Francis I., in 1515, there were but two marshals, who had 500 livres per annum in war, but no stipend in time of peace. The number was afterwards greatly increased. Napoleon's marshals were renowned for skill and courage; see *Marshal*.

Mariner Persecution, see *Protestants*.

Marignano (now MALEGNANO), N. Italy, near Milan. Three battles have been fought near here. 1. Francis I. of France defeated the duke of Milan and the Swiss, 13, 14 Sept. 1515; above 20,000 men were slain. This conflict has been called the Battle of the Giants. 2. Near here was fought the battle of Pavia (*which see*), 24 Feb. 1525. 3. After the battle of Magenta, 4 June, 1859, the Austrians intrenched themselves at Malegnano. The emperor sent marshal Baraguay d'Hilliers with 16,000 men to dislodge them, which he did with a loss of about 850 killed and wounded, on 8 June. The Austrians are said to have lost 1400 killed and wounded, and 900 prisoners, out of 18,000 engaged.

Mariner's Compass, see *Compass* and *Magnetism*.

Marine Society (for the maintenance and instruction of boys for the navy) was founded by Jonas Hanway, 1756, and incorporated 1772. It instituted the first training-ship on the Thames, 1786. H.M.S. *Warspite* was burned, without loss of life, 3 Jan. 1876; and the boys were removed to the *Conqueror*.

Marines were first established with the object of forming a nursery to man the fleet. An order in council, dated 16 Oct. 1664, authorized 1200 soldiers to be raised and formed into one regiment. In 1684, the third regiment of the line was called the Marine Regiment; but the system of having soldiers exclusively for sea service was not carried into effect until 1698, when two marine regiments were formed. More regiments were embodied in subsequent years; and in 1741 the corps consisted of ten regiments, each 1000 strong. In 1759 they numbered 18,000 men. In the latter years of the French war, ending in 1815, they amounted to 31,400, but there were frequently more than 3000 supernumeraries. The *jollies*, as they are called, frequently distinguished themselves. The "Royal Marine Forces" (so named 1 May, 1802), now comprehend artillery and light infantry. The vote for 1857 was for 16,000 marines, inclusive of 1500 artillery.—*P. H. Nicolas*. Marine Engineers' Institution, founded in 1872.

Marino, San, a republic in central Italy. Its origin is ascribed to St. Marinus, a hermit, who resided here in the fifth century. Its independence lost for a short time—to Caesar Borgia, 1503, and to the pope, 1789; was confirmed by pope Pius VII. in 1817. A convention with Italy, 27 March, 1872. Population in 1858, about 8000; in 1869, 7303; in 1874, 7816.

Mariolatry, worship of the Virgin Mary; began in the fourth century, greatly increased in the tenth.

Marionnettes, puppet plays. The *fantoccini*, popular in Italy in the fifteenth century; in the eighteenth in England and Germany, see *Punch*.

Maritime Exhibition at Havre opened by representatives of the government, 1 June, 1868: a similar exhibition was opened at Naples by the prince of Piedmont, 17 April, 1871; at Paris, 10 July, 1875.

Mark, a silver coin of the northern nations, and the name *mark-lubs* is still retained in Denmark. In England, the mark means the sum of 13s. 4d., and the name is retained in law courts.

Market, see *Smithfield*, *Metropolitan Cattle Market*, *London*, 1868.

Mark's, St. (Venice). The church was erected in 829, the piazza in 1592.

The proposed restorations and changes in the façades and mosaic pavement created much excitement in England, and led to remonstrances which irritated the Italian people. . . . Nov., Dec. 1879

Marlborough, a town in Wiltshire; a royal manor mentioned in Domesday-book. King Henry III. passed the "*Statutes of Marlbridge*" in the ancient castle in 1267. Marlborough has returned two members to parliament since Edward I. The grammar-school was founded by Edward VI.—MARLBOROUGH HOUSE, Pall Mall, London, was built by Wren for the duke of Marlborough, 1709–10; was bought for the princess Charlotte and prince Leopold in 1817; held by queen Adelaide till 1849, and became the residence of the prince of Wales, 1863; see *Gems*.

Marocco, see *Morocco*.

Maronites, Christians in the East, followers of one Maron in the fifth century; they are said to have embraced the errors of the Jacobites, Nestorians, and Monothelites. About 1180 they numbered 40,000, living in the neighborhood of Mount Libanus, and were of service to the Christian kings of Jerusalem. They were reconciled to the Church of Rome soon after. For an account of the massacres of the Maronites in 1860, see *Druses*.

Maroons, a name given in Jamaica to runaway negroes. When the island was conquered from the Spaniards, a number of their negroes fled to the hills and became very troublesome to the colonists. A war of eight years' duration ensued, when the Maroons capitulated on being permitted to retain their free set-

Cujas assures us that the Gascons and other people bordering on the Pyrenean mountains had not relinquished this custom in his time, 1590. The women bore the name of "wives of the second order."—*Hénault*. See *Morganatic Marriages*.

DOUBLE MARRIAGES. There are some instances of a husband and two wives (but they are very rare) in countries where polygamy was interdicted by the state. The first Lacedæmonian who had two wives was Anaxandrides, the son of Leon, about 510 B.C. Dionysius of Syracuse married two wives, viz.: Doris, the daughter of Xenetus, and Aristomache, sister of Dion, 398 B.C. It is said that the count Gleichen, a German nobleman, was permitted, under peculiar circumstances, by Gregory IX., in A.D. 1237, to marry and live with two wives. The Mormons practise and encourage polygamy.

FORCED MARRIAGES. The stat. 3 Henry VII. 1487 made the principal and abettors in marriages with heiresses, etc., contrary to their will, equally guilty as felons. By 39 Eliz. 1596, such felons were denied the benefit of clergy. This offence was made punishable by transportation, 1 Geo. IV. 1820. The remarkable case of Miss Wharton, heiress of the house of Wharton, whom captain Campbell married by force, occurred in William III.'s reign. Sir John Johnston was hanged for seizing the young lady, and the marriage was annulled by parliament, 1690.—Edward Gibbon Wakefield was tried at Lancaster, and found guilty of the felonious abduction of Miss Turner, 24 March, 1827; and his marriage with her was immediately dissolved by act of parliament.

MARRIAGES BY SALE. Among the Babylonians, at a certain time every year, the marriageable females were assembled, and disposed of to the best bidder. This custom is said to have originated with Atossa, daughter of Belochos, about 1433 B.C.

Mars, a planet, next to the earth in order of distance from the sun; the spots on its surface were first observed by Fontana, in 1636. Two satellites were discovered by prof. Asaph Hall, at Washington, U. S., 11 Aug. 1877.

"They have likewise discovered two lesser stars or satellites which revolve about Mars."—*Swift, Gulliver's Travels—Voyage to Laputa*, about 1726.

Mar's Insurrection. John, earl of Mar, proclaimed James III. at Braemar, Aberdeenshire, 6 Sept. 1715. He was defeated at Sheriffmuir, 13 Nov., and escaped from Montrose with the Pretender, 4 Feb. 1716.

Marsaglia (Piedmont, N. Italy). Here the imperialists under prince Eugene and the duke of Savoy were defeated by the French under Catinat, 4 Oct. 1693.

Marseillaise Hymn. The words and music are ascribed to Rouget de Lisle, or L'Isle, a French engineer officer, who, it is said, composed it by request, 1792, to cheer the conscripts at Strasburg. It derived its name from a body of troops from Marseilles marching into Paris in 1792 playing the tune. This account is doubted (1879). The author was pensioned by Louis Philippe, 1830.

Marseilles. The ancient *Massilia* (S. France), a maritime city, founded by the Phœceans about 600 B.C.; an ally of Rome, 218 B.C. Cicero styled it the Athens of Gaul, on account of its excellent schools.

Suchet, duke of Albuera; died 3 Jan. 1826.
Victor, duke of Belluno; died 1 March, 1841.

Marshalsea Court, having jurisdiction in the royal palace, was very ancient, of high dignity, and coeval with the common-law. Since the decision of the case of the Marshalsea (see *lord Coke's 10 Rep. 68*) no business has been done in this court; but it was regularly opened and adjourned at the same time with the Palace court, the judges and other officers being the same. These courts were removed from Southwark to Scotland Yard in 1801, were abolished by parliament, and discontinued 31 Dec. 1849; see *Prisons*.

Marsi, a brave people of Southern Italy, who, after several contests, yielded to the Romans, about 301 B.C. During the civil wars they and their allies rebelled, having demanded and been refused the rights of Roman citizenship, 91 B.C. After many successes and reverses, they sued for and obtained peace and the rights they required, 87 B.C. The Marsi being *Socii* of the Romans, this was called the *Social war*.

Marston Moor (near York). The Scots and parliamentary army were besieging York, when prince Rupert, joined by the marquess of Newcastle, determined to raise the siege. Both sides drew up on Marston Moor, on 2 July, 1644, and the contest was long undecided. Rupert, commanding the right wing of the royalists, was opposed by Oliver Cromwell, at the head of troops disciplined by himself. Cromwell was victorious; he drove his opponents off the field, followed the vanquished, returned to a second engagement and a second victory. The prince's artillery was taken, and the royalists never recovered from the blow.

Martello Towers, or **MORTELLA TOWERS**, were circular buildings erected in the beginning of the present century on the southern coast of England, and other parts of the empire, as defences against invasion.

Martinique (French West Indies), discovered in 1493 or 1502; settled by France, 1635. This and the adjacent isles of St. Lucia and St. Vincent, and the Grenadines, were taken by the British from the French in Feb. 1762. They were restored to France at the peace of the following year. They were again taken, 16 March, 1794; restored at the peace of Amiens in 1802; again captured 23 Feb. 1809. A revolution in this island

in favor of Napoleon was finally suppressed by the British, 1 June, 1815, and Martinique reverted to its French masters. Severe earthquakes occurred here in 1767 and 1839.

Martinmas, 11 Nov., the feast of St. Martin, bishop of Tours, in the fourth century, is quarter-day in parts of the north of England and in Scotland. The high-sheriffs of England and Wales are nominated on the morrow of St. Martin, 12 Nov.

Martin's Hall, St. (Long Acre, London), was opened as a concert-room for Mr. John Hullah on 11 Feb. 1850; burned down 26 Aug. 1860; rebuilt 1861; opened as the New Queen's Theatre, by Mr. Alfred Wigan, 24 Oct. 1867.

Martyrs. Stephen, the first Christian martyr, was stoned, 37. The festivals of the martyrs, of very ancient date, took their rise about the time of Polycarp, who suffered martyrdom about 169. St. Alban is the English protomartyr, 286; see *Persecutions, Protestants, and Diocletian Era*. The Martyrs' Memorial, Smithfield, erected by the Protestant Alliance, was inaugurated 11 March, 1870. The Martyrs' Memorial church, St. John's street, Clerkenwell, was consecrated 2 June, 1871.

Maryland, named after queen Henrietta Maria, one of the original states of the United States, was granted in 1632 to lord Baltimore, and settled by a company of English Romanists in 1634. It continued in the Union when the other slave states seceded in 1860 and 1861. The Confederate army, under gen. Lee, after their victory at Bull Run, 30 Aug. 1862, crossed the Potomac and entered Maryland. They were followed by the Federal army under McClellan. Severe conflicts ensued, especially on 17 Sept., at Antietam Creek, with great loss on both sides, each claiming the victory; see *Antietam*.

Marylebone, a large parish, N. W. London. The name is corrupted from St. Mary at the Bourne, or brook—Tyebourne. It was chiefly pasture land in 1760. The manor was acquired by the duke of Portland in 1813. The hunting-grounds now form Regent's park (*which see*). The parishes of Marylebone, St. Pancras, and Paddington were made a parliamentary borough in 1882.

Marylebone Gardens—attached to the "Rose of Normandy"—a place of public entertainment, opened in the middle of the seventeenth century; mentioned by Pepys, closed 23 Sept. 1776; a music hall erected here, 1855.

Masanietto, see *Naples*, 1617. Auber's opera "La Muette de Portici" (1828) was produced in London as "Masaniello," 4 May, 1829.

Mascat, see *Muscat*.

Masks. Poppæa, the wife of Nero, is said to have invented the mask to guard her complexion from the sun; but theatrical masks were in use among the Greeks and Romans. Horace attributes them to Æschylus; yet Aristotle says the inventor and time of their introduction were unknown.—Modern masks, and muffs, fans, and false hair for the women, were devised in Italy, and brought to England from France in 1572.—*Stour*. See *Iron Mask*.

Masonic Institutions, see *Freemasonry*.

Masorah (Hebrew for *tradition*), a collection of conjectural readings (*kerie*) of the Hebrew text of the Old Testament, with critical, grammatical, and exegetical remarks by various Jewish doctors (written between the sixth and tenth centuries), who also furnished the *Masoretic vowel-points*.

The first Rabbinical Hebrew Bible, containing the Masorah, Targums, and comments, was printed by Bomberg at Venice, 1518. The "Book of the Masorah, the Hedge of the Law," was first printed at Florence, 1730.

Masquerades were in fashion in the court of Edward III., 1340; and in the reign of Charles II., 1660, masquerades were frequent among the citizens. The bishops preached against them, and made such represen-

tations as occasioned their suppression, 9 Geo. I. 1724. They were revived and carried to a shameful excess in violation of the laws; and tickets of admission to a masquerade at Ranelagh were on some occasions subscribed for at twenty-five guineas each, 1776.—*Mortimer*. At the close of a bal masqué, given by Anderson the Wizard, 5 March, 1856, Covent-garden theatre was destroyed by fire.

Masques, precursors of the opera, introduced into England in the latter part of the sixteenth century; many were written by Ben Jonson; one at the Middle Temple on the marriage of princess Elizabeth, Feb. 1613. Milton's "Comus" was represented at Ludlow castle in 1634.

Mass, in the Roman church, is the office or prayers used at the celebration of the eucharist, in memory of the passion of Christ, and to this every part of the service alludes. The general division consists in high and low; the first is that sung by choristers, and celebrated with the assistance of a deacon and sub-deacon; low-masses are those in which the prayers are rehearsed without singing. Mass was first celebrated in Latin about 394; it was introduced into England in the seventh century. Prostration was enjoined at the elevation of the host in 1201. Dr. Daniel Rock, in "The Church of our Fathers" (1849), describes an ancient MS. of "The Service of the Mass, called the Rite of Salisbury," compiled for that cathedral, by St. Osmund and others, during the twelfth century. The English communion service was adopted in 1549; see *Missal and Ritualism*.

Massachusetts, one of the United States. First settled at Plymouth by a colony of English Puritans, who had lived some time in Holland, after being driven out of their own country by persecution, 1620. This was called the Plymouth colony. In 1628 others direct from England settled at Salem and Charlestown, and in 1630 at Boston, and this was called the Massachusetts Bay colony. By this name the whole province was called until the Revolution, the two above-named colonies having been united in 1692. Here were transacted some of the earlier and most important scenes of the Revolution; see *Boston*. It adopted a state constitution in 1780, and accepted the federal constitution in Feb. 1788, by which it became a member of the confederacy.

Massacres. The following are among the most remarkable, probably exaggerated:

BEFORE CHRIST.

Of all the Carthaginians in Sicily, 397.
2000 Tyrians crucified and 8000 put to the sword for not surrendering Tyre to Alexander, 331.
Of 2000 Capuans, friends of Hannibal, by Gracchus, 211.
A dreadful slaughter of the Teutones and Ambrones, near Aix, by Marius, the Roman general, 200,000 being left dead on the spot, 102.
The Romans throughout Asia, women and children not excepted, massacred in one day, by order of Mithridates, king of Pontus, 88.
A great number of Roman senators massacred by Cinna, Marius, and Sertorius, 87.
Again, under Sylla and Catiline, his minister of vengeance, 82.
At Perugia, Octavianus Caesar ordered 300 Roman senators and other persons of distinction to be sacrificed to the manes of Julius Caesar, 40.

AFTER CHRIST.

At the destruction of Jerusalem, 1,100,000 Jews are said to have been put to the sword, 70.
The Jews, headed by one Andre, put to death many Greeks and Romans in and near Cyrene, 115.
Cassius, a Roman general, under the emperor M. Aurelius, put to death 300,000 of the inhabitants of Seleucia, 165.
At Alexandria, many thousands of citizens were massacred by order of Antoninus, 215.
The emperor Probus is said to have put to death 400,000 of the barbarian invaders of Gaul, 277.
Of the Gothic hussars by Valens, 378.
Of Thessalonians, when 5000 persons invited into the circus were put to the sword by order of Theodosius, 390.
Of the circus factions at Constantinople, 532.
Massacre of the Latins at Constantinople by order of Andronicus, 1184.
Of the Albigenses and Waldenses, commenced at Toulouse, 1208. Thousands perished by the sword and gibbet.
Of the French in Sicily, 1282; see *Sicilian Vespers*.
At Paris, of the Armagnacs, at the instance of John, duke of Burgundy, 1418.

Of the Swedish nobility, at a feast, by order of Christian II., 1520.
 Of Protestants at Vassy, 1 March, 1562.
 Of 70,000 Huguenots, or French Protestants, in France (see *St. Bartholomew*), 24 Aug. 1572.
 Of the Christians in Croatia by the Turks, when 65,000 were slain, 1592.
 Of the pretender Demetrius, and his Polish adherents, at Moscow, 27 May, 1605.
 Of Protestants in the Valteline, N. Italy, 19 July, 1620.
 Of Protestants at Thorn, put to death under a pretended legal sentence of the chancellor of Poland, for being concerned in a tumult occasioned by a Roman Catholic procession, 1724.
 All the Protestant powers in Europe interceded to have this unjust sentence revoked, but unavailingly.
 At Batavia, 12,000 Chinese were massacred by the natives, Oct. 1740, under the pretext of an intended insurrection.
 Massacre of Wyoming, U.S., by Tories, British, and Indians, who slaughtered and scalped men, women, and children, 3 July, 1778.
 At the taking of Ismail by the Russians, 30,000 old and young were slain, Dec. 1790; see *Ismail*.
 Of French royalists (see *Septembriseurs*), 2 Sept. 1792.
 Of Poles at Praga, 1794.
 In St. Domingo, where Dessalines made proclamation for the massacre of all the whites, 29 March, 1804, and many thousands perished.
 Insurrection at Madrid, and massacre of the French, 2 May, 1808.

 Of Gen. Custer and his entire force (276 men), by Indians under Sitting Bull, on the Little Big Horn river, 25, 26 June, 1876.

MASSACRES IN BRITISH HISTORY.

Of 300 British nobles, on Salisbury Plain, by Hengist, about 450.
 Of the monks of Bangor, to the number of 1200, by Ethelfrid, king of Bernicia, 607 or 612.
 Of the Danes in the southern counties of England, on the night of 13 Nov. 1002, by order of Ethelfred II. At London it was most bloody, the churches being no sanctuary. Among the rest was Gunilda, sister of Swein, king of Denmark, left in hostage for the performance of a treaty but newly concluded.—*Baker*.
 Of the Jews in England. Some few, pressing into Westminster hall at Richard I.'s coronation, were put to death by the people; and, a false alarm being given that the king had ordered a general massacre of them, the people in many parts of England slew all they met. In York 500, who had taken shelter in a castle, killed themselves rather than fall into the hands of the multitude, 1199.
 Of the Bristol colonists at Cullen's Wood, Ireland (see *Cullen's Wood*), 1209.
 Of the English factory at Amboyna, in order to dispossess its members of the Spice Islands, Feb. 1625.
 Massacre of the Protestants in Ireland, in O'Neill's rebellion, which began 23 Oct. 1641. Upwards of 30,000 British were killed in the commencement of this rebellion.—*Sir William Pitt*. In the first three or four days of it, forty or fifty thousand of the Protestants were destroyed.—*Lord Clarendon*. Before the rebellion was entirely suppressed, 154,000 Protestants were massacred.—*Sir W. Temple*.

Of the Macdonalds of Glencoe (see *Glencoe*), 13 Feb. 1692.
 Of 184 men, women, and children, chiefly Protestants, burned, shot, or pierced to death by pikes; perpetrated by the insurgent Irish, at the barn of Scullabogue, Ireland, in 1798.—*Mugrave*.
 Of Europeans at Meerut, Delhi, etc., by mutineers of the native Indian army (see *India*), May and June, 1857.
 Of Europeans at Kalangan, on the south coast of Borneo, 1 May, 1859.
 Of the Europeans at Morant Bay, Jamaica, by the infuriated negroes, 11, 12 Oct. 1865; see *Jamaica*.
 Of lieutenant Holcombe and surveying party (about 70) in Assam, on Naga hills, about 24 Feb. 1875.
 Of Mr. Margary and servants (with col. Browne's expedition into Western China) at Manwyne, by Chinese, 21 Feb. 1875.
 Of Commodore Goodenough, of the *Pearl*, and 2 seamen, by natives of Santa Cruz island, South Pacific Ocean; attacked 12 Aug.; died 20 Aug. 1875.

Massagetae, an ancient Scythian people (probably the ancestors of the Goths), who invaded Asia about 635. In a conflict with them Cyrus the Great was killed, 529 B.C.

Massilia, see *Marseilles*.

Massorah, see *Masorah*.

Master and Servant Act (amending the statute respecting them) was passed 20 Aug. 1867; see *Servants*. Royal commission to examine into its working, reported 31 July; published evidence.....Oct. 1874

Master of the Ceremonies, see *Ceremonies*.

Master of the Great Wardrobe, an officer of great antiquity and dignity. The establishment was abolished in 1782, and the duties transferred to the lord chamberlain.

Master of the Revels, an officer of the court. Solomon Dayrolle was the last appointed. Part of the duties were transferred to the licenser of plays, 1737.

Master of the Rolls, an equity judge, derives his title from having the custody of all charters, patents, commissions, deeds, and recognizances entered upon rolls of parchment; his decrees are appealable to the court of chancery. The repository of public papers, called the Rolls, was in Chancery lane. The rolls were formerly kept in a chapel founded for the converted Jews; but after the Jews were expelled the kingdom in 1290 it was annexed forever afterwards to the office of the mastership of the rolls. Here were kept all the records since the beginning of the reign of king Richard III., 1483; all prior to that period being kept in the Tower of London; see *Records*. The first recorded master of the rolls was either John de Langton, appointed 1286, or Adam de Osgodeby, appointed 1 Oct. 1295; but it is clear that the office was in existence long before.—*Hardy*. The duties were defined in 1833; the salary regulated in 1837.

RECENT MASTERS OF THE ROLLS.

Sir Wm. Grant appointed.....	27 May, 1801
Sir Thomas Plumer.....	6 Jan. 1818
Robert lord Gifford.....	5 April, 1824
Sir J. S. Copley (afterwards lord Lyndhurst).....	14 Sept. 1826
Sir John Leach.....	3 May, 1827
Sir C. Pepys (afterwards lord Cottonham).....	29 Sept. 1834
Henry Bickersteth (afterwards lord Langdale).....	19 Jan. 1836
Sir John (baron 1865) Romilly.....	28 March, 1861
Sir George Jessel (a Jew).....	29 Aug. 1873

Masters in Chancery chosen from the equity bar were first appointed, it is said, to assist the ignorance of sir Christopher Hatton, lord chancellor of England, in 1587. The office was abolished in 1852. The offices of the masters in the queen's bench, common pleas, and exchequer divisions of the high court of justice were amalgamated into one central office in the high court of justice in 1879.

Mastodon, see *Mammoth*.

Matacão, a small island near Sierra Leone; secured to the British by treaty, 18 April, 1826. It was occupied by the French, March, 1879; and after some discussion was left by them June following.

Matches, see *Lucifers*.

Materialism, the doctrine held by those who maintain that the soul of man is not a spiritual substance

distinct from matter, but is the result of a particular organization of matter in the body. The term is rather loosely applied to the system of Epicurus, about 310 B.C.; Hobbes, about A.D. 1642; Priestley, about 1772; and many eminent men in the present day. It is not necessarily identical with atheism.

Maternity Charity, Royal, Finsbury; founded 1757.

Mathematics formerly signified all kinds of learning; but the term is now applied to the sciences relating to numbers and quantity; see *Arithmetic*. Among the most eminent mathematicians were Euclid, 800 B.C.; Archimedes, 287 B.C.; Descartes, died 1650 A.D.; Barrow, died 1677; Leibnitz, died 1716; sir Isaac Newton, died 1727; Euler, died 1783; Lagrange, died 1813; Laplace, died 1827; and Dr. Peacock, died 1858; sir G. B. Airy (astronomer royal), Bartholomew Price, J. J. Sylvester, and I. Todhunter are eminent mathematicians. Mary Somerville, born 1790, author of the "Mechanism of the Heavens," died 1873. The London Mathematical Society was founded 16 Jan. 1865; prof. Aug. De Morgan, president.

Mathurins, see under *Trinity*.

Matins. The service or prayers first performed in the morning or beginning of the day in the Roman Catholic church. The *French Matins* were the massacre of St. Bartholomew, 24 Aug. 1572. The *Matins of Moscow* were the massacre of prince Demetrius, and the Poles his adherents, in the morning of 27 May, 1606.

Matrimonial Causes Act, passed 1859. By the act passed 27 May, 1878, a magistrate may grant judicial separation with maintenance to a wife suffering from a husband's violent usage.

Matter is held to exist in three states; gaseous, liquid, and solid. Mr. William Crookes considers that there is a fourth state, "radiant matter," subtler than any of these, 1879-80; see *Light*.

Matterhorn, a part of the main ridge of the Alps, about 14,836 feet high, S. Switzerland. After various fruitless attempts by prof. Tyndall and other eminent climbers, in 1860, the summit was reached on 14 July, 1865, by Mr. Edward Whymper and others. During their descent, four of the party were killed. Mr. Hadow fell; the connecting-rope broke, and he himself, lord Francis Douglas, the rev. Mr. Hudson, and Michael Croz, a guide, slipped down, and fell from a precipice nearly 4000 feet high. Miss Walker, with her father, ascended the Matterhorn, 22 July, 1871. Three gentlemen ascended without a guide, 21 July, 1876. Dr. W. O. Moseley, an American, was killed here, 14 Aug. 1879.

Maumee Rapids, BATTLE OF. At the Maumee Rapids, in northern Ohio, Wayne, with American troops, fought with, defeated, and completely routed 2000 Indians, on 20 Aug. 1794. The Americans lost 33 killed and 100 wounded. This battle ended the Indian war in the Northwest.

Maundy-Thursday (derived by Spelman from *mande*, a hand-basket, in which the king was accustomed to give alms to the poor; by others from *dis mandati*, the day on which Christ gave his grand *mandate*, that we should love one another), the Thursday before Good Friday.—*Wheatly*. On this day it was the custom of our sovereigns or their almoners to give alms, food, and clothing to as many poor persons as they were years old. It was begun by Edward III., when he was fifty years of age, 1363, and is still continued.

Maur, St., see *Benedictions*.

Mauritania (N. Africa), with Numidia, became a Roman province, 45 B.C., with Sallust for proconsul. Augustus created (30 B.C.) a kingdom formed of Mauritania and part of Getulia, for Juba II., a descendant of the ancient African princes. Suetonius Paulinus suppressed a revolt here, A.D. 42, when it was made a province, divided into parts. The country was subjugated

by the Vandals and Greeks, and fell into the hands of the Arabs, about 667; see *Morocco* and *Moors*.

Mauritius, or ISLE OF FRANCE (in the Indian Ocean), was discovered by the Portuguese, 1505; but the Dutch were the first settlers in 1598. They called it after prince Maurice, their stadtholder; but on the acquisition of the Cape of Good Hope they deserted it; and it continued unsettled until the French landed, and gave it the name of one of the finest provinces in France, 1715. This island was taken by the British, 2 Dec. 1810, and was confirmed to them by the treaty of Paris in 1814. The bishopric was founded 1854. Sir Henry Barkley, governor, in 1863, succeeded by sir Arthur H. Gordon, 1870; sir Arthur Purves Phayre, 1874; sir George F. Bowen, 1878. Population in 1861, 313,462; in 1875, 344,602. In 1866 two railways were in progress; both now opened. By an awful hurricane on 11 March, 1868, great damage was done to shipping and buildings, with much loss of life.

Mausoleum. Artemisia married her own brother, Mausolus, king of Caria, Asia Minor, 377 B.C. At his death she drank in liquor his ashes after his body had been burned, and erected to his memory at Halicarnassus a monument, one of the seven wonders of the world (350 B.C.), termed *Mausoleum*. She invited all the literary men of her age, and proposed rewards to him who composed the best elegiac panegyric upon her husband. The prize was adjudged to Theopompus, 357 B.C. She died 352 B.C. The statue of Mausolus is among the antiquities brought from Halicarnassus by Mr. C. T. Newton in 1857, and placed in the British Museum. A mausoleum for the royal family of England was founded by the queen at Frogmore, 15 March, 1862.

Mauve (French for *malva*, mallow), a dye produced by Dr. Stenhouse from lichens in 1848; now produced from *Aniline* (which see).

May, the fifth month of the year, received its name, some say, from Romulus, who gave it this appellation in respect to the senators and nobles of his city, who were denominated *maiores*; others supposed it was so called from Maia, the mother of Mercury, to whom they offered sacrifices on the first day. The ancient Romans used to go in procession to the grotto of Egeria on May-day; see *Eril May-day*.

Mrs. Elizabeth Montagu (who died in 1800) gave for many years, on May-day, an entertainment at her house in Portman square, to the chimney-sweepers of London. They were regaled with roast beef and plum-pudding, and a dance succeeded. Upon their departure each guest received a shilling from the mistress of the feast. It is said, though the statement is much doubted, that this entertainment was instituted to commemorate the circumstance of Mrs. Montagu's having once found a boy of her own, or that of a relation, among the sooty tribe. In allusion to this incident, perhaps, a story resembling the adventures of this lost child is pathetically related by Montgomery, in "The Chimney-sweeper's Boy."

The annual festival of "Jack in the Green," and his companion sweeps, has gradually ceased, 1876.

May Laws, see *Prussia*, May, 1873.

Mayence, see *Mentz*.

"**Mayflower,**" see *Pilgrim Fathers*.

Maynooth College (Ireland), founded by parliament, 1795, and endowed by a yearly grant voted for the education of students designed for the Roman Catholic priesthood in Ireland. An act for its government was passed in 1800. It contains about 500 students. Permanent endowment of this college (30,000*l.* for the enlargement of the buildings and 26,000*l.* annually) was granted by parliament, June, 1845. This occasioned much controversy in England, a motion being made for its abolition almost every session. The college was repaired and enlarged in 1860. By the Irish Church act, passed 26 July, 1869, the annual parliamentary grant was to cease after 1 Jan. 1871, a compensation being made. A synod held here, Sept. 1875, condemned mixed education. The buildings were much injured by fire,

31 Oct. 1878; damage estimated at 10,000*l*. The pictures and books were saved.

Mayo Assassination. Richard Southwell Bourke, earl of Mayo, was born 21 Feb. 1822. As lord Naas he was chief secretary for Ireland, in the Derby and Disraeli administrations, 1852, 1858-9, 1866-8. In Sept. 1868, he was appointed viceroy of India, and energetically fulfilled the duties. He was assassinated at Port Blair in the Andaman islands, on a visit of inspection, by Shere Ali, a convict, 8 Feb. 1872. The Indian government granted an annual pension of 1000*l*. to the countess, and 20,000*l*. for the children, and 1000*l*. a year was added to lady Mayo's pension by parliament, voted unanimously, 22 July, 1872.

Mayors of Corporations. At the time of the Norman conquest, 1066, the chief officer of London was called *portgrave*, afterwards softened into *portveere*, from Saxon words signifying chief governor of a harbor. He was afterwards called provost, but in Henry II.'s reign the Norman title of *maire* (soon after *mayor*) was brought into use. At first the mayor was chosen for life, but afterwards for periods of irregular duration; now he is chosen annually, but is eligible for re-election. He must be an alderman, and have been sheriff. His duties commence on 9 Nov. The prefix *LORD* is peculiar to the chief civic officer of London, Dublin, Edinburgh, and York.

The "*Lord Mayor's Court*" is very ancient.

The first mayor of London, Henry Fitz-Alwyn, held office for 24 years, appointed. 1199
First presented to the barons of the exchequer. 1251
The prefix of *lord* granted by Edward III., with the style of *right honorable*. 1354
Sir Henry Pickard, who had been lord mayor of London in 1357, sumptuously entertained in one day four monarchs: Edward, king of England; John, king of France; the king of Cyprus; and David, king of Scotland; the Black Prince and many of the nobility being present (*Stow*). 1363

Sir John Norman the first lord mayor who went by water to be sworn at Westminster, and instituted lord mayor's show. 1453
The more costly pageants of the show laid aside. 1685
The lord mayor entertained the prince regent of England, the emperor of Russia, king of Prussia, and numerous foreigners of high rank. 18 June, 1814
The lord mayor, Farncombe, gave a banquet to prince Albert, and the mayors of most of the boroughs of the United Kingdom, in furtherance of the project of the great International Industrial Exhibition, 1851.

21 March, 1850
The lord mayor, sir F. Moon, entertained the emperor and empress of the French. 19 April, 1855
The lord mayor, B. S. Phillips, entertained the king and queen of the Belgians, July; entertained by them at Brussels. Oct. 1866
The lord mayor entertained the viceroy of Egypt, 11 June; the sultan, 18 July, 1867; the shah of Persia, 20 June, 1873; the czar. 18 May, 1874

Mazra (or *BABA WALI*), near Candahar, Afghanistan. Here gen. sir Frederick Sleigh Roberts totally defeated Sirdar Mahomed Ayooob Khan, and captured his camp and all his cannon, 1 Sept. 1880. Among the killed were col. F. Brownlow, capt. St. John F. Frome, and capt. E. Straton; lieut. Hector MacLaine (made prisoner 27 July) was found recently murdered. Ayooob Khan, with some followers, fled towards Herat.

Mazurka, a Polish dance of the sixteenth century, introduced into England about 1845. Chopin's music for the mazurka is much admired.

Meal-tub Plot, against the duke of York, afterwards James II., contrived by one Dangerfield, who secreted a bundle of seditious letters in the lodgings of col. Maunsell, and then gave information to the custom-house officers to search for smuggled goods, 23 Oct. 1679. After Dangerfield's apprehension, on suspicion of forging these letters, papers were found concealed in a *meal-tub* at the house of a woman with whom he cohabited, which contained the scheme to be sworn to, accusing the most

eminent persons in the Protestant interest, who were against the duke of York's succession, of treason, particularly the earls of Shaftesbury, Essex, and Halifax. On Dangerfield being whipped the last time, as part of his punishment, 1 June, 1695, one of his eyes was struck out by a barrister named Robert Francis. This caused his death, for which his assailant was hanged.

Measures, see *Weights and Micrometer*. "Not men, but measures," a phrase used in parliament by Brougham, 2 Nov. 1830.

Meat, see *Provisions*.

Meat-biscuit, said to have been invented by Gail Borden, 1850; see *Milk*.

Meath (Ireland). Many episcopal sees in Meath (as Clonard, Duleek, and others of less note) were fixed at Clonard, before 1151-2, when the division of the bishoprics in Ireland was made by John Paparo, then legate from pope Eugene III. Eugene was the first styled bishop of Meath, about 1174. Meath was valued, 30 Henry VIII., at 373*l.* 12*s.* per annum.

Mecca (in Arabia), the birthplace of Mahomet, about 571, whence he was compelled to flee, 15 July, 622 (the Hegira). On one of the neighboring hills is a cave where it is asserted he retired to perform his devotions, and where the greatest part of the Koran was brought to him by the angel Gabriel, 604. Mecca, after being vainly besieged by Hoscin for the caliph Yezid, 682, was taken by Abdelmelek, 692. In 1803 it fell into the hands of the Wahabees, a Mahometan sect. They were expelled by the pacha of Egypt in 1818, who retired in 1841. It is said that 160,000 pilgrims visited Mecca in 1858, and only 50,000 in 1859. The grand shereef was assassinated by a fanatic, 21 March, 1880.

Mechanics' Institutions. One was founded by Dr. Birkbeck in London, and another in Glasgow, in 1823; and soon after others arose in different parts of the empire. They have revived since 1857, many noblemen and gentlemen giving lectures in them.

Mechanics' Magazine, weekly; established 30 Aug. 1823; was incorporated with a new paper termed *Iron*, Jan. 1873.

Mechanicsville (Va.), BATTLE AT, 26 June, 1862. This battle was the beginning of the seven days' fighting between Lee and McClellan, by which McClellan was compelled to raise the siege of Richmond and retire to Harrison's Landing, on the James river. The confederates at Mechanicsville assaulted the federal position with great determination, and fearful carnage ensued, the confederates losing between 3000 and 4000 men. Critics have asserted that at the close of the battle Richmond was at the mercy of the national army, but such was not the opinion of gen. McClellan, who, deeming his position a dangerous one to maintain, at once prepared to retreat; see *Peninsular Campaign*.

Mechlin, or **MALINES** (Belgium), renowned for its lace manufacture, was founded in the sixth century; destroyed by the Normans in 884; sacked by the Spaniards, 1572; taken by the prince of Orange, 1578, and by the English, 1580; and frequently captured in the seventeenth and eighteenth centuries, partaking in the evil fortunes of the country. A Roman Catholic congress was held here Sept. 1867.

Mecklenburg (N. Germany), formerly a principality in Lower Saxony, now independent as the two grand-duchies of Mecklenburg-Schwerin (population in 1875, 553,785) and Mecklenburg-Strelitz (population in 1875, 95,673). The house of Mecklenburg claims to be descended from Genseric the Vandal, who ravaged the western empire in the fifth century, and died 477. During the Thirty Years' war Mecklenburg was conquered by Wallenstein, who became its duke, 1628; it was restored to its own duke 1630. After several changes the government was settled in 1701 as it now exists in the two branches of Schwerin and Strelitz. In 1815 the dukes were made grand-dukes. The dukes joined the new North German Confederation by treaty, 21 Aug. 1866. Disputes between the two chambers respecting a new constitution, Feb. 1875.

GRAND-DUKES OF MECKLENBURG-SCHWERIN.

1815. Frederic Francis I.; died 7 March, 1842.
1842. Frederic Francis II.; born 28 Feb. 1823.
Heir: his son, Frederic Francis, born 19 March, 1851.

GRAND DUKES OF MECKLENBURG-STRELITZ.

1815. Charles; died 6 Nov. 1816.
1816. George; born 12 Aug. 1779; died 6 Sept. 1860.
1860. Frederic William; born 17 Oct. 1819; married princess Augusta of Cambridge, 28 June, 1843.
Heir: his son, Adolphus Frederic, born 22 July, 1848.
The royal family of England is intimately allied with the house of Mecklenburg-Strelitz. King George III. married Charlotte, a daughter of the duke, in 1761; their son, the duke of Cumberland (afterwards king of Hanover), married princess Frederica Caroline, a daughter of the duke, in 1815.

Mecklenburg Declaration of Independence. On 31 May, 1775, prominent citizens of Mecklenburg county, N. C., signed and issued a document virtually declaring the independence of the British colonies in America. This was more than a year before the adoption of the Declaration of Independence by congress.

Medals, see *Numismatics*. The ancient medals resembled medallions. Modern medals began about 1455 in Germany. The house of commons resolved to grant rewards and medals to the fleet whose officers (Blake, Monk, Penn, and Lawson) and men gained a glorious victory over the Dutch fleet, off the Texel, in 1653. Blake's medal of 1653 was bought by his majesty William IV. for 150 guineas. In 1692 an act was passed for applying the tenth part of the proceeds of prizes for medals and other rewards for officers, seamen, and marines. Subsequent to lord Howe's victory, 1 June, 1794, it was thought expedient to institute a naval medal. Medals were struck for the victory of Waterloo; a general war-medal (for the war 1793-1814) was ordered in 1847; and special medals were given after the Caffre and Chinese wars. Medals were presented by the queen

to persons distinguished in the war in the Crimea, 18 May, 1855. Medals were given to arctic voyagers of 1875-6, in 1877. Col. Eaton exhibited 1000 medals in New Bond street, May, 1880.—American national medals number 86 in all. Of these, "17 belong to the period of the revolution, 27 to the war of 1812-15, 4 to the Mexican war, and 2 to the civil war." The first medal ordered by congress was a gold one, voted "to his excellency general Washington," 25 March, 1776, for "his wise and spirited conduct in the siege and acquisition of Boston." Mr. J. F. Loubat's costly and laborious work on "The Medallic History of the United States" was published 1878.

Medical Association, British, founded in 1832 for the promotion of medical science and the maintenance of the honor of the medical profession. It holds annual meetings at different places in the United Kingdom, and publishes the *British Medical Journal* weekly.

Medical Benevolent College, Royal (Epsom), opened in 1855 by the prince consort. It provides an asylum for 20 pensioners, male and female; and 40 foundation scholars (sons of medical men) are fed, clothed, and educated.

Medical Congresses, International, have been held at Paris, 1867; Florence, 1869; Vienna, 1873; Brussels, 1875; Geneva, 1877; Amsterdam, 1879; the seventh was held in London, 2-9 Aug. 1881.

Medical Council. The Medical act, 1858, "to regulate the qualifications of practitioners in medicine and surgery," was amended in 1860. It established "the General Council of Medical Education and Registration of the United Kingdom." The first meeting of this council took place on 23 Nov. 1858, when sir B. C. Brodie was elected first president (who on 30 Nov. was elected president of the Royal Society). He was succeeded by Mr. J. H. Green in June, 1860; by Dr. George Burrows, Jan. 1864; by Dr. George Edward Paget in 1870; and by Dr. Henry Wentworth Acland in 1874. The first "Medical Register" was issued in July, 1859. In 1862 the council was incorporated by parliament, and authorized to prepare and sell a new Pharmacopæia, which was published as the "British Pharmacopæia," in 1864. New editions have appeared since.

Medici Family, the restorers of literature and the fine arts in Italy, were chiefs, or *signori*, of the republic of Florence from 1434, in which year Cosmo de' Medici, who had been banished from the republic, was recalled and made its chief; he ruled for thirty years. Lorenzo de' Medici, styled "the Magnificent," and the "Father of Letters," ruled Florence from 1469 to 1492. Giovanni de' Medici (pope Leo X.) was the son of Lorenzo.—*Roscoe*. From 1569 to 1737 the Medici family were hereditary grand-dukes of Tuscany (*which see*). Cattarina de' Medici became queen of France in 1547, and regent in 1550. She plotted with the duke of Alva to destroy the Protestants in 1565.

Meeanee. The Beloochees, amounting to 30,000 infantry, with 15 guns and 5000 cavalry, posted in a formidable position at Meeanee, were defeated with great loss on 17 Feb. 1843, by lieutenant-gen. sir Charles Napier, with 2600 men of all arms.

Meerut (near Delhi). Here the Indian mutiny began, 10 May, 1857; see *India*.

Megæra, see *Wrecks*, 1871.

Megaphone, a form of telephone (*which see*), invented by Mr. T. A. Edison, for the use of the deaf; announced 1878.

Megara, a city of ancient Greece, was subdued by the Athenians in the eighth century B.C. Pericles suppressed a revolt, 445 B.C. The Megarians founded Byzantium 657 B.C., and sent a second colony, 628 B.C. The Megarian (Eristic, or disputatious) school of philosophy was founded by Euclid and Stilpo, natives of Megara.

Mehadpore, or MAHEDPORE (W. India). Here sir Thomas Hislop and sir John Malcolm defeated the Mahrattas under Holkar, 21 Dec. 1817.

Meigs, Fort, at the Maumee Rapids, was occupied by gen. Harrison, with about 2000 American troops, in the spring of 1813. There, on 1 May, he was besieged by gen. Proctor, with a British and Indian force amounting in all to about 2800 men. On the 5th they were attacked by a part of gen. Clay's brigade, 800 in number, and driven off. The victors pursued, but were turned upon and overwhelmed by the British and Indians. During the siege the Americans lost 81 killed and 190 wounded. In the attack and pursuit, on 5 May, the Americans lost 80 killed and 490 made prisoners.

Melanesia, southwest Pacific isles. The rev. J. C. Patteson (son of sir John), born 1827, was consecrated missionary bishop of Melanesia. He and the rev. J. Atkin were murdered at the isle of Santa Cruz, one of the Queen Charlotte group, by the natives, Sept. 1871, it is supposed in revenge for the kidnapping of natives for slaves for Queensland and the Fiji isles, a measure which the bishop himself strenuously opposed.

Melazzo (W. Sicily). Here Garibaldi, on 20, 21 July, 1860, defeated the Neapolitans under gen. Bosco, who lost about 600 men, Garibaldi's loss being 167. The latter entered Messina; and on 30 July a convention was signed, by which it was settled that the Neapolitan troops were to quit Sicily. They held the citadel of Messina till 13 March, 1861.

Melbourne (Australia), capital of Victoria (*which see*). It was founded by J. P. Fawkener, 29 Aug. 1835; and laid out as a town by order of sir R. Bourke, in April, 1837. The first land sale took place in June, and speculation continued till it caused wide-spread insolvency, in 1841-2; see *Victoria*.

Melbourne Administrations. On the retirement of earl Grey, 9 July, 1834, viscount Melbourne became first minister of the crown, 16 July. When viscount Althorp became earl Spencer, on his father's decease, Nov. same year, lord Melbourne waited on the king to receive his majesty's command as to the appointment of a new chancellor of the exchequer, when his majesty said he considered the administration at an end. Sir Robert Peel succeeded, but was compelled to resign in 1835, and lord Melbourne returned to office. His administration finally terminated, 30 Aug. 1841, sir Robert Peel again coming into power; see *Administrations*.

FIRST ADMINISTRATION, July, 1834, resigned Nov. 1834.

Viscount Melbourne, *first lord of the treasury*.
 Marquess of Lansdowne, *lord president*.
 Earl Mulgrave, *privy seal*.
 Viscount Althorp, *chancellor of the exchequer*.
 Viscount Duncan, viscount Palmerston, and T. Spring Rice (afterwards lord Monteagle), *home, foreign, and colonial secretaries*.
 Lord Auckland, *admiralty*.
 Mr. Charles Grant (afterwards lord Glenelg), and Mr. C. P. Thompson (afterwards lord Sydneyham), *boards of control and trade*.
 Lord John Russell, *paymaster of the forces*.
 Lord Brougham, *lord chancellor*.
 Sir John Lubbock, Mr. Ellice, marquess of Conyngham, Mr. Littleton, etc.

SECOND ADMINISTRATION, April, 1835.

Viscount Melbourne, *first lord of the treasury*.
 Marquess of Lansdowne, *lord president*.
 Viscount Duncan, *privy seal, and woods and forests* (succeeded by earl of Clarendon, Jan. 1840).
 T. Spring Rice, *chancellor of the exchequer* (succeeded by Francis T. Baring, Aug. 1840).
 Lord John Russell, *home secretary* (succeeded by marquess of Normandy, Aug. 1839).
 Viscount Palmerston, *foreign secretary*.
 Lord Glenelg, *colonial secretary* (succeeded by marquess of Normandy, Feb. 1839, lord John Russell, Aug. 1839).

Memphis, an ancient city of Egypt ("of which the very ruins are stupendous"), is said to have been built by Menes, 3880 B.C.; or by Mieriam, 2189 B.C. It was restored by Septimius Severus, A.D. 202. The invasion of Cambyses, 525 B.C., began the ruin of Memphis, and the founding of Alexandria, 332, completed it. In the seventh century, under the dominion of the Saracens, it fell into decay.—Memphis, Tennessee, U.S., on the Mississippi, was taken from the confederates by the federals after a severe conflict, 6 June, 1862. Severely scourged by yellow fever, 1878-9. Population decreased from 40,226 in 1870 to 33,593 in 1880. Memphis and Mobile are the only cities in the United States which did not increase in population during the decade named; see *Yellow Fever*.

Men of the Time, a Dictionary of Contemporaries, first published 1852; 10th edition by Mr. Thompson Cooper, 1879.—"Men of Mark," printed photographs, with biographical sketches, also by Mr. T. Cooper, first appeared Jan. 1876.

Menai Strait (between the Welsh coast and the isle of Anglesey). Suetonius Paulinus, when he invaded Anglesey, transported his troops across this strait in flat-bottomed boats, while the cavalry swam over on horseback, and attacked the Druids in their last retreat. Their horrid practice of sacrificing their captives, and their opposition, so incensed the Roman general that he gave the Britons no quarter, throwing all that escaped from that battle into fires which they had prepared for the destruction of himself and his army, 61. In crossing this strait, a ferry-boat was lost, and fifty persons, chiefly Irish, 4 Dec. 1785. The road from London to Holyhead has long been regarded as the highway from the British metropolis to Dublin; Mr. Telford was applied to by the government to perfect this route by the London and Holyhead mail-coach road, which he did by erecting beautiful suspension-bridges over the river Conway and the Menai Strait—commenced in July, 1818; finished in July, 1825; opened 30 Jan. 1826. The Britannia tubular bridge over the Menai was constructed by Stephenson and Fairbairn in 1849-50; see *Tubular Bridges*.

Mendicant Friars. Several religious orders commenced alms-begging in the thirteenth century, in the pontificate of Innocent III. They spread over Europe, and formed many communities; but at length, by a general council held by Gregory X., at Lyons, in 1272, were reduced to four orders—Dominicans, Franciscans, Carmelites, and Augustines. The Capuchins and others branched off, see *Franciscans*, etc.

Mendicity Society (Red Lion square, London) was established in 1818 for the suppression of public begging, and other impositions. Tickets received from the society are given by subscribers to beggars, who obtain relief at the society's house, if deserving. Up to 1872 the society had caused above 23,000 vagrants to be convicted as impostors. In 1857, 54,074 meals; in 1880,

42,912; in 1865, 52,157; in 1872, 26,330; in 1878, 55,180 were distributed. In 1857, 3785; in 1866, 3909; in 1872, 2192; and in 1878, 1700 begging letters were investigated; see *Poor*. The society has been much aided by the action of the Charity Organization Society; established in 1870.

Mendoza, in the Argentine republic, nearly destroyed by an earthquake, one of the most awful recorded, 20 March, 1861, above 7000 persons perished.

Menippée, see *Satire*.

Mennonites, four sects of Dutch, Flemish, and German baptists, derive their name from Menno Symonis (1505-61), formerly a Catholic priest, who became a teacher and leader of the Anabaptists about 1537, and published his "True Christian Belief" in 1556; subsequently divisions and changes ensued. The Mennonites, objecting to war, emigrated from Prussia to Odessa, to escape military service, and went thence to America, 1878.

Mensuration. The properties of conic sections were discovered by Archimedes, to whom the chief advancement in mensuration may be attributed. He also determined the ratio of spheres, spheroids, etc., about 218 B.C.; see *Arithmetic*. The *Mensurator*, a new machine for the solution of triangles, was explained by Mr. W. Marsham Adams, at the British Association meeting at Brighton, Aug. 1872.

Mentana (near Monte Rotondo, in the old papal states). Here Garibaldi and his volunteers, after having intrenched his positions at Monte Rotondo and Mentana on their march towards Tivoli, on Sunday, 3 Nov. 1867, were totally defeated by the pontifical and French troops; under generals Kanzler and Polhès, after a severe conflict, in which gen. Faily said "the Chassepot rifles did wonders." There were about 5000 men on each side, but the Garibaldians were very badly armed. The loss of the papal and French troops was about 200 killed and wounded; that of Garibaldi about 800. Garibaldi crossed the Italian frontier, and was arrested at Correse, and eventually sent to Caprera (about 25 Nov.); see *Rome*. A monument to the Garibaldians who fell here was inaugurated 25 Nov. 1877.

Ments, or **MATENCE** (S.W. Germany), the Roman *Moguntiacum*, built about 13 B.C. The archbishopric was founded by Boniface, 745. Many diets have been held here, and here John Faust established a printing-press, about 1440. A festival in honor of John Gutenberg was celebrated here in 1837; see *Printing*. Ments was given up to the Prussians, 26 Aug. 1866.

Mennu, Institutes of, the very ancient code of India. Sir Wm. Jones, who translated them into English (1791), considers their date should be placed between Homer (about 962 B.C.) and the Roman Twelve Tables (about 449 B.C.).

Merchantile Marine Act was passed in Aug. 1830, and amended Aug. 1831.

Mercator's Chart, said to have been constructed by Gerard Mercator, or Kauffmann, and published 1566, and applied to navigation by Edward Wright about 1599.

Mercer, Fort, BATTLE AT. Count Dunop, with 2000 Hessians in British service, attacked Fort Mercer, on the Delaware river, 22 Oct. 1777, and was repulsed by the Americans with a loss of 400 men, the Americans losing less than 50. Count Dunop was killed.

Merchandise Marks Act, passed in 1862, to punish forgeries of trade-marks.

Merchant Adventurers' Company, established by the duke of Brabant in 1296, was extended to England in Edward III.'s reign, and was formed into a corporation in 1564.

Merchant Shipping Act of 1854 was amended by acts passed in 1862, 1867, 1871, 1872, and 1873. The act suddenly passed 13 Aug. 1875 gave further power to the Board of Trade for stopping unseaworthy ships.

Other acts passed 1876 and 1880; see *Courts of Survey and Seamen*.

Merchant Taylors, THE, a rich company of the city of London, of which many kings have been members, were so called after the admission of Henry VII. into their company, 1501, but were incorporated in 1405. Their school was founded in 1561.—*Stow*.

Merchants were protected by Magna Charta, 1215, and by many statutes; see *Acton Burnel*. An attempt made by queen Anne's ministry to exclude merchants from sitting in the house of commons, in 1711, failed.

Mercia, see under *Britain*.

Mercury, the planet nearest the sun, and the smallest known to the ancients. The last transit of Mercury over the sun's disk, of rare occurrence, and first observed by Cassendi, 1631, was well observed, 5 Nov. 1868. The Greek god Hermes was the Roman Mercury. See *Calend* and *Quicksilver*.

Mercy, ORDER OF (in France), was established with the object of accomplishing the redemption of Christian captives among the Saracens, by John de Matha, in 1196.—*Hinault*. Another order was formed by Pierre Nolesque in Spain, 1223.

Merida (Spain), a town in Estremadura (built by the Romans), was taken by the French, Jan. 1811. Near this town, at Arroyo Molino, the British army under gen. (afterwards lord) Hill defeated the French under gen. Girard, after a severe engagement, 28 Oct. 1811. The British took Merida from the French in 1812, gen. Hill leading the combined forces of English and Spanish troops.

Merino Sheep, imported into England from Spain, 1788, are thought to be descendants of English sheep taken to Spain as part of the dowry of John of Gaunt's daughter Katherine, 1390.

Meroe, an ancient city and country of Africa, near the sources of the Nile, said to have flourished under sacerdotal government in the time of Herodotus, about 450 B.C.

Merovingians, the first race of French kings, 418-762; see *France* and *Mayors*.

Merrimac, see *United States*, 1862, and *Hampton Roads*.

Merry-Andrew. The name is said to have been first given to Andrew Dorde, a physician who lived in the reign of Henry VIII., and who on some occasions, on account of his facetious manners, appeared at court, 1547.

Merthyr-Tydvil (Glamorganshire). Riots commenced here, 3 June, 1831, and continued for several days; many persons were killed and wounded; see *Coal* (*Accidents*).

Merton (Surrey). At an abbey here, the barons under Henry III., 23 Jan. 1226, held a parliament which enacted the Provisions of Merton, the most ancient body of laws next after Magna Charta. They were repealed in 1263; see *Barons*.

Merv, or **MARU** (the ancient *Antiochia Margiana*), a town of independent Turkestan, Central Asia. In 1880-1, the Russian advance towards this place was much discussed; see *Russia*.

Mesmerism. Frederick Anthony Mesmer, a German physician of Merseburg, published his doctrines in 1766, contending, in a thesis on planetary influence, that the heavenly bodies diffused through the universe a subtle fluid which acts on the nervous system of animated beings. Quitting Vienna for Paris, in 1778, he gained numerous proselytes and much money. A committee of physicians and philosophers investigated his pretensions, and Bailly, in a paper drawn up in 1784, exposed the futility of animal magnetism. Mesmerism excited attention again about 1848, when Miss Harriet Martineau and others announced their belief in it. In 1859, the Mesmeric Infirmary issued its tenth annual re-

ture. The periodicity of the star-showers about the 10th of August (termed in the middle ages St. Lawrence's tears) was discovered separately by Quetelet, 1836, and by Herrick in 1837. The following are remarkable epochs for their annual return: 2 Jan., 29 July, 3 and 9-12 Aug., 8-14 Nov., 11 Dec.—*R. P. Greg.* See *August*.

The magnificent continuous star-shower of 14 Nov. 1866 had been predicted by prof. Newton some time previously. A fine display occurred on the night of 13 Nov. 1868 in the United States. A similar phenomenon had been witnessed by Humboldt at Cumana (S.A.), 12 Nov. 1799; and by Dr. D. Olmsted at New Haven (U.S.), 13 Nov. 1833. They were well observed in Britain and Europe, 27 Nov. 1872.

AEROLITES, falling stones accompanying meteors, are found in our museums. They contain iron, nickel, and other minerals.

Method (Greek, *μέθοδος*, a way of transit), that which gives to knowledge its character. S. T. Coleridge's treatise on the science of method is prefixed to the first volume of the "Encyclopædia Metropolitana," 1845.

The most recent work on this subject is prof. Stanley Jevons's "Principles of Science: a Treatise on Logic and Scientific Method," 1874. "The powers of mind concerned in creation of science: are discrimination, detection of identity, and retention."

Methuen Treaty, a treaty for regulating the commerce between Great Britain and Portugal, made 27 Dec. 1703, concluded by Paul Methuen, our ambassador at Lisbon. It greatly favored the importation of port wine into this country by lowering the duty, to the discouragement of French wines. It was abrogated in 1834.

Methyl, a colorless inodorous gas, a compound of hydrogen and carbon, obtained in the free state first by Frankland and Kolbe separately, in 1849.

Methylated Spirits. By an act passed in 1855, a mixture of spirits of wine with 10 per cent. of its bulk of wood-naphtha, or methylic alcohol, is allowed to be made duty-free for use in the arts and manufactures, not less than 450 gallons being made at one time. In 1861 an act was passed permitting the methylated spirits to be retailed by license.

Metonic Cycle, a period of 19 years, or 6940 days, at the end of which the changes of the moon fall on the same days; see *Calippic Period*.

Metric System. Before the Revolution there was no uniformity in French weights and measures. On 8 May, 1790, the constituent assembly charged the Academy of Sciences with the organization of a better system. The committee named for the purpose by the academy included the names of Berthollet, Borda, Delambre, Lagrange, Laplace, Méchain, and Prony. Delambre and Méchain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona, and from their calculations the *mètre*, which is equal to a ten-millionth part of the distance between the poles and the equator (3.2808 English feet), was made the unit of length and the base of the system by law on 7 April, 1795. The system was completed in 1799, and made by law the only legal one on 2 Nov. 1801. A decree on 12 Feb. accommodated the old measures to the new system; but on 4 July, 1837, it was decreed that after 1 Jan. 1840 the metric and decimal system in its primitive simplicity should be used in all business transactions. The example of France has been followed by the greater part of Europe, and will probably in time be adopted in the British empire. A decimal system of currency has been in use in the United States since the organization of the mint in 1793.

Unit of SURFACE, *centiare*—a square *mètre*=1.1960 English yards (a square *décimètre* or *are*=100 square metres).

Unit of VOLUME or SOLIDITY, *stère*=a cubic *mètre*.

Unit of CAPACITY, *litre*=a cubic *décimètre* (or 10th of a *mètre*) =1.76077 English pints.

Unit of WEIGHT, *gramme*=weight of a cubic centimetre (the 100th part of a metre) of distilled water=0.56435 English drachm.

Unit of MONEY, the *franc*, a piece of silver weighing 5 grammes.

The multiples of these units are expressed by Greek numerals (*deca*, 10; *hecto*, 100; *kilo*, 1000; *myria*, 10,000). The divisors are expressed by Latin numerals (*deci*, 10; *centi*, 100; *milli*, 1000).

Metronome, to regulate time in the performance of music. A metronome with double pendulum, invented by Winkel, was adopted successfully by Maelzel, and patented by him in 1816.

Metropolis of Great Britain includes the cities of London and Westminster, and the boroughs of Southwark, Finsbury, Marylebone, Tower-Hamlets, Hackney, Lambeth, and Chelsea. The Metropolis Management act, 18 & 19 Vict. c. 122, was passed in 1855; see *London*.

Metropolis Roads Act (passed in 1863) transferred the management of certain roads north of the Thames from the commissioners to the parishes, and abolished certain turnpikes and toll-bars.

Metropolis Water Act, 1852; amended 1871.

Metropolitan (from the Greek *μητροπόλις*), a title given at the council of Nice, 325, to certain bishops who had jurisdiction over others in a province. The dignity is said to have arisen in the second century, through the dissident bishops in a district referring to one bishop of superior intellect.

Metropolitan Board of Works was established by 18 & 19 Vict. c. 120 (1855),* amended in 1862. It held its first meeting and elected Mr. (afterwards air) John Thwaites as chairman, 22 Dec. 1855. The office is in Spring gardens. In 1858, its powers were extended in order to effect the purification of the Thames by constructing a new main drainage for the metropolis. The board was authorized to raise a loan and levy 3*d.* in the pound on the property in the metropolis. It was also authorized to construct the Thames Embankment. In 1861 the board received nearly a million pounds, and expended 900,000*l.*; see *Sewage and Thames*. Sir John Thwaites, the chairman, died 8 Aug. 1870, aged 55. Much discussion ensued respecting the appointment of his successor; Mr. Bruce, the home secretary, having in-

Messalians, a sect professing to adhere to the letter of the gospel, about 310, refused to work, quoting this passage, "Labor not for the food that perisheth."

Messenia (now *Maura-Matra*), in the Peloponnese, a kingdom founded by Polycaon, 1499 B.C. It had long sanguinary wars with Sparta, and once contained a hundred cities. It was at first governed by kings; after its restoration to power in the Peloponnese it formed an inferior republic, under the protection first of the Thebans and afterwards of the Macedonians.

The first Messenian war began 743 B.C.; was occasioned by violence offered to some Spartan women in a temple of devotion common to both nations; the king of Sparta being killed in his efforts to defend the females. Eventually, Ithome was taken, and the Messenians became slaves to the conquerors. B.C. 724

The second war, to throw off the Spartan yoke, commenced about 685, ending in the defeat of the Messenians, who fled to Sicily. 668

The third war. 466-455

Messiah, synonymous with Christ "the anointed," foretold by Dan. ix. 25, about 538 B.C. "We have found the Messiah, which is, being interpreted, the Christ" (John i. 41).—"The Messiah," Handel's greatest oratorio, composed by him in twenty-three days (22 Aug.-14 Sept. 1741), was first performed at Dublin, 13 April, 1742, the receipts being given by him to the charities of that city.

Messina (Sicily), so named by the Samians, who seized this city, then called Zancle, 671 B.C. It was seized by the Mamertini (*which see*), about 281 B.C. It belonged for many ages to the Roman empire; was taken by the Saracens, about A.D. 820.—*Priestley*. Roger the Norman took it from them by surprise, about 1072.

Metals. Tubal-Cain is mentioned as an "instructor of every artificer in brass and iron" (Gen. iv.). Moses and Homer speak of the seven metals, and Virgil of the melting of steel. The Phenicians had great skill in working metals. Bunsen and Kirchhoff's method of chemical analysis by means of the spectrum has added cesium, rubidium, thallium, indium, gallium, and others to the known metals; see *Elements*, *Mixes*, *Iron*, and the other metals.

Metamorphists, in the fifteenth century, affirmed that Christ's natural body, with which he ascended into heaven, was wholly deified.

Metaphysics, the science of abstract reasoning, or that which contemplates the existence of things without relation to matter. The term, literally denoting "after physics," originated from these words having been put at the head of certain essays of Aristotle, which follow his treatise on Physics.—*Mackintosh*. Modern metaphysics arose in the fifteenth century—the period when an extraordinary impulse was given to the study of the human mind in Europe, commonly called the "revival of learning." Hobbes, Cudworth, S. T. Coleridge, Dugald Stewart, and sir W. Hamilton were eminent British metaphysicians, and Descartes, Pascal, Kant, Schelling, and Fichte foreign ones; see *Philosophy*.

Metaurus, a river in central Italy, where Hasdrubal, the brother of Hannibal, was defeated and slain, 207 B.C., when marching with abundant reinforcement. The Romans were led by Livius and Claudius Nero, the

consula. The latter commanded the head of Hasdrubal to be thrown into his brother's camp. The victory saved Rome.

Metempsychosis, a doctrine attributed to Pythagoras, about 528 B.C., asserts the transmigration of the soul from one body to another. It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate; and therefore embalmed the dead; see *Buddhism*.

Meteorograph, an apparatus for the invention of which father Secchi of Rome received a prize at the Paris International Exhibition, July, 1867. It is self-acting, and registers the various changes of the atmosphere in the form of a diagram.

Meteorology (from the Greek *μετέωρος*, aerial), the science which treats of the phenomena which have their origin in the air, such as rain, lightning, meteors, fogs, etc. Bacon, Boyle, and Franklin wrote on the subject.

Meteorological Society of the Palatinat, established 1780.
Meteorological Society of London, first met 15 Oct. 1823.
John Dalton's essay on meteorology appeared in 1793.
Luke Howard's work on the clouds appeared in 1802, and his "Barometrographia" in 1804; see *Clouds*.
Sir W. Reed published his work on the "Law of Storms" in 1838. The works of Daniell (1845), Kaemtz (1845), Müller (1847), and Buchan (1867) are esteemed.
Mr. James Glaisher, the secretary of the Meteorological Society (established in 1850 and chartered in 1866), is a most eminent meteorologist. By his exertions the apparatus at Greenwich was erected, and meteorology has appeared in the "Greenwich Observations" since 1845; see *Balloon (Scientific Ascents)*.

Meteorological observatories have been erected in all parts of the globe.

The meteorological department of the Board of Trade, established in 1855, under admiral Fitzroy, commenced the publication of reports in 1857. The admiral published his "Weather book" in 1863. His exertions are said to have overworked his brain; and on 30 April, 1865, he died by his own hand. The meteorological office was soon after placed under the direction of Mr. Robert H. Scott. It has issued apparatus and instruction-books to captains of ships and established observatories in many places in the empire. Placed under a committee of Royal Society, R. H. Scott secretary, July, 1877.

The Kew meteorological observatory given to the British Association in April, 1860; was purchased and presented to the Royal Society by Mr. J. P. Gassiot, 1871.

At the recommendation of M. Le Verrier and admiral Fitzroy, meteorological information, obtained by the telegraph from the principal places in the United Kingdom, has been transmitted daily to Paris, and thence to other parts of Europe, since 1 Sept. 1860.

Storm warnings first issued in Holland through M. Buys Ballot, 1860.

Storm-warnings first sent to the coast by the Board of Trade 6 Feb., and first published 31 July, 1861; suspended, 7 Dec. 1866; restoration proposed, Nov. 1867; declared inadvisable. Daily international bulletin of the Imperial observatory at Paris, under the direction of M. Le Verrier, first published Nov. 1862.

"Daily weather charts" first issued by the Meteorological Office 11 March, 1872; "Weekly Weather Report" first published 11 Feb. 1878.

International Meteorological Congress at Vienna, 2-16 Sept. 1873; at Rome, 14-22 April, 1879; and at Berne, 9-12 Aug. 1880.

"Weather Charts and Storm Warnings," by R. H. Scott, published 1876 et seq.

A French academy of meteorology organized a successful balloon ascent, 9 Aug. 1879.

The work of meteorological observation in the United States is confided to the signal corps of the army. Stations are maintained throughout the country, and since 1870 reports are made twice daily of observations taken simultaneously at all the stations. These reports are published in all newspapers, together with weather predictions founded upon the observations. The service is singularly efficient, and its warnings by storm signals and otherwise are carefully heeded by mariners and others. The scientific work of the Weather Bureau is done with the utmost care, and has contributed largely to the advance of meteorological knowledge.

Meteors, LUMINOUS, include shooting-stars, fireballs, and falling stones, or aerolites. They were described by Halley, Wallis, and others early in the seventeenth cen-

Metronome, to regulate time in the performance of music. A metronome with double pendulum, invented by Winkel, was adopted successfully by Maelzel, and patented by him in 1816.

Metropolis of Great Britain includes the cities of London and Westminster, and the boroughs of Southwark, Finsbury, Marylebone, Tower-Hamlets, Hackney, Lambeth, and Chelsea. The Metropolis Management act, 18 & 19 Vict. c. 122, was passed in 1855; see *London*.

Metropolis Roads Act (passed in 1863) transferred the management of certain roads north of the Thames from the commissioners to the parishes, and abolished certain turnpikes and toll-bars.

Metropolis Water Act, 1852; amended 1871.

Metropolitan (from the Greek *μητροπόλις*), a title given at the council of Nice, 325, to certain bishops who had jurisdiction over others in a province. The dignity is said to have arisen in the second century, through the dissentient bishops in a district referring to one bishop of superior intellect.

Metropolitan Board of Works was established by 18 & 19 Vict. c. 120 (1855),* amended in 1862. It held its first meeting and elected Mr. (afterwards sir) John Thwaites as chairman, 22 Dec. 1855. The office is in Spring gardens. In 1858, its powers were extended in order to effect the purification of the Thames by constructing a new main drainage for the metropolis. The board was authorized to raise a loan and levy 8d. in the pound on the property in the metropolis. It was also authorized to construct the Thames Embankment. In 1861 the board received nearly a million pounds, and expended 900,000*l.*; see *Severage and Thames*. Sir John Thwaites, the chairman, died 8 Aug. 1870, aged 55. Much discussion ensued respecting the appointment of his successor; Mr. Bruce, the home secretary, having in-

Metropolitan Cattle Market, inaugurated by the lord mayor and corporation on Wednesday, 13 July, 1855, in presence of the prince consort. It is situated in Copenhagen Fields, an elevated site north of London, occupying an area of about fifteen acres; larger by nine acres than Smithfield, and capable of containing 30,000 sheep, 6400 bullocks, 1400 calves, and 900 pigs. In the centre is a circular building, let to bankers and others having business connected with graziers and cattle-agents. Within and around the market are erected several large taverns. A place is set apart for slaughtering animals, with approved appliances for purposes of health, by ventilation, sewerage, etc.; there is also a place for hay-stands. Sales commenced on Friday, 15 June, 1855.—An act for establishing a meat and poultry market in Smithfield (*which see*) was passed in 1860.

Metropolitan Railway (Underground), at first between Paddington and Victoria street, near Holborn. The act for it passed in 1825; the construction began in the spring of 1860; and it was opened for traffic 10 Jan. 1863. Many serious difficulties were overcome with great skill and energy by the engineer, John Fowler, and the contractors, Jay, Smith, and Knight. In the first six months of 1865, there were 7,462,823 passengers. It has been continued to Moorgate street, and supplemented by the Metropolitan Districts Railway.

Metropolitan School Board, instituted by the Elementary Education act, 1870; was elected 29 Nov. 1870 (for three years). It included lord Lawrence, lord Sandon, professor Huxley, Miss Garrett, M.D., and Miss Davies. At its first meeting, 15 Dec., lord Lawrence was elected chairman, and Mr. C. Reed, M.P., vice-chairman; and it was decided that the chairman should be unpaid at present. On 27 Nov. 1873, 30 Nov. 1876, and 27 Nov. 1879, Mr. (afterwards sir) Charles Reed was elected chairman. He died 25 March, 1881; *see Education.*

Metropolitan Streets Act (30 & 31 Vict. c.

134) "for regulating the traffic in the metropolis, and for making provision for the greater security of persons passing through the streets," passed 20 Aug. 1867. A short act modifying the clauses relating to costermongers and cabs was passed 7 Dec. 1867.

Metz, a fortified city in Lorraine, now in the department of the Moselle, N.E. France. It was the Roman Divodunum or Meti, capital of the Mediomatrici, a powerful Gaulish tribe, and afterwards of the kingdom of Austrasia, or Metz, in the sixth century. It was made a free imperial city, 985. It was besieged by Charles VII. of France for seven months in 1444, and was ransomed for 100,000 florins, was captured by Henry II., 10 April, 1552, and successfully defended by the duke of Guise against the emperor Charles V. with an army of 100,000 men, 31 Oct. 1552 to 15 Jan. 1553. Metz was ceded to France by the peace of Westphalia, 24 Oct. 1648, and was fortified by Vauban and Belleisle. On 28 July, 1870, the emperor Napoleon III. arrived at Metz and assumed the chief command. After the disastrous defeats at Woerth and Forbach, on 6 Aug., the whole French army (except the corps of MacMahon, De Failly, and Douay) was concentrated here, 10, 11 Aug., and by delay was hemmed in by the Germans. Marshal Bazaine assumed the chief command, 8 Aug. The emperor departed with the vanguard, which crossed the Moselle early on 14 Aug.

1. Battle of Pange or Courcelles, gained by the first army under Von Steinmetz, after several hours' fighting, with great German loss. 14 Aug. 1870
Bazaine was censured for not advancing on 15 Aug. "
2. Battle of Vionville or Mars-la-Tour, gained by the 2d army under prince Frederick Charles, after twelve hours' fighting. By the unexpected unmasking of a mitrailleuse battery, Henry, prince of Reuss, and many German nobles were killed in a few moments. The victory was at first claimed by the French. (This battle, the most sanguinary in the war hitherto, included a Balaklava charge of a German regiment of cavalry upon a French battery, by which it was decimated, but to which the victory was greatly due. Twice as many Germans were killed as at Königgrätz, the killed and wounded being estimated at 17,000. The French loss was said to have been equally great). 16 Aug. "
Bazaine masses his troops for a decisive conflict, 17 Aug. "
3. Battle of Rézonville or Gravelotte, gained by the combined 1st and 2d armies, commanded by the king in person, after twelve hours' fighting. "The most desperate struggle took place on the slopes over Gravelotte, which the Germans gained by nightfall, after repeated fatal charges; the fortune of the day being long in suspense. But the right of the French had been outflanked; they fell back fighting to the last, and retired under cover of Metz. The French are said to have lost 19,000, and the Germans 25,000." (The king, on the 19th, had not undressed for thirty hours. The carnage is considered to have been unexampled; a large number of French prisoners were made; and enormous loss was experienced by the imperial guard. The German army included Saxons and Hessians), 18 Aug. "
Bazaine repulsed in a sortie at Courcelles, near Metz (he claimed a victory). 26 Aug. "
His whole army defeated by gen. Manteuffel, of the army of prince Frederick Charles, in a battle lasting from the morning of 31 Aug. to noon. 1 Sept. "
Von Steinmetz sent to govern Posen; prince Frederick Charles sole commander before Metz. 21 Sept. "
Three vigorous but ineffective sallies. 23, 24, 27 Sept. "
About 100,000 soldiers estimated in Metz. 30 Sept. "
Great sortie; the Germans surprised; about 40,000 French engaged; they are repulsed after a severe engagement from 3 p.m. till dark; loss about 2000 French and 600 Germans. 7 Oct. "
About 600 oxen and 500 sheep captured during a sortie, 8 Oct. "
Gen. Boyer arrives at Versailles to treat for terms of capitulation. 14 Oct. "
Metz surrenders with the army, including marshals Bazaine, Canrobert, and Le Bœuf; 66 generals; about 6000 officers; 173,000 men, including the imperial guard; 400 pieces of artillery; 100 mitrailleuses; and 63 eagles or standards. 27 Oct. "
The capitulation was signed at Froscati by gens. Jarras and Stiehl on behalf of the French and German commanders. 27 Oct. "
General order to the army issued by marshal Bazaine, saying that they were "conquered by famine," 27 Oct. "

Order to the army issued by prince Frederick Charles, recognizing their bravery, great obedience, calmness, cheerfulness, and devotion 27 Oct. 1870
 The Germans enter Metz 29 Oct. "
 One cause of the fall of Metz was the great army it contained; it might have been successfully defended by 20,000 men.
 Marshal Bazaine was tried and condemned to death for surrendering Metz and the army, 6 Oct.-10 Dec.; punishment commuted to 20 years' imprisonment, 12 Dec.; he escaped from Isle St. Marguerite 9 Aug. 1874

Mexican War. The war between the United States and Mexico, which commenced in the spring of 1846, was caused immediately by the annexation of the independent state of Texas (which was once a part of Mexico, and had separated by means of a revolution) to the American Union. Hostilities were threatened by Mexico, and gen. Zachary Taylor was ordered by the president of the United States to march into Texas, to the borders of the Rio Grande, with an army of occupation. In Jan. 1846, he took position opposite the Mexican city of Matamoras, and commenced a fortification, which he called Fort Brown. Soon after this hostilities began, and continued until near the close of 1847. Gen. Taylor invaded central Mexico, and gen. Scott, beginning at Vera Cruz, penetrated the country to the capital, gaining victories at every step. He took possession of the city of Mexico on 14 Sept. 1847. On 2 Feb. 1848, a treaty of peace was signed at Guadalupe Hidalgo. By this war the United States came into possession of Northern Mexico and California.

Mexico, anciently Anahuac, North America, is said to have been conquered by the Aztecs, who founded the city of Mexico about 1325. It was discovered in 1517, and conquered by Fernando Cortez, 1519-21; explored by Alexander von Humboldt, 1799-1804. It is stated that there have been above 260 insurrections in Mexico since 1821. Population, 1874, about 9,276,079; 1879, 9,686,777.

Miami (or MACMEE) River, BATTLES OF. These were battles fought by Americans, under gen. Harmar, and a body of Indians, on the extreme western borders of Ohio, on 19 and 22 Oct. 1790. The Americans were defeated, with a loss of 183 killed and 31 wounded.

Michael, St., and George, St. This order of knighthood, founded for the Ionian Isles and Malta, 27 April, 1818, was reorganized in March, 1869, in order to admit servants of the crown connected with the colonies. Among the first of the new knights were the earl of Derby, earl Russell, and earl Grey.

Michaelmas, 29 Sept., the feast of St. Michael, the reputed guardian of the Roman Catholic church, under the title of "St. Michael and All Angels." Instituted, according to Butler, 487.

The custom of eating goose at Michaelmas has been erroneously attributed to queen Elizabeth's eating of the bird at dinner on 29 Sept. 1588, at the house of sir Neville Uffreyville, at the time she heard of the destruction of the Spanish Armada. The custom is of much older date, and is observed on the continent.—*Clavis Calendria*.

Michael's Mount, St. (Cornwall), is considered by some to be the Iktis of Diodorus Siculus, and an ancient resort of the tin-merchants. St. Michael was said to have appeared on the mount, 495 or 710; and the place, thus reputed holy, became the seat of a body of monks, who received a charter from Edward the Confessor, 1044, and many privileges from pope Gregory VII., 1079.

Michigan, a northwest state of the United States, settled by the French, 1670; admitted into the Union, 26 Jan. 1837. Population, 1880, 1,636,331. Capital, Lansing.

Micrometer, an astronomical instrument used to measure any small distances and the minuter objects in the heavens, such as the apparent diameters of the planets, etc., was invented by William Gascoigne, who was killed at the battle of Marston Moor, 2 July, 1644. It was improved by Huyghens about 1652. Sir Joseph Whitworth made a machine to measure the millionth of an inch about 1858; the measurement of the 30,000th of an inch is now common.

Microphone (Greek, *μικρός*, little; *φωνή*, sound), a name given by Wheatstone, in 1827, to an instrument for rendering weak sounds audible by means of solid rods. The name was also given to an arrangement invented (in Dec. 1877) by professor D. E. Hughes (an American, an inventor of the printing telegraph), and shown to the Royal Society, 9 May, 1878.

An electric current is established between two moderately conducting bodies (such as pieces of charcoal, metallized by being plunged when heated into mercury) resting slightly upon each other, mounted on a piece of thin wood. If the contact is so made that one of the bodies may be easily displaced, minute sounds produced on the wood disturb the electric conductivity at the place of contact, and may be heard by the help of the telephone. The sonorous and electric waves are thus rendered synchronous, and become convertible. The tread of a fly sounds like that of a large quadruped; see *Telephone*.

Microscopes, said to have been invented by Jansen in Holland about 1590, by Fontana in Italy, and by Drebbel in Holland, about 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. Solar microscopes were invented by Dr. Hooke. In England great improvements were made in the microscope by Benjamin Martin (who invented and sold pocket microscopes about 1740), by Henry Baker, F.R.S., about 1763, and still greater during the present century by Wollaston, Ross, Jackson, Varley, Powell, and others. *Diamond microscopes* were made by Andrew Pritchard in 1824; and the properties of "test objects," to prove the qualities of microscopes, discovered by him and Goring in 1824-40. A *binocular microscope* (i. e. for two eyes) was constructed by professor Riddell in 1851, and Wenham's important improvements were made known in 1861. Treatises on the microscope by J. Quekett (1848), by Dr. W. B. Carpenter (1856 et seq.), by Dr. Lionel Beale (1858-64), and Griffith and Henfrey's "Micrographic Dictionary" (1856 and 1875), are valuable. The Microscopical Society of London was established 20 Dec. 1839, and the Quekett Microscopical Club, 1865. In 1865 Mr. H. Sorby exhibited his *spectrum microscope*, by which the millionth of a grain of blood was detected.

Micro-tasimeter, a new instrument invented by Mr. T. A. Edison, in which he has applied the principle of the carbon microphone to the measurement of infinitesimal pressure; announced July, 1878. He proposes to apply the principle to delicate barometers, thermometers, hygrometers, etc.

Middle Ages, see *Dark Ages*. Henry Hallam's "Middle Ages" appeared in 1818.

Middle Creek (Kentucky), BATTLE OF, fought 10 Jan. 1862, in the valley of the Big Sandy. Gen. James A. Garfield, with about 1500 men, here defeated gen. Humphrey Marshall, commanding 3000 confederates.

Middlesborough, N. Riding of Yorkshire, on the Tees, a coal port and a seat of the iron manufacture, the first house erected by George Chapman, April, 1830;

population, 1861, 18,992; 1871, 46,643. New dock, and literary and scientific institution, opened Oct. 1875. Mr. Henry W. F. Bolckow, head of great iron-works (the first mayor and M.P.), died 18 June, 1878. The prosperity of the Cleveland district, which had greatly declined since 1874, began to revive in the autumn of 1879.

Middlesex, the metropolitan county of England, was the seat of the Trinobantes in the Roman province, Flavia Cæsariensis, and the Middel-Sexe, or Middle Saxons, in the kingdom of East-Sexne, or Essex. Lionel Craufield was created earl of Middlesex, 16 Sept. 1622; succeeded by his sons, James, 1645-51; Lionel, 1651-74, when the title became extinct. Charles Sackville was made earl in 1675; and his son became duke of Dorset in 1720.

Middlesex Hospital, London, founded 1745; incorporated 1886; cancer ward endowed 1791.

Midian, now ARZ MADIAN, N. W. Arabia; anciently held by the descendants of Midian, a son of Abraham. Having enticed the Israelites to idolatry, they were severely chastised, 1452 B.C. They invaded Canaan about 1249 B.C., and were thoroughly defeated by Gideon.

Capt. Richard F. Burton explored the ruined cities of Midian in 1877, and found the remains of ancient mines, many relics, and gold. An expedition, equipped by the khedive of Egypt, and placed under his command, started from Suez, 10 Dec. 1877, and returned 20 April, 1878. He brought home 25 tons of geological specimens, specimens of silver and copper ore, many coins and other antiquities, and photographs of the remains of ruined cities, etc.

Midland Railway Station, St. Pancras, N. London, possessing the largest known roof in the world (245 feet 6 inches wide, and 698 feet long), was opened for traffic 1 Oct. 1868. The engineer was Mr. H. W. Barlow. The architect of the magnificent Gothic hotel was sir G. Gilbert Scott.

Midwifery. Women were the only practitioners among the Hebrews and Egyptians. Hippocrates, in Greece, 460 B.C., is styled the father of midwifery as well as of physics.* It advanced under Celsus, who flourished A.D. 37, and of Galen, who lived 131. In England midwifery became a science about the period of the institution of the college of physicians, 10 Hen. VII. 1518. Dr. Harvey engaged in the practice of it, about 1603; Astruc affirms that madame de la Vallière, mistress of Louis XIV., in 1663, employed Julian Clement, a surgeon, with great secrecy.

Mifflin, Fort, CAPTURE OF. Fort Mifflin was upon Mud Island, in the Delaware, just below Philadelphia, and opposite Red Bank. It was garrisoned by Americans, under lieutenant-col. Smith, of Maryland. After a series of assaults by land and water, and a gallant defence until the fort was utterly disabled, it was surrendered to the British on 16 Nov. 1777, after a loss of near 250 men.

Milan, Mediolanum, capital of the ancient Liguria, now Lombardy, is reputed to have been built by the Gauls, about 408 B.C. The cathedral termed *duomo* was built about 1385.

* Agnodice, an Athenian virgin, disguised her sex to learn medicine. She was taught by Hierophilus, her father, the art of midwifery, and when employed, always discovered her sex to her patients. This brought her into so much practice that the profession, now out of employment, accused her, before the Areopagus, of corruption. She confessed her sex to the judges, and a law was made to empower all free-born women to learn midwifery. The whole story is doubtful.

Milbank Penitentiary, Westminster. The very unhealthy site was purchased of the marquess of Salisbury in 1799 for 12,000*l*. The building, a modification of Jeremy Bentham's Panopticon (*which see*), first received convicts 27 June, 1816.

In consequence of many deaths during a great epidemic, the convicts were placed in Woolwich hulks, 1822-3. On 10 June, 1843, a committee reported the penitentiary a failure. The system was abolished in parliament, and the building styled Milbank prison.

Miletus, a Greek city of Ionia, Asia Minor, founded about 1043 B.C. The Milesians defended themselves successfully, 623-612 B.C. During the war with Persia it was taken, 491, but restored, 449. Here Paul delivered his celebrated charge to the elders of the church of Ephesus, A.D. 60 (Acts xx.).

Milford Haven (Wales). Here the earl of Richmond, afterwards Henry VII., landed on his way to encounter Richard III., whom he defeated at Bosworth, 1485. The packets from this port to Ireland, sailing to Waterford, were established in 1787. The dock-yard, established here in 1790, was removed to Pembroke in 1814.

Militia of Jesus, a society of Roman Catholic youth of France and Italy, formed to support the papal cause by moral agencies, became known in 1877.

Milk. The type of food as containing all things needful for the development of the animal body. A process for its condensation was invented by Mr. Gail Borden, near New York, in 1849, for which he was awarded a medal at the Great Exhibition in 1851, when he erected factories. He invented meat biscuit, 1850. The Anglo-Swiss Condensed-milk Company was established in 1866; and since then the Aylesbury Company.

Typhoid fever (said to be caused by bad milk) prevailed in London, Aug., Sept. 1873; about 20 died of fever through milk, at and near Eagley, Lancashire, March, 1875.

Milky Way (Galaxy) in the heavens. Juno is said by the Greek poets to have spilled her milk in the heavens after suckling Mercury or Hercules. Democritus (about 428 B.C.) taught that the *via lactea* consisted of stars, which Galileo (1610-42) proved by the telescope.

Mill Spring (Kentucky), BATTLE AT. Gen. Zollicoffer, confederate, was here defeated by gen. George H. Thomas, with a loss of 300 men, 19 Jan. 1862. Gen. Zollicoffer was killed.

Millenarians suppose that the world will end at the expiration of the seven thousandth year from the creation; and that during a thousand years (millennium) Christ and the saints will reign upon the earth; see Rev. xx. The doctrine was very generally inculcated in the second and third centuries, by Papias, Justin Martyr, and others.

Millenary Petition, presented to king James on his accession, 1603, on behalf of nearly a thousand Puritan ministers against the "human rites and ceremonies" of the church of England.

Mills. Moses forbade mill-stones to be taken in pawn, because it would be like taking a man's life to pledge (Deut. xxiv. 6). The hand-mill was in use among the Britons previously to the conquest by the Romans. The Romans introduced the water-mill. Cotton-mills moved by water were erected by sir Richard Arkwright at Cromford, Derbyshire. He died in 1792. See *Mechanics*. Mill-work exhibition at the Agricultural Hall, London, N., 10-18 May, 1881.

Mincio, a river of Lombardy. Here the Austrians were repulsed by the French under Brune, 25-27 Dec. 1800; and by Eugène Beauharnais, 8 Feb. 1814, near Valeggio.

Minden (Prussia), BATTLE OF, 1 Aug. 1759, between the English, Hessians, and Hanoverians (under prince Ferdinand of Brunswick), and the French (under marshal De Contades), who were beaten and driven to the ramparts of Minden. Lord George Sackville (afterwards lord George Germaine), who commanded the British and Hanoverian horse, for some disobedience of orders was tried by a court-martial on his return to England, found guilty, and dismissed, 22 April, 1760. He was afterwards restored to favor, and became secretary of state, 1776.

* This militia act was consequent upon the then prevailing opinion of the necessity of strengthening our national defences against the possibility of French invasion. The act empowered her majesty to raise a force not exceeding 80,000 men, of which number 50,000 were to be raised in 1852, and 30,000 in 1855; the quotas for each county or riding to be fixed by an order in council.

Mineralogy and Mines. Strabo and Tacitus enumerate gold and silver as among the products of Britain. The earliest instance of a claim to a mine royal being enforced occurs 47 Hen. III. 1262. It related to mines containing gold, together with copper, in Devonshire. In Edward I.'s reign, according to Mr. Ruding, the mines in Ireland, which produced silver, were supposed to be so rich that the king directed a writ for working them to Robert de Ufford, lord justice, 1276. The lead-mines of Cardiganshire, from which silver has ever since been extracted, were discovered by sir Hugh Middleton in the reign of James I.; see *Coal*, and the various metals.

The study of mineralogy was advanced by Becker, Kircher, and Woodward in the seventeenth century. A British Mineralogical Society established in 1800 Haidy's "Traité de Minéralogie" appeared in 1801 *Mining Journal* established. 29 Aug. 1835 The government School of Mines, etc., Jermyn street, St. James's, opened in Nov. 1851 An act for the regulation of mines passed in 1860 A Miners' Protection Association proposed by Mr William Gurney and others in March, 1862 Value of the total mineral produce of the United Kingdom estimated at 29,155,701*l.* in 1854; 31,840,581*l.* in 1859; 40,310,937*l.* in 1863; 40,345,945*l.* in 1866; 41,521,705*l.* in 1868; 46,094,600*l.* in 1870; 69,041,158*l.* in 1873; 64,421,322*l.* in 1879. James D. Dana's "System of Mineralogy," 5th edition, 1868 Miners' conference, for amelioration of their condition, held at Merthyr-Tydvil; well conducted; Mr. Halliday president. Oct. 1871 Metalliferous Mines Regulation act passed. 10 Aug. 1872 The Amalgamated Association of Miners, begun in Lancashire about 1869, held a conference at Newport, 1872; at Bristol. 8 Oct. 1873 Mineralogical Society of Great Britain held first meeting in London, 3 Feb. 1876; fourth. 22 Aug. 1879 Another society termed itself *A, E, I*, Miller's symbol for the face of a crystal. 1876 A miners' national conference on wages; opened at Birmingham. 20 April, 1881

Minerva, see *Athens* and *Parthenon*.

Minié Rifle, invented at Vincennes, about 1833, by M. Minié (born 1810). From a common soldier he raised himself to the rank of *chef d'escadron*. His rifle, considered to surpass all made previous to it, was adopted by the French, and, with modifications, by the British, 1852; see *Fire-arms*.

Minims (from *minimi*, the least), an order of monks, founded by San Francisco di Paolo, in Calabria, received their name, as professing themselves inferior to the Minorites (from *minor*, less); see *Franciscans*. St. Francis died in France in 1507, where he had established houses of his order.

Minister of War, see *War Minister*.

Ministers, see *Administrations*.

Ministers, in Scotland: church patronage was abolished in 1874.

Minnesingers, lyric German poets of the twelfth and thirteenth centuries, who sang of love and war to entertain knights and barons of the time.—The *Meistersingers*, their successors, an incorporated fraternity in the fourteenth century, composed satirical ballads for the amusement of the citizens and lower classes. Hans Sachs, a shoemaker (1494–1576), a poet of the Reformation, was for a time their dean. His works were published at Nuremberg, 1560. "Owleglass" and "Reynard the Fox" are attributed to the Meistersingers.

Minnesota, a western state of the United States, was organized as a territory, 3 March, 1849, and admitted into the Union in 1857. On 17 Aug. 1862, the Sioux Indians commenced a series of outrages at Acton, desolating the country and massacring above 500 persons, of both sexes and of all ages. Gen. Sibley beat the Indians in two battles and rescued many captives. Thirty-eight Indians were executed as assassins.

Minorca and Majorca, the Balearic Isles (*which see*). Port Mahon in Minorca was captured by lieutenant Stanhope and sir John Leake in 1708, and was ceded

to the British by the treaty of Utrecht in 1718. It was retaken by the Spanish and French in July, 1756, and admiral Byng fell a victim to public indignation for not relieving it; see *Byng*. It was restored to the British at the peace in 1763; taken 5 Feb. 1782; again captured by the British under gen. Stuart, without the loss of a man, 15 Nov. 1798; given up at the peace of Amiens, 25 March, 1802.

Minorities. In the new Reform bill, passed 15 Aug. 1867, provision was made for the representation of minorities in constituencies with three members by limiting each elector to two votes. It was introduced as an amendment by lord Cairns, in the lords, 30 July, and accepted by the commons, Aug. 1867. The principle was adopted in a new constitution by the state of Illinois, U. S., July, 1870.

Minster, or *MONASTERIUM*, a place occupied by monks; see *Westminster* and *York*.

Minstrels, originally pipers appointed by lords of manors to divert their copyholders while at work, owed their origin to the gleemen or harpers of the Saxons, and continued till about 1560. John of Gaunt erected a court of minstrels at Tutbury in 1380. So late as the reign of Henry VIII. they intruded without ceremony into all companies, even at the houses of the nobility; but in Elizabeth's reign they were adjudged rogues and vagabonds (1597).

Mint. Athelstan enacted regulations for the government of the mint about 928. There were several provincial mints under the control of that of London. Henry I. is said to have instituted a mint at Winchester, 1125. Stow says the mint was kept by Italians, the English being ignorant of the art of coining, 7 Edw. I. 1278. The operators were formed into a corporation by the charter of king Edward III., in which condition it consisted of the warden, master, comptroller, assay-master, workers, coiners, and subordinates. The first entry of gold brought to the mint for coinage occurs in 18 Edw. III. 1343. Tin was coined by Charles II. 1684; and gun-metal and pewter by his successor, James, after his abdication. Sir Isaac Newton was warden, 1699–1727, during which time the debased coin was called in, and new issued at the loss of the government. Between 1806 and 1810, grants amounting to 262,000*l.* were made by parliament for the erection of the present mint, which was completed in 1810; it was injured by fire 31 Oct. 1815. The new constitution of the mint, founded on the report of the hon. Wellesley Pole, took effect in 1817. Prof. Thomas Graham, the master of the mint, died 16 Sept. 1869. By the Coinage act, passed 4 April, 1870, the office was combined with that of the chancellor of the exchequer, the duties being transferred to the deputy-master (Mr. C. W. Freemantle), see *Coinage*.

1835. Alexander Baring.	1855. Thomas Graham, F.R.S.

Mint of the UNITED STATES was established by act of congress in April, 1792, and began to coin money the next year. The total coinage of the United States mint from its establishment to 1881, inclusive, has been:

Gold	\$1,211,837,186.00
Silver	319,983,403.65
Minor coins	13,689,277.00

(See *Coinage*.)

Miridites, or *MIRDITES*, see *Turkey*, 1877.

Mirrors. In ancient times mirrors were made of metal; those of the Jewish women of brass. **Mirrors**

of silver were introduced by Praxiteles, 328 B.C. Mirrors or looking-glasses were made at Venice, A.D. 1300; and in England, at Lambeth, near London, in 1673. The improvements in manufacturing plate-glass, and that of very large size, have cheapened looking-glasses very much. Various methods of coating glass by a solution of silver, thus avoiding the use of mercury, so injurious to the health of the workmen, have been made known; by M. Petitjean in 1851; by M. Cimeg in 1861, and by Liebig and others.

Mischna, see *Talmud*.

Miserere (Psalm li.), sung at Rome in the "*Tenebræ*," the service in Holy or Passion Week, in a peculiarly effective manner, to old music. One arrangement is by Costanzo Festa, dated 1517.

Missal, or **MASS-BOOK**, the Romanist ritual compiled by pope Gelasius I., 492-6; revised by Gregory I., 590-604. Various missals were in use till the Roman missal was adopted by the council of Trent, 1545-63. The missal was superseded in England by the Book of Common Prayer, 1549.

Missionary Bishops, see under *Bishops*.

Missionary Ridge (Tennessee), **BATTLE AT**, 25 Nov. 1863; see *Chattanooga*.

Missions,* see Mark xvi. 15. Among the Romanists, the religious orders of St. Dominic, St. Francis, St. Augustin, etc., have missions to the Levant and to America. Marco Polo is said to have introduced missionaries into China, 1275. The Jesuits have missions to China (*which see*) and to most other parts of the world. Among the Protestants, an early undertaking of this kind was a Danish mission, planned by Frederick IV. in 1706. The Society for the Propagation of the Gospel in Foreign Parts was established 1701, and the Moravian Brethren encouraged missions about 1732. The London Missionary Society held their first meeting, 4 Nov. 1791. Most Christian sects now support missions. *British Contributions to Foreign Missions*: 1871, 855,742l.; 1877, 1,100,793l. (in 1871-7, 6,977,866l.).

Commander Allan Gardner, R.N., who left England in the *Ocean Queen* in Sept. 1850, on the Patagonian mission, with Mr. Williams, surgeon, Mr. Maidment, catechist, and four others, died on Picton Island, at the mouth of the Beagle Channel, to the south of Tierra del Fuego, having been starved to death; all his companions having previously perished, 6 Sept. 1851.

M. Schoffler, a missionary to Cochinchina, was publicly executed at Son Tay, by order of the grand mandarin, for preaching Christianity, such preaching being prohibited by the law of that country, 4 May, 1851.

Mississippi, a great river, North America, explored by De Soto about 1541. The Mississippi trade was begun in England, in Nov. 1716. Law's Mississippi scheme in France, commenced about the same period, exploded in 1720; at which time the nominal capital is said to have amounted to 100,000,000*l.* The ruin of thousands soon followed; see *Law's Bubble*.

Mississippi, one of the United States. First settled by the French at Natchez, and claimed as a part of Louisiana, 1716. Colony attacked by the Natchez Indians. Indians almost annihilated by the French in 1730. Ceded to Great Britain in 1763. Erected into a territory (including Alabama) in 1812. Admitted into the Union in 1817. Adopted ordinance of secession 9 Jan. 1861. Ordinance repealed by constitutional convention, 21 Aug. 1865. Readmitted to the Union by act of congress, 23 Feb. 1870. Population, 1880, 1,131,592. Capital, Jackson.

Missolonghi, a town in Greece, taken from the Turks, 1 Nov. 1821, and heroically and successfully defended against the Turks by Marco Bozzaris, Oct. 1822-27 Jan. 1823. It was taken 22 April, 1826, after a long

siege. Here Lord Byron died, 19 April, 1824. It was surrendered to the Greeks in 1829.

Missouri, one of the United States. Was a part of the vast territory of Louisiana, and included in its purchase from the French in 1803. St. Louis settled by the French in 1764. Only a sort of trading-post until 1804, when the territorial government was formed. Admitted into the Union in 1821. It decided on neutrality in the conflict of 1861, but was invaded by both the confederate and federal forces in June of that year, and became one of the seats of war. Population, 1880, 2,168,804. Capital, Jefferson City.

Missouri Compromise. During the session of congress in 1818-19, a bill was introduced into congress which contained a provision forbidding the introduction of slavery or involuntary servitude into the new state of Missouri, when admitted. This brought out violent debates upon the subject of slavery. The whole country was greatly agitated by it. Finally a compromise was effected (28 Feb. 1821) by an agreement that slavery should be allowed in Missouri, and in all territory west of it, south of 36° 30' N. lat., and prohibited in all territory north of this line. This act was virtually repealed in 1854 by the act erecting the territories of Nebraska and Kansas.

Mithridate, a medical preparation in the form of an electuary, supposed to be an antidote to poison, and the oldest compound known, is said to have been invented by Mithridates, king of Pontus, about 70 B.C.

Mithridatic War, caused by the massacre of 80,000 Romans by Mithridates VI., king of Pontus, 88 B.C., and remarkable for its duration, its many sanguinary battles, and the cruelties of its commanders. Mithridates having taken the consul Aquilius, made him ride on an ass through a great part of Asia, crying out as he rode, "I am Aquilius, consul of the Romans." He is said to have killed him by causing melted gold to be poured down his throat, in derision of his avarice, 85 B.C. Mithridates was defeated by Pompey, 66 B.C.; and committed suicide, 63 B.C.

Mitrailleuse, or **MITRAILLEUR**, a machine-gun in which 37 or more large-bored rifles are combined with breech-action, by means of which a shower of bullets may be rapidly projected by one man. It was invented in Belgium, and adopted by the French emperor soon after the Prusso-Austrian war in 1866, and was much used in the Franco-Prussian war in 1870. Its peculiar "dry, shrieking, terrible sound" was described in the bombardment of Saarbrück, 2 Aug. 1870. Modifications of the mitrailleuse have been made by Montigny and others. The Fosbery mitrailleuse was tried and approved at Shoeburyness, 11 Aug. 1870. It is mentioned in *Grose's Military Antiquities* (1801) that in England, in 1625, a patent was granted to William Drummond for a machine composed of a number of muskets joined together, by the help of which two soldiers can oppose a hundred, and named, on account of its effect, "thunder carriage," or, more usually, "fire carriage." An English mitrailleuse, a modification of the American Gatling, containing 50 cartridges, was tried at Woolwich, 18 Jan. 1872; 50 of them were ordered to be made by Armstrong.

Mitre. The cleft cap or mitre was worn by the Jewish high-priest, 1491 B.C. It had on it a golden plate inscribed "HOLINESS TO THE LORD" (Exod. xxxix. 28). The most ancient mitre that has the nearest resemblance to the present one is that upon the seal of the bishop of Laon, in the tenth century.—*Fosbroke*. Anciently the cardinals wore mitres; but at the council of Lyons, in 1245, they were directed to wear hats.

Mitylene, or **LESBOS**, *Egean Sea*. Near here the Greeks defeated and nearly destroyed the Turkish fleet, 7 Oct. 1824.

Mnemonics, artificial memory, was introduced by Simonides the younger, 477 B.C.—*Arundelian Marbles*.

* **MISSIONS**, "a series of sermons, generally by a minister, or special preacher, often followed by confessions and communions" (a species of revivalism), were authorized in the metropolis by the bishops of London, Winchester, and Rochester, held 1869 and since.

"Mnemonica" was published by John Willis in 1618; and the "Memoria Technica" of Dr. Grey first appeared in 1730. A system of mnemonics was announced in Germany in 1806-7; and others since.

Mombites, descendants of Lot, a people living to the southeast of Judea. They were frequently at war with the Israelites, and were subdued with divine help by Ehud about 1336, by David about 1040, and by Jehoshaphat, 895 a.c., but often harassed the Jews in the decay of their monarchy. The discovery of a stone with inscription in Phœnician characters, said to relate to Meslin, king of Moab, referred to in 2 Kings iii., was announced in Jan. 1870, and impressions were exhibited soon after, which caused much discussion among Orientalists.

Mobile, Alabama. The city is situated at the southwest corner of the state, at the mouth of Mobile river, and with a harbor on the Gulf. After the capture of Vicksburg in 1863, an attack on this city was contemplated, but was given up, the Red river campaign being strongly urged by the United States government. Admiral Farragut attacked Forts Morgan and Gaines, 5 Aug. 1864. On that day Fort Powell was blown up; on the 8th, Fort Gaines was surrendered with its garrison, and Fort Morgan was occupied on the 23d. After passing the forts on the 5th, Farragut captured the confederate ram Tennessee. The result of this brief naval campaign was the possession of Mobile bay by the national forces. After Hood's defeat at Nashville (Dec. 1864), military operations against Mobile were commenced. On 25 March, gen. Canby had the 13th and 16th corps (under Gordon Granger and A. J. Smith) at Danley's, on Fish river, east of Mobile. The siege of Spanish Fort was commenced on the 27th. A week before this, gen. Steele, with an army which he had landed at Pensacola, marched northward against Montgomery, and, returning near the close of the month, joined the besieging army around Mobile. Spanish Fort was evacuated by the confederates on 8 April, and occupied by the national troops. The next day Fort Blakely was assaulted and captured, and Mobile was evacuated (11, 12 April). This was the last campaign of the civil war. Gen. Richard Taylor surrendered on 4 May. The population of Mobile decreased from 32,034 in 1870 to 31,203 in 1880. Mobile and Memphis are the only American cities which did not increase in population during that decade.

Möckern (Prussia). Here the French army under Eugene Demharians was defeated by the Prussians under Yorck, 5 April, 1813; and here Blücher defeated the French, 16 Oct. 1813.

Modena. The first were figures of living persons, and Dibutades, the Corinthian, is the reputed inventor of those in clay. His daughter, being about to be separated from her lover, traced his profile by his shadow on the wall; her father filled up the outline with clay, which he afterwards baked, and thus produced a figure of the object of her affection, giving rise to an art till then unknown, about 985 a.c.

A beautiful model of the new town of Edinburgh, before the building began, was formed in wood.

A model was made of a bridge over the Nera, of uncommon strength as well as elegance, and of the mountains of Switzerland by general P'uffer (1766-68).

M. A. Hoffman's model of Paris was remarkable for its precision.

Fine models of Gibraltar, Quebec, and other fortified places are deposited in the Rotunda at Woolwich.

Modena (formerly Mutina), capital of the late duchy in Central Italy, was governed by the house of Este from 1288 till 1796, when the last male of that house, the reigning duke Hercules III., was expelled by the French. By the treaty of Campo Formio, the Modenese possessions were incorporated with the Cisalpine republic, 1797, and with the kingdom of Italy, 1806. The archduke Francis of Este, son of the archduke Ferdinand of Austria, and of Mary, the heiress of the last duke, was restored in 1814. Modena, in accordance

with the voting by universal suffrage, was annexed to Sardinia on 18 March, 1860. Population in 1857, 604,512.

GRAND-DUKES.

1814. Francis IV. An invasion of his states by Murat was defeated 11 April, 1815. He was expelled by his subjects in 1821, but was restored by the Austrians.

1846. Francis V (born 1 June, 1819) succeeded 21 Jan. His subjects rose against him soon after the Italian war broke out, in April, 1859. He fled to Verona, established a regency 11 June, which was abolished 18 June. Farina was appointed dictator, 27 July, a constituent assembly was immediately elected, which offered the duchy to the king of Sardinia, 16 Sept., who incorporated it with his dominions, 18 March, 1860. Francis died 20 Nov. 1875.

Moderados. A political party in Spain, long headed by Ramon Maria Narvaez, duke of Valencia (who died 23 April, 1868), who opposed the Progressistas, headed by Espartero and Prim. The party was reinforced by the favorers of Don Carlos, after his total defeat in 1876.

Modoc Indians (a few hundreds), dwelling in lands south of Oregon, were removed to other lands by the United States government. Not obtaining subsistence, they returned to their old possessions, and their able leader, captain Jack, defeated the troops sent to expel them, 17 Jan. 1873. During negotiations for a peaceful settlement, they decoyed the United States commissioners into an ambush (11 April), and massacred general Canby and commissioner Thomas. Fighting took place, 15, 16 April, and the Indians retreated to almost impregnable positions. The troops were fired on, and suffered much loss, 27 April. The Indians were gradually surrounded. Jack and about twenty warriors held out desperately. Some surrendered, and he himself was captured, 1 June; tried, July, and executed 3 Oct. 1873.

Moesia (now Bosnia, Servia, and Bulgaria) was finally subdued by Augustus, 29 a.c. It was successfully invaded by the Goths, a.d. 250, who eventually settled here; see *Goths*.

Moguls, see *Tartary*.

Mohacs (Lower Hungary). Here Louis, king of Hungary, defeated by the Turks under Solymán II. with the loss of 22,000 men, was suffocated by the fall of his horse in a muddy brook, 29 Aug. 1526. Here also prince Charles of Lorraine defeated the Turks, 12 Aug. 1687.

Mohammerah, a Persian town near the Euphrates, captured, after two hours' cannonading, by sir James Outram, during the Persian war, 26 March, 1857. News of the peace arrived 4 April.

Mohilow (Russia). Here the Russian army, under prince Bagration, was signally defeated by the French under Marshal Davoust, prince of Eckmühl, 23 July, 1812.

Mohocks, ruffians who went about London at night wounding and disfiguring the men and indecently exposing the women. One hundred pounds were offered by royal proclamation in 1712 for apprehending any one of them.—*Northouck*.

Mohurram, a Mahometan festival in honor of the prophet's nephews: at its celebration in Bombay, Feb. 1874, the Mahometans fiercely attacked the Parsees, and were quelled by the military.

Moldavia, see *Danubian Principality*.

Molinists, a Roman Catholic sect, followers of Louis Molina, a Jesuit, born 1535. He maintained the reconcilability of the doctrines of predestination and free-will, 1588.

Molly Maguire, a secret society in mining districts, United States (which see), 1877.

Molokani, a sect in West Russia, said to date from the sixteenth century, who maintain primitive Christian doctrines and practices; well described by Mr. D. MacKenzie Wallace in his "Russia," published 1877.

Moluccas, an archipelago in the Indian Ocean (the

chief island Amboyna), discovered by the Portuguese about 1511, and held by them secretly until the arrival of the Spaniards, who claimed them, till 1529, when Charles V. yielded them to John III. for a large sum of money. The Dutch conquered them in 1607, and have held them ever since—except from 1810 to 1814, when they were subject to the English.

Molwitz (in Prussian Silesia). Here the Prussians, commanded by Frederick II., obtained a great victory over the imperialists, 10 April (o. s. 30 March), 1741.

Molybdenum, a whitish, brittle, almost infusible metal. Scheele, in 1778, discovered molybdic acid in a mineral hitherto confounded with graphite. Hjelm, 1782, prepared the metal from molybdic acid; and in 1825 Berzelius described most of its chemical characters.—*Gmelin*.

Monachism (from the Greek *μόνος*, alone). Catholic writers refer to the prophet Elijah, and the Nazarites mentioned in Numb. vi., as early examples. The first Christian ascetics appear to be derived from the Jewish sect of the Essenes, whose life was very austere, practising celibacy, etc. About the time of Constantine (306-22) numbers of these ascetics withdrew into the deserts, and were called *hermits*, *monks*, and *anchorites*,* of whom Paul, Anthony, and Pachomius were most celebrated. Simeon, the founder of the Stylitæ (or pillar saints), died 451. He is said to have lived on a pillar thirty years. St. Benedict, the great reformer of western monachism, published his rules and established his monastery at Monte Casino, about 529. The Carthusians, Cistercians, etc., are varieties of Benedictines. In 964, by decree of king Edgar, all married priests were ineffectually ordered to be replaced by monks. Religious orders expelled from France, by decree, 29 March, 1880. See *Abbeys* and *Benedictines*.

Monaco, a principality, N. Italy, held by the Genoese family Grimaldi since 968. By treaty on 2 Feb. 1861, the prince ceded the communes of Roquebrune and Mentone, the chief part of his dominions, to France for 4,000,000 francs. The present prince, Charles III., born 8 Dec. 1818, succeeded his father, Florestan, 20 June, 1856. *Heir*: Albert, born 13 Nov. 1848. A commercial convention between the prince and France, signed 9 Nov. 1865, was much discussed as tending towards the abolition of the French navigation laws. Population, 1878, 7049. Petitions against Monte Carlo, the great gaming establishment, Dec. 1880.

Monarchy. Historians reckon various grand monarchies—the Chaldean, Assyrian, Babylonian, Median, Persian, Grecian, Parthian, and Roman (*which see*).

Monasteries, see *Abbeys*.

Moncontour (near Poitiers, France). Here the admiral Coligny and the French Protestants were defeated with great loss by the duke of Anjou (afterwards Henry III.), 3 Oct. 1569.

Moncrieff System, see *Cannon*.

Monday Concerts, see under *Musical*.

Mondovi (Piedmont). Here the Sardinian army, commanded by Colli, was defeated by Napoleon Bonaparte, 22 April, 1796.

Monetary Conferences. INTERNATIONAL, opened at Paris, 16 Aug. 1878; and 19 April, 1881.

Money is mentioned as a medium of commerce in Gen. xliii., 1860 B.C., when Abraham purchased a field as a sepulchre for Sarah. The coinage of money is ascribed to the Lydians. Moneta was the name given to their silver by the Romans, it having been coined in the temple of Juno Moneta, 269 B.C. Money was made of different metals, and even of leather and other articles, both in ancient and modern times. It was made of

pasteboard by the Hollanders so late as 1574; see *Coin*, *Gold*, *Copper*, *Mint*, *Bank*, etc. For *Money-orders*, see *Post-office*. The czar Nicholas struck coins in platinum. A monetary conference was held at Paris (during the international exhibition), Aug. 1878.

Moneyers travelled with our early kings, and coined money as required; see *Mint*.

Mongols, see *Tartary*.

Moniteur Universel, a French newspaper, was established in Paris by C. J. Panckoucke, 5 May, 1789; daily paper, 24 Nov. 1789; the organ of the government, 28 Dec. 1799. It was superseded by the *Journal Officiel*, 1 Jan. 1869; resumed its official position about 23 Sept. 1870; and was again superseded by the *Journal Officiel*, Feb. 1871. It became the organ of MacMahon's government in 1875.

Monitor Ships, see *United States*. The American monitor *Monitor* arrived at Plymouth in June, 1866, and excited much attention.

Monitorial System (in education), in which pupils are employed as teachers, was used by Dr. Bell in the Orphan Asylum at Madras in 1795, and was also adopted by Joseph Lancaster in London; see *Education*.

Monk, see *Monachism*.

Monmouth, BATTLE OF. Sir Henry Clinton, at the head of the British army, left Philadelphia for New York on 18 June, 1778, with 11,000 men and an immense baggage and provision train. Washington pursued him, harassed him much in New Jersey, and engaged in battle with him near Monmouth Court-house on 28 June, 1778. The battle lasted all day. It was exceedingly sultry weather, and more than 50 American soldiers died of exhaustion. Night closed the conflict. Both armies slept upon their arms until towards midnight, when Clinton, with his whole force, stole off in the dark, to avoid another engagement in the morning, and escaped, leaving a large number of sick and wounded behind. The Americans lost 228 of their men; less than 70 were killed. The British left about 300 dead on the field.

Monmouth's Rebellion. James, duke of Monmouth (born at Rotterdam, 9 April, 1649), a natural son of Charles II. by Lucy Waters, was banished England for his connection with the Rye-house plot, in 1683. He invaded England at Lyme, 11 June, 1685; was proclaimed king at Taunton, 20 June; was defeated at Sedgemoor, near Bridgwater, 6 July; and beheaded on Tower hill, 15 July.

Monochord, a box of thin wood, with a bridge, over which is stretched a wire or chord, said to have been invented by Pythagoras, about 600 B.C.

Monolith, Greek for "single stone;" see *Obelisk*.

Monophysites, see *Eutychians*.

Monopolies were formerly so numerous in England that parliament petitioned against them, and many were abolished, about 1601-2. They were further suppressed by 21 Jas. I. 1624. Sir Giles Mompesson and sir Francis Mitchell were punished for their abuse of monopolies, 1621. In 1630, Charles I. established monopolies of soap, salt, leather, and other common things, to supply a revenue without the help of parliament. It was decreed that none should be in future created by royal patent, 16 Chas. I. 1640.

Monothelites, heretics who affirmed that Jesus Christ had but one will, were favored by the emperor Heraclius, 630; they merged into the Eutychians (*which see*).

Monroe Doctrine, a term applied to the determination expressed by James Monroe, president of the United States, in his message to the congress, 2 Dec. 1823, not to permit any European power to interfere with the concerns of any independent states of North or South America, or to acquire dominion on the continent. This doctrine was referred to in 1859, with the view of weakening the influence of Great Britain and Spain on

Montigny, see under *Fire-arms*.

Monthery (Seine-et-Oise, France), site of an indecisive battle between Louis XI. and a party of his nobles, termed "The League of the Public Good," 16 July, 1465.

Montmartre, HEIGHTS OF, near Paris, taken by Blucher, 30 March, 1814. They were fortified during the communist insurrection, March, 1871; and retaken by the army of Versailles, 28 May.

Montmirail (Marne, France). Here Napoleon defeated the allies, 11 Feb. 1814.

Montpellier (S. France), built in the eighth century, prospered as the neighboring city, Maguelonne, decreased. It was acquired by marriage by the king of Aragon, 1204; by the king of Majorca, 1276; was ceded to France, 1349; given to Charles the Bad, king of Navarre, in exchange for Mantes, etc., 1365; sequestered by France, 1378. It was seized by the Huguenots early in the reign of Henry III., and held by them till Sept. 1622, when it surrendered after a siege, followed by a treaty of peace, 20 Oct.

Montserrat, a West India island, discovered by Columbus in 1493, and settled by the British in 1632. It has several times been taken by the French, but was secured to the British in 1783.

Monument of London, built by sir Christopher Wren, 1671-7. The pedestal is 40 feet high, and the edifice altogether 202 feet, that being the distance of its base from the spot where the fire which it commemorates commenced. It is the loftiest isolated column in the world. Its erection cost about 14,500*l*. The staircase is of black marble, consisting of 345 steps.* Of the four original inscriptions, three were Latin, and the following in English—cut in 1681, obliterated by James II. recut in the reign of William III.; and finally erased by order of the common council, 26 Jan. 1831. They produced Pope's indignant lines:

"Where London's column, pointing at the skies,
Like a tall bully, lifts the head, and lies."

* William Green, a weaver, fell from this monument, 25 June, 1750. A man named Thomas Craddock, a baker, precipitated himself from its summit, 7 July, 1780. Mr. Lyon Levy, a Jewish diamond merchant, of considerable respectability, threw himself from it, 18 Jan. 1810; as did more recently three other persons. In consequence of which a fence was placed round the railing of the gallery in 1839.

Moodkee (India). Here, on 18 Dec. 1845, the Sikhs attacked the advanced guard of the British, and were repulsed three miles, losing many men and fifteen pieces of cannon. Sir Robert Sale was mortally wounded. The battle followed that of Ferozeshah (*which see*).

Mooltan (N.W. India), an ancient city, was stormed by Runjeet Sing, 1818. Here his son, Moolraj Sing, ruler of the Sikhs, treacherously murdered Mr. Vans Agnew and lieutenant Anderson, 21 April, 1848. Several conflicts took place between the British and the Sikhs, in which the latter were beaten, and Mooltan taken after a protracted siege, 2-22 Jan. 1849.

Moore's Creek Bridge (North Carolina), BATTLE AT, between Americans, 1000 strong, and Tory Scotch settlers, numbering 1500, on 27 Feb. 1776. The Tories were beaten, losing 70; the Americans none.

Moors, formerly the natives of Mauritania (*which see*), but afterwards the name given to the Numidians and others, and now applied to the natives of Morocco and the neighborhood. They frequently rebelled against the Roman emperors, and assisted Genseric and the Vandals in their invasion of Africa, 429. They resisted for a time the progress of the Arab Mahometans, but were overcome in 707, and in 1019 by them introduced into Spain, where their arms were long victorious. In 1063 they were defeated in Sicily by Roger Guiscard. The Moorish kingdom of Granada was set up in 1237, and lasted till 1492, when it fell before Ferdinand V. of Castile, mainly owing to internal discord. The expulsion of the Moors from Spain was decreed by Charles V., but not fully carried into effect till 1609, when the bigotry of Philip III. inflicted this great injury to his country. About 1518 the Moors established the piratical states of Algiers and Tunis (*which see*). In the history of Spain, the Arabs and Moors must not be confounded.

Moplaha, industrious fanatical Mahometans in Malabar, East Indies, gave trouble by their attacks on Hindoos and the British, especially in 1845; an outbreak was suppressed about 15 Sept. 1873.

Moral Philosophy, the science of ethics, defined as the knowledge of our duty, and the art of being virtuous and happy. Socrates (about 430 B.C.) is regarded as the father of ancient, and Grotius (about 1623) the father of modern, moral philosophy; see *Philosophy*.

Morat (Switzerland), where Charles the Bold of Burgundy was completely defeated by the Swiss, 22 June, 1476. A monument, constructed of the bones of the vanquished, was destroyed by the French in 1798, and a stone column erected. 400th anniversary kept, 1876.

Moravia, an Austrian province, occupied by the Slavonians about 548, and conquered by the Avars and Bohemians, who submitted to Charlemagne. About 1000 it was subdued by Boleslas of Poland, but recovered by Ulrich of Bohemia in 1030. After various changes, Moravia and Bohemia were amalgamated into the Austrian dominions in 1526. Moravia was invaded by the Prussians in 1866, and they established their headquarters at Brunn, the capital, 13 July. The demand of the Moravians for home rule was resisted Oct. 1871.

Moravians, or UNITED BRETHREN, said to have been part of the Hussites, who withdrew into Moravia in the fifteenth century, but the brethren assert that their sect was derived from the Greek church in the ninth century. In 1722 they formed a settlement called *Herrnhut*, the watch of the Lord, on the estate of count Zinzendorf. Their church consisted of 500 persons in 1727. They were introduced into England by count Zinzendorf about 1738; he died at Chelsea in June, 1760. In 1851 they had thirty-two chapels in England. They are zealous missionaries, and founded settlements in foreign parts about 1732. London Association founded in 1817. The United Brethren in the United States, in 1880, had 4524 organized churches and 157,835 communicants. They settled in Pennsylvania in 1746.

Morganatic * Marriages, when the left hand is given instead of the right, between a man of superior and a woman of inferior rank, in which it is stipulated that the latter and her children shall not enjoy the rank or inherit the possessions of the former. The children are legitimate. Such marriages are frequently contracted in Germany by royalty and the higher nobility. It has been asserted that our George I. was thus married to the duchess of Kendal; the late duke of Sussex to lady Cecilia Underwood; Frederic VI. of Denmark to the countess of Danner, 7 Aug. 1850; and several Austrian princes recently.

Morgarten (Switzerland). 1300 Swiss engaged 20,000 Austrians, commanded by the duke Leopold, whom they completely defeated, 15 Nov. 1315, upon the heights of Morgarten, overlooking the defile through which the enemy was to enter their territory from Zug.

Mormons (calling themselves the Church of Jesus

Christ of LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, called the Prophet, who announced in 1828, at Palmyra, N. Y., that he had had a vision of the angel Moroni. In 1827 he said that he found the Book of Mormon, written on gold plates in Egyptian characters. This book is said to have been written about 1812 by a clergyman named Solomon Spaulding (or by Martin Harris, who died Sept. 1875), as a religious romance in imitation of the Scripture style. It was translated and published in America in 1830, in England in 1841. It fell into the hands of Rigdon and Smith, who determined to palm it off as a new revelation. The Mormons command the payment of tithes, permit and enjoin polygamy, encourage labor, and believe in their leaders working miracles. Missionaries are propagating these doctrines in Europe with more success than would be expected.

Mortar, a short gun with a large bore and close chamber for throwing bombs; said to have been used at Naples in 1435, and first made in England in 1543. The mortar left by Soult at Cadiz, in Spain, was fixed in St. James's park in Aug. 1816. On 19 Oct. 1857, a colossal mortar, constructed by Mr. Robert Mallet, was tried at Woolwich, with a charge of 70 lbs. it threw a shell weighing 2550 lbs. $1\frac{1}{2}$ miles horizontally, and about $\frac{1}{2}$ mile in height.

Mortimer's Cross (Herefordshire). The earl of Pembroke and the Lancastrians were here severely defeated by the young duke of York, afterwards Edward IV., 2 Feb. 1461. He assumed the throne as Edward IV. in March following.

Mortmain Acts (*mort main*, dead hand). When the survey of all the land in England was made by William I., 1085-6, the whole was found to amount to 62,215 knights' fees, of which the church then possessed 28,015, to which additions were afterwards made, till the 7th of Edward I. 1279, when the statute of mortmain was passed, from a fear that the estates of the church might grow too bulky. By this act it was made unlawful to give any estates to the church without the king's leave; and this act, by a supplemental provision, was made to reach all lay fraternities, or corporations, in the 15th of Richard II. 1391. Mortmain being such a state of possession as makes property inalienable, it is said to be in a dead hand. Several statutes have been passed on this subject: legacies by mortmain were especially restricted by the 9th Geo. II. c. 36 (1736).

Mosaic-work (the Roman *opus tessellatum*) is of Asiatic origin, and is probably referred to in Esther i. 6, about 519 B.C. It had attained to great excellence

in Greece in the time of Alexander and his successors, when Sosos of Pergamos, the most renowned Mosaic artist of antiquity, flourished. He acquired great fame by his accurate representation of an "unswept floor after a feast." The Romans also excelled in mosaic-work, as evidenced by the innumerable specimens preserved. Byzantine mosaics date from the fourth century after Christ. The art was revived in Italy by Tañ, Gaddi, Cimabue, and Giotto, who designed mosaics, and introduced a higher style in the thirteenth century. In the sixteenth century Titian and Veronese also designed subjects for this art. The practice of copying paintings in mosaics came into vogue in the seventeenth century; and there is now a workshop in the Vatican where chemical science is employed in the production of colors, and where 20,000 different tints are kept. In 1861, Dr. Salviati of Venice had established his manufacture of "enamel-mosaics;" and in July, 1864, he fixed a large enamel mosaic picture in one of the spandrels under the dome of St. Paul's cathedral, London. He has since executed commissions for the queen and other persons.

Moscow, the ancient capital of Russia, was founded, it is said, by Dolgorouki, about 1147. The occupation of the south of Russia by the Mongols in 1235 led to Moscow becoming the capital, and, beginning with Jaroslav II., 1238, its princes became the reigning dynasty. It is regarded as a holy city by the Russians.

Mosquito Coast (Central America). The Indians inhabiting this coast were long under the protection of the British, who held Belize and a group of islands in the bay of Honduras. The jealousy of the United States long existed on this subject. In April, 1850, the two governments covenanted not "to occupy or fortify or colonize, or assume or exercise any dominion over, any part of Central America." In 1855 the United States charged the British government with an infraction of the treaty; on which the latter agreed to cede the disputed territory to the republic of Honduras, with some reservation.* The matter was finally settled in 1859.

Moss-troopers, desperate plunderers, and lawless soldiers secreting themselves in the mosses on the borders of Scotland. Many severe laws were enacted against them, but they were not extirpated till the eighteenth century.

Motets, short pieces of church music, some of which are dated about the end of the thirteenth century. Good motets were written between 1430 and 1480; and very fine ones in the sixteenth and seventeenth centuries. The "Motet Society," for the publication of these works, was founded in 1847, by Wm. Dyce.

Mourning for the Dead. The Israelites neither washed nor anointed themselves during the time of mourning, which for a friend lasted seven days; upon extraordinary occasions a month. The Greeks and Romans fasted. White was used in mourning for the imperial family at Constantinople, 823. The ordinary color for mourning in Europe is black; in China, white, in Turkey, violet; in Ethiopia, brown, it was white in Spain until 1498. Anne of Brittany, the queen of two successive kings of France, mourned in black, instead of wearing white, as was then the custom, on the death of her first husband, Charles VIII., 7 April, 1498.—*Hénault*.

Mousquetaires, or MUSKETEERS, horse-soldiers under the old French *régime*, raised by Louis XIII., 1622. This corps was considered a military school for the French nobility. It was disbanded in 1646, but was restored in 1657. A second company was created in 1660, and formed cardinal Mazarin's guard.—*Hénault*.

Mozambique, chief of the Portuguese territories, E. Africa, on an isle, was visited by Vasco de Gama, 1498; conquered by the Portuguese under Tristan da Cunha and Albuquerque, 1506; a settlement was established, 1508.

Mugletonians, so called from Ludovic Muggleton, a tailor, known about 1641, prominent about 1650; convicted of blasphemy, Jan. 1676, died 1697. He and John Reeve affirmed that God the Father, leaving the government of heaven to Elias, came down and suffered death in a human form. They asserted that they were the two last witnesses of God who should appear before the end of the world, Rev. xi. 3. This sect existed 1850.

Mühlberg, on the Elbe, Prussia. Here the German Protestants were defeated by the emperor Charles V., 24 April, 1547, and John Frederick, elector of Saxony, was taken prisoner.

Mühdorf (Bavaria). Near this place Frederick, duke of Austria, was defeated and taken prisoner by Louis of Bavaria, 28 Sept. 1322.

Mulberry-trees. The alleged first planted in England are in the gardens of Sion House. Shakespeare planted a mulberry-tree with his own hands at Stratford-upon-Avon; and Garrick, Macklin, and others were entertained under it in 1742. Shakespeare's house was afterwards sold to a clergyman of the name of Gastrel, who cut down the mulberry-tree for fuel, 1765. A silversmith purchased the whole, and manufactured it into memorials.

Mule, a spinning-machine invented in 1779 by Samuel Crompton, born at Bolton, Lancashire, in

1753; named, from Crompton's residence, *hall-in-the-wood-wheel*; and *muslin-wheel*, from its giving birth to the British muslin and cambric manufacture; and *mule*, from its combining the advantages of Hargreaves's spinning-jenny and Arkwright's adaptation. It is stated that Crompton at the time knew nothing of the latter. He did not patent his invention, but gave it up in 1780. It produced yarn treble the fineness and very much softer than any ever before produced in England. Parliament voted him 5000*l.* in 1812, now considered a most inadequate compensation. Mr. Roberts invented the *self-acting mule* in 1825.

Mulhouse, or MÜLHAUSEN (in N.E. France), an imperial city, under Rodolph of Hapsburg; joined the Swiss Confederation in 1515, annexed to France in 1798; conquered and annexed to Germany, 1870-1. The calico manufacture was introduced in 1746.

Mummies (from the Arabic *mum*, wax; see *Embalming*). The mummies in the British Museum, with other Egyptian antiquities, were placed there about 1803. Mr. Alex. Gordon, in 1737, published an essay on three Egyptian mummies, one of which was brought to England in 1722 by capt. Wm. Lethieullier; two others came in 1734, one of which was retained by Dr. Mead, the other was given to the College of Physicians. In 1834, Mr. T. J. Pettigrew published a "History of Egyptian Mummies."

Münchengrätz (Bohemia) was taken by the Prussians under prince Frederick Charles, after a severe action, 28 June, 1866. The Austrians lost about 800 killed and 1000 prisoners, and the prince gained about 12 miles of country.

Munda (now Monda, S. Spain). Here Cneius Scipio defeated the Carthaginians, B.C. 216; and here Julius Cæsar defeated the sons of Pompey, 17 March, 45, after a severe conflict.

Mundane Eras. That of Alexandria fixed the Creation at 5502 B.C. This computation continued till A.D. 284, Alex. era 5786; but in A.D. 285 ten years were subtracted, and 5787 became 5777. This coincided with the Mundane era of Antioch (which dated the Creation 5492 B.C.).—*Nicholas*.

Munich, the capital of Bavaria, founded by duke Henry of Saxony, 962. It was taken by Gustavus Adolphus of Sweden in 1632, by the Austrians, in 1704, 1741, and 1743; and by the French under Moreau, 2 July, 1800. It abounds in schools, institutions, and manufactures. The university was founded by king Louis in 1826. A Bavarian art-exhibition was opened here by prince Adalbert, 20 July, 1869. A congress of "Old Catholics" (*which see*) met here, 23 Sept. 1871. International exhibition opened, 19 July, 1879. Population, Dec. 1871, 169,693, 1875, 198,829.

Münster (W. Prussia). The bishopric, said to have been founded by Charlemagne, 780, was secularized in 1802; seized by the French, 1806, part of the duchy of Berg, 1809; annexed to France, 1810; ceded to Prussia, 1815. The Anabaptists, under John of Leyden, the king of Münster, held the city in 1534-5. Here were signed the preliminaries of the treaty of Westphalia (*which see*), or Münster, Jan. 1647; definitively signed 24 Oct. 1648.—MÜNSTER, the southern province of Ireland, an ancient kingdom. In 1568 a commission was issued for its government by a president and council, and new colonies were founded in 1588.

Murcia, a province, formerly a kingdom, N.E. Spain, was subdued by the Moors, 713; by Ferdinand of Castile, 1240; and divided between Castile and Aragon, 1305.

Murcia, the capital, was sacked by the French under Sebastiani, 23 April, 1810. It was inundated by the Segura, after a violent storm, 15-17 Oct. 1879, when about 1000 persons perished.

Murder, the highest offence against the law of God. (Gen. ix. 6, 2348 A.C.) A court of Ephetae was established by Demophoon of Athens for the trial of murder, 1179 A.C. The Persians did not punish the first offence. In England, during a period of the heptarchy, murder was punished by fines only. So late as Henry VIII.'s time the crime was compounded for in Wales. Murderers were allowed benefit of clergy in 1503. Aggravated murder, or *petit treason* (a distinction now abolished), happened in three ways: by a servant killing his master, a wife her husband, and an ecclesiastical person his superior (stat. 25 Edw. III. 1350). The enactments relating to this crime are very numerous, and its wilful commission has been rarely pardoned by our sovereigns. The act whereby the murderer should be executed on the day next but one after his conviction was repealed 1836; see *Assassinations, Executions, Trials*; also *London*, 1872, *Bravo, Burton, Euston, Ratcliffe, Road, Richmond, Harley Street, Whitechapel, Poisoning; Railways*, 1861 and 1881.—*Slough*.

Museum, originally a quarter of the palace of Alexandria, like the Prytaneum of Athens, where eminent learned men were maintained by the public. The foundation is attributed to Ptolemy Philadelphus, who here placed his library about 280 A.C. Besides the British Museum, Soane's Museum, and the Museum of Geology (*which see*), there are very many others in London. The opening of public museums and galleries on Sunday was long advocated in parliament: negatived by 271 to 68, 19 May, 1874.

Music. * Jubal, the father of all such as handle

the harp and the organ" (3875 A.C., Gen. iii. 21). The flute, and harmony, or concord in music, are said to have been invented by Hyagnis, 1506 A.C.—*Arund. Murblea*. Vocal choruses of men are first mentioned 556 A.C.—*Dufresnoy*. See *Organ*, and other musical instruments. Prior to 1600, the chief music in England was masses, ballads, and madrigals; but dramatic music was much cultivated from that time. About the end of James I.'s reign, a music professorship was founded in the University of Oxford by Dr. William Hychin; and the year 1710 was distinguished by the arrival in England of George Frederick Handel. Mozart came to England in 1763; Joseph Haydn in 1791; and Carl Maria von Weber in 1825.

MUSICAL NOTES, etc.; see *Gamus*. The first six are said to have been invented by Guy Aretino, a Benedictine monk of Arezzo, about 1025.—*Blair*. The notes at present used were perfected in 1338. Counterpoint was brought to perfection by Palestrina about 1555. Gaffurio of Lodi read lectures on musical composition in the fifteenth century, and they effected great improvement in the science. The Italian style of composition was introduced into these countries about 1616.

The **MUSICAL PITCH** was settled in France in 1859. The middle A to be 870 simple or 435 double vibrations in a second; but through error of measurement the fork made gave (A) 439 double vibrations (C, 522). At a meeting on the subject, held at the Society of Arts, on 23 Nov. 1860, the concert pitch of C was recommended to be 528 vibrations in a second; but the fork made by Mr. J. H. Griesbach gives 532 vibrations. Mr. Hullah adopted 512 vibrations. A lower pitch was adopted at concerts in London in Jan. 1869. 528 vibrations for C adopted for performances at the international exhibition of 1872, at a meeting, 20 Jan. 1872. [Handel's tuning fork, 1740, was 495; the Philharmonic Society's, 1813-43, was 515.]

Mr. A. J. Ellis's elaborate "History of Musical Pitch" is published in "Journal of the Society of Arts," 5 March, 1880, and separately.

MUSICAL FESTIVALS. Several were held on the continent in the eighteenth century; for Haydn at Vienna, 1800, 1811; others at Erfurt, 1811; Cologne, 1821; and frequently since.

The **Tonic sol fa** system, in which the letters *d, r, m, f, s, l, t* (for *do, re, mi, fa, so, la, ti, or si*) are used instead of notes, was invented by Miss Glover of Norwich, and improved by rev. John Curwen, about 1844; he died 1860.

The Tonic Sol fa Association founded 1853; the college established 1862.

MUSICAL FESTIVALS IN ENGLAND. Dr. Byssie, chancellor of Hereford, about 1724, proposed to the members of the choir a collection at the cathedral door after morning service, when forty guineas were collected and appropriated to charitable purposes. It was then agreed to hold festivals at Hereford, Gloucester, and Worcester, in rotation annually. Until the year 1753, the festival lasted only two days; it was then extended at Hereford to three evenings; and at Gloucester, in 1757, to three mornings, for the purpose of introducing Handel's "Messiah," which was warmly received, and has been performed annually ever since. Musical festivals on a great scale are now annually held at various cathedrals in England; see *Handel* and *Crystal Palace*.

"*Sons of the Clergy*" annual musical performances at St. Paul's began 1709.

* He had eleven sons musicians: four distinguished.

Music-halls. In 1878, 347 of these were licensed in London: first class, 8; second class, 6; third class, 13; fourth class, 53; etc.

Musketry Schools at Hythe and Fleetwood were established in 1854 under major-gen. C. C. Hay. He resigned in 1867. The school at Fleetwood was closed the same year.

Muskets, see *Fire-arms*.

Muslin, a fine cotton cloth, so called, it is said, from having a downy nap on its surface resembling moss (French, *mousse*); according to others, because it was first brought from Moussol, in India. Muslins were first worn in England in 1670.—*Anderson*. By means of the mule (*which see*), British much superseded India muslins.

Muta (Syria). Here Mahomet and his followers defeated the Christians in his first conflict with them, 629.

Mute. A prisoner is said to stand *mute*, when, being arraigned for treason or felony, he either makes no answer, or answers foreign to the purpose. Anciently a mute was subjected to torture.

Walter Calverly, esq., of Calverly in Yorkshire, having murdered two of his children, and stabbed his wife in a fit of jealousy, being arraigned for his crime at York assizes, stood mute, and was thereupon pressed to death in the castle—a large iron weight being placed upon his breast, 5 Aug. 1606.

—*Stow*.

Major Strangeway suffered death in a similar manner at Newgate, for the murder of his brother-in-law, Mr. Fussell, 1657.

Judgment was awarded against mutes, as if they were convicted or had confessed, by 12 Geo. III. 1772.

A man refusing to plead was condemned and executed at the Old Bailey on a charge of murder, 1778, and another on a charge of burglary at Wells, 1792.

An act passed by which the court is directed to enter a plea of "not guilty" when the prisoner will not plead, 1827.

Mutina (now Modena), N. Italy. Here Marc Antony, after defeating the consul Pansa, was himself beaten with great loss by Hirtius, the other consul, and fled to Gaul, 27 April, 43 B.C.

Mutinies, BRITISH. The mutiny throughout the fleet at Portsmouth for an advance of wages, April, 1797. It subsided on a promise from the admiralty, which not being quickly fulfilled occasioned a second mutiny on board the *London* man-of-war; admiral Colpoys and his captain were put into confinement for ordering the marines to fire, whereby some lives were lost. The mutiny subsided 10 May, 1797, when an act was passed to raise the wages, and the king pardoned the mutineers.

Mutiny of the *Bounty*, 28 April, 1789; see *Bounty*.

Mutiny at the Nore, which blocked up the trade of the Thames, broke out on 27 May, 1797, and subsided 13 June, 1797, when the principal mutineers were put in irons, and several executed (including the ringleader, who had assumed the name of rear-admiral Richard Parker), 30 June, at Sheerness.

Mutiny of the *Danaë* frigate; the crew carried the ship into Brest harbor, 27 March, 1800.

Mutiny on board admiral Mitchell's fleet at Bantry Bay, Dec. 1801, and January following; see *Bantry Bay*.

Mutiny at Malta, began 4 April, 1807, and ended on the 12th, when the mutineers (chiefly Greeks and Corsicans) blew themselves up by setting fire to a large magazine, consisting of between 400 and 500 barrels of gunpowder.

Mutiny on the *Jefferson* sloop, U. S. schooner; two mates murdered; put down by the captain, 20 April; vessel arrived at Gravesend, May; 2 men condemned at Boston, U. S., 1 Oct. 1875.

Mutiny on the *Lennie*, British ship, bound for America, captain and two mates murdered by foreign seamen, 31 Oct. 1875. Van Hoydek, steward, managed to get the vessel to the Isle of Rhé; 11 men seized and conveyed to London; tried, 4 convicted, 4 May; executed, 23 May, 1876.

Mutiny on the *Canoel*, Glasgow bark, capt. G. Best, 4 Jan., on way home from Valparaiso; captain and 3 men killed; mutineers overcome by others, some killed; vessel brought to Queenstown, 13 May; Christos Baumbos sentenced to death, 31 July; executed at Cork, 26 Aug. 1876. Giuseppe Pistoria executed at Cork, 25 Aug. 1879.

Mutiny in 19th Hussars, Curragh camp, Dublin; through discontent with officers on account of extra duty, 8 Sept.; 75 arrested; court-martial; sentenced to penal servitude, 2 for 5 years, 2 for 6 years, 1 for 7 years, 1 for 8 years, 14 Nov. 1877.

For Indian mutinies, see *Madras*, 1806, and *India*, 1857.

Mutiny Act (1 & 2 Will. and Mary, c. 5), for the discipline, regulation, and payment of the army, etc., was passed 12 April, 1689, and has since been re-enacted annually.

A parliamentary commission reported in favor of consolidating and simplifying military law by combining the Mutiny act and articles of war in a new act to be passed annually, etc., July, 1878.

Mycale (Ionia, Asia Minor), **BATTLE OF**, fought between the Greeks (under Leotychides, the king of Sparta, and Xantippus the Athenian) and the Persians, 22 Sept. 479 B.C.; the day on which Mardonius was defeated and slain at Platea by Pausanias. The Persians (about 100,000 men), who had just returned from the unsuccessful expedition of Xerxes in Greece, were completely defeated, thousands of them slaughtered, and their camp burned. The Greeks sailed back to Samos with an immense booty.

Mycenæ, a division of the kingdom of Argives, in the Peloponnesus. It stood about fifty stadia from Argos, and flourished till the invasion of the Heracleidæ. Early history mythical.

Mylæ, a bay of Sicily where the Romans, under their consul Duilius, gained their first naval victory over the Carthaginians, and took fifty of their ships, 260 B.C. Here also Agrippa defeated the fleet of Sextus Pompeius, 36 B.C.

Myographion, an apparatus for determining the velocity of the nervous current, invented by H. Helmholtz in 1850, and since improved by Du Bois Raymond and others.

Mysore (S. India) was made a flourishing kingdom by Hyder Ali, who dethroned the reigning sovereign in 1761, and by his son, Tipoo Sahib, who considerably harassed the English. Tipoo was chastised by them in 1792; and on 4 May, 1799, his capital, Seringapatam, was taken by assault, and himself slain. The

English established a prince of the old royal family as maharajah of part of Mysore in 1799. Being without an heir, he was permitted to adopt a child of four years of age, in Aug. 1867; who succeeded him at his death, 27 March, 1868, and assumed the government in May, 1881. Tipoo's last surviving son, Gholam Mahomet, a British pensioner, died at Calcutta, 11 Aug. 1872.

Mysteria, derived from the Greek *μυστήριον*, a mystery or revealed secret. The *Sacred* mysteries is a term applied to the doctrines of Christianity, called the "mystery of godliness," 1 Tim. iii. 16, as opposed to the "mystery of iniquity," 2 Thess. ii. 7. The *Profane* mysteries were the secret ceremonies performed by a select few in honor of some deity. From the Egyptian mysteries of Isis and Osiris sprang those of Bacchus and Ceres among the Greeks. The Eleusinian mysteries were introduced at Athens by Eumolpus, 1356 B.C. **MYSTERY PLAYS**, see *Drama*.

Mystics, a name given to those theologians who, in addition to the obvious meaning of the Holy Scriptures, assert that there are interpretations to be discovered by means of an emanation of the Divine Wisdom, by which the soul is enlightened and purified; for which purpose they advocate seclusion for contemplation and asceticism.

Mysticism taught at Alexandria by Clemens, Pantænus, Origen, and others, who mingled Christianity and Platonism, second and third centuries.

Much promoted by the works of the Pseudo-Dionysius ("The Mystic Theology," etc.), sixth century.

Introduced into the Western empire, ninth century.

Eminent mediæval mystics (opposed by the schoolmen): Master Eckhart (1261-1329); John Tauler of Strasburg, where he acted heroically during the plague termed the "black death" (1290-1361); Henry Suso (1300-65). They aimed at a more spiritual religion than Romanism; but their followers were charged with immorality, pantheism, communism, and maintaining private inspiration.

Jacob Böhme or Behmen, the German mystic, published his "Aurora" (an alleged divine revelation), 1612; died 18 Nov. 1624.

For modern mystics, see *Quakers*, *Quirists*, *Hutchinsonians*, and *Sveedenborgians*.

Mythology (Greek *μῦθος*, fable), the traditions respecting the gods of any people. Thoth (or Mercury Trismegistus) is supposed to have introduced mythology among the Egyptians, 1521 B.C.; and Cadmus, the worship of the Egyptian and Phœnician deities among the Greeks, 1493 B.C.

Naas (E. Ireland). Here a desperate engagement took place between a body of royal forces and the insurgent Irish, 24 May, 1798, during the rebellion. The latter were defeated with the loss of 300 killed and many wounded.

Nabonassar, **ERA OF**, received its name from the prince of Babylon, under whose reign astronomical studies were much advanced in Chaldaea. The years contain 365 days each, without intercalation. The first day of the era was Wednesday (said, in mistake, to be

Thursday, in "L'Art de Vérifier les Dates"), 26 Feb. 747 B.C.—3967 Julian period. To find the Julian year on which the year of Nabonassar begins, subtract the year, if before Christ, from 748; if after Christ, add to it 747.

Nachod (Bohemia). At this place the Prussians, under their crown-prince, defeated the Austrians, after a severe conflict, 27 June, 1866. The Prussian Uhlans vanquished the Austrian cavalry.

Nacolea (Phrygia). Near here the usurper Proco-

pius was defeated, and soon afterwards slain by the emperor Valens, 366.

Nafels (Switzerland). Here an Austrian army was defeated by a small body of Swiss, 1388.

Naga Hills Massacre, see *India*, 1875.

Nag's Head Story. Matthew Parker was consecrated archbishop of Canterbury at Lambeth, 17 Dec. 1559, by bishops Barlow, Coverdale, Scory, and Hodgkins. Many years after, the Romish writers asserted that Parker and others had been consecrated at the Nag's Head Tavern, Cheapside, by Scory. This fiction was refuted by Burnet.

Nahum, FESTIVAL OF. Nahum, the seventh of the twelve minor prophets, about 713 B.C.; the festival is 24 Dec.

Naini Tal, see *Landslips*, 18 Sept. 1880.

Naissus (Moesia). The Goths were defeated near here with great slaughter by the emperor Claudius II., 269.

Najara, or NAVARETE (N. Spain). At Logroño, near these places, Edward the Black Prince defeated Henry de Trastamere, and re-established Peter the Cruel on the throne of Castile, 3 April, 1367.

Names. Adam and Eve named their sons (Gen. iv. 25, 26). A Roman citizen had generally three names; *prænomen*, denoting the individual; *nomen*, the gens or clan; *cognomen*, the branch of the clan; sometimes he had the *agnomen* (e. g., Publius Cornelius Scipio Africanus). The popes change their names on their exaltation to the pontificate, "a custom introduced by pope Sergius, whose name till then was Swine-snout," 687.—*Platina*. Onuphrius refers it to John XII., 956; stating that it was done in imitation of SS. Peter and Paul, who were first called Simon and Saul. In France the name given at baptism was sometimes changed. The two sons of Henry II. of France were christened Alexander and Hercules; at their confirmation these names were changed to Henry and Francis. Monks and nuns, at their entrance into monasteries, assume new names; see *Surnames*. Miss Yonge's "History of Christian Names," published 1863. M. A. Lower's "Patronymica Britannica," 1860.

Namur, in Belgium, was made a county in 932: taken by the French, 1 July, 1692; by William of England, 4 Aug. 1695; ceded to the house of Austria by the peace of Utrecht, and garrisoned by the Dutch as a barrier town of the United Provinces in 1715. The city of Namur was ceded to Austria, 1713; taken by the French in 1746, but was restored in 1749. In 1782, the emperor Joseph expelled the Dutch garrison. In 1792 it was again taken by the French, who were compelled to evacuate it in 1793; regained 1794; delivered up to the allies, 1814; assigned to Belgium, 1831. It was the site of a severe conflict in June, 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo.

Nancy (N.E. France), an ancient city, capital of Lorraine in the thirteenth century. After taking Nancy, 29 Nov. 1475, and losing it, 5 Oct. 1476, Charles the Bold of Burgundy was defeated beneath its walls, and slain by the duke of Lorraine and the Swiss, 5 Jan. 1477; see *Lorraine*. Nancy was embellished by Stanislas, ex-king of Poland, who resided and died here Feb. 1766. It was captured by Blucher, Jan. 1814; and on the retreat of MacMahon's army, and expecting the German army, surrendered to four Uhlans, 12 Aug. 1870. It was restored at the peace.

Nankin, said to have been made the central capital of China, 420. It was the court of the Ming dynasty from 1369 till Yung-lo removed it to Peking in 1410. On 4 Aug. 1842, the British ships arrived at Nankin, and peace was made. The rebel Tac-pings took it on 19, 20 March, 1853. It was recaptured by the imperialists, 19 July, 1864, and found to be in a very desolate condition.

Nantes (W. France), formerly capital of the Namnetes. The edict in favor of the Protestants issued here by Henry IV., 13 April, 1598, was revoked by Louis XIV., 22 Oct. 1685. Awful cruelties were committed here by the republican Carrier, Oct.-Nov. 1793; see *Drowning*.

Naphtha, a clear, combustible rock oil, known to the Greeks, called "oil of Media," and thought to have been an ingredient in the Greek fire (*which see*).

Napier's Bones, see *Logarithms*.

Naples, formerly the continental division and seat of government of the kingdom of the Two Sicilies, began with a Greek colony named Parthenope (about 1000 B.C.), which was afterwards divided into Palæopolis (the *old*) and Neapolis (the *new city*); from the latter the present name is derived. The colony was conquered by the Romans in the Samnite war, 326 B.C. Naples, after resisting the power of the Lombards, Franks, and Germans, was subjugated by the Normans under Roger Guiscard, king of Sicily, A.D. 1131. Few countries have had so many political changes and cruel and despotic rulers, or suffered so much by convulsions of nature, such as earthquakes, volcanic eruptions, etc. In 1856, the population of the kingdom of Naples was 6,886,030, of Sicily, 2,231,020; total, 9,117,050. It now forms part of the revived kingdom of Italy.

Napoleon Memorial. Subscriptions from the royal family and the three services for a statue of prince Louis Napoleon (killed in Zululand, 1 June, 1879) were closed about 15 July, 1879. The statue was placed in St. George's chapel, Windsor, May, 1881; placing it in Westminster Abbey having been much opposed.

Narbonne (S.E. France), the Roman Narbo Martius, founded 118 B.C., made capital of a Visigothic kingdom, 462; captured by the Saracens, 720; retaken by Pepin le Bref, 759. Gaston de Foix, the last vicomte (killed at Ravenna, 11 April, 1512), resigned it to the king in exchange for the duchy of Nemours. Many councils held here, 589-1374.

Narceine and Narcotine, alkaloids obtained from *Opium* (*which see*). Narceine was discovered by Pelletier in 1832; and narcotine by Derosne in 1803.

Narva (Esthonia, Russia). Here Peter the Great of Russia was totally defeated by Charles XII. of Sweden, then in his nineteenth year, 30 Nov. 1700. The army of Peter is said to have amounted to 60,000, some Swedes affirm 100,000 men, while the Swedes were about 20,000. Charles attacked the enemy in his intrenchments, and slew 18,000; 30,000 surrendered. He had several horses shot under him. He said, "These people seem disposed to give me exercise." Narva was taken by Peter in 1704.

Naseby (Northamptonshire), the site of a decisive victory over Charles I. by the parliament army under Fairfax and Cromwell. The main body of the royal army was commanded by lord Astley; prince Rupert led the right wing, sir Marmaduke Langdale the left, and the king himself headed the body of reserve. The king fled, losing his caannon, baggage, and nearly 5000 prisoners, 14 June, 1645.

Nashville (Tennessee, U. S.) was occupied by the confederates in 1861, and taken by the federals, 23 Feb. 1862. Near here the confederates under Hood were defeated by the federals under Thomas, 14-16 Dec. 1864.

Nassau, a German duchy, made a county by the emperor Frederic I. about 1180, for Wolfram, a descendant of Conrad I. of Germany; from whom are descended the royal house of Orange now reigning in Holland (see *Orange and Holland*), and the present duke of Nassau. Wiesbaden was made the capital in 1839. On 25 April, 1860, the Nassau chamber strongly opposed the conclusion of a concordat with the pope, and claimed liberty of faith and conscience. The duke adopted the Austrian motion at the German diet, 14 June, and after the

war the duchy was annexed to Prussia by decree, 20 Sept., and possession taken 8 Oct. 1866. Population of the duchy in 1865, 468,311.

1788. Count Frederick William made DUKE in 1806.

1814. William George, 30 Aug.

1839. Adolphus William Charles, born 24 July, 1817.

National Assembly, FRENCH. Upon the proposition of the abbé Siéyès, the states-general of France constituted themselves the National Assembly, 17 June, 1789. On the 20th the hall of this new assembly was shut by order of the king; upon which the deputies of the *tiers état* repaired to the *Jeu de Paume*, or Tennis-court, and swore not to dissolve until they had digested a constitution for France. On the 22d they met at the church at St. Louis. This assembly abolished the state religion, annulled monastic vows, divided France into departments, sold the national domains, established a national bank, issued assignats, and dissolved itself 21 Sept. 1792; see *National Convention*. In 1848 the legislature was again termed the National Assembly. It met 4 May, and a new constitution was proclaimed, 12 Nov. A new constitution was once more proclaimed by Louis

Napoleon in Jan. 1852, after dissolving the National Assembly, 2 Dec. 1851. The present French National Assembly was elected 8 Feb., and met 13 Feb. 1871; see *France*.

National Assembly, GERMAN, see *Germany*, 1848.

National Associations. One was formed in 1584, headed by the earl of Leicester, to protect queen Elizabeth from assassination, in consequence of the discovery of various plots. Another for the defence of William III. against assassins was established in 1696, of which all persons holding office under government were required to be members; see *Aid to Sick and Wounded, Artillery, Colonies, Employers, Farmers, Social Science, and Volunteers* for other national associations.

National Benevolent Institution, established 1812, incorporated 1859. Pensions are granted to decayed gentry, and to professional people, teachers, and others in reduced circumstances.

National Convention of France, constituted in the hall of the Tuileries 17 Sept. and formally opened 21 Sept. 1792, when M. Grégoire, at the head of the National Assembly, announced that that assembly had ceased its functions. It was then decreed "That the citizens named by the French people to form the National Convention, being met to the number of 371, after having verified their powers, declare that the National Convention is constituted." This convention continued until a new constitution was organized, and the Executive Directory was installed at the Little Luxembourg, 1 Nov. 1795; see *Directory*. The Chartists (*which* see) in England formed a National Convention in 1839.

National Debt. The first mention of parliamentary security for a debt of the nation occurs in the reign of Henry VI. The present national debt may be said to have commenced in the reign of William III., 1689. It amounted, in 1697, to about five millions sterling, and was then thought to be of alarming magnitude. The sole cause of the increase has been *war*. By an act passed 31 May, 1867, the conversion of 24,000,000*l.* of the debt into terminable annuities was provided for. The law is consolidated by the National Debt act, passed 9 Aug. 1870; amended by act passed 2 Aug. 1875; see *Sinking Fund*.

The following statement of the various refunding operations of the national treasury is compiled from the article "Re-

funding the National Debt" in "Appletons' Annual Cyclopaedia" for 1879.

The house of representatives passed a resolution, 21 Sept. 1790, directing the secretary of the treasury to prepare a plan for supporting the public credit. In response, the secretary (Hamilton) submitted his first report 9 Jan. 1791.

The first refunding act drawn in accordance with Hamilton's suggestions, was approved 4 Aug. 1790. Under this act the state debt and the foreign and domestic debt of the nation, were consolidated and refunded in three classes of bonds. The proceeds of the loans authorized being insufficient to refund the whole debt a new loan was authorized by act of congress approved 3 March, 1795.

The next refunding operation was undertaken in 1807. An act for the conversion of the various outstanding stocks into a new 6 per cent stock was approved 13 Feb. 1807. The holders of the old bonds did not respond to the offer made them except in part and the scheme partially failed.

The next refunding operation occurred in 1812. An act for the conversion of the old 6 per cent and deferred stocks into a new 6 per cent stock was approved 6 July, 1812. About \$1,000,000 was converted under this act.

The next effort was made in 1822, when an act was approved, 20 April authorizing the issue of a 6 per cent stock in exchange for the outstanding 6 and 7 per cent stocks. This attempt failed almost entirely.

The next effort was made in 1824 under an act approved 21 May authorizing a 4½ per cent bond. This was only in part successful and a new attempt was made the next year under an act approved 3 March 1826. This scheme also failed chiefly because the rate of interest offered (4½ per cent) was too low.

No further attempts were made at that time to refund the debt, but it matured and was paid during the next ten years the whole being practically extinguished in 1836.

A new debt grew up in the years following and in 1861 it amounted to \$60,000,000. During the civil war this debt was swollen enormously until, on 31 Aug. 1865, the interest bearing portion amounted to \$2,361,530,204.00. This debt was represented by bonds, as follows:

Four per cents	\$618,127.00
Five per cents	60,115,727.00
Six per cents	1,361,730,420.25
Seven and three tenths per cents	100,000,000.00

Some of these bonds were paid, and others converted into the five twenty consols of 1862, 1867, and 1868, bearing 6 per cent interest. Refunding at lower rates of interest was clearly impossible until the credit of the government should be established more firmly than it was then, when the 6 per cent bonds were sold in the market below par.

The needed improvement of credit may be said to have been begun by the passage of the act of 18 March, 1869, pledging the faith of the government for the payment of the debt in coin.

The first post bellum refunding act was approved 14 July, 1870, and a further amendatory act was approved 20 Jan. 1871. The last classes of our 6 per cent bonds were still held at a considerable discount in 1870, but the improvement was so rapid that the secretary of the treasury (Boutwell) gave notice on 24 Feb. 1871 of his purpose to issue subscriptions for a new 5 per cent loan under the refunding act. The loans were opened on 6 March and by 1 Aug. the subscriptions received amounted to \$65,775,550. Early in that month the second air arrangement was made under which an association of bankers took the remainder of the \$30,000,000, and offered, and the whole transaction was completed before 1 April 1872.

Further sales of 5 per cent bonds were made under new offers, until the whole amount authorized by the act, viz., \$95,000,000, had been sold and a like amount of 6 per cent bonds retired.

On 25 Aug. 1875 the secretary of the treasury (Morrill) entered into a contract with bankers for the sale of \$300,000,000 of 4½ per cent bonds for refunding purposes. Of this sum there was sold before 4 March 1877 about \$90,000,000 and the amount of 4 per cent bonds was retired. On 6 April, secretary Sherman who had succeeded to the treasury, announced his intention to withdraw the 4½ per cent loan from the market as soon as \$300,000,000 should be sold, and before 1 July 1877 the amount had been taken. Of the proceeds \$15,000,000 was applied to the redemption of specie payments, the remainder to the retirement of old bonds.

On 9 June 1877 the first contract for the sale of 4 per cent bonds was made. For 30 days the loan was kept open to the public under agreement with the bankers contracting for it, and during that time \$75,496,500 was taken of which \$25,000,000 were applied to redemption purposes. At the end of the calendar year 1878 there had been sold for refunding \$17,000,000 of 4 per cent bonds.

The fear that refunding operations would cause an outflow of gold to Europe in payment of called bonds led the secretary to make a contract 21 Jan. 1879 by which \$5,000,000 of the 4 per cents was to be taken to England each month.

An act of congress approved 25 Jan. 1879 authorized the exchange of 4 per cent consols of 1867 for equal amounts of 6 per cent five twenty bonds, upon terms favorable to the holders. Refunding certificates of the denomination of \$10 designed to popularize the loan were authorized by act of congress, approved 26 Feb. 1879.

On 4 April, 1879, subscriptions to the 4 per cent loan were received, amounting to more than \$122,000,000. About half of these subscriptions were rejected, and the balance covered.

On 16 April, 1879 \$150,000,000 of the 4 per cent, and \$45,000,000 of refunding certificates were offered, the bonds at a premium of one half of 1 per cent and 4 per cent were also offered in exchange for ten for ten. Within two days the subscriptions exceeded the offering by nearly \$35,000,000. A subscription for \$40,000,000 of the certificates was also declined, in order that the loans might be distributed widely among the people. For that purpose restrictions were placed upon the sale of the certificates, which was completed in June 1879.

This finished the work of refunding all the interest bearing obligations of the government which were then subject to redemption. It was accomplished without loss to the government or the least disturbance of the business of the country. The result has been to make an annual saving of \$19,000,046.50 in interest.

National Dramatic Academy was proposed by prof. H. Morley and others in 1876.

National Gallery, London, began with the purchase, by the British government, of the Angerstein collection of 38 pictures, for 57,000*l.*, in 1824. The first exhibition of them took place in Pall Mall on 10 May, 1824. Sir G. Beaumont (1826), Mr. Hulwell Carr (1831), and many other gentlemen, as well as the British Institution, contributed many fine pictures; and the collection has been since greatly augmented by gifts and purchases. The present edifice in Trafalgar square, designed by Mr. Wilkins, was completed and opened 9 April, 1838.

In July, 1857, a commission appointed to consider the propriety of removing the pictures reported in favor of their remaining in their present locality; and in 1860, 15,000*l.* were voted to be expended in adapting the central part of the building to exhibition purposes. On 11 May, 1861, the National Gallery was reopened after having been closed 8 months, during which time great improvements were made in the internal arrangements.

On 19 June, 1865, the house of commons voted 20,000*l.* to buy land to enlarge the building, and an act for this purpose was passed 15 July, 1866. Visitors in 1866, 775,901; in 1871, 911,650, sum voted for year 1867-8, 15,000*l.*; for 1876, 20,000*l.* Legacy from Francis William Clarke, about 24,000*l.*, fell in 1880; 1880, pictures 1040.

A parliamentary return gives a list of pictures presented to or purchased for the National Gallery—204 presented, 250 bequeathed and 313 purchased. The cost of the 313 pictures which has been spread over 45 years, has been 244,877*l.* Up to 1871 337,194*l.* had been expended. The Post collection (70 pictures), bought for 75,000*l.*, spring, 1871. The "Congress of Vienne," a masterpiece of Verelst, (valued at 72,000*l.* in 1860), presented by Sir Richard Wallcut, Oct. 1871.

Mr Wynn Ellis (a silk merchant, born July, 1798, died 27 Nov. 1875) bequeathed about 400 pictures to the National Gallery on certain conditions. Proposed, new galleries erected by K. Barry, pictures rearranged, Aug. 1876.

National Guard of France was instituted by the Committee of Safety at Paris on 13 July, 1789 (the day before the destruction of the Bastille), to maintain order and defend the public liberty. Its first colors were blue and red, to which white was added, when its formation was approved by the king. Its action was soon paralyzed by the revolution, and it ceased altogether under the consulate and empire. It was revived by Napoleon in 1814, and maintained by Louis XVIII., but was broken up by Charles X., after a tumultuous review in 1827. It was revived in 1830, and helped to place Louis Philippe on the throne. In 1848 its reconstitution and its enlargement from 80,000 to 100,000 men led to the frightful conflict of June, 1848. Its constitution was entirely changed in Jan. 1852, when it was subjected entirely to the control of the government. Formerly it had many privileges, such as choosing their own officers, etc. In consequence of the defection of part of the National Guard and the incompetency of the rest during the outbreak in Paris in 1871, its gradual abolition was decreed by the national assembly at Versailles (468-184), 24 Aug. 1871. The peaceful disarmament began in September. National Guards have been established

in Spain, Naples, and other countries during the present century.

National Health Society, founded in 1873 for the collection and diffusion of sanitary knowledge, by lectures and otherwise.

National Opera-house, N. Thames Embankment; Mr. Mapleson, proprietor; Mr. F. H. Fowler, architect; Mr. Wm. Webster, contractor. First brick laid by Mlle. Tietjens, 7 Sept.; first stone laid by the duke of Edinburgh, 16 Dec. 1875. Failure of the scheme reported, Nov. 1877. Scheme that the works to be resumed Nov. 1878; agreed to Jan. 1880.

National Portrait Exhibitions proposed by the earl of Derby, earl Granville, and others, at a meeting in London, 13 July, 1865. They were held in what had been the refreshment-room of the exhibition of 1862 at South Kensington. The first was opened 16 April; closed 18 Aug. 1866; second, opened 3 May; closed 31 Aug. 1867; third, opened 13 April; closed 22 Aug. 1868.

National Portrait Gallery was determined on in Feb. 1857, in pursuance of votes from both houses of parliament. The sum of 2000*l.* was appropriated for the purchase of portraits of persons eminent in British history. Donations are received under certain restrictions. The gallery, Gt. George street, Westminster, was opened 15 Jan. 1859. The collection was removed to South Kensington, Dec. 1869, and reopened 28 March, 1870. A valuable collection of national portraits appeared at the Manchester Exhibition in 1857.

National Schools, see *Education and Music*, 1873.

National Society for Promoting the Education of the Poor in the Principles of the Established Church of England, founded 1811; incorporated 1817. About 13,000 schools and a million scholars are connected with it. Office: Sanctuary, Westminster. Training colleges: St. Mark's, Chelsea, Whitelands, and Battersea.

National Testimonials (subscribed for) were presented to Rowland Hill (for his exertions in obtaining the penny postage), 17 June, 1846; and to Miss Florence Nightingale (for her beneficent exertions for the sufferers during the Crimean war), 29 Nov. 1855.

National Thrift Society, formed at Oxford in 1878. Meetings have been held at the Mansion-house, London, 1880 et seq.

National Trade Society, formed in June, 1871, to watch over and secure the interests of traders, and promote amendments in the law affecting commercial interests. President, W. H. Smith, M.P. Civil-service trading, the income-tax, and international exhibitions have been considered by the committee.

National Training School for Music, South Kensington, founded by the duke of Edinburgh, 18 Dec. 1873; opened by him, 17 May, 1876.

National Union was formed in 1869 to combine a number of associations supporting the Conservative party. Lecturers were employed and pamphlets circulated. The party was termed Nationalists in Aug. 1871. It included the dissatisfied of various parties.

Nationality, a word much used since 1848. In Poland, Hungary, Italy, and Germany, the struggle for nationality has been long and severe. In 1866, agitation for this principle began in Bohemia, Slavonia, and other parts of the Austrian empire. The nationality of Ireland is the alleged basis of the Fenian agitation; see *Ireland*, 1870, and *Home Government*.

Nativity. There are three festivals in the Roman and Greek churches, under this name. The Nativity of Christ, also observed by the Protestants on 25 Dec. (see *Christmas*); the Nativity of the Virgin Mary, not

observed by the Protestants at all. Pope Sergius I., about 690, established the latter, but it was not generally received in France and Germany till about 1000; nor by the Eastern Christians till the twelfth century. The festival of the nativity of St. John the Baptist, 24 June, Midsummer-day, is said to have been instituted in 488.

Natural History was studied by Solomon, 1014 B.C. (1 Kings iv. 33); Aristotle (384–322 B.C.); by Theophrastus (394–297 B.C.); and by Pliny (23–79 A.D.); see *Botany*, *Zoology*, etc.

Naturalism, a realistic style in literature, mainly introduced by Balzac, 1829 et seq.

Edmond and Jules de Goncourt published "Medical and Physiological Novels," 1846 et seq. Emile Zola, in his "Rougon-Macquart" series, 1871 et seq., portrayed deformed and diseased rather than true nature. A dramatized form of his "Assommoir," entitled "Drink," was much performed in London in 1879.

Naturalization is defined to be "the making a foreigner or alien a denizen or freeman of any kingdom or city, and so becoming, as it were, both a subject and a native of a king or country that by nature he did not belong to." The first act of naturalization passed in 1437; and various similar enactments were made in most of the reigns from that time; several of them special acts relating to individuals. An act for the naturalization of the Jews passed May, 1753; but was repealed in 1754, on the petition of all the cities in England; see *Jews*, for the privileges since granted them. The act for the naturalization of prince Albert passed, 3 Vict., 7 Feb. 1840. A committee to inquire into the naturalization laws, appointed May, 1868, earl of Clarendon chairman, met 25 Oct. 1868; reported about Feb. 1869; and new acts for this purpose were passed 12 May, 1870, and 25 July, 1872. In 1870 there were about 9500 Americans in England, and about 2,500,000 British subjects in the United States of America. By the new act the latter were enabled to renounce their allegiance; and by the convention signed 3 Feb. 1871, the nationality of British subjects was made dependent on choice and not on birth.

Nature, a weekly illustrated journal of science, first appeared 4 Nov. 1869; editor, Mr. Joseph Norman Lockyer, F.R.S.

Nature-printing. This process consists in impressing objects, such as plants, mosses, feathers, etc., into plates of metal, causing these objects, as it were, to engrave themselves; and afterwards taking casts or copies fit for printing from. Kniphoff of Erfurt, between 1728 and 1757, produced his *Herbarium vivum* by pressing the plants themselves (previously inked) on paper; the impressions being afterwards colored by hand. In 1833, Peter Kyhl, of Copenhagen, made use of steel rollers and lead plates. In 1842 Mr. Taylor printed lace. In 1847 Mr. Twining printed ferns, grasses, and plants; and in the same year Dr. Branson suggested the application of electrotyping to the impressions. In 1849, professor Leydolt of Vienna, by the able assistance of Mr. Andrew Worring, obtained impressions of agates and fossils. The first practical application of this process is in Von Heufler's work on the mosses of Arpach, in Transylvania; the second (the first in this country) in "The Ferns of Great Britain and Ireland," edited by Dr. Lindley, the

illustrations to which were prepared under the superintendence of Mr. Henry Bradbury in 1855-6, who also, in 1859-60, printed "The British Seaweeds," edited by W. G. Johnstone and Alex. Croall. The process was applied to butterflies by Joseph Merrin, of Gloucester, in 1864.

Naval Battles of the United States. The navy, during the Revolution, was of little account. The principal exploits were performed by privateers. In Dec. 1775, a navy was established by Congress, and offi-

cers appointed. Esck Hopkins was made commander-in-chief, and in the spring of 1776 went southward with a small squadron.

Hopkins captured several British vessels, March and April, 1776

Navarino (S.W. Greece), settled by the Arabs, sixth century; taken by the Turks, 1500; by Venetians, 1686; by Turks, 1714; by Greeks, 1821; by Turks, 1825. Near here, on 20 Oct. 1827, the combined fleets of England, France, and Russia, under command of admiral Codrington, nearly destroyed the Turkish and Egyptian fleet. More than thirty ships, many of them four-deckers, were blown up or burned, chiefly by the Turks themselves, to prevent their falling into the hands of their enemies. This destruction of the Turkish naval power was characterized by the duke of Wellington as an "untoward event."

Navarre, now a province of Spain, formed a part of the Roman dominions, and was conquered from the Saracens by Charlemagne, 778. His descendants appointed

governors, one of whom, Garcia Jimenez, took the title of king in 857. In 1076, king Sancho IV. was poisoned, and Sancho Ramores of Aragon seized Navarre. In 1134, Navarre became again independent under Garcia Ramores IV. In 1234, Thibault, count of Champagne, nephew of Sancho VII., became sovereign of Navarre; and in 1284, by the marriage of the heiress Jane with Philip IV. le Bel, Navarre was united to France.

Navigation began with the Egyptians and Phœnicians. The first laws of navigation originated with the Rhodians, 916 B.C. The first account we have of any considerable voyage is that of the Phœnicians sailing round Africa, 604 B.C.—*Blair*.

Navigation Laws. A code of maritime laws is attributed to Richard I. of England, said to have been decreed at the Isle of Oleron, 1194 (see *Oleron*), and further enactments were made by Richard II. in 1381. In Oct. 1551, the parliament passed an act entitled "Goods from foreign parts, by whom to be imported," the principles of which were affirmed by 12 Charles II. c. 18, "An act for the encouraging and increasing of shipping and navigation" (1680). The latter act restricts the importation and exportation of goods from or to Asia, Africa, or America, to English ships, of which the masters and three-fourths of the mariners are to be English. This was followed by many acts of similar tenor; which were consolidated by 3 & 4 Will. IV. c. 64 (1833). These acts were in the whole or in part repealed by the act "to amend the laws in force for the encouragement of British shipping and navigation" (passed 12 & 13 Vict. c. 29, 26 June, 1849, after much opposition), and which came into operation 1 Jan. 1850. The Steam Navigation act, passed 14 & 15 Vict. c. 79, 1851, came into operation 1 Jan. 1852. The act regulating the navigation of the river Thames was passed in 1786.—In Feb. 1865, the emperor recommended the modification of the French navigation laws; in Feb. 1872, new restrictions were laid upon foreign ships, chiefly affecting British.—Navigation laws were passed by the United States Congress, 1793-8, which are still in force. Since the introduction of iron steamships, American shipping

has greatly decreased, and earnest efforts have been made, ineffectually, to secure the modification of the navigation laws, in order to promote American ship-owning.

Navigators (or Navvies). These helpers in the construction of railways probably derived their name (about 1830) from formerly making the inland navigation in Lincolnshire, etc., and are doubtfully said to be descendants of the original Dutch canal laborers. Navy Mission Society (new) met at Lambeth Palace, 7 May, 1880. A "steam navy," suitable for working in sand, gravel, or heavy clay, made by Messrs. Ruston, Proctor, & Co., of Lincoln, 1878.

(14 sailing-vessels and 37 steamers) and 398 other vessels, in all 449; including vessels building, converting, or ordered to be built. The new French iron-clad frigate *Gloire*, constructed by M. Dupuy de Lôme, launched in 1860, was generally considered as successful. The *Solférino* and *Magenta* were launched in June, 1861; other iron vessels since. The *Magenta* was destroyed by fire, 6 killed, 31 Aug. 1875. The *Dévastation*, a great iron-clad, launched at L'Orient, 19 Aug. 1879.

Navy of the United States. Since the civil war the navy of the United States has been reduced to very small proportions. It consisted, Dec. 1, 1879, of 45 vessels in commission and 16 undergoing repairs. The active list included 2043 officers of all grades and 7500 enlisted men.

Nazarene, a name given to Jesus Christ, and his disciples; but afterwards to a sect who rejected the doctrine of Christ's divinity in the first century. A sect named Nazarenes, resembling the Society of Friends in Britain, became prominent in Hungary in the autumn of 1867.

Neapolis, see *Naples*.

Nebraska, a N.W. state of the United States, was organized as a territory 30 May, 1854; admitted to the Union 1 March, 1867. Population, 1880, 452,433. Capital, Omaha city.

Nebular Hypothesis, put forth by sir William Herschel, 1811, supposes that the universe was formed out of shapeless masses of nebulae, or clusters of small stars. It has not been generally received. In Oct. 1860, Mr. Lassell strictly scrutinized the Dumb-bell nebula, and stated that the brightest parts did not appear to be stars. In 1865, Mr. William Huggins reported that he had analyzed certain nebulae by their spectra, and believed them to be entirely gaseous.

Necromancers, see *Magie*.

Nectarine, the *Amygdalus Persica*, originally came from Persia about 1562. Previously presents of nectarines were frequently sent to the court of England from the Netherlands; and Catherine, queen of Henry VIII., distributed them among her friends.

Needle-gun (*Zündnadelgewehr*), a musket invented by J. N. Dreyse, of Sömmerda, about 1827, and made a breech-loader in 1836, which was adopted by the Prussian general Manteuffel about 1846. It was found to be a most effective weapon in the war with Denmark in 1864, and in that with Austria in 1866. The ignition of the charge is produced by a fine steel rod or needle being pressed through the cartridge. The principle is claimed for James Whitley, of Dublin, 1823; Abraham Mosar, 1831; and John Hanson, of Huddersfield, 1843.

Needles. "The making of Spanish needles was first taught in England by Elias Crowse, a German, about the eighth year of queen Elizabeth, and in queen Mary's time there was a negro made fine Spanish needles in Cheapside, but would never teach his art to any." — *Stour*. The manufacture was greatly improved at Whitechapel, London; Redditch, in Gloucestershire; and Hathersage, in Derbyshire. An exhibition of ancient needle-work was formed at South Kensington Museum in 1873.

The Victory man-of-war arrived off Portsmouth with his remains 4 Dec. "

The body lay in state in the Painted Hall at Greenwich, 5 Jan.; removed to the Admiralty, 8 Jan.; funeral took place 9 Jan. 1806

The prince of Wales (afterwards George IV.), the duke of Clarence (afterwards William IV.), and other royal dukes, almost all the peers of England, and the lord mayor and corporation of London, with thousands of military and naval officers and distinguished men, followed the funeral-car to St. Paul's; the military amounted to near 10,000, independent of volunteers.

Nelson Column, Trafalgar square, London, completed, and statue placed on it (see *Statues*) 4 Nov. 1843

Nemean Games, celebrated at Nemea, in Achaia, said to have been instituted by the Argives in honor of Archemorus, who died by the bite of a serpent; and revived by Hercules, 1226 B.C. The conqueror was rewarded with a crown of olives, afterwards of green parsley. They were celebrated every third year, or, according to others, on the first and third year of every Olympiad, 1226 B.C. — *Hierodotus*. They were revived by the emperor Julian, A.D. 362, but ceased in 396.

Neo-Platonism, or **NEW-PLATONISM**, see *Philosophy*.

Nepaul (N. India) was conquered by the Ghoorikas, 1768, who made treaties with the British, 1791 and 1801; but frequently made incursions, and in consequence war with them commenced 1 Nov. 1814; terminated 27 April, 1815. A treaty of peace was signed between the parties 2 Dec. 1815. War was renewed through an infraction of the treaty by the Nepalese, Jan. 1816; and, after several contests, unfavorable to the Nepalese, the former treaty was ratified, 15 March, 1816. An extraordinary embassy from the king of Nepal to the queen of Great Britain arrived in England, landing at Southampton, 25 May, and remained till Aug. 1850; it consisted of the Nepalese prince, Jung Bahadur, and his suite, to whom many honors were paid. He supported the English during the Indian mutiny in 1857. The prince of Wales was honorably received in Nepal, 12 Feb. 1876.

Nephelia, sacrifices of sobriety among the Greeks, when they offered mead instead of wine to the sun and moon, to the nymphs, to Aurora, and to Venus; and burned any wood but that of the vine, fig-tree, and mulberry-tree, esteemed symbols of drunkenness (618 B.C.).

Nephoscope (Greek, νέφος, a cloud). An apparatus for measuring the velocity of clouds, invented by Karl Braun, and reported to the Academy of Sciences, Paris, 27 July, 1868.

Neptune, a primary planet, first observed on 23 Sept. 1846, by Dr. Galle at Berlin, in consequence of a letter from M. Le Verrier, who had conjectured, from the anomalous movements of Uranus, that a distant planet might exist nearly in the position where Neptune is situated. Calculations to the same effect had been previously made by Mr. J. Couch Adams, of Cambridge. A satellite of Neptune was discovered by Mr. Lassell on 10 Oct. following. Neptune is said to have been seen by Lalande, and thought to be a fixed star. The Greek god Poseidon became the Roman Neptune.

Neptunium, a new metal discovered in tannalite, from Connecticut, by R. Hermann in 1877; not yet admitted by chemists (1878).

Nervii, a warlike tribe in Belgic Gaul, were defeated in a severe battle by Julius Cæsar, 57, and subdued 58 B.C.

Nerwinden, see *Landen*.

Nesbit, see *Nisbet*.

Nestorians, the followers of Nestorius, bishop of Constantinople (428-431), who is represented as a heretic for maintaining that, though the Virgin Mary was the mother of Jesus Christ as man, yet she was not the mother of God, since no human creature could impart to another what she had not herself; he also held that God was united to Christ under one person, but remained as distinct in nature and essence as though he had never been united at all. He was opposed by Eutyches, and died 439; see *Eutychians*. Nestorian Christians in the Levant administer the sacrament with leavened bread and in both kinds, permit their priests to marry, and use neither confirmation nor auricular confession.—*Du Pin*. A Nestorian priest and deacon were in London in July, 1862.

Netley Hospital, near Southampton, for invalid soldiers. The foundation-stone was laid by the queen, 19 May, 1856.

Neuchâtel, a canton in Switzerland, formerly a lordship, afterwards a principality. The first known lord was Ulric de Fenis, about 1032, whose descendants ruled till 1373, after which, by marriages, it frequently changed governors. On the death of the duchesse de Nemours, the last of the Longuevilles, in 1707, there were many claimants, among them our William III. He and the allies, however, gave it to Frederick I. of Prussia, with the title of prince. In 1806 the principality was ceded to France, and Napoleon bestowed it on his general Berthier, who held it till 1814, when it fell to the disposal of the allies. They restored the king of Prussia with the title of prince, with certain rights and privileges; but constituted it a part of the Swiss confederation.

After an unsuccessful attempt in 1831, the inhabitants repudiated their allegiance to Prussia, and proclaimed Neuchâtel a free and independent member of the Swiss confederation. 1848

The king of Prussia protested against this; and a protocol was signed between England, France, and Austria recognizing his claims. 1852

Some of his adherents, headed by the count de Pourtales, broke out into insurrection against the republican authorities, who, however, quickly subdued and imprisoned them, with the intention of bringing them to trial. Sept. 1856

War threatened by the king of Prussia, and great enmity and determination manifested by the Swiss. On the intervention of the English and French governments, a treaty was signed by which the king of Prussia virtually renounced his claims, on receiving a pecuniary compensation, which he eventually gave up. He retains the title of prince of Neuchâtel, without any political rights. 11 June, 1857
The prisoners of Sept. 1856 were released without trial, 18 Jan. "

Neustria, or **WEST FRANCE**, a kingdom allotted to Clotaire by his father, Clovis, at his death, in 511. His descendant Charlemagne became sole king of France in 771. It was conquered by the Northmen, and hence named Normandy (*which see*).

Neutral Powers. By the treaty of Paris, signed by the representatives of Great Britain, France, Austria, Russia, Prussia, Turkey, and Sardinia, on 16 April, 1856, it was determined that privateering should be abolished; that neutrals might carry an enemy's goods not contraband of war; that neutral goods not contraband were free even under an enemy's flag; and that blockades to be binding must be effective. The president of the United States acceded to these provisions in 1861; see *International Law*.

Neutrality Laws. A commission, in a report issued in May, 1868, recommended changes. An act to make better provision for the preservation of neutrality was passed 9 Aug. 1870. John P. McDiarmid apprehended, for breach of neutrality laws, at Bow street, 28 Oct. 1870.

Nevada, a western state of the United States, organized as a territory 2 March, 1861; admitted to the

Union, 31 Oct. 1864. Capital, Carson City. Virginia City was nearly destroyed by fire, 26 Oct. 1875; several lives were lost; property about \$2,000,000; 10,000 persons rendered homeless. Population of Nevada in 1880, 62,265.

Neville's Cross, or **Durham**, BATTLE OF, between the Scots, under king David Bruce, and the English, it is said (probably incorrectly) under Philippa, consort of Edward III., and lord Percy, 12 or 17 Oct. 1346. More than 15,000 of the Scots were slain, and their king taken prisoner.

Nevis (W. Indies), an island discovered by Columbus, planted by the English in 1628; taken by the French, 14 Feb. 1782; restored to the English in 1783. The capital is Charleston.

Newark (Nottinghamshire). The church was erected by Henry IV. Here, in the midst of troubles, died king John, 19 Oct. 1216; here the royal army under prince Rupert repulsed the army of the parliament, besieging the town, 21 March, 1644; and here, 5 May, 1646, Charles I., after his defeat at Naseby, put himself into the hands of the Scotch army, who afterwards gave him up to his enemies. Newark was first incorporated by Edward VI., and afterwards by Charles II.

Newberne (N.C.), BATTLE OF, 14 Feb. 1862. National force under Burnside attacked and took the fortifications and town.

New Brunswick was taken from Nova Scotia, and received its name as a separate colony in 1785. It was united with Canada for legislative purposes by an act passed 29 March, 1867. Population of New Brunswick in 1865, 272,780; in 1871, 285,594. Lieut.-governor, Lemuel A. Wilmot, 1868; Samuel Leonard Tilley, 1874.

Great fire at St. John. 20-22 June, 1877; destruction of 12 churches, 25 public buildings; thousands houseless; about 20 killed, loss about 3,000,000. Subscriptions in Britain and United States.

Newbury (Berkshire). Near here were fought two desperate battles—(1.) 20 Sept. 1643; between the army of Charles I. and that of the parliament under Essex; it terminated somewhat favorably for the king. Among the slain was the amiable Lucius Cary, viscount Falkland, deeply regretted. (2.) A second battle of dubious result was fought between the royalists and the parliamentarians under Waller, 27 Oct. 1644.

A memorial to lord Falkland and his companions at Newbury was inaugurated by the earl of Carnarvon, 9 Sept. 1878.

New Caledonia (Pacific ocean), discovered by Cook on 4 Sept. 1774, was seized by the French, 20 Sept. 1853, and colonized. The French government, in Dec. 1864, redressed the outrages committed upon the British missionaries at a station established here in 1854.

In the latter part of June, 1878, some of the native tribes revolted, burned some of the towns and villages, and killed about 90 of the European colonists, men, women, children, and servants, including col. Gally-Passeboe, the military commandant of the island. The insurrection was not subdued till the end of the year.

Newcastle-upon-Tyne (Northumberland), the Roman Pons Ælia, the first coal port in the world,* and the commercial metropolis of the north of England. The coal-mines were discovered here about 1234. The first charter granted to the townsmen for digging coal was by Henry III. in 1239.

* In 1306 the use of coal for fuel was prohibited in London, by royal proclamation, chiefly because it injured the sale of wood for fuel, great quantities of which were then growing about the city; but this interdiction did not long continue, and we may consider coal as having been dug and exported from this place for more than 600 years.

New England (North America). The first settle-
 ment, made in 1607, was named New England by capt. Smith, in 1614. A band of 102 immigrants, now termed

the "Pilgrim Fathers" (with 28 women), arrived here in the *Mayflower*, and founded the settlement at Plym-
 outh 11 Dec. (o.s.) 1620. This was the nucleus of
 Massachusetts, from whence were gradually developed
 New Hampshire, Vermont, Connecticut, and Rhode
 Island. In 1613 these settlements formed the first Amer-
 ican confederation, a defensive union, with a constitution
 based on the Mosaic law, governed by a religious aris-
 tocracy, which lasted till 1693. Maine was made an in-
 dependent state in 1820.

New Forest (Hampshire) was made ("afforested")
 by William the Conqueror, 1079-85. It is said that the
 whole country for thirty miles in compass was laid
 waste. William Rufus was killed in this forest by an
 arrow shot by Walter Tyrrel, that accidentally glanced
 against a tree, 2 Aug. 1100, the site of which is now
 pointed out by a triangular stone. The New Forest
 Deer Removal act was passed 14 & 15 Vict. c. 76, 7 Aug.
 1851. Agitation for the preservation of this forest,
 autumn, 1870; see *Forests*.

Newfoundland (North America), discovered by
 Sebastian Cabot, who called it *Prima Vista*, 24 June,
 1497. It was formally taken possession of by Sir Hum-
 phrey Gilbert, 1583. In the reign of Elizabeth, other
 nations had the advantage of the English in the fishery.
 In 1577 there were 100 fishing-vessels from Spain, 50
 from Portugal, 150 from France, and only 15 (but of larg-
 er size) from England.—*Hakluyt*. But the English fish-
 ery in some years afterwards (1625) had increased so
 much that the ports of Devonshire alone employed 150
 ships, which sold their fish in Spain, Portugal, and Italy.
 The sovereignty of England was recognized in 1713.
 Newfoundland obtained the privilege of a colonial legis-
 lature in 1832; and the bishopric was established in
 1839; population in 1874, 161,389. Appalling fire at St.
 Johns, a great portion of the town destroyed, the loss
 estimated at 1,000,000*l.* sterling, 9 June, 1846. On 14
 Jan. 1857, a convention was concluded between the Eng-
 lish and French governments, confirming certain French
 privileges of fishery in exchange for others. The Eng-
 lish colonists were dissatisfied with this convention.
 Newfoundland consented to union with the dominion of
 Canada, March, 1869; a railway from St. Johns to St.
 George's bay proposed by the colonial government Aug.
 1878. Governor, col. sir Stephen J. Hill, 1870; sir John
 H. Glover, Jan. 1876; see *Canada*, Nov. 1877.

Fishery Dispute. At Fortune bay, U.S., fishers fixed nets
 on Sunday, 13 Jan. 1878; this being contrary to local
 regulations, they were forcibly removed; controversy
 ensued. Mr. Everts, on part of U.S. government, sent
 despatch, 24 Aug.; correspondence, Sept., Oct.; the
 marquis of Salisbury refused compensation; but earl
 Granville granted it; 15,000*l.* were awarded by arbitra-
 tion..... 28 May, 1881

Newgate, LONDON. The prison derives its name
 from the gate which once formed part of it, and stood a
 little beyond the Sessions-house in the Old Bailey. It
 was used as a prison for persons of rank as early as 1218;
 but was rebuilt about two centuries afterwards by the
 executors of sir Richard Whittington, whose statue with
 a cat stood in the niche till the time of its demolition
 by the great fire of London, in 1666. It was then recon-
 structed; but, becoming an accumulation of misery and
 inconvenience, was pulled down and rebuilt between 1778
 and 1780. During the riots in 1780, the interior was
 destroyed by fire, but shortly afterwards restored. In
 1857 the interior was pulled down to be re-erected on
 a plan adapted to the reformatory system.—**Newgate**

New Guinea, or **PAPUA**, a large island, Pacific ocean, discovered by the Portuguese after their settlement of the Moluccas, between 1512 and 1580. It was visited by Saavedra, a Spaniard, in 1528. It is said to have been named New Guinea by Ortiz de Retea, a Portuguese, 1549. Torres Strait, which divides New Guinea and Australia, was discovered by Torres, a Spaniard, in 1606. It was frequently visited by the Dutch in the seventeenth century. They established a colony and erected a fortress, named Dubus, on the S.W. coast, in 1826, which was unsuccessful, and removed in 1835.

New Hebrides (S. Pacific ocean), discovered by Quiros, who, believing them to be a continent, named them *Tierra Austral del Espíritu Santo*, in 1606. Bougainville in 1768 found them to be islands; and in 1774 Cook gave them their present name.

New Holland, see *Australia, New South Wales*, etc.

New Ireland, an island in the Pacific ocean, lat. 2° 3' S., long. 152° E.; 200 miles long, 25 miles average width. An attempt of the French marquis de Rays to colonize this island was reported a disastrous failure in August, 1880, and May, 1881; see also *Ireland, New*.

New Jersey, one of the United States, was first settled at Bergen, by some Danish families from New York, in 1622, and by the Dutch on the Delaware, in 1623. In 1631, a colony of Swedes settled on the Delaware from Cape May to Burlington. The province was granted to the duke of York in 1664, and by him conveyed to lord Berkeley and sir George Carteret, who established a government there in 1665. With New York it was surrendered to the Dutch in 1673, and surrendered by them to the English in 1674. In 1676, the province was divided into East and West Jersey; Carteret taking the former, and William Penn and others the latter by purchase. They afterwards purchased East Jersey. After much difficulty, the province was surrendered to the crown in 1702, and continued a royal government until the Revolution. The independent state was organized in 1776, and in 1787 adopted the federal constitution. Population, 1880, 1,180,988. Capital, Trenton.

Newmarket (Cambridgeshire), renowned for its horse-races. It is first mentioned in 1227; and probably derived its name from the market then recently established. James I. erected a hunting-seat here, called the king's house, to which Charles I. was taken as a prisoner in 1647, when the parliament army was quartered in the neighboring village of Kennet. Charles II., who was fond of racing, built a stand-house for the sake of the diversion, about 1667,* and from that period races have been annual to the present time, and many extraordinary races have been run; see *Races*.

New Mexico (North America), ceded to the United States in 1848, and organized as a territory, 9 Sept. 1850. Capital, Santa Fé.

New Orleans, chief city of Louisiana, U. S. (*which see*), founded in 1717, under the regency of the duke of Orleans. In 1788, seven eighths of the city were destroyed by fire. The British attacked New Orleans in Dec. 1814, and were repulsed with great loss by the Americans under gen. Jackson, 8 Jan. 1815.—New Orleans was surrendered to the federals in April, 1862. The strong feeling of the inhabitants in favor of the confederates and against the federals induced gen. B. F. Butler to rule them with military rigor, May to Oct. 1862. He was replaced by gen. Banks, 16 Dec. 1862. Sanguinary riots, begun 30 July, 1866, only suppressed by martial law; about 40 persons, white and colored, were killed, and about 160 wounded; similar riots occurred 24 Oct. 1868, and often since.

CHARTIST RIOTS. About 10,000 chartists (*which see*), from the neighboring mines, armed with guns, pikes, etc., arrived at Newport, 4 Nov. 1839. They divided themselves into two bodies—one, under the command of Mr. John Frost, an ex-magistrate, proceeded down the principal street; while the other, headed by his son, took the direction of Stow Hill. They met in front of the Westgate hotel, where the magistrates were assembled with about 30 soldiers of the 45th regiment, and several special constables. The rioters broke the windows and fired on the inmates, by which the mayor, Mr. (afterwards sir Thomas) Phillips, and several other persons, were wounded. The soldiers returned the fire, and

* During the races, on 22 March, 1683, Newmarket was nearly destroyed by an accidental fire, which occasioned the hasty departure of the company then assembled, including the king, the queen, the duke of York, the royal attendants, and many of the nobility; and to this disaster historians have ascribed the failure of the Rye House Plot, the object of which was said to be the assassination of the king and his brother on the road from Newmarket to London, if the period of their journey had not been thus anticipated; see *Rye House Plot*.

dispersed the mob, which fled, leaving about 20 dead and others wounded. A detachment of the 10th royal hussars arrived from Bristol, and the town became tranquil. Frost was apprehended on the following day, together with his printer, and other influential persons among the chartists. He and others were tried and sentenced to death (afterwards commuted to transportation). Jan. 1840 An amnesty was granted them, 3 May, and they returned to England. . . . Sept. 1856 Frost died, aged 96. . . . 20 July, 1877

Newport (Rhode Island), a celebrated watering-place. Here the eminent bishop Berkeley, and also Smybert, the earliest professional portrait-painter in America, resided for a while. It is near the entrance of Narragansett bay, and was the scene of many stirring events during the American Revolution, being occupied alternately by the British, American, and French troops, the latter, under Rochambeau, having landed there in 1780. Newport is one of the capitals of Rhode Island.

New River, for the supply of London with water, was begun 1609, and finished in 1613, when the projector, Hugh Myddelton, a London goldsmith, was knighted by James I.—*Strype*. This artificial river, which rises in Hertfordshire,* and which, with its windings, was 48 miles long, was brought to London, and opened 29 Sept. 1613. No little was the benefit of it understood that for above 30 years the 72 shares into which it was divided netted only 5*l.* apiece. Each of these shares was sold originally for 100*l.* A part of a share sold at the rate of 94,050*l.* the share, 1 Nov. 1876; part of a king's share at rate of 90,000*l.*; of an adventurer's share at rate of 93,200*l.*, 15 May, 1878; king's share, rate 88,200*l.*; adventurer's, 91,000*l.*, Oct. 1878; king's share, rate 91,010*l.*; adventurer's, 91,500*l.*, Nov. 1880.

New Ross (Wexford), S.E. Ireland. Here gen. Johnston totally defeated the rebels under Beauchamp D. Bagenal Harvey, 4 June, 1798.

New Rugby, Tennessee, U. S., a colony of British farmers and others, founded on English principles by Mr. Thomas Hughes, formerly M.P., author of "Tom Brown's Schooldays," etc.; inaugurated 5 Oct. 1880.

Newry (N. Ireland). In the rebellion of 1611, Newry was reduced to a ruinous condition; it was surprised by sir Con. Magenis, but was retaken by lord Conway. After the Restoration the town was rebuilt. It was burned by the duke of Berwick when fleeing from Schomberg and the English army, and only the castle and a few houses escaped, 1689.

News-letters. News-writers in the reign of Charles II. collected from the coffee-houses information, which was printed weekly and sent into the country. The *London Gazette*, then the only authorized newspaper, contained little more than proclamations and advertisements.

New South Wales, the principal colony of Australia, on the eastern coast of New Holland, was explored and taken possession of and named by capt. Cook in 1770. At his recommendation a convict colony was first formed here. Capt. A. Phillip, the first governor, arrived at Botany Bay with 800 convicts, 20 Jan. 1788; but he subsequently preferred Sydney, about seven miles distant from the head of Port Jackson, as a more eligible situation for the capital. A new constitution was granted in 1855 (18 & 19 Vict. c. 54). The Intercolonial Exhibition was opened at Sydney, by the governor-general, lord Belmore, 30 Aug. 1870. It consisted of two departments, agricultural and non-agricultural. A conference of delegates from the Australian colonies met at Sydney in Jan. 1873, to deliberate on a customs' union, postal and railway arrangements, etc. The ministry introduced a

Newspapers. The Roman *Acta Diurna* were issued, it is said, 691 B.C. In modern times, a *Gazette*, which derived its name from its price, a small coin, was published in Venice (about 1536). The *Gazette de France*, now existing, first appeared in April, 1631, edited by Renaudot, a physician. It was patronized by the king, Louis XIII., who wrote one article for it, and by Richelieu. The first real newspaper published in England† was established by sir Roger L'Estrange, in 1663; it was entitled the *Public Intelligencer*, and continued nearly 3 years, when it ceased, on the appearance of the *Gazette*. In the reign of James I., 1622, appeared the *London Weekly Courant*; and in the year 1643 (the period of the civil war) were printed a variety of publications, certainly in no respect entitled to the name of newspapers. The following are the titles of some of them:

England's Memorable Accidents.
The Kingdom's Intelligencer.
The Journal of Certain Passages in Parliament.
The Mercurius Aulicus.
The Scotch Intelligencer.
The Parliament's Scout.

In Scotland, same year, there were 110 newspapers, having 249,141 advertisements.
In Ireland, there were 102 newspapers, having 236,128 advertisements.

In that year the number of stamps issued was—in England, 65,741,271 at 1d., and 11,684,423 supplement stamps at 1d.; in Scotland, 7,643,045 stamps at 1d., and 241,264 at 1d.; in Ireland, 6,302,728 stamps at 1d., and 43,358 at 1d.
Reduction of newspaper duty from 4d. to 1d. took effect on 15 Sept. 1836.

The distinctive die came into use 1 Jan. 1837.

Duty on advertisements abolished, 1853.

By the act passed 15 June, 1855 (18 & 19 Vict. c. 27), the stamp on newspapers, as such, was totally abolished, and to be employed henceforth only for postal purposes. Many new papers were then started, which were but of short duration.

In 1857, 71 million newspapers passed through the post-office. In Jan. 1860, 1060 newspapers; in Jan. 1862, 1165 newspapers; and in Jan. 1868, 1404 newspapers were published in the United Kingdom.

On 1 Oct. 1861, when the paper duty came off, the *Times*, *Daily News*, and *Morning Post* reduced their price to 3d. each copy unstamped.

Newspapers, AMERICAN. On 24 April, 1704, appeared the first regular newspaper published in the United States, the *Boston News-Letter*; although in Sept. 1690, an adventurous printer had made a like attempt in the same town, the publication of which was suppressed by the authorities, and only one copy is now known to be in existence.

The increase of newspaper literature in the United States is marvellous enough. In 1830, with a population of 23½ millions, the number of newspapers published was 852 (50 of these being dailies), with a yearly issue of 68,117,796 copies; in 1840 the number of newspapers had increased to 1631, with a yearly issue of 195,838,673 copies, in 1850 the number of papers published was 2526, with an issue of 426,409,978 copies; in 1860 the number of newspapers published had risen to 4051, with an annual issue of 928,000,000 copies, being an increase of 118 per cent. for 1860 over the preceding decennial period. In 1870 there were 5871 newspapers, with a circulation of 20,842,475 copies. In 1880 there were published in the United States 980 daily, 8718 weekly, and 1075 other newspapers and periodicals. The circulation of daily newspapers was 3,637,424; that of weekly newspapers, 19,459,107 copies. The aggregate number of copies printed in 1880 was 2,077,659,675. There were 54,654 persons employed mechanically, and 16,489 editorially, in the making of newspapers; the wages paid amounted to \$28,571,386.

New Style. Pope Gregory XIII., in order to rectify the errors of the current calendar, published a new one, in which ten days were omitted—5 Oct. 1582 becoming 15 Oct. The new style was adopted in France, Italy, Spain, Denmark, Holland, Flanders, Portugal, in 1582; in Germany in 1584; in Switzerland in 1583 and 1584; in Hungary in 1587; and in Great Britain in 1751. In 1752 eleven days were left out of the calendar—3 Sept. being reckoned as 14 Sept. The difference between the old and new style up to 1699 was 10 days; after 1700, 11 days; after 1800, 12 days. In Russia, Greece, and throughout the East, the old style is still retained. The czar Alexander II. was born on 17 April, 1818, old style, 29 April, new style, see *Calendar*.

New Testament, see Bible.

Newtonian Philosophy, the doctrines respecting gravitation, etc., taught by sir Isaac Newton in his "Principia," published in 1687; see *Gravitation*. He was born 25 Dec. 1642, became master of the mint, 1699; president of the Royal Society, 1703, and died 20 March, 1727. A statue of him in marble by Roubillac was set up at Trinity College, Cambridge, 14 July, 1755; and one in bronze by Theed, at Grantham, 21 Sept. 1858, when lord Brougham delivered a discourse on the life and works of Newton. The latter statue cost 1600*l.*, a sum obtained by public subscription.

New Year's day, etc. The beginning of the Jewish year was changed and the Passover instituted 1491 B.C. A feast is said to have been instituted by Numa and dedicated to Janus (who presided over the new year) 1 Jan. 713 B.C.

On this day the Romans sacrificed to Janus a cake of new-sifted meal, with salt, incense, and wine; and all the mechanics began something of their art of trade; the men of letters did the same, as to books, poems, etc.; and the consuls, though chosen before, took the chair and entered upon their office this day. Nominus Marcellus refers the origin of **NEW YEAR'S GIFTS** among the Romans to Titus Tatius, king of the Sabines, who, having considered as a good omen a present of some branches cut in a wood consecrated to Strenia, the goddess of strength, which he received on the first day of the new year, authorized the custom afterwards, and gave these gifts the name of Strenæ. 747 B.C.

New York, the "Empire State" of the United States of North America, is said to have been discovered by Verrazano, a Florentine in the French service, about 1524; and rediscovered by Hudson, an Englishman in the Dutch service, in 1609, and settled by the Dutch in 1614; but the English under col. Nichols dispossessed them and the Swedes, 27 Aug. 1664. Population of the state, 1880, 5,083,810.

Ney's Execution. Ney, duke of Elchingen, prince of the Moskwa, and one of the most valiant of the marshals of France, was shot as a traitor, 7 Dec. 1815. On 7 Dec. 1853, his statue was erected on the spot where he fell.

After the abdication of Napoleon I., 5 April, 1814, Ney took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him; but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invader's way to Paris, March, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the slain, his clothes pierced with bullet holes, five horses having been shot under him; night and defeat obliged him to flee. Though included in the decree of 24 July, 1815, which guaranteed the safety of all Frenchmen, he was sought out, and on 5 Aug. taken at the castle of a friend at Urtillac, and brought to trial before the Chamber of Peers, 4 Dec. The 12th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favor in vain.

Nezib (Syria). Here Ibrahim and the Egyptians defeated the Turks, 24 June, 1839.

Niagara (North America). At the head of this river, on the western shore, is Fort Erie, which was taken by the English, 24 July, 1759. It was abandoned in the war with the United States, 25 May, 1813, but was retaken 19 Dec. following. A suspension-bridge of a single span of 820 feet over the Niagara, connecting the railways of Canada and New York, was opened in March, 1855. It is elevated 18 feet on the Canadian and 28 feet on the American side.

About 18 miles below Fort Erie are the remarkable falls. The river is here 710 yards wide; the half mile immediately above the cataracts is a rapid, in which the water falls 58 feet; it is then thrown, with astonishing grandeur, down a stupendous precipice of 150 feet perpendicular, in three distinct and collateral sheets; and, in a rapid that extends to the distance of nine miles below, falls nearly as much more. The river then flows in a deep channel till it enters lake Ontario at Fort Niagara.

The falls visited by the prince of Wales, Sept. 1890. Blondin crossed the falls on a tight rope, 17 Aug. 1859. Professor Tyndall visited the falls, Nov. 1872, and lectured on them at the Royal Institution, 4 April, 1873.

Niagara, Fort; taken from the French by the English, 1759; garrisoned by Americans, 1812; bombarded from Fort George, 21 Nov. 1812; surprised and captured by a British force, 19 Dec. 1813.

Nibelungenlied, or NIBELUNGEN-LIED, a popular German epic of the twelfth century, composed of various ancient mythical poems, termed sagas, which, according to the poet William Morris, should be to our race what Homer was to the Greeks.

The first critical edition, by K. Lachmann, appeared 1826 and 1846. The best translation in modern German, by Simrock, 1827; a useful edition, with translation and glossary, by L. Braunsfels, 1846; in English, by W. N. Lottson, 2d ed. 1874. Richard Wagner's musical dramas, "The Ring of the Nibelungen," are based on this poem. The persons include the great Northern gods and goddesses, the giants, the dwarfs, and the daughters of the Rhine (see under *Musi*).

Nicea, see Niv.

Nicaragua, a state in Central America (which see). The present constitution was established 19 Aug. 1858. At the commencement of 1855 it was greatly disturbed

by two political parties—that of the president, Chamorro, who held Granada, the capital, and that of the democratic chief, Castellón, who held Leon. The latter invited Walker, the filibuster, to his assistance, who in a short time became sole dictator of the state.* By the united efforts of the confederated states the filibusters were all expelled in May, 1857. On 1 May, 1858, Nicaragua and Costa Rica appealed to the great European powers for protection. Nicaragua railway, a transit route between the Pacific and Atlantic, proposed, and company formed Nov. 1866. President T. Martinez elected 1859 and 1863; Fernando Guzman elected 1 March, 1867; Vicente Quadra elected 1 Feb. 1871; Pedro Joaquin Chamorro, 1 Feb. 1875; Joaquin Zavala, 1 March, 1879. Population estimated at 300,000.

Louis Napoleon, afterwards emperor, proposed the making a ship canal by the lake Nicaragua from the Atlantic to the Pacific, between 1842 and 1844; the government of Nicaragua proposed it in 1846; col. Childs made a survey in 1851; a company was chartered for 85 years, and conventions were signed, but the capitalists declined their support. The scheme was revived in Feb. 1875 (see *Panama and Loano*).

Nice, or NICA, a town in Bithynia, Asia Minor, N.W. Antigonus gave it the name Antigoneia, which Lysimachus changed to Nicæa, the name of his wife. It became the residence of the kings of Bithynia about 208 B.C. At the battle of Nice, A.D. 194, the emperor Severus defeated his rival, Pescennius Niger, who was again defeated at Issus, and soon after taken prisoner and put to death. The first general council was held here 19 June–25 Aug. 325, which adopted the *NICENE CREED* and condemned the Arians. It was attended by 318 bishops from divers parts, who settled both the doctrine of the Trinity and the time for observing Easter. An addition was made to the creed, 381, was rejected, 431 (when it was decreed unlawful to make further additions), but accepted, 451. When the Crusaders took Constantinople, and established a Latin empire there in 1204, the Greek emperors removed to Nice, and reigned there till 1261, when they returned to Constantinople, see *Eastern Empire*. Nice was taken by the Ottoman Turks in 1330.

Nice (N. Italy) was the seat of a colony from Massilia, now Marseilles, and formed part of the Roman empire. In the middle ages it was subject to Genoa, and

* William Walker was born in Tennessee, in the United States, where he became successively doctor, lawyer, and journalist, and afterwards gold-seeker in California, whence he was invited to Nicaragua by Castellón, with the promise of 52,000 acres of land, on condition of bringing with him a band of adventurers to sustain the revolutionary cause. Walker accepted the terms, and on 28 July landed at Realjo with 68 men. He increased his forces at Leon, and soon after attacked the town of Rivas, where he was repulsed with loss. He then joined col. Kinney, who had occupied and governed Grey Town, 6 Sept. On 13 Oct. Walker captured Granada by surprise when in a defenceless state, shot Mayorga, one of the ministers, and established a rule of terror. By intervention of the American consul he made peace with the general of the state army, Corral, but shot him on 7 Nov., on finding him corresponding with fugitives at Costa Rica. Walker at first was only general in chief; but on Rivas, whom he had made president, deserting him, he became sole dictator. On 14 May, 1856, his envoy Vigil was recognized by the president of the United States, whence also he obtained reinforcements during his retention of power. Costa Rica declared war against him, 28 Feb. 1856; the other states of Central America soon followed the example, and a sanguinary struggle ensued, lasting till May, 1857. On 25 Nov. 1856, Walker totally burned Granada, being unable to defend it, and removed the seat of government to Rivas. This place he surrendered to gen. Mora on 1 May, 1857, on the intervention of capt. Davis, of the *St. Mary's*, U. S. Himself, his staff, and 200 men were conveyed in that vessel to New Orleans, where they were received with great enthusiasm. On 25 Nov. 1857, he again invaded Nicaragua, landing at Punta Arenas with 400 men; but on 8 Dec. was compelled to surrender to capt. Paulding, U. S., and was conveyed to New York. He escaped punishment by *volle prosequa* (2 June, 1858); but capt. Paulding was tried for exceeding his orders, and blamed—yet excused by president Buchanan. On 5 Aug. 1860, Walker landed near Truxillo, Honduras, and took the fort on the 6th. On the 7th he proclaimed that he made war on the government, not on the people of Honduras. On being summoned to surrender his body by capt. Salmon, R. N., of the *Porcupine*, he refused and fled. He was pursued, caught, given up to the Honduras government, tried, and shot (12 Sept.). His followers were dismissed.

suffered from the frequent wars, being taken and retaken by the imperialists and French. It was taken by the Austrians under Melas, 1800; seized and annexed to France, 1792; restored to Sardinia in 1814. Nice was again annexed to France in virtue of the treaty of 24 March, 1860, the people having voted nearly unanimously for this change by universal suffrage. The French troops entered 1 April, and definite possession was taken 14 June following. Garibaldi, a native, vehemently protested against this annexation. Population of the province in 1857, 256,698.

Fire at the opera-house, and panic, about 100 killed, 20 March, 1881.

Nicias, PEACE OF, between Athens and Sparta for 50 years, 421 B.C., negotiated by that unfortunate Athenian general, who, with his colleague Demosthenes, was put to death after the disastrous termination of the expedition against Syracuse, 413 B.C.

Nickel, a white, ductile, malleable, magnetic metal, employed in the manufacture of German silver. Cronstedt, in 1751, discovered nickel in the mineral copper-nickel.

Nicobar Isles, Indian ocean, S. of Bay of Bengal, given up by Denmark and occupied by Great Britain to suppress piracy; announced June, 1869.

Nicolaitanes, a sect mentioned in Rev. ii. 6, 15, said to have sprung from Nicolas, one of the first seven deacons (Acts vi.), and to have advocated a community of wives, and to have denied the divinity of Christ.

Nicomedia, the metropolis of Bithynia, Asia Minor, N.W., founded by king Nicomedes I., 264 B.C., on the remains of Astacus; destroyed by an earthquake, A.D. 115; and restored by the emperor Adrian, 124. The Roman emperors frequently resided here during their eastern wars. Here Diocletian resigned the purple, 305; and Constantine died at his villa in its neighborhood, 337. It surrendered to the Seljukian Turks, 1078; and to Orchan and the Ottoman Turks in 1898.

Nicopolis, on the Danube, Bulgaria, founded by Trajan. Here was fought a battle between the allied Christian powers under Sigismund, king of Hungary, afterwards emperor, and the Turks under Bajazet; said to have been the first battle between the Turks and Christians; the latter were defeated, losing 20,000 slain, and Constantine died at his villa in its neighborhood, 337. It surrendered to the Seljukian Turks, 1078; and to Orchan and the Ottoman Turks in 1898.

Niello-work, believed to have been produced by rubbing a mixture of silver, lead, copper, sulphur, and borax into engravings on silver, etc., an art known to the ancients, was practised in the middle ages, and said to have given to Maso Finiguerra the idea of engraving upon copper, about 1460.

Niemen, or **Memel**, a river flowing into the Baltic, and separating Prussia from Russia. On a raft on this river the emperor Napoleon met Alexander of Russia, 22 June, 1807, and made peace with him and Prussia. He crossed the Niemen to invade Russia, 24 June, 1812, and recrossed with the remains of his army, 28 Dec. Near it the Poles defeated the Russians, 27 May, 1861.

Niger Expedition, see *Africa*, 1841.

Nightingale Fund. On 21 Oct. 1854, Miss Florence Nightingale left England with a staff of thirty-seven nurses, and arrived at Scutari 5 Nov. She rendered invaluable services to the army, and returned to London 8 Sept. 1856. In honor of this, a meeting was held at Willis's Rooms on 29 Nov. 1856 to raise funds to establish an institution for the training of nurses and other hospital attendants. Madame Jenny Lind-Goldschmidt sang at Exeter Hall on 11 March, 1856, and gave the proceeds (1872), to the fund. The subscriptions closed 24 April, 1857, amounting to 44,038*l.* The queen gave Miss Nightingale a valuable jewel.

Nigritia, see *Soudan*.

Nihilism, a popular name for the school of philosophy which believes nothing without physical evidence, renounces all forms of divine revelation, and gives nothing in their place.

Nihilists, ultra-reformers in Russia said to propose the destruction of all government and to begin society afresh. They became known and spread in 1872; their alleged leader, Zhyhareff. The government began to suppress them, Sept. 1875. One of the leaders, Michael Bakossin, died at Lugano, 1 July, 1876. They evidently possess wealth. For recent events, see *Russia*, 1877-81.

Nikolsburg (Moravia). Here were signed, 20 July, 1866, the preliminaries of a peace between Austria and Prussia.

Nikolsch, a strong Turkish fortress in Montenegro, many times besieged, having been left by the Turks with insufficient garrison, it was captured by Montenegro, 7, 8 Sept. 1877, causing great rejoicing.

Nil Darpan, see *India*, June, 1861.

Nile (Egypt). This great river rises in the Mountains of the Moon, in about ten degrees of N. lat., and in a known course of 1250 miles receives no tributary streams. The travels of Bruce were undertaken to discover the source of the Nile. He set out from England in June, 1768; on 14 Nov. 1770 discovered the source of the Blue Nile; and returned home in 1773. This river overflows regularly every year, from about 15 June to 17 Sept., when, having given fertility to the land, it begins to decrease. It must rise 16 cubits to insure that fertility. The first Nilometer (a pillar) was set up by Solyman the Caliph, 715. In 1823, the foundations of the Nile rose to 25 instead of 22, by which 20,000 people were drowned and immense property lost. Mr. Petherick set out early in 1861 to explore the country at the source of the Nile. For recent discoveries, see *Africa*, 1863. A bridge over the Nile (above 1800 feet) at Cairo was completed by a French company, Aug. 1872.

Nile, BATTLE OF THE (or *Aboukir*), 1 Aug. 1798, near Rosetta, between the French fleet under Brueys, and the British under sir Horatio Nelson. Nine of the French line-of-battle ships were taken, two were burned, and two escaped. The French ship *L'Orient*, with Brueys and 1000 men on board, blew up, and only 70 or 80 escaped. Nelson's exclamation upon commencing the battle was "Victory or Westminster Abbey!"

Nimeguen (Holland). Here was signed the treaty of peace between France and the United Provinces, 1678. The French were successful against the British under the duke of York, before Nimeguen, 28 Oct. 1794, were defeated by them, 3 Nov.; but gained the place, 6 Nov.

Nineteenth Century, a magazine open to writers of totally different opinions; first appeared March, 1877; editor, James Knowles.

Ninety-six, **SEVEN OF**. In May, 1781, gen. Greene commenced the siege of Fort Ninety-six, in Abbeville District, South Carolina, with less than a thousand regulars, and a few raw militia. The garrison was commanded by Lieut.-col. Cruger, a New York loyalist. The siege continued from 22 May until 18 June, when an unsuccessful attempt was made to take the works by storm. The siege was raised on the following evening, and the Americans retreated beyond the Saluda River. Greene lost 150 men during the siege.

Nineveh, the capital of the Assyrian empire (see *Assyria*), founded by Ashur about 2345 B.C. Nimrod reigned in Assyria, and named this city Nineveh, 2000 B.C.—*Abbi Ismael*. Jonah preached against Nineveh (about 862 B.C.), which was taken by Nebuchadnezzar, 606 B.C. The discoveries of Layard and others since 1843, in the neighborhood of Mosul, at Kouyunjik, the site of the ancient Nineveh, and other places, have in a

manner disinterred and re-peopled a city which for centuries had ceased to figure on the page of history. Botta commenced his explorations at Khorsabad in 1843, and published his great work, "Monuments de Ninive," 1849-50. In 1848 Mr. Layard published his "Nineveh and its Remains," and in 1853 his "Discoveries," in his second visit in 1849-50. Mr. Hornumel Rassam, in 1854, discovered an ancient palace. Mr. George Smith described his excavations and their results in 1873-4, in "Assyrian Discoveries," 1875. He died at Aleppo, 19 Aug. 1876: see *Assyria*. Mr. Rassam, appointed his successor, among other valuable discoveries at Balawat, nine miles N.E. of Nimroud, and at Koyunjik, etc., found a bronze monument with inscriptions recording the names, title, genealogy, and exploits of king Assur-nazir-pal (B.C. 885-860), builder of the palaces and temples of Kalakh, the capital of the middle Assyrian empire.

The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before us as distinct as those of a living people; and by help of the sculptures and their cuneiform inscriptions, the researches of the learned have increased the knowledge of Assyrian history. Among the sculptures that enrich the British Museum may be mentioned the winged bull and lion, and numerous hunting and battle pieces; and the bass-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nisroch (from *Nisr*, an eagle or hawk), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 710 B.C. (2 Kings xix. 37).

Niobium, a rare metal, discovered by Hatchett in columbite, a black earth, and named columbium, 1801. It was pronounced to be identical with tantalum by Wollaston; but was rediscovered by H. Rose in 1846, and named niobium.

Nirvana, see *Buddhism*.

Nisbet, or NESBIT (Northumberland). Here a battle was fought between the English and Scotch armies, the latter greatly disproportioned in strength to the former. Several thousands of the Scots were slain upon the field and in the pursuit, 7 May, 1402.

Nial Prius ("unless before"), words in a writ summoning a person to be tried at Westminster, *unless* the judges should come to hold their assizes in the place where he is. Judges sit in Middlesex by virtue of 18 Eliz. c. 12 (1576).

Nismes (Nîmes), S. France, was the flourishing Roman colony Nemausus. Its noble amphitheatre was injured by the English in 1417. The inhabitants embraced Protestantism, and suffered much persecution in consequence; and Nismes has frequently been the scene of religious and political contests. The treaty termed the Pacification of Nismes (14 July, 1629) gave religious toleration for a time to the Huguenots.

Nitre, see *Sulphate*.

Nitric Acid, a compound of nitrogen and oxygen, formerly called *aqua fortis*, first obtained in a separate state by Raymond Lully, an alchemist, about 1287; but we are indebted to Cavendish, Priestley, and Lavoisier for our present knowledge of its properties. H. Cavendish demonstrated the nature of this acid in 1785. *Nitrous acid* was discovered by Scheele about 1774. Nitrous gas was accidentally discovered by Dr. Hales. *Nitrous-oxide gas* (laughing-gas) was discovered by Dr. Priestley in 1776. The use of this gas as an anæsthetic began in America in 1864; at Paris, 1866; in London, 31 March, 1868, ingenious apparatus having been invented for its application.

Nitrogen, or AZOTE (from the Greek *α*, no, and *ζω* or *ζω*, I live), an irrepirable elementary gas, and an important element in food, discovered by Rutherford about 1772. Before 1777, Scheele separated the oxygen of the air from the nitrogen, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of these two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia so freely given off by decomposing animal and vegetable bodies.

Nitro-glycerine (also called NITROLEUM), an intensely explosive amber-like fluid, discovered by Sobrero

in 1847, is produced by adding glycerine (in successive small quantities) to a mixture of one part of nitric acid and two parts of sulphuric acid. Alfred Nobel, a Swede, first attempted its application as an explosive agent in 1864. It has caused several most disastrous accidents, with great loss of life. In attempting to bury some nitro-glycerine in the town moor at Newcastle-on-Tyne, 17 Dec. 1867, an explosion took place, and seven persons lost their lives, including Mr. Mawson, the sheriff, and Mr. Bryson, town surveyor; see *Dynamite*. Mr. Alfred Nobel's nitro-glycerine manufactory, near Stockholm, blown up—15 persons killed, many injured—10 June, 1868. An act prohibiting its importation for a time, and regulating its transmission, was passed in 1869; see *Explosives*.

Nizam, see *Hyderabad*.

Nobility. The Goths, after they had seized a part of Europe, rewarded their heroes with titles of honor to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, 1095. George Neville, duke of Bedford (son of John, marquess of Montague), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edw. IV., 1478. Noblemen's privileges were restrained in June, 1773; see *Lords*, and the various orders of the nobility.

In 1845 a statistical writer said that there were 600,000 nobles in Russia, 239,000 in Austria; in Spain (in 1780), 470,000; in France (before 1790), 360,000 (of whom 4120 were of the *ancienne noblesse*); in the United Kingdom, 1631 with transmissible titles (dukes to baronets).

Nobility of France preceded that of England. On 18 June, 1790, the National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquises, knights, barons, excellencies, abbots, and others be abolished; that all citizens take their family names; liveries and armorial bearings also to be abolished. The records of the nobility, 600 volumes, were burned at the foot of the statue of Louis XIV., 25 June, 1792. A new nobility was created by the emperor Napoleon I., 1808. The hereditary peerage was abolished 27 Dec. 1831; re-instituted by Napoleon III., 1862.

Noble, an English gold coin (value 6s. 8d.), first struck in the reign of Edward III., 1348 or 1344, said to have derived its name from the excellence of the metal of which it was composed.

Nocturne, a name given by John Field (who died 1837) to a new and very pleasing musical composition. He was followed very successfully by Chopin, who died 1849. The term was adopted by Mr. Whistler, the artist, for his night pieces, in which he began with line, form, and color, 1877-8.

Nominalists (or CONCEPTUALISTS), a scholastic sect, opposed to the Realists, maintain that general ideas have no existence outside our minds, and only exist by the names we give them. The founder of the sect, Jean Roscellin, a canon of Compiègne, was condemned by a council at Soissons, 1092, but the controversy was revived in the twelfth century. Among the Nominalists are reckoned Abelard, St. Thomas Aquinas (partially), Occam, Hobbes, Locke, Berkeley, and Dugald Stewart. The Realists assert that general ideas are real things with positive existence.

Nonconformists. The Protestants in England are divided into conformists and nonconformists, or churchmen and dissenters. The first place of meeting of the latter in England was established at Wandsworth, near London, 20 Nov. 1572. The name of nonconformists was taken by the Puritans when the Act of Uniformity came into operation on 24 Aug. 1602 (termed "Black Bartholomew's day"), when 2000 ministers of the established religion resigned, not choosing to con-

form to the statute passed "for the uniformity of public prayers and administration of the sacraments; see *Puritans and Dissenters*. The laws against them were relaxed by the Toleration act, 24 May, 1689.—The *Nonconformist* newspaper (edited by Mr. Edward Miall, since M.P.) first appeared 14 April, 1841. He died 29 April, 1881.

Nones, in the Roman calendar, were the fifth day of each month, excepting March, May, July, and October, when the nones fell on the seventh day.

Nonjurors considered James II. to have been unjustly deposed, and refused to swear allegiance to William III. in 1689. Among them were Sancroft, archbishop of Canterbury; Ken, bishop of Bath and Wells; and the bishops of Ely, Gloucester, Norwich, and Peterborough, and many of the clergy, who were deprived 1 Feb. 1691. Nonjurors were subjected to double taxation, and obliged to register their estates, May, 1723. They formed a separate communion, which existed till the beginning of the present century.

Non Nobis, Domine! ("Not unto us, O Lord!" etc., *Psa. cxv. 1*), a musical canon, sung as a grace at public feasts, was composed by W. Lirde in 1618.

Non-resistance Oath (containing a declaration that it is unlawful to take arms against the king upon any pretence whatever), enforced by the Corporation act, 1661, was repealed in 1719.

Nootka Sound (Vancouver's Island), discovered by capt. Cook in 1778, and settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs; but the Spaniards, in 1789, captured two English vessels and took possession of the settlement. The British ministry demanded reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

"No-popery Riots," see *Gordon*. The cry was revived against the Catholic Emancipation bill, 1829.

Nordlingen (Bavaria). Here the Swedes under count Horn were defeated by the Austrians, 27 Aug. 1634; and the Austrians and allies by Turenne in 1645.

Nore Mutiny, see *Mutinies*.

Norfolk Island (Pacific ocean), discovered in 1774, by capt. Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson under governor Phillip, in 1788, in Sydney bay, on the south side of the island. This was at one time the severest penal colony of Great Britain. The island was abandoned in 1809, but reoccupied as a penal settlement in 1825. The descendants of the mutineers of the *Bounty* were removed to it in June, 1856, from Pitcairn's Island (*which see*).

Normal Schools (from *norma*, a rule). One for the instruction of teachers established at Paris by a law, 30 Oct. 1794, opened 20 Jan. 1795, under the direction of La Place, La Harpe, Hatty, and other eminent men, was soon closed. Another, established by Napoleon in 1808, was closed in 1822. The plan was revived in 1826, and has been developed in England and other countries.

Normandy (N. France), part of Neustria, a kingdom founded by Clovis in 511 for his son Clotaire, which, after various changes, was united to France by Charles the Bald in 837. From the beginning of the ninth century it was continually devastated by the Scandinavians, termed Northmen or Normans, to purchase repose from whose irruptions Charles the Simple of France ceded the duchy to their leader Rollo, 905. Rollo, the first duke, held it as a fief of the crown of France, and several of his successors after him, until William,

the seventh duke, acquired England, in 1066. It remained a province of England till the reign of king John, 1204, when it was reunited to France. It was reconquered by Henry V., 1418, and held by England partially till 1450. The English still possess the islands on the coast, of which Jersey and Guernsey are the principal.

Northampton was burned by the Danes in 1010. Here Henry III. proposed to found a university in 1260, and held a parliament in 1269. On 10 July, 1460, a conflict took place between the duke of York and Henry VI. of England, in which the king was defeated, and made prisoner (the second time) after a sanguinary fight which took place in the meadows below the town. Northampton was ravaged by the plague in 1637. It was seized and fortified by the parliamentary forces in 1642. A fire nearly destroyed the town, 3 Sept. 1675. Riots here because Mr. C. Bradlaugh was not elected M.P., 6 Oct. 1874, were suppressed by the military.

Northeast and Northwest Passages. The attempt to discover a northwest passage was made by a Portuguese named Corte Real, about 1500. In 1585, a company was formed in London called the "Fellowship for the Discovery of the Northwest Passage." From 1743 to 1818 parliament offered 20,000*l*. for this discovery. In 1818 the reward was modified by proposing that 5000*l*. should be paid when either 110°, 120°, or 130° W. long. should be passed; one of which payments was made to sir E. Parry. For their labors in the voyages enumerated in the list below, Parry, Franklin, Ross, Back, and Richardson were knighted.

 The NORTHEAST PASSAGE from the Atlantic to the Pacific

4 Capt. M'Clure sailed in the *Investigator* in company with com. Collinson in the *Enterprise* in search of sir John Franklin, 20 Jan. 1850. On 6 Sept. he discovered high land, which he named Baring's land; on the 20th, other land, which he named after prince Albert; on the 30th the ship was frozen in. Entertaining a strong conviction that the waters in which the *Investigator* then lay communicated with Barrow's strait, he set out on 21 Oct., with a few men in his sledge, to test his views. On 26 Oct. he reached Point Russell (73° 31' N. lat., 114° 14' W. long.), where from an elevation of 600 feet he saw Parry or Melville sound beneath them. The strait connecting the Atlantic and Pacific oceans he named after the prince of Wales. The *Investigator* was the first ship which traversed the Polar sea from Behring's strait to Behring island. Intelligence of this discovery was brought to England by com. Inglefield, and the Admiralty chart was published 14 Oct. 1851. Capt. M'Clure returned to England, Sept. 1854. In 1855 5000*l*. were paid to capt. (afterwards sir Robert) M'Clure, and 5000*l*. were distributed among the officers and crew. On 30 Jan. 1855, the Admiralty notified that the Arctic medal would be given to all persons engaged in the expeditions from 1818 to 1855.

Norwich, *Bisnormic* or, originally East Anglia; the first bishop was Felix, a Burgundian, sent to convert the East Anglians about 630. The see was divided into two distinct bishoprics—Elmham, in Norfolk, and Dunwich, in Suffolk, about 673. Both sees suffered extremely from the Danish invasions, inasmuch that after the death of St. Humbert they lay vacant for a hundred years. At last the see of Elmham was revived, and Dunwich was united to it; but Arfastus removed the seat to Thetford, where it continued till Herbert Losinga removed it to Norwich 1094. This see has given to the church of Rome two saints; and to the nation five lord chancellors. It was valued in the king's books at 899*l*. 18*s*. 7*d*. per annum. Present income, 4500*l*.; see *Bishoprics*.

Notables, French assemblies of nobles, bishops, knights, and lawyers. An assembly of the notables was convened by the duke of Guise, 20 Aug. 1560, and by other statesmen. Calonne, the minister of Louis XVI., summoned one which met on 22 Feb. 1787, on account of the deranged state of the king's finances, and again in 1788, when he opened his plan; but as any reform militated too much against private interest to be adopted, Calonne was dismissed, and soon after retired to England. Louis having lost his confidential minister, De Vergennes, by death, called De Brienne, an ecclesiastic, to his councils. The notables were reassembled on 6 Nov. 1788. In the end, the states-general were convoked 5 Dec.; and from this assembly sprang the national assembly (*which see*). The notables were dismissed by the king, 12 Dec. 1788.—The *Spanish notables* assembled and met Napoleon (conformably with a decree issued by him commanding their attendance), at Bayonne, 25 May, 1808.

Novara (N.W. Italy). Near this town the Austrian marshal Radetzky totally defeated the king Charles Albert and the Sardinian army, 23 March, 1849. The contest began at 10 A.M., and lasted till late in the evening; the Austrians lost 396 killed, and had about 1850 wounded; the Sardinians lost between 3000 and 4000 men, 27 cannons, and 3000 prisoners. The king soon after abdicated in favor of his son Victor Emmanuel.

Nova Scotia (North America) was discovered by Cabot, 1497; visited by Verrazzani, 1524, and named Acadia; settled in 1622, by the Scotch under sir William Alexander, in the reign of James I. of England, from whom it received the name of Nova Scotia. Since its first settlement it has more than once changed proprietors, and was not confirmed to England till the peace of Utrecht, in 1713. It was taken in 1745 and 1758; but was again confirmed to England in 1763. Nova Scotia was divided into two provinces in 1784, and was erected into a bishopric in Aug. 1787. King's College, Windsor, was founded in 1788; see *Baronets*. Gold was found in Nova Scotia in 1861. By an act passed 29 March, 1867, Nova Scotia and New Brunswick were united with Canada for legislative purposes. On the agitation for secession Mr. John Bright presented a petition in the commons 15 May; his motion for a royal commission of inquiry negatived 16 June, 1868. The agitation soon subsided. Lieut.-governor, sir Charles H. Doyle, 1867. Joseph Howe died soon after his appointment, 1 June, 1873. Adams George Archibald, 1873.

Nuits, a small fortified town, near Dijon, in Burgundy, N.E. France, chartered in 1212; frequently captured and ravaged, specially in 1569, 1576, and 1636. It was taken by the Badenese under Von Werder, 18 Dec. 1870, after five hours' conflict, in which above 1000 French are said to have been killed and wounded, and 700 prisoners taken. The German loss was also heavy. A depot of arms and ammunition was gained by the victors.

Numantine War. The war between the Romans and the Celtiberians (Celts who possessed the country near the Iber, now the Ebro) began, 143 B.C., on account of the latter having given refuge to their allies the Sigidians, who had been defeated by the Romans. Numantia, an unprotected city, withstood a long siege, in which the army of Scipio Africanus, 60,000 men, was opposed by no more than 4000 men able to bear arms. The Numantines fed upon horse-flesh, and their own dead, and then drew lots to kill one another. At length they set fire to their houses, and destroyed themselves, so that not one remained to adorn the triumph of the conqueror, 133 B.C.

Numidia (N. Africa), the seat of the war of the Romans with Jugurtha, which began 111 B.C., and ended with his subjugation and captivity, 106. The last king, Juba, joined Cato and was killed at the battle of Thapsus, 46 B.C., when Numidia became a Roman province; see *Mauritania*.

Numismatics, the science of coins and medals, an important adjunct to the study of history. In this country Evelyn (1697), Addison (1726), and Pinkerton (1789),

published works on medals. Pellerin's "Recueil des Médailles," 9 vols. 4to (1762). Ruding's "Annals" is the great work on British coinage (new edition, 1840). The Numismatic Society in London was founded by Dr. John Lee in 1836. It publishes the *Numismatic Chronicle*. Mr. Yonge Akerman's "Numismatic Manual" (1840) is a useful introduction to the science. Foreign works are numerous.

Nuncio, an envoy from the pope of Rome to Catholic states. The pope deputed a nuncio to the Irish rebels in 1645. The arrival in London of a nuncio, and his admission to an audience by James II., July, 1687, is stated to have hastened the Revolution.

Nunnery. The first founded is said to have been that to which the sister of St. Anthony retired at the close of the third century. The first founded in France, near Poitiers, by St. Marcellina, sister to St. Martin, 360.—*Du Fresnoy*. The first in England was at Folkestone, in Kent, by Eadbald, or Edbald, king of Kent, 630.—*Dugdale*. See *Abbeys* and *Monachism*. The nuns were expelled from their convents in Germany, in July, 1785; in France, in Jan. 1790. In Feb. 1861, monastic establishments were abolished in Naples, compensation being made to the inmates. For memorable instances of the fortitude of nuns, see *Acre* and *Coldingham*.

Nuremberg, a free imperial German city in 1219. In 1522, the diet here demanded ecclesiastical reforms and a general council, and in 1532 secured religious liberty to the Protestants. It was annexed to Bavaria in 1805. Albert Dürer was born here in 1471.

Oak, styled the monarch of the woods, and an emblem of strength, virtue, constancy, and long life. That produced in England is considered to be the best calculated for ship-building, except the live-oak of the United States. In June, 403, the "*Synod of the Oak*" was held at Chalcedon. The constellation Robur Caroli, the oak of Charles, was named by Dr. Halley in 1676, in memory of the oak in which Charles II. saved himself from his pursuers, after the battle of Worcester, 3 Sept. 1651; see *Boscobel* and *Races*.

Oates's Plot. Titus Oates, at one time chaplain of a ship of war, was dismissed for immoral conduct, and became a lecturer in London. In conjunction with Dr. Tongue, he invented a plot against the Roman Catholics, who he asserted had conspired to assassinate Charles II., and extirpate the Protestant religion. He made it known 12 Aug. 1678, and in consequence about 18 Roman Catholics were accused, and, upon false testimony, convicted and executed; among them the aged viscount Stafford, 29 Dec. 1680. Oates was afterwards tried for perjury (in the reign of James II.), and, being found guilty, was fined, put in the pillory, publicly

whipped from Newgate to Tyburn, and sentenced to imprisonment for life, May, 1685. On the accession of William and Mary he was pardoned, and a pension of 3*l.* a week granted to him, 1689.

Oaths were taken by Abraham, B.C. 1892 (Gen. xxi. 24), and authorized (1491 B.C.) Exod. xxii. 11. The administration of an oath in judicial proceedings was introduced by the Saxons into England, 600.—*Rapin*. That administered to a judge was settled 1844.

Obelisk. (Greek *ὀβελός*, a spit, *μολαῖος*, a single stone.) The Egyptian symbol of the supreme God. The first mentioned in history was that of Rameses, king of Egypt, about 1485 B.C. The Arabians called them Pharaoh's needles, and the Egyptian priests the fingers of the sun. Several were erected at Rome; one was erected by the emperor Augustus in the Campus Martius, on the pavement of which was a horizontal dial that marked the hour, about 14 B.C. Of the obelisks brought to Rome by the emperors, several have been restored and set up by various popes. One was excavated and set up in the piazza of St. John Lateran, Rome, by Sixtus V. 1588.

In London are three English obelisks: first in Fleet street, at the top of Bridge street, erected to John Wilkes, lord mayor of London in 1775 (see *North Briton*); and immediately opposite to it, at the south end of Farrington street, stands another of granite to the memory of Robert Waltham, lord mayor in 1824, erected 25 June, 1833; the third at the south end of the Blackfriars road marks the distance of one mile and a fraction from Fleet street.

Egyptian Obelisks. 42 are known, some broken: 12 at Rome; 1, from Luxor, set up in the Place de la Concorde, Paris, Oct. 1836; 5 in England (2 British Museum; 1 Alnwick; 1 Soughton hall, 1 on Thames embankment).

The obelisks improperly named *Cleopatra's Needles* were erected by Thothmes III. at On (Heliopolis), about 1500 B.C. One was removed to Alexandria by Augustus, about 23 B.C. After being long imbedded in the shore, it was acquired for Great Britain by sir Ralph Abercromby, in 1801; but not removed. It was offered to the British government by Mehemet Ali, and again by the Khedive, 15 March, 1877.

Mr. Erasmus Wilson having offered to pay all expenses, Mr. John Dixon, the engineer, undertook to convey it to England. The vessel, *Cleopatra*, containing it sailed with the *Olga* 21 Sept. During a violent gale, the vessels were separated, 14, 15 Oct.; six lives were lost in a fruitless attempt to recover it. The *Cleopatra*, which was abandoned, was found by the *Fitzmaurice* (capt. Carter), and towed to Ferrol, whence it was towed by the *Anglia*, and arrived in London 20 Jan. 1878.

The salvage awarded was 2000*l.*, 6 April, 1878.

After much discussion, the Thames embankment (between Charing Cross and Waterloo bridges) was selected for its site, where, by much engineering skill, it was placed, 12 Sept. 1878.

The obelisk weighs 186 tons, 7 cwt., 2 stones, 11 lbs. Height, from base to point, 68 feet 5½ inches.

It was placed under the care of the metropolitan board of works by act passed 22 July, 1878.

The fellow of the obelisk of London (reared at Heliopolis about 1500 B.C. by Thothmes III., and removed to Alexandria about 23 B.C.) was offered to the United States in 1877.

The offer was confirmed, May, 1879. The work of lowering the shaft began by lieut. com. Gorringe, 6 Dec. 1879.

Steamer bearing the obelisk sailed from Alexandria, 12 June; arrived in New York, 20 July, 1880.

Obelisk landed on Staten Island, 6 Sept. 1880.

Towed to the city, 16 Sept. 1880.

Corner-stone of foundation laid in Central Park, 9 Oct. 1880. Obelisk raised into position, 22 June, 1881.

Oblivion. In 1660 was passed an act of "free general pardon, indemnity, and oblivion for all treasons and state offences" committed between 1 Jan. 1637 and

24 June, 1660. The regicides and certain Irish popish priests were excepted. A similar act was passed 20 May, 1690; see *Amnesty*.

Observance, FATHERS OF THE (or OBSERVANTS), a name given to certain members of the Franciscan order, about 1363, who voluntarily undertook the observance of their rule in its pristine rigor. This reformation was after a time enforced by the pope.

Observatories. The first is said to have been erected on the top of the temple of Belus, at Babylon. On the tomb of Osymandias, in Egypt, was another, and it contained a golden circle 200 feet in diameter; that at Benares was at least as ancient as these. The first in authentic history was at Alexandria, about 300 B.C., erected by Ptolemy Soter.—*Observatory*, a monthly review of astronomy, first appeared in 1877.

"**Ocean Monarch**," an American emigrant ship, left Liverpool, bound for Boston, 24 Aug. 1848, having nearly 400 persons on board. When within six miles of Great Orme's Head, Carnarvonshire, N. Wales, she took fire, and in a few hours was burned to the water's edge, and 178 persons perished.

The Brazilian steam frigate *Alfonso* happened to be out on a trade trip at the time, with the prince and princess de Joinville and the duke and duchess d'Anmale on board, who witnessed the catastrophe, and aided in rescuing and comforting the sufferers. The crews and passengers of the *Alfonso* and the yacht *Queen of the Ocean* saved 156 persons, and 62 others escaped by various means.

Oceana, an imaginary republic, described in a book written by James Harrington, dedicated to Oliver Cromwell, and published in 1656.

Octarch, the chief of the kings of the heptarchy, was called *Rex gentis Anglorum*. Hengist was the first octarch, 455, and Egbert the last, 800; see *Britain*. Some authors insist that the English heptarchy should have been called the *octarchy*.

October, the eighth month in the year of Romulus, as its name imports, and the tenth in the year of Numa, 713 B.C. October still retained its first name, although the senate ordered it to be called *Faustianus*, in honor of Faustina, wife of Antoninus the emperor; and Commodus called it *Inriectus* and *Domitianus*. October was sacred to Mars.

Octrois (from the low Latin *auctorium*, authority), a term applied to concessions from sovereigns, and to the taxes levied at the gates of towns in France on articles of food before entering the city. These octrois, of

ancient origin, were suppressed in 1791; re-established, 1797; and reorganized in 1816, 1842, and 1852. In 1859, the octrois of Paris produced above 54,000,000 francs. The Belgian government became very popular in July, 1860, by abolishing the octrois.

Odes are very ancient; among the Greeks they were extempore compositions sung in honor of the gods. Anacreon's odes were composed about 582; Pindar's, 498 or 446; and Horace's from 24 to 18, all B.C. Anciently odes were divided into strophe, antistrophe, and epode; see *Poets-laureate* and *Lyric Poetry*.

Odessa, a port on the Black Sea, built by the empress Catharine of Russia, 1784-92, after the peace of Jassy. In 1817 it was made a free port, since when its prosperity has rapidly increased. It was partially bombarded by the British, 21 April, 1854, in consequence of the Russian batteries having fired on a flag of truce, 6 April. On 12 May, the English frigate *Tiger* stranded here, and was destroyed by Russian artillery. The captain, Giffard, and many of his crew were killed, and the rest made prisoners.

Odometer (from the Greek *ὀδός*, way, and *μέτρον*, measure); see *Pedometer*.

Odontology (from the Greek *ὀδόντες*, teeth), the science of the teeth, may be said to have really begun with the researches of prof. Richard Owen, who in 1839 made the first definite announcement of the organic connection between the vascular and vital soft parts of the frame and the hard substance of a tooth. His comprehensive work "Odontography" (illustrated with beautiful plates) was published 1840-5. The Odontological Society was established 1856.

Odryssæ, a people of Thrace. Their king, Teres, retained his independence of the Persians, 508 B.C. Sitalces, his son, enlarged his dominions, and in 429 aided Amyntas against Perdiccas II. of Macedon with an army of 150,000 men. Sitalces, killed in battle with the Triballi, 424, was succeeded by Seuthæ, who reigned prosperously. Cotys, another king (382-353), disputed the possession of the Thracian Chersonesus with Athens. After nine or ten years' warfare, Philip II. of Macedon reduced the Odryssæ to tributaries, and founded Philipopolis and other colonies, 343. The Romans, after their conquest of Macedon, favored the Odryssæ, and in 42 their king, Sadales, bequeathed his territories to the Romans. The Odryssæ, turbulent subjects, and often chastised, were finally incorporated into the empire by Vespasian, about A.D. 70.

Odyli, the name given in 1845 by baron von Reichenbach to a so-called new "imponderable, or influence," said to be developed by magnets, crystals, the human body, heat, electricity, chemical action, and the whole material universe. The odylic force is said to give rise to luminous phenomena, visible to certain sensitive persons only. The baron's "Researches on Magnetism, etc., in Relation to the Vital Force," translated by Dr. Gregory, were published in 1850. Emanuel Swedenborg (died 1772) described similar phenomena.

Ohm's Law, for determining the quantity of the electro-motive force of the voltaic battery, was published in 1827. It is in conformity with the discovery that the earth may be employed as a conductor, thus saving the return wire in electric-telegraphy.

Oil was used for burning in lamps as early as the epoch of Abraham, about 1921 B.C. It was the custom of the Jews to anoint with oil persons appointed to high offices, as the priests and kings (Psa. cxxxiii. 2; 1 Sam. x. 1; xvi. 13). The fact that oil, if passed through red-hot iron pipes, will be resolved into a combustible gas, was long known to chemists; and after the process of lighting by coal-gas was made apparent, Messrs. Taylor and Martineau contrived apparatus for producing oil-gas on a large scale, 1815.

Old Bailey Sessions Court is held for the trial of criminals, and its jurisdiction comprehends the county of Middlesex as well as the city of London. It is held eight times in the year by the royal commission of oyer and terminer. The judges are the lord mayor, those aldermen who have passed the chair, the recorder, and the common sergeant, who are attended by both the sheriffs and one or more of the national judges. The court-house was built in 1778, and enlarged in 1808; see *Central Criminal Court*.

Old Believers, a Russian sect said to number about 12,000,000, founded by Nikon, a minister of the czar Alexis (1645-76). They profess to adhere to the old reading of the Slavonian sacred books, which have been superseded by the present Russian church. The czar Alexander II. granted liberty of worship to the sect in 1879.

Old Catholics, the name assumed in Germany by the members of the Roman Catholic church opposed to the dogma of papal infallibility, headed by prof. Dollinger of Munich. After three days' conference at Munich, Sept. 1871, they decided to set up independent worship, first-meeting in a church given them by the town council of Munich. The abbé Michaud began a similar movement in Paris in Feb. 1872. Dr. Dollinger preached in favor of union with the Church of England, March, 1872. Père Hyacinthe (Charles Loyson), president of the party at Rome, issued a programme respecting the Vatican decrees, recognizing ecclesiastical authorities, demanding reform, yet opposing schism, about 5 May, 1872. The bishops of Lincoln (Wordsworth) and Ely (Browne), and the dean of Westminster (Dr. Stanley), by invitation attended the conference at Cologne, and delivered addresses, 20-22 Sept. 1872. The Old Catholics elected their first bishop, Dr. Joseph Reinkens, 1 June, 1873, who was recognized by the emperor and other powers.

Olives are named in the earliest accounts of Egypt and Greece; and at Athens their cultivation was taught by Cecrops, 1556 B.C. They were first planted in Italy about 562 B.C. The olive has been cultivated in England since A.D. 1648; the Cape olive since 1730.

Olmütz, the ancient capital of Moravia. Here the emperor Ferdinand abdicated, on behalf of his nephew, Francis Joseph, 2 Dec. 1848; and here the latter promulgated a new constitution, 4 March, 1849. A conference was held here 29 Nov. 1850, under the czar Nicholas, when the difficulties between Austria and Prussia respecting the affairs of Hesse-Cassel were arranged.

Olténitza. A Turkish force having crossed the Danube, under Omar Pacha, established themselves at Olténitza, in spite of the vigorous attacks of the Russians, who were repulsed with loss, 2 and 3 Nov. 1853. On the 4th a desperate attempt to dislodge the Turks by gen. Danneberg with 9000 men, was defeated with great loss.

Olustee (Florida), *Battle of*, 20 Feb. 1864. Gen. Seymour was defeated by the confederates.

Olympiada, the era of the Greeks, dating from 1 July, 776 B.C., the year in which Choroebus was successful at the Olympic games. This era was reckoned by periods of four years, each period being called an Olympiad, and in marking a date the year and Olympiad were both mentioned. The computation of Olympiads ceased with the 305th, A.D. 440.

Olympic Games, so famous among the Greeks, said to have been instituted in honor of Jupiter by the Idæi Dactyli, 1453 B.C., or by Pelops, 1307 B.C., revived by Iphitus, 884 B.C., were held at the beginning of every fifth year, on the banks of the Alpheus, near Olympia, in the Peloponnesus (now the Morea), to exercise the youth in five kinds of combats, the conquerors being

highly honored. The prize contended for was a crown made of a kind of wild olive, appropriated to this use. The festival was abolished by Theodosius, A.D. 394. In 1858 M. Zappas, a wealthy Peloponnesian, gave funds to re-establish these games, under the auspices of the queen of Greece.—*OLYMPIC THEATRE*, London, opened 1806; see *Theatres*.

Olympieium (near Peleponnesus), the great temple of Jupiter erected by Libon of Elis, at the charge of the Eleans, after their conquest of the country, 572-472 B.C. For this temple Philias made the colossal statue of the god, in gold and ivory, 437-433 B.C.

The German explorations by Messrs. Hirschfeld and Böttcher, planned by prof. Ernst Curtius, the historian, began in Oct. 1875. Torsoes and other relics were found. Above 100 objects in marble, many coins, bronzes, inscriptions, etc., found, 1875-8. Explorations closed, Nov. 1880.

Olynthus, a city (N. Greece) subdued in war by Sparta, in 382-379 B.C. It resisted Philip of Macedon, 350 B.C., by whom it was destroyed, 347. Demosthenes delivered three orations on its behalf, 349.

Omens, see *Augury*. Amphictyon was the first who is recorded as having drawn prognostications from omens, 1497 B.C. Alexander the Great and Mithridates the Great are said to have studied omens. At the birth of the latter, 131 B.C., there were seen for seventy days together two splendid comets; and this omen, we are told, directed all the actions of Mithridates throughout his life.—*Justin*.

Omniades, a dynasty of Mahometan caliphs, beginning with Moawiyah, of whom fourteen reigned in Arabia, 661-750; and eighteen at Cordova, in Spain, 755-1031.

Omnibus (Latin *omnibus*, "for all"). The idea of such conveyances is ascribed to Pascal, about 1662, when similar carriages were started, but soon discontinued. They were revived in Paris about 11 April, 1828, and introduced into London by a coach-proprietor named Shillibeer. The first omnibus started from Paddington to the Bank of England on Saturday, 4 July, 1829. Regulations were made respecting omnibuses by 16 & 17 Vict. c. 33 (1853); see *Cubriolets* and *Hackney-coaches*. The London Omnibus Company was established in Jan. 1856. The saloon omnibuses ran in 1857-60. In Sept. 1865, it was stated that there were then running, about 620 omnibuses belonging to the General Omnibus Company, and 450 belonging to private proprietors; in 1867, about 1050 omnibuses, with 13,000 drivers and conductors.—*Sir R. Mayne*. In 1873 about 1400 omnibuses. Dividend, Aug. 1873, 12½ per cent.—*Omnibus bill*, one which deals with many topics.

Omnimeter, a new surveying apparatus (combining the theodolite and level, and comprising a telescope and microscope), invented by Eckhold, a German engineer, to supersede chain measuring; announced Sept. 1869.

"Oneida," collision with the *Bombay*; see *United States*, 1870.

Opéra Comique, a new theatre, 299 Strand; opened 29 Oct. 1870, by Mlle. Déjazet and a French company. The French *opéra comique* began 1715.

Opera-house, **THE ITALIAN**, or **QUEEN'S**, or (since 1837) **HER MAJESTY'S THEATRE**. The original building is generally supposed to have been constructed by sir John Vanbrugh, though Mr. Pennant attributes it to sir Christopher Wren. It was built as "the Queen's (afterwards changed to King's) theatre;" opened 9 April, 1705; and burned down 17 June, 1789. The foundation of the new theatre was laid 3 April, 1790; and the house was opened 22 Sept. 1791, on an improved plan; a new exterior was erected in 1820, from designs by Mr. Nash. This theatre was totally destroyed by fire (cause unknown) on the night of 6-7 Dec. 1867. The loss of the lessee, Mr. Mapleson, was about 12,000*l.*, and that of Mlle. Titiens (valuable jewels and dresses) was valued at 2000*l.*; rebuilt, but internal arrangements not completed. Moody and Sankey's revival meetings were held here, 12 April-31 May, 1875. The new house was opened for Italian opera by Mr. Mapleson, 28 April, 1877; see *Theatres*.—**THE ENGLISH OPERA** (or **LYCEUM**) was opened 15 June, 1816. It was entirely destroyed by fire 16 Feb. 1830. The new English Opera-house, or **LYCEUM**, was erected from designs by Mr. S. Beazley, and opened in July, 1834; see *Theatres* and *National Opera-house*.

Operas. Adam de la Hail, a Trouvère, surnamed "le Bossu d'Arras," born in 1240, is, as far as has yet been ascertained, the composer of the first comic opera, *Li Gieus* (*Le Jeu de Robin et de Marion*). The Italian opera began with the *Il Satiro* of Cavaliere, and the *Infue* of Rinuccini, with music by Peri, about 1590. Their *Euridyce* was represented at Florence, 1600, on the marriage of Marie de Médicis with Henry IV. of France. *L'Orfeo*, *Favola in Musica*, composed by Monteverde, was performed in 1607, and is supposed to have been the first opera that was ever published. About 1669 the abbot Perrin obtained a grant from Louis XIV. to set up an opera in Paris, where, in 1672, was acted *Pomona*.

Scarlatti produced 108 operas, 1680 et seq.; followed by Stradella, Lulli, and other composers. Purcell produced *Dido* and *Æneas*, 1677; and many others. Handel's *Rinaldo* was performed at the Haymarket; he successfully broke through previous restrictions, 24 Feb. 1711. Pepusch's *Beggar's Opera*, 1728. C. W. Gluck introduced a new style with reforms in his *Orfeo ed Euridyce*, 1762. Arne's *Artaxerxes*, 1762. J. H. Hesse produced many operas, chiefly at Dresden, 1731-63. N. Logroscino developed the opera buffa, died, 1763. Mozart's *Le Nozze di Figaro*, 1786; *Die Zauberflöte*, 1786; *Don Giovanni*, 1787; *La Clemenza di Tito*, 1791. Cimarosa's *Il Matrimonio Segreto*, etc., 1792. Storace's *Waterman*, etc., 1788-96. Cherubini's *Loisinka*, 1791; *Anacreon*, 1803. Beethoven's *Fidelio*, 1805. Bishop's *Rosina*, etc., 1782-1807.
